PART I

Macro-Fiscal Perspectives

01

Fiscal Policy,
Strategy and Challenges

1.1 Overview

Sri Lanka experienced a deep, complex and unprecedented economic crisis in 2022. The crisis sent shock waves across the entire nation and the impact of it was felt by all strata of the society, mainly by the poor and the vulnerable. The effects of the crisis were reflected in high double-digit inflation, severe government cash flow constraints, significant currency depreciation, depletion of foreign exchange reserves to a negligible level, and the resultant shortage of essential goods, including fuel, pharmaceuticals, raw materials, and some food items as well as prolonged power cuts. This translated into severe economic hardships for the people and resulted in social unrest and political upheaval. However, the headwinds from the crisis began to abate towards the end of the year due to the corrective measures taken by the government through various reforms and policy interventions.

The economic crisis had been a long time in the making. Sri Lanka has been living beyond its means for a prolonged period resulting in twin deficits in the Government budget and the current account of the balance of payments. Persistent fiscal deficits due to low revenue performance and relatively high and rigid recurrent expenditure coupled with sub-optimal efficiency of public investment, resulted in high financing requirements leading to unsustainable levels of debt. Parallel to the fiscal imbalances, Sri Lanka has been experiencing chronic current account deficits in the balance of payments where foreign currency inflows are significantly outpaced by the outflows.

Figure 1.1 | Revenue, Expenditure and Budget Deficit (% of GDP)

Source : Department of Fiscal Policy

Figure 1.2 | Trade Balance and Current Account Balance (% of GDP)

Source : Central Bank of Sri Lanka

Long standing vulnerabilities in the economy were exposed due to ill-timed policy choices and exogenous shocks including the COVID-19 pandemic and the Russia-Ukraine conflict. Significant cuts in direct and indirect taxes and weakening growth led to severe cash flow constraints with Government revenue being grossly inadequate to incur even basic expenditures. Having lost the access to conventional international financial markets, the budget deficit was mainly financed through the borrowings from the Central Bank of Sri Lanka. Further, the fixing of the exchange rate from April 2021 and continued servicing of external debt in spite of losing the access to the international capital markets due to rating downgrades, led to the rapid depletion of usable international reserves. This compelled to an acute foreign currency shortage resulting in the shortage of essential imported goods, pharmaceuticals and inputs for economic activity as well as long power cuts that was particularly experienced since early 2022. Amidst these developments, the Government announced a debt standstill in April 2022, specifically for foreign bilateral and commercial debt, with virtually depleted usable official foreign exchange reserves and in an environment where there was no possibility to make foreign debt service payments.

Inflation increased significantly, peaking at around 70 percent by September 2022 due to the significant depreciation of the exchange rate since early March 2022, global price shocks, domestic supply shortages and the high monetary financing of the Government budget, particularly in 2021.

In April, there were changes in the Government administration after the significant social and political upheaval by March 2022 and the

Government commenced discussions with the International Monetary Fund (IMF) in line with the request it made for an Extended Fund Facility (EFF) in mid-March 2022. Unlike in the past, debt restructuring was also a prerequisite to obtain the assistance from the IMF as Sri Lanka's debt had already been assessed as unsustainable by the IMF.

The Government undertook several reform measures to restore economic stability. From May 2022, tax reforms were initiated including the increase in VAT rates and reduced tax free thresholds, increased telecommunications levy, and amendments to income taxes including corporate and personal income tax rates. At the same time, there were concerted efforts to control government expenditure with a series of circulars issued to restrict spending on non-urgent spending. Due to aggressive revenue measures and expenditure rationalization efforts, the primary deficit as a percentage of GDP reduced to 3.7 percent in 2022 from 5.7 percent in 2021, surpassing the primary deficit target of 4.0 percent of GDP under the IMF-EFF programme. Furthermore, a primary surplus of Rs. 48.3 billion was achieved over the set primary deficit target of Rs. 56 billion. In parallel, utility prices were increased to reflect costs, particularly fuel and electricity. The Central Bank also tightened monetary policy, as a part of the comprehensive effort to restore macroeconomic stability.

A key priority of the Government was to ensure the restoration of liquidity in forex markets to enable sufficient forex to finance a regular supply of essential imports. In addition to the demand management efforts outlined above, the Government also implemented temporary restrictions on non-essential imports, margin requirements, and restrictions on certain forms of payments such as open account payments. These measures along with the gradual restoration of confidence resulted in increased foreign exchange inflows through formal channels which improved foreign exchange liquidity in the banking system and the gradual restoration of availability of imports. Through the course of the year, queues for gas and fuel were eliminated and power outages gradually reduced.

Sri Lanka's key bilateral and multilateral development partners played a crucial role in facing the crisis by providing timely financial assistance and re-purposing the funds earmarked for long term projects to finance essential imports such as fuel, fertiliser and pharmaceuticals and to support social protection requirements. The restoration of fertiliser supply was particularly important given the high levels of food inflation and potential food insecurity due to the rise of global food prices associated with the Russia-Ukraine conflict. With fertiliser supply being restored, it was possible to ensure an improved harvest by early 2023 and food inflation has reduced dramatically as a result.

The support of multilateral financing institutions was particularly important at a time where there was no foreign financing available to fund the budget, resulting in significant cash flow pressure for the Government. Given the excessive reliance on domestic financing, a large component of this has to be provided by the Central Bank in the form of inflationary monetary financing. A key priority of the Government has been to improve fiscal performance through revenue based fiscal consolidation efforts so as to eliminate the need for monetary financing. In fact, with the proposed new Central Bank Bill monetary financing will be prohibited by law. However, given the legacy rigidities in Government expenditure, weak Government revenue, high domestic interest rates, lack of foreign financing, and volatile Government securities auctions, the phasing out of Government financing creates significant pressure on Government cash flow management.

The combined impacts of the economic crisis and the challenges associated with the reform programme have created significant economic stress on the entire population but particularly the poor and vulnerable groups. To address this, the Government immediately increased the allocations of social protection spending for vulnerable communities supported by the financing of development partners. Furthermore, the existing targeting mechanisms for social protection have inherent weaknesses and are characterized by significant inclusion and exclusion errors. To address this, the Government undertook a major reform of

the welfare delivery system with the support of the World Bank. A new beneficiary selection mechanism based on objective and transparent criteria to identify the poor has been developed and welfare benefits will be distributed based on this new criteria effective from July 1st 2023.

It was also necessary to ensure the stability of the financial system considering the volatility created by the economic crisis and debt restructuring process. Towards this end, the Government and Central Bank have made it a priority to ensure the stability of the financial system in all measures relating to debt restructuring and economic stabilisation. The Central Bank took early steps to assess banking asset quality, capitalization, and liquidity positions. Proactive measures will be put in place to ensure capitalization and liquidity remain above mandatory levels and that the financial system remains well positioned to support the economic recovery.

Whilst the immediate focus is on restoring economic stability, the Government is also cognizant of the need to set the foundation for economic growth. Towards this end, numerous reforms are being put in place to address inefficiencies in factor markets including land,

labour, and capital. Enhancing female labour force participation, amending archaic labour laws, freeing up land for investment, and restructuring state owned enterprises are just some of the broad reform measures. Whilst fiscal consolidation is a priority, the Government will prioritise public investment in education, health, public transport, and digitalisation.

Based on the reform agenda described above, the Government reached a Staff Level Agreement with the IMF in September 2022. With the financial assurances received from the bilateral creditors, the IMF Board approved a 48-month extended arrangement under the EFF of SDR 2.286 billion (about USD 3 billion) to support Sri Lanka's economic policies and reforms on March 20, 2023. The approval of the EFF programme was an important step in the efforts to overcome the economic crisis as it helped to improve confidence in the economy while supporting efforts to obtain financing from other international financial institutions. The economy is beginning to see the benefits of these reform initiatives as inflation is stabilizing, the currency is appreciating, and economic activity is gradually recovering. However, it is essential that the country continued on this reform paths, and any deviation risks a return to the turbulent conditions experienced less than a year ago.

Box 1.1 | The 2022 Economic Crisis – Lessons Learned and Way Forward

In 2022, Sri Lanka faced its worst economic crisis since independence which taught a number of critical lessons on economic management. It has also provided an important opportunity for the country to revisit its economic model that has been followed for decades. The crisis shows that there is no room for reliance on populist and unsustainable policies. It has clearly shown the dangers of over reliance on politically and ideologically motivated decisions as opposed to evidence-based decision-making with objective judgment. Unfortunately, Sri Lanka's economic crisis is now being widely pointed to as a textbook case of how an economy should not be managed, given its severity and the detrimental effects it had on the economy and the broader society. Therefore, it is timely to revisit Sri Lanka's economic model and overall economic management strategy as well as political economy issues appropriate to face the existing economic climate and new realities. The crisis also presents a unique opportunity to implement much-needed but long-delayed reforms to lay the foundation for a strong economy with improved living standards in the future. The Government has provided the Roadmap for this in declaring the target to become an advanced economy by 2048.

The present crisis reflects an accumulation of delayed reform over many years, culminating in more recent ill-timed policy choices. Fiscal and monetary policy that favoured consumption over savings leading to excess import demand, anti-export bias in trade regimes with an over reliance on protectionist trade policy, failure to attract foreign investments due to a lack of a sustainable and credible investment environment, focus on investments in the non-tradable sector, an excessive role of the state in commercial activity and politicization of policy issues such as privatisation, overreliance on the public sector in providing employment, mispricing of key utilities such as energy, reluctance to implement necessary but perhaps unpopular reforms in a timely and consistent manner, and stop-go type policies under the previous IMF programmes, are among the key areas of the protracted policy inadequacy.

The adverse economic situation that had been created by early 2022, mainly due to the ill-timed policy choices stemming from serious governance lapses and lack of proactiveness led to the worst economic crisis experienced in post-independence history. The economy had fully exhausted its buffers by early 2022 as it was affected by a myriad of vulnerabilities that emanated from both global and domestic sources. The extreme fuel and cooking gas shortages, long power outages, significant currency depreciation, near hyperinflation situation, and shortage of other essential items including medicines, due largely to a shortage of foreign exchange, are testimony to this. Monetary financing reached exceptionally high levels without any policy effort to address the underlying causes of the unfavourable fiscal situation. The country's usable foreign exchange reserves declined to an almost negligible level with no actionable steps to avoid the crisis or communicate the extent of the crisis to the general public until the shortages of essential imported items reached a critical level leading to public protests. Attempts to obtain some foreign assistance as a last resort were too little too late and proved to be unsuccessful. Considering the unfavourable trends, particularly since mid-2021, had the corrective economic policy measures been taken well in advance, including seeking the assistance of the International Monetary Fund (IMF), the situation could have been managed better and the worst outcomes of the crisis could have been mitigated. In fact, there were numerous forecasts and debates on the potential economic crisis, both officially and publicly, which went ignored until it was too late. The failure to adopt a more inclusive and transparent economic policy structure is another important learning from this crisis. The ultimate result of this economic mismanagement was that the entire population of the country had to go through unprecedented difficulties, including the loss of several lives due to long queues for essential items, and millions of people entering poverty and vulnerable economic status.

Box 1.1 | The 2022 Economic Crisis – Lessons Learned and Way Forward contd...

Hence, it is important that all stakeholders understand the underlying causes of Sri Lanka's economic crisis and every effort must be made to ensure right decision making models are followed in the future to avoid another crisis in the future. The crisis also raises important concerns about responsible economic management, particularly the fiscal and monetary affairs of the country, requiring appropriate accountability mechanisms to be put in place.

As Sri Lanka moved towards the brink of economic catastrophe following the above developments, social upheaval erupted by early April 2022 and significant changes took place in the administration. The key priority was to provide essential items, including fuel, cooking gas, and other essentials such as pharmaceuticals. After a series of negotiations, the Government came to a staff level agreement with the IMF while commencing the debt restructuring process to obtain financing assurances. The reform programme agreed upon between the Government and IMF entailed a series of adjustments, particularly on fiscal measures, utility prices, and price stability. With the strong support received from key creditors by financial assurances, the IMF programme was approved by its Executive Board on 20 March 2023. This four year USD 3 billion Extended Fund Facility (EFF) programme expects to address the twin imbalances of Sri Lanka's economy, the fiscal deficit and the current account deficit in the balance of payments. The ambitious EFF program is envisaged to restore macroeconomic stability and debt sustainability, to set the foundation for sustainable and equitable economic growth. The EFF programme has a value beyond the USD 3 billion financing as it involves additional financing from other IFIs, and more importantly it anchors credibility in Sri Lanka's economic reform programme which is directly linked to addressing deep rooted economic issues in the country.

With the economic policies and measures implemented since the second quarter of 2022, the economy has shown signs of stabilization. The restoration of the supply of essential items, along with tough but essential policy measures, including the revisions in the tax structure, strong expenditure management initiatives, monetary policy tightening and allowing the exchange rate to be determined based on the market conditions and supply side improvements have helped to achieve this favourable development. Nevertheless, continuous and focused attempts, particularly on the fiscal policy front, are essential to entrench stability and to sustain this improvement. The improved revenue generation has become the key to addressing fiscal issues given the structural limitations in the expenditure side of the budget. With the recent revision of tax rates, efforts are being intensified to widen the tax base and implement a system to efficiently collect taxes. It is critical for Sri Lanka to efficiently manage its expenses, considering the limited fiscal space available in the current context. This involves prioritizing spending on essential services such as healthcare, education, and critical infrastructure while cutting back on non-essential expenses. There is no room for ostentation given the serious issues in the fiscal sector and hence managing public finances with utmost care and with strong discipline has become more important than ever. Fiscal discipline is particularly important given that funds are provided at a very high cost (of around 25 percent) considering the limitations in foreign financing. The ongoing reforms of the State Owned Enterprises (SOEs) are also a part of this reform process to prepare the country to face unfolding realities and reduce the burden on the Treasury and the general public.

Box 1.1 | The 2022 Economic Crisis – Lessons Learned and Way Forward contd...

Looking beyond the economic stabilization and debt restructuring strategy, it is important to take this crisis as an opportunity to transform the economy, and to face the complex and multifaceted demands forged by rapid digitalization, automation, artificial intelligence, and adverse developments such as climate change and population ageing. While the IMF programme will help reestablish economic stability, it will not be a panacea for all the ills faced by the country. Hence, policies that would go beyond the IMF-EFF programme are essential. The new policies that are to be presented in the near future will include reforms for the modernization of agriculture, education, health services, public services, international relations and defence, factor market reforms (labour laws, land laws, and new laws and institutions to promote investment), greater international economic integration (promotion of external trade, tourism and investment), SOEs reforms (new laws for SOE restructuring and Public Private Partnership (PPP) programme), institutional and legal reforms, SME development and digitalization. Measures will be put in place to improve trade integration and to better align with global trends in manufacturing, such as value chain integration. In this process, special attention will be paid to efficient financial control, anti-corruption measures, improved governance and adherence to the rule of law for the country. These are policy reforms that need to be implemented irrespective of the implementation of an IMF programme. These reforms will be submitted to Parliament for debate and approval, where necessary.

The ongoing reforms to improve competitiveness, maintain macro-fiscal stability and strengthen institutions will pave the way for robust economic growth, job creation and poverty reduction. Accordingly, based on the features indicated above, a highly competitive, export oriented and environmentally friendly new economic model will be founded by giving priority to equitable, sustainable initiatives and digitalization. It is expected to bring about a high, sustainable and job-rich growth trajectory in the medium to long term by opening up the economy for enhanced exports and private investments. This will be further strengthened with the expected enhanced economic integration with South and East Asia, Regional Comprehensive Economic Partnership Agreement (RCEP) and the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) in general and larger trading partners in particular. Specific attention will be paid to benefitting from the growth in Asia in the decades to come.

Continuous efforts are essential to consolidate stability while implementing measures to address structural bottlenecks that hinder the economic growth process of the country as indicated above. The completion of the debt restructuring process will provide additional impetus to undertake these difficult efforts. At the same time, it is critically important to understand that any attempt to change the direction of the economy without a proper, convincing and implementable alternative, and merely based on politically motivated rhetoric will only deteriorate the situation and create further distresses for the already weak economy. Hence, the country needs to successfully pursue the intended fundamental framework of economic policies by learning from past ill-timed policy choices for a more sustained recovery. At the same time, a new political framework that addresses the requirement of the commitment to facilitate economic management and reconciliation among the major ethnic groups in the country, leading to a truly collective Sri Lankan identity, is also needed to ensure the success and sustainability of the reform agenda aimed at a high growth trajectory, going forward.

1.2 Economic Conditions of 2022

Amidst the pressures emanating from the economic crisis, Sri Lankan economy contracted by 7.8 percent in 2022 on a year-on-year basis, which is the highest economic contraction ever recorded in the country in its post-independence history. Accordingly, all three sectors of the economy contracted. The Agriculture sector contracted by 4.6 percent owing to the decline in the growing of rice and vegetables, marine fishing, and animal production stemming from the lack of fertilizer, fuel shortages, shortages of animal feed, and surge in cost of raw materials. The Industry sector experienced a major contraction of 16.0 percent that was led by contractions in mining and quarrying activities, construction, and manufacturing. This is attributable to the interrupted power supply, shortage of key raw materials due to the lack of foreign exchange liquidity, high input prices, and low demand stemming from deterioration in purchasing power. The Services sector also contracted by 2.0 percent with significant contractions recorded in wholesale and retail trade, financial services, and real estate activities.

Figure 1.3 | Quarterly GDP Growth Rate

Source : Department of Census and Statistics

However, towards the end of the year, the Government was able to address grave supply-side constraints such as the unavailability of fuel through demand management under the introduction of a QR code mechanism, and introducing cost-reflective pricing. Uninterrupted supply of cooking gas was also restored with support from international partners who repurposed funding pipelines to finance urgent essential import needs. The availability of fuel was ensured due to the specific support received as Line of Credit. In addition, humanitarian support was received from a number of countries. Availability of essential imports such as raw materials was also

improved towards the latter part of the year with policy interventions taken to prioritize essential imports to minimize foreign exchange outflows.

In 2022, inflation increased to historically high levels, with a sharp acceleration of price levels between March and September. Inflation as measured by Colombo Consumer Price Index (CCPI, 2013=100) increased from 18.7 percent in March 2022 up to 69.8 percent in September 2022 on a year-on-year basis. As a measure to curb high inflation, policy rates were increased by 700 basis points in April 2022, by 100 basis points in July 2022, and further by 100 basis points in March 2023 to 15.50–16.50 percent. Reflecting the considerable tightening of monetary policy and fiscal policy measures, inflation levels decelerated from September 2022 until the end of the year with 57.2 percent recorded in December 2022. By May 2023, inflation as measured by the CCPI (2021=100) decelerated to 25.2 percent.

Figure 1.4 | Monthly Movements of Inflation - Colombo Consumer Price Index

Source : Department of Census and Statistics

Note: 2020 January-2023 January based on CCPI (2013=100) and 2023 February-May based on CCPI (2021=100)

The external sector underwent a tumultuous period in 2022 with significant strains on the Balance of Payments (BOP), severely depleted usable foreign exchange reserves, and significant depreciation of the currency. The fiscal and monetary policy tightening measures coupled with temporary import restrictions and cost-reflective utility pricing resulted in the contraction of the trade deficit and enabled an improvement in the current account balance supported by improved remittances and earnings from tourism.

The trade deficit narrowed to USD 5.2 billion in 2022 from USD 8.1 billion recorded in 2021. Sri Lankan exports grew significantly in 2022 to USD 13.1 billion from USD 12.5 billion in 2021 benefiting largely from the growth in industrial exports such as apparel, whereas imports plummeted to USD 18.3 billion in 2022 from USD 20.6 billion in 2021. A surplus was recorded in trade in services with the increase in earnings from tourism to USD 1,136 million in 2022 with 719,978 tourist arrivals from USD 507 million with 194,495 tourist arrivals recorded in 2021 marking a 124.2 percent increase. However, workers' remittances have declined by 31.0 percent to USD 3,789 million in 2022 from USD 5,491 million in 2021. However, there was a notable recovery of remittances in the latter part of 2022 and continuing in 2023.

Figure 1.5 | Developments in the Trade Balance

Source : Central Bank of Sri Lanka

Gross Official Reserves (GOR) significantly reduced by December 2022 to USD 1.9 billion (including the swap facility from the People's Bank of China, equivalent to around USD 1.4 billion, which is subject to conditions of usability) compared to USD 3.1 billion at the end December 2021. The decline in the GOR can be attributable to foreign currency debt service payments in early 2022 prior to the announcement of the suspension of servicing selected external debt by the Government on April 12, 2022, and provision of foreign exchange liquidity on a net basis to facilitate essential imports by the Central Bank of Sri Lanka.

Figure 1.6 | Gross Official Reserves

Source : Central Bank of Sri Lanka

The historically largest depreciation of the Sri Lanka Rupee was recorded in the first half of 2022 as the Rupee depreciated by 41.4 percent against the US Dollar by the end of April 2022 from the range of Rs. 200–203 per US dollar during early 2022. However, the rupee stabilized around the guidance band introduced in May 2022 and only recorded a marginal depreciation until the end of December 2022. In addition, a notable appreciation of the Sri Lankan Rupee was recorded in early March 2023 with the lowering of mandatory forex sales requirements from the conversion of export proceeds and workers' remittances, steady inflows to the services sector, increased inflow of workers' remittances and financial flows to portfolio investments and increase of market confidence with the finalization of the IMF-EFF arrangement.

Figure 1.7 | Exchange Rate Movements

Source : Central Bank of Sri Lanka

1.3 Fiscal Performance

Government fiscal operations were severely constrained by early 2022. However, with the introduction of several tax policy measures including the introduction of Surcharge Tax which was levied as a one-off tax, the increase of VAT rate on Financial Services from 15 percent to 18 percent effective from January 2022, the increase of general VAT rate from 8 to 12 percent effective from June 1, 2022 and further to 15 percent effective from September 1, 2022, imposition of Social Security Contribution Levy effective from October 1, 2022 coupled with the impact on revenue from high inflation and depreciation, the total revenue and grants increased by 37.5 percent in 2022 to Rs. 2,012.6 billion from Rs. 1,463.8 billion in 2021. This increase was driven by a significant increase of revenue from income taxes by 76.8 percent to Rs. 534.0 billion in 2022 compared to 2021 with revenue receipts of Rs. 120.7 billion from the Surcharge Tax. Revenue from taxes on goods and services increased by 35.6 percent to Rs. 876.0 billion, whereas taxes on external trade yielded a revenue of Rs. 341.1 billion which marks a decline of 2.5 percent from Rs. 349.8 billion recorded in 2021. Non-tax revenue amounted to Rs. 228.0 billion in 2022, while Rs. 33.4 billion was received as grants.

Figure 1.8 | Government Revenue (% of GDP)

Source : Department of Fiscal Policy

Figure 1.9 | Major Components of Tax Revenue (% of GDP)

Source : Department of Fiscal Policy

Government expenditure also increased by 27.0 percent Rs. 4,472.6 billion in 2022 compared to Rs. 3,521.7 billion recorded in 2021. As annual average inflation at nearly 50 percent outpaced growth in expenditure, Government expenditure was significantly curtailed in real terms. Recurrent expenditure increased by 28.1 percent to Rs. 3,519.6 billion in 2022 from Rs. 2,747.5 billion in 2021. This was primarily led by the increase in interest payments by 49.3 percent to Rs. 1,565.2 billion from Rs. 1,048.4 billion. Expenditure on subsidies and transfers increased by 19.1 percent to Rs. 815.4 billion in 2022 from Rs. 684.5 billion in 2021 due to increased welfare payments granted in light of the economic hardships faced by the most vulnerable. Expenditure on salaries and wages also increased by 13.1 percent to Rs. 956.2 billion in 2022 compared to Rs. 845.7 billion in 2021. Even amidst the high inflationary environment, expenditure on goods and services has only slightly increased by 8.2 percent to Rs. 182.9 billion compared to Rs. 169.0 billion recorded in 2021, reflecting stringent expenditure control measures adopted by the Government.

Figure 1.10 | Major Components of Government Expenditure (% of GDP)

Source : Department of Fiscal Policy

Although, the budget deficit in nominal terms increased to Rs. 2,460.0 billion in 2022, compared to Rs. 2,057.9 billion recorded in 2021, the budget deficit as a percentage of GDP reduced to 10.2 percent of GDP from 11.7 percent of GDP in 2021. Furthermore, the primary deficit declined in nominal terms to Rs. 894.8 billion in 2022 from Rs. 1,009.5 billion in 2021.

Primary deficit target under the IMF programme was Rs. 954 billion for 2022 (4.0 percent of GDP), however, a primary deficit of Rs. 894.8 billion (3.7 of GDP) was achieved with the revenue measures introduced in 2022. The

primary deficit would have reduced by a further 1.0 percent of GDP if the Ceylon Petroleum Corporation had been able to repay its obligations to the General Treasury on agreed time. The significant over performance in terms of fiscal outcomes in 2022 is a reflection of the focused policy measures towards inculcating discipline in the fiscal sector.

Figure 1.11 | Major Fiscal Balances (% of GDP)

Source : Department of Fiscal Policy

In spite of the material progress in fiscal outcomes, financing the budget deficit and Treasury cash flow management have been major challenges in 2022. Since the country lost the access to global capital markets in early 2020, the budget deficit was financed mostly by domestic sources including a significant component of inflationary monetary financing. The Government is now in the process of phasing out monetary financing and as a result the budget deficit has to be financed by domestic market borrowings,

stretching the limited capacity of the Treasury Bond and Bill markets. Government revenues significantly exceeded by mandatory recurrent expenditure including public sector salaries, pensions, interest costs, and welfare payments. Therefore, in the absence of foreign borrowings, curtailed monetary financing, and volatile domestic Treasury auctions, Treasury's cash flow management has been exceptionally challenging. Cash flow has been managed through extreme diligence in releasing funds only for essential expenditure, whilst also minimizing arrears. The limited instances of monetary financing in recent months have been only to meet outstanding debt service obligations. The difficulties in Treasury cash flow management are expected to ease once foreign financing channels are restored gradually, debt restructuring is completed, interest costs abate, and regular subscription of Treasury securities auctions is maintained.

1.4 Reform Initiatives in 2022

The year 2022 was a watershed year which provided the impetus for the Government to recognize the structural weaknesses and policy mismatches in the economy and to embark on a comprehensive reform agenda covering all sectors of the economy.

Fiscal weaknesses have been a major driver of Sri Lanka's macroeconomic volatility, and thus fiscal reforms feature prominently in the Government's economic reform agenda. Accordingly, the Government embarked on a series of extensive reforms focusing on primarily revenue-based fiscal consolidation since June 2022. This includes raising Value Added Tax (VAT) rate from 8 percent to 12 percent with effect from June 1, 2022, and further increasing the rate up to 15 percent effective from September 1, 2022.

In addition, with amendments approved to the Inland Revenue Act, No. 24 of 2017, and Value Added Tax, No. 14 of 2002 in December 2022, a host of other reforms pertaining to income tax and VAT have come into effect. The Personal Income Tax (PIT) structure has been made more progressive by widening the tax base with a reduced relief of Rs. 1.2 million from Rs. 3 million with effect from January 1, 2023. In addition, tax rates have been increased to rise by 6 percentage points for every Rs. 500,000 per annum up to a top rate of 36 percent from the previous structure where tax rates rose by 6 percentage points each for every Rs. 3 million up to a top rate of 18 percent. Further, a unified Corporate Income Tax rate of 30 percent has been introduced with the removal of all sector-specific exemptions and concessionary rates with effect from October 1, 2022. The revenue base for VAT has been widened with the lowering of the VAT registration threshold from Rs. 300 million per annum to Rs. 80 million per annum with effect from October 1, 2022.

Apart from the above-mentioned reforms that have been implemented at the time of the compilation of this report, further tax reforms are planned with regard to further removal of unproductive exemptions with regard to VAT, phasing out of para tariffs and strengthened tax administration as announced in the Budget 2023.

Along with the revenue enhancement measures, significant measures were taken to rationalize expenditure by suspending non-essential recruitments and postponing non-priority expenditure in Government institutions as well as in State Owned Enterprises (SOEs). A number of circulars in this regard were issued by the Ministry of Finance, Economic Stabilization, and National Policies to guide spending agencies on ways to curtail expenditure. However, key expenditure requirements especially with regard to healthcare, education, and social protection were not curtailed by the Government.

Along with the significant reforms in the fiscal sector, substantive action has been taken to restore price stability, strengthen external policy buffers, and initiate essential legislative and institutional reforms to restore macroeconomic stability. Policy interest rate hikes and enhanced communication efforts have helped re-anchor inflation expectations to a considerable extent and inflation is now on a clear downward path. The resulting enhanced confidence enabled foreign currency inflows to revert to formal channels and improve forex liquidity in the banking system. Long delayed energy pricing reforms contributed to reduce forex drains and enhance overall demand management efforts in the economy while helping to strengthen the financial position of relevant institutions. In addition, steps have been taken to promote Sri Lanka as a safe and attractive destination for tourism and thereby increase tourist arrivals into the country. The increased non-debt creating inflows from tourism and remittances coupled with an appropriate monetary and fiscal policy mix has enabled an improvement in the current account balance, allowing a recovery in foreign exchange reserves in early 2023.

Box 1.2 | Sri Lanka Towards Economic Recovery Path in 2023

Sri Lanka is witnessing a strong and gradual economic recovery compared to the dismal economic conditions experienced in 2022. In 2022, the real economy contracted by 7.8 percent which was lesser than the anticipated contraction of 8.7 percent. In 2023, the economy is expected to recover but will be contracted by around 2.0 to 3.0 percent reflecting the domestic and global headwinds. The real economy is evolving and pressure exerted on the reserves, inflation and exchange rate has reduced in the first four months of 2023. Recovery in earnings from tourism, workers' remittances, import compression and foreign inflows to domestic Treasury Bills will help strengthen the external sector. Furthermore, tightened monetary policy stance will anchor the ongoing disinflation process. Expected financial assistance from the World Bank and Asian Development Bank, among others and the second tranche of the Internal Monetary Fund (IMF) will cushion the pressure on the budget while strengthening the reserve position.

Headline inflation, as measured by the year-on-year change in the Colombo Consumer Price Index (CCPI, 2013=100) which surged to 69.8 percent in September 2022 from 12.1 percent in December 2021 declined moderately from then onwards to 57.2 percent in December 2022. As measured by the year-on-year change in the CCPI (2021=100), the disinflation continued during 2023 and decelerated sharply to 25.2 percent in May 2023.

The external sector shows signs of improvement in the first quarter of 2023. The merchandise trade deficit has notably declined to USD 0.9 billion in the first quarter of 2023 compared to USD 2.4 billion in the first quarter of 2022. Earnings from exports declined by 7.9 percent to USD 3.0 billion in the first quarter of 2023 compared to USD 3.3 billion recorded in 2022. The expenditure on imports also dropped substantially by 31.7 percent to USD 3.9 billion in the first quarter of 2023 compared to USD 5.7 billion recorded in the first quarter of 2022. This is primarily attributable to the decline in imports of fuel, machinery and equipment, textiles and textile articles, building material, base metals and cereals and milling industry products. In addition, earnings from tourism increased by 17.8 percent to USD 696.3 million in January-April 2023 compared to USD 591.0 million recorded in the same period of 2022. Further, inflows from workers' remittances increased substantially by 81.0 percent to USD 1,867.2 million in January-April 2023 compared to USD 1,031.5 million recorded in the corresponding period in 2022.

Figure 2 | Key External Inflows 2023 Jan - April

Sources: Central Bank of Sri Lanka

With the aggressive revenue enhancement measures implemented since June 2022, the Government revenue increased by 42.1 percent in the first quarter of 2023 to Rs. 635.3 billion from Rs. 446.9 billion in the first quarter of 2022. Revenue from income taxes nearly doubled to Rs. 161.8 billion in the first quarter of 2023 compared to Rs. 82.8 billion recorded in the same period of 2022. Revenue from taxes on goods and services also increased by 66.9 percent to Rs. 325.8 billion from Rs. 195.2 billion benefiting from the increase in VAT revenue of Rs. 163.7 billion and receipts from the newly introduced Social Security Contribution Levy amounting to Rs. 51.2 billion. However, revenue from excise duty on motor vehicles, CESS levy and Special Commodity Levy (SCL) was subdued in the first quarter of 2023 due to the import compressions.

Box 1.2 | Sri Lanka Towards Economic Recovery Path in 2023 contd...**Figure 3 | Comparison of Revenue Performance 2022-2023 Q1**

Source : Department of Fiscal Policy

Figure 4 | Government Fiscal Operations 2022-2023 Q1

Source : Department of Fiscal Policy

However, total expenditure also increased to Rs. 1,260.0 billion in the first quarter of 2023 which marks a 35.3 percent increase compared to Rs. 931.2 billion in the first quarter of 2022 mainly driven by the increase in interest payments by 77.6 percent to Rs. 673.1 billion from Rs. 379.0 billion. The expenditure on goods and services also increased by 43.6 percent to Rs. 53.0 billion from Rs. 36.9 billion. With the enhanced social safety net programme, the expenditure on subsidies and transfers increased by 10.2 percent to Rs. 185.8 billion from Rs. 168.6 billion. However, the expenditure on salaries and wages fell by 3.5 percent to Rs. 228.3 billion from Rs. 236.5 billion due to the suspension of new recruitments and increased retirements. Expenditure arrears for bills more than 3 months has become zero and social spending for Samurdhi and other categorical expenditures of assistance to the elderly, allowances for disabled people and financial support for kidney patients increased nearly to Rs. 35 billion in the first quarter of 2023.

Benefiting from the cost-reflective prices on fuel, Ceylon Petroleum Corporation (CPC) recorded a profit of Rs. 29.7 billion in the first quarter of 2023. However, Ceylon Electricity Board (CEB) recorded a loss of Rs. 34.4 billion in the first quarter of 2023 as the cost-reflective pricing mechanism was implemented only in mid-February 2023. A comprehensive strategy will be introduced to strengthen the balance sheets of CPC, CEB, SriLankan Airlines (SLA) and Road Development Authority (RDA).

With the enhanced revenue collection coupled with the slight increase in primary expenditure (total expenditure excluding interest payments) by 6.3 percent, the Government overperformed the indicative target set under the IMF-EFF programme on the Government primary balance floor with a primary surplus of Rs. 48.3 billion over the set primary deficit target of Rs. 56 billion. However, revenue enhancement measures together with the strengthening tax administration including strict enforcement measures with swift implementation of planned and new revenue measures are prerequisites to achieve the annual revenue target.

1.5 Fiscal Strategy in the Medium Term

The Medium-Term Fiscal Outlook is anchored around the following:

- Achieving government revenue as a percentage of GDP of over 15 percent in 2026 and beyond;
- Rationalizing Government expenditure and maintaining recurrent expenditure at around 15 percent of GDP;
- Gradually increasing and maintaining public investment at over 4 percent of GDP from 2024 and beyond;
- Containing budget deficits gradually to be less than 5 percent of GDP from 2025 and beyond; and
- Achieving a primary surplus of over 0.8 percent in 2024 and maintaining a primary surplus of over 2.3 percent in 2025 and beyond.

Table 1.2 I Medium Term Macro-Fiscal Framework from 2023–2027

as a percentage of GDP

Indicator	2022	Estimate	Projections			
	Provisional	2023	2024	2025	2026	2027
Total Revenue and Grants	8.3	11.3	13.3	14.9	15.0	15.1

Sources : Department of Fiscal Policy, Department of National Budget and International Monetary Fund (IMF) Programme Parameters

This Medium-Term Macro-Fiscal Framework has taken into account the fiscal targets under the IMF-EFF programme, significant revenue enhancement and expenditure rationalization measures that were already implemented and further measures to be implemented in the coming years.

Tax Reforms

Major tax reforms to be implemented in the coming years:

- Start estimating and publishing the direct costs imposed by tax incentives granted under the Strategic Development Projects and Board of Investment Acts by January 1, 2024.
- Revamp the VAT system by abolishing the vast majority of exemptions by January 1, 2024 which will be front loaded in 2023 to fill the revenue gap.

- Take measures to significantly speed up valid VAT refunds and abolish the SVAT system by January 1, 2024.
- Introduce automatic indexation of excises to inflation by January 1, 2024.
- Introduce a nationwide real property tax including a review of related fiscal transfers, requesting technical assistance as needed by January 1, 2025.
- Introduce a gift and inheritance tax with a tax-free allowance and minimal exemptions by January 1, 2025.

Tax Administration Reforms

The Government has focused on further strengthening tax administration to complement the revenue enhancement measures.

Under the Inland Revenue (Amendment) Act, No 04 of 2023, notable measures were taken to enhance the tax administration with legal provisions to make electronic tax filing mandatory for non-corporate taxpayers, streamline the refund process, discourage cash transactions and obligate key institutions to submit taxpayer transaction information at the individual level to the Inland Revenue Department (IRD).

In addition, a number of tax administration strengthening reforms are to be implemented in the coming years in order to simplify and digitize the tax system, increase tax compliance, and reduce leakages of tax revenue.

- Open a tax file for everyone over 18 years.
- Strengthen the digitalization efforts at major revenue agencies and address deficiencies identified
- Phase out para-tariffs/levies
 - o Elimination of CESS Levy on a phased basis in three years commencing January 1, 2023. Preliminary steps have been taken in this regard by reducing CESS rates applicable to all liable items by 25–30 percent effective from March 29, 2023.
 - o Phasing out of Ports and Airports Development Levy in five years. Preliminary steps have been taken in this regard by removing PAL applicable to 1,631 HS codes (tariff items) effective from April 4, 2023.
 - o Revision of current rates of Customs Import Duty upwards from 0%; 10%; and 15% to 0%; 15%; and 20% to accommodate the proposed phasing out of para-tariffs / levies effective from March 29, 2023.
- Introduce Key Performance Indicators (KPIs) for the revenue collecting agencies
- Introduce a charter covering the rights and obligations of taxpayers
- Appoint a Tax Ombudsman to address the concern of taxpayers
- Introduction of legislative amendments to improve the efficiency of tax collection at the Departments of Excise and Customs.
- Implement a tax audit and a verification programme.

Reforms in State-Owned Enterprises

In 2022, significant measures were taken to reduce the net burden posed by State Owned Enterprises (SOEs) on Sri Lanka's public finances. A SOE Restructuring Unit has been set up to drive the restructuring of key SOEs. In addition, a cost-recovery pricing mechanism has been adopted for fuel and electricity under the IMF-EFF programme where prices are continuously adjusted on a monthly basis for fuel and a semi-annual basis for electricity.

In addition, significant structural reforms are to be implemented to strengthen the governance of SOEs and to make them financially viable. This includes restructuring of the balance sheets of the CEB, CPC, SriLankan Airlines (SLA), and the Road Development Authority (RDA), ensuring that new SOE borrowing is limited to the financing of commercially viable activities (e.g., investment projects), remunerating subsidies and other quasi-fiscal activities through Government transfers and ensuring that no new borrowing in foreign currency for non-financial SOEs with less than 20 percent of revenues denominated in foreign currency. These SOE reforms are endorsed within the IMF-EFF programme.

Reforms in Public Financial Management

As a major reform under the IMF-EFF programme, a new Public Financial Management (PFM) Act will be enacted in 2024. The new PFM Act will include an overarching legal framework to strengthen the core PFM functions of macro-fiscal analysis and forecasting, fiscal data collection and reporting, fiscal management and budget formulation and execution. The new Act will clearly define the budget formulation process, specify the roles and responsibilities of the Ministry of Finance and spending agencies, and establish information and accountability requirements. The new PFM Act will also replace the current Fiscal Management (Responsibility) Act, No. 03 of 2003 and will encompass a new fiscal rules framework to enhance the discipline in the fiscal operations of the Government with the overall objective of debt reduction and fiscal sustainability.

A Public Debt Management Agency (PDMA) will be established to independently manage the Government's debt operations. The PDMA will have substantial operational freedom and will be responsible for overseeing all aspects of debt management, including making decisions regarding domestic and international financing. Further, the agency will be involved in evaluating all forms of debt, derivatives, and guarantees. Additionally, a Parliament Budget Office will be set up to assist Parliament in the performance of its public finance responsibilities under the Constitution. This includes the implementation and monitoring of national budget proposals, making responsible decisions to maintain a sustainable fiscal position, and allocate public resources effectively. Moreover, several reform initiatives will be implemented to minimize the susceptibility to corruption. These measures include the introduction of comprehensive legislation that aligns with the United Nations Convention against Corruption (UNCAC), decreasing opportunities for corruption by expanding the use of digitalization in key areas such as revenue administration and procurement, and establishing an online platform to enhance transparency.

Reforms in the External Sector

Administrative measures including import restrictions and exchange restrictions that were imposed to support the balance of payments will be gradually eliminated. In addition, steps will be taken to strengthen external inflows to the country through diversification of exports, creation of a one-stop-shop at the Board of Investments (BoI), amalgamation of BoI and Export Development Board (EDB) and creation of a conducive environment to attract FDIs.

Reforms in the Financial and Monetary Sector

The institutional framework in the monetary sector will be further strengthened by providing greater autonomy to the Central Bank of Sri Lanka through a new Central Bank Act, replacing the existing Monetary Law Act. In order to maintain a sound and adequately capitalized banking system, a diagnostic study will be conducted for nine major banks including a comprehensive asset quality review.

Additionally, a new Banking (Special Provisions) Act and amendments to the Banking Act will be enforced to strengthen financial sector supervision. The regulatory and governance framework for state-owned banks will also be improved, while the supervision on smaller-non-bank deposit-takers will be enhanced.

From Stability to Growth

During the last 12 months, there has been significant progress in shifting the economy from a state of near collapse to relative stability. The establishment of an IMF supported reform programme and efforts towards restructuring debt are expected to set the stage for improved credit ratings and restoring capital market access. However, for a sustainable recovery in the long term Sri Lanka will have to improve its non-debt creating inflows (primarily exports of goods and services and FDI) to build up its foreign exchange reserves. Towards this end the Government is resuming engagement with global markets through trade agreements and greater economic integration. Building on progress in negotiations with India, China, and Thailand, Sri Lanka intends to engage with broader regional trading arrangements including Regional Comprehensive Economic Partnership (RCEP). Engaging with such trading institutions will enable the country to connect with regional value chains and become an attractive investment destination with a large effective market.

At the same time, domestic supply capacity must be also addressed. Long term growth can only be established through competition and contestation in markets. Competitiveness of the economy will be enhanced through critical reforms to key factors markets including land, labour, and capital. Measures will be introduced to free up land resources for commercial usage, including investment zones. The institutional framework supporting exports and investment will also be revamped to extract optimal value from the BoI and the EDB through a new institutional mechanism. Labour market reforms will seek to enhance female labour force participation and encourage flexible work, whilst reviewing labour legislation to strike an appropriate balance between the interests of employers and employees.

Whilst market forces will drive economic activity, the Government will ensure modern regulatory frameworks that ensure fair competition and contestation. The policy framework will also ensure that economic activity does not compromise Sri Lanka's natural heritage and bio-diversity, recognising that protecting the latter will have significant

long term economic benefits. The Government will commit to enhanced investment in education, healthcare, social protection, public transportation, and digitisation to deliver efficient public services and ensure social justice. These measures as a whole will be critical for Sri Lanka to embark on a new growth model underpinned by an equitable, sustainable, and digitalised economy.

Box 1.3 | The Economic Reform Programme under the Extended Fund Facility of the International Monetary Fund (IMF-EFF)

The economic crisis, that erupted in early 2022 with the acute depletion of usable official reserves, sharp currency depreciation and the resultant shortage of essential goods including fuel, cooking gas and pharmaceuticals, soaring inflation, severe cash flow constraints of the Government emanated from low Government revenue and high recurrent expenditure, the unstable financial system with the shocks emanating from the fiscal and monetary sectors and social unrest and political upheaval, has prompted the Government to usher much-needed and much-neglected reforms, particularly in the fiscal, monetary, financial and growth enhancing areas. As such, the Government made a formal request for an IMF-backed economic stabilisation programme. Concurrently, the Government announced a debt service standstill in April 2022 and introduced other stabilization measures including addressing the shortage of essentials with the assistance of bilateral development partners. The Government also commenced discussions with creditors in order to restructure the debt to pave the way for a IMF programme and to regain debt sustainability and also hired legal and financial advisors.

After months of negotiations, the Government successfully reached a Staff-Level Agreement (SLA) with the IMF on September 1, 2022 and implemented a series of policy adjustments in line with the SLA. Accordingly, the Government fulfilled nine prior actions as agreed upon.

1. Cabinet approval of revenue measures to support fiscal consolidation during 2023, in line with programme parameters
2. Parliament approval of a revised 2022 budget that is in line with programme parameters
3. Submission to Parliament of the 2023 Appropriation Bill that is in line with programme parameters
4. Cabinet approval to automate monthly retail fuel price adjustment as prescribed by the 2018 fuel pricing formula to achieve cost recovery
5. Cabinet approval to automate semi-annual cost-recovery based electricity price adjustment
6. Cabinet approval of the new Central Bank Act with amendments from the bill submitted to Parliament in November 2019 in consultation with IMF staff
7. Cabinet approval of Banking (Special Provisions) Act to strengthen key elements of the CBSL's crisis management powers of the Central Bank of Sri Lanka (CBSL)
8. Hiring by the CBSL of an independent firm to conduct banking sector diagnostic exercise based on Terms of Reference and timeline established in consultation with IMF staff
9. Increase policy interest rates by 100 basis points to ensure forward-looking real policy rates on a firmly upward path

Box 1.3 | The Economic Reform Programme under the Extended Fund Facility of the International Monetary Fund (IMF-EFF) contd..

In line with the programme parameters, the fiscal operations of the Government in 2022 were guided by the revised budget. Under the revised budget, a primary deficit of Rs. 954 billion or 4.0 percent of GDP was targeted and owing to the aggressive revenue-enhancement measures and expenditure rationalization efforts, a primary deficit of Rs. 894.7 billion or 3.7 percent of GDP was achieved surpassing the target. This would have been further contained to 2.7 percent of GDP if the Ceylon Petroleum Corporation (CPC) could have paid to the Treasury of USD 700 million (approximately Rs. 252 billion) for the fuel imported under the Indian line of credit facility. In addition, a cost-recovery pricing system was adopted for fuel and electricity with continuous formula-based price revisions.

With the completion of the prior actions and receipt of financial assurances from official creditors, the IMF Board approved a 48-month extended arrangement under the EFF of SDR 2.286 billion (around USD 3 billion) on March 20, 2023 to support Sri Lanka's economic policies and reforms. The disbursement of the first tranche of about USD 330 million was taken place immediately following the approval. The programme is designed to restore macroeconomic stability and ensure the sustainability of public debt. It is built upon seven key pillars as given below.

Table 1 | Seven Key Pillars of the IMF-EFF Programme

(1) Revenue Based Fiscal Consolidation
<ul style="list-style-type: none"> • Ambitious and progressive tax reforms • Revenue Administration Reforms • Expenditure Rationalization Measures and preserving priority spending • Enhancing the timeliness, accuracy and coverage of fiscal data • Automatic cost-recovery based pricing for fuel and electricity • Strengthening the governance of State Owned Enterprises (SOEs) and make them financially viable • Strengthening the core Public Financial Management (PFM) functions under a new PFM Act
(2) Stronger Social Safety Nets
<ul style="list-style-type: none"> • Protecting the vulnerable against the impacts of the economic crisis and policy adjustments through strong Social Safety Net (SSN) Programmes • Strengthening the institutional framework to improve the effectiveness and efficiency of SSN Programmes
(3) Sovereign Debt Restructuring Strategy
<ul style="list-style-type: none"> • A debt resolution consistent with the IMF program parameters and a fair and equitable burden sharing among creditors • Establishing a Public Debt Management Agency (PDMA) in line with international best practices • Regularly publishing a quarterly bulletin of public debt and debt service
(4) Restoring price stability and Rebuilding International Reserves
<ul style="list-style-type: none"> • Implementing a multi-pronged disinflation strategy and refrain from monetary financing • Allowing a greater exchange rate flexibility • Strengthening the institutional frameworks supporting flexible inflation targeting and greater exchange rate flexibility. • Phasing out the administrative measures imposed to support the balance of payments

Box 1.3 | The Economic Reform Programme under the Extended Fund Facility of the International Monetary Fund (IMF-EFF) contd..

(5) Safeguarding Financial Stability

- Ensuring a healthy and adequately capitalized banking system and addressing the significant vulnerabilities in the banking system
- Strengthening the frameworks for financial sector supervision and crisis management
- Strengthening the resilience and governance of state-owned banks

(6) Addressing Governance and Corruption Vulnerabilities

- IMF to publish governance diagnostic report which is an in-depth, country-tailored assessment of corruption and governance vulnerabilities
- Enacting a comprehensive piece of legislation that harmonizes anti-corruption legislation with the United Nations Convention against Corruption (UNCAC)
- Improving fiscal transparency by improving the timeliness and accuracy of fiscal data and enhancing debt transparency.

(7) Structural Reforms to Unlock Sri Lanka's growth potential

- Revisiting the 5-year plan for rationalizing remaining para-tariffs developed under the 2016–20 EFF arrangement, aimed at removing an important impediment for foreign investments.
- Implementation of a single window for trade and pursue further trade reforms with technical assistance from development partners.
- Carrying out comprehensive labour market reforms

The programme details a number of policy actions that are to be implemented under specific timelines encompassing the above mentioned 7 pillars. These benchmarks are critical for achieving the goals of the programme and are used as markers to assess programme implementation.

Table 2 | Structural Benchmarks

Fiscal, SOE, and social safety net reforms

Set retail fuel prices to their cost-recovery levels with monthly formula-based adjustments, and compensate the CPC for providing any fuel subsidies with on-budget transfers	Continuous
Adjust the end-user electricity tariff schedule to its cost-recovery level (overall across different types of final consumers) with semi-annual formula-based adjustments on a forward-looking basis in January and July each year (effective from January 1 and July 1, respectively); the CEB submits tariff revision requests to the Public Utility Commission of Sri Lanka by end-October (for January tariff revisions) and by end-April (for July tariff revisions); and compensate the electricity sector for providing any residual subsidies with on-budget transfers	Continuous
Parliamentary approval of the welfare benefit payment scheme and the application of the new eligibility criteria to identify low-income families for receiving welfare benefit payments	End-May 2023
Cabinet approval of a comprehensive strategy (laying out clear timelines and modalities) to restructure the balance sheets of the CEB, CPC, SriLankan Airlines, and the Road Development Authority, in consultation with IMF staff	End-June 2023

Box 1.3 | The Economic Reform Programme under the Extended Fund Facility of the International Monetary Fund (IMF-EFF) contd..

Cabinet approval of revenue measures to support fiscal consolidation during 2024, in line with program parameters	End-July 2023
Completion of the rollout of the Integrated Treasury Management Information System (ITMIS) expanding its coverage to all 220 heads (national budget execution agencies)	End-September 2023
Submission to Parliament for the first reading of the 2024 Appropriation Bill that is in line with program parameters	End-October 2023
Parliamentary approval of the 2024 Appropriation Act and the spending allocations in line with program parameters	End-December 2023
Submission to Parliament of a new PFM law, in consultation with IMF staff, that will authorize the budget formulation process, roles and responsibilities of relevant agencies, and information and accountability requirements	End-December 2023
Improve the Bulk Supply Transaction Account (BSTA) to accurately measure the electricity subsidy, and start using it to determine the cost-recovery based electricity tariff and Government transfer requirement	End-December 2023
Monetary and exchange rate policies	
Parliamentary approval of the new Central Bank Act prepared in consultation with IMF staff	End-April 2023
Financial sector	
Completion of the asset quality review component of bank diagnostic exercise for the two largest state-owned banks and the three largest private sector banks	End-April 2023
Cabinet approval of a full revision of the Banking Act in consultation with IMF staff	End-June 2023
Development by the CBSL of a roadmap for addressing banking system capital and FX liquidity shortfalls and intervening in banks assessed to be non-viable	End-July 2023
Determination by the MOF of the size, timing, instruments, and terms and conditions for potential government recapitalization of viable banks which are unable to close capital shortfalls from private sources	End-October 2023
Parliament approval of a full revision of the Banking Act in consultation with IMF staff	End-December 2023
Governance	
Enact new anti-corruption legislation to harmonize it with the United Nations Convention Against Corruption, pending comprehensive asset recovery provisions, in consultation with IMF staff	End-June 2023
Publication of the report of an IMF-led governance diagnostic technical assistance mission to assess Sri Lanka's anti-corruption framework	End-September 2023

Box 1.3 | The Economic Reform Programme under the Extended Fund Facility of the International Monetary Fund (IMF-EFF) contd..

The IMF programme is subject to semi-annual reviews which will review the performance based on a number of criteria established under the Programme.

Table 3 | Monitoring Criteria of the IMF-EFF Programme

Type	Criteria
Quantitative Performance Criteria (QPCs)	<ul style="list-style-type: none"> - Central Government primary balance (floor) - Stock of expenditure arrears of the central Government (ceiling) - Net official international reserves (floor) - Net Credit to the Government (NCG) from the (CBSL) (ceiling)
Continuous Performance Criteria (CPCs) related to external arrears and Article VIII obligations	<ul style="list-style-type: none"> - New external payment arrears of the nonfinancial public sector and the CBSL (ceiling) - Not imposing or intensifying restrictions on the making of payments and transfers for current international transactions - Not introducing or modifying multiple currency practices (MCPs) - Not concluding bilateral payment agreements that are inconsistent with Article VIII of IMF Articles of Agreement - Not imposing or intensifying import restrictions for balance of payments purposes
Monetary Policy Consultation Clause (MPCC)	<ul style="list-style-type: none"> - Monitoring whether year-on-year inflation on specified target dates is consistent with the target bands set under the programme and toward the CBSL's target band of 4–6 percent by end-2024
Indicative Targets (ITs)	<ul style="list-style-type: none"> - Central Government Tax Revenue (floor) - Social Safety Net Spending (floor) - Cost of Non-Commercial Obligations for fuel and Electricity (Net of Government Transfers) (ceiling) - Treasury Guarantees (ceiling)

Figure 2 | Revenue and Grants

Source : Department of Fiscal Policy (2010–2022), IMF Targets (2023–2028)

The successful implementation of the reform policy measures within the designated timeline and focused efforts to meet the mentioned performance criteria throughout the programme will play a vital role in steering Sri Lanka towards economic and debt sustainability. These reforms are indispensable for the economy to overcome its challenges. Moreover, the programme's introduction of robust legal frameworks on public financial management and anti-corruption will promote public accountability and transparency and strengthen governance processes.

Furthermore, the implementation of these measures will restore investor confidence in Sri Lanka and facilitate access to additional financing from development partners, with an estimated budget support of approximately USD 3.75 billion from the World Bank and the Asian Development Bank, including an expected disbursement of USD 900 million in 2023. These avenues for external financing and debt restructuring will help bridge the external financing gap. Additionally, this approach is crucial for bolstering foreign reserves and fortifying the economy against external and internal shocks.

02

Economic
Developments
in 2022

2.1 Overview

In 2022, Sri Lankan economy was saddled with unprecedented challenges embedded with the economic crisis and public and political tensions. The economic growth sharply fell by 7.8 percent in 2022 compared to the 3.5 percent growth witnessed in 2021. The crisis was transformed into long queues for food items and energy including fuel and cooking gas, disruptions in electricity, other essential items including pharmaceuticals and required inputs for the industries due to the total supply side disturbances emanating from the acute foreign exchange shortages. As such, the prices have skyrocketed. Inflation rose to the level of nearly 70 percent in September 2022 which has compelled the Central Bank and the Government to tighten both monetary and fiscal policies to curb inflation through policy rate hikes and to curtail non-essential imports. Such bold measures helped improve the normalization of living conditions and supply-side improvements for the industries.

All sectors of the economy including Agriculture, Industry and Services contracted in 2022 with a sharp contraction in manufacturing, construction, mining and quarrying, marine fishing and marine aquaculture, real estate, insurance and financial services. As a result, the negative growth momentum witnessed during the latter part of 2021 gradually continued until the last quarter of 2022 reflecting the adverse impact of the crisis. The economic contraction of 0.5 percent recorded in the first quarter of 2022 has further deepened to a sharp contraction of 7.4 percent in the second quarter of 2022 mainly due to supply side disruptions including fuel and electricity shortages. The soaring inflationary pressures together with other disturbances have resulted in a negative growth of 11.5 percent in the third quarter of 2022 while the growth further dropped to 12.4 percent in the last quarter of 2022 reflecting the overall weaker demand conditions.

The external sector faced unprecedented vulnerabilities largely due to the pressures on Balance of Payments (BOPs), depletion of Gross Official Reserves (GOR), sharp depreciation of the exchange rate and the shortage of foreign exchange liquidity in the market, among others. However, the lowest merchandise trade deficit since 2010 was recorded in 2022 at USD 5,185 million compared to USD 8,139 million in 2021, with the expansion of earnings from merchandise exports and compression of expenditure on

merchandise imports due to policy measures taken to curtail imports amidst the severe BOP pressures. Earnings from tourism significantly increased by 124.2 percent to USD 1,136 million in 2022 due to high global vaccination rates, increased air connectivity along with the lifting of travel restrictions while workers' remittances declined by 31.0 percent to USD 3,789 million possibly due to the receipt of the remittances to the country through informal channels with the higher rates offered by the grey market. Consequently, the current account deficit in the external sector significantly narrowed to USD 1.5 billion in 2022 compared to USD 3.3 billion in 2021.

Meanwhile, GOR declined to USD 1.90 billion as at end 2022 compared to USD 3.14 billion recorded as at end 2021. This included the swap facility from the People's Bank of China equivalent to around USD 1.43 billion as at end 2022, which is subject to the conditionalities on its usability. However, with the funding assistance under the Extended Fund Facility of the International Monetary Fund (IMF-EFF) arrangement and the purchases of foreign exchange from the market, GOR increased to about USD 2.76 billion by the end April 2023. The Sri Lankan rupee depreciated substantially by 41.4 percent against the USD by end April 2022. However, it appreciated against the USD by 22.9 percent by end May 2023, reflecting the improved market sentiments. GDP was estimated at USD 77.1 billion at current market prices in 2022 compared to USD 88.5 billion in 2021.

The performance of the equity market was subdued in 2022. The All Share Price Index (ASPI) recorded the historically highest value of 13,462.4 points on January 19, 2022 and dropped to 8,490 points by the end 2022 while the Standard & Poor's Sri Lanka 20 (S&P SL20) Index dropped to 2,636 points by the end 2022. Further, market capitalization declined by 29.9 percent to Rs. 3,847 billion at the end of 2022 from Rs. 5,489 billion at the end 2021.

The total labour force participation rate fell marginally to 49.8 percent in 2022 from 49.9 percent in 2021 reflecting the decline in the labour force together with the increase in the inactive population. However, the unemployment rate dropped to 4.7 percent in 2022 from 5.1 percent in 2021.

Headline inflation, as measured by the year-on-year change in the Colombo Consumer Price Index (CCPI, 2013=100) sharply increased to 69.8 percent in September 2022 mainly due to the supply side disruptions, before declining moderately to 57.2 percent in December 2022. The declining trend of headline inflation further continued during 2023 and fell sharply to 25.2 percent (CCPI, 2021=100) in May 2023. As measured by the year-on-year change in the NCPI (2021=100), headline inflation declined sharply to 33.6 percent in April 2023. Meanwhile, year-on-year core inflation as measured by the movements in CCPI (2021=100) dropped to 20.3 percent in May 2023 and year-on-year core inflation as measured by the movements in NCPI (2021=100) declined to 31.8 percent in April 2023.

The Central Bank continued its tight monetary policy stance throughout 2022 along with other supportive policy measures. Accordingly, the Standing Deposit Facility Rate (SDFR) and Standing Lending Facility Rate (SLFR) which were increased by 100 basis points to 14.5 percent and 15.5 percent, respectively on July 07, 2022 were further upwardly adjusted by another 100 basis points to 15.5 percent and 16.5 percent, respectively on March 03, 2023.

2.2 Sri Lankan Economy

The Sri Lankan economy contracted by 7.8 percent in 2022 compared to the forecast of 8.7 percent due to economic and social challenges together with supply side headwinds. However, the unprecedented challenges arising from the crisis were gradually managed by introducing prudent policy measures. Agriculture, Industry and Services sectors contracted in 2022 largely owing to the supply side disruptions, the prolonged energy crisis together with the subdued demand conditions prevailed due to deterioration in purchasing power of the people. Agriculture sector contracted by 4.6 percent in 2022, compared to the marginal growth of 0.9 percent in 2021 as a result of the contraction in sub-sectors including cereals, tea, rice, other beverage crops, vegetables, rubber, marine fishing and animal production. Industry sector contracted significantly by 16.0 percent in 2022 compared to the growth of 5.7 percent recorded in 2021 owing to the contraction of construction activities, mining and quarrying activities and manufacturing activities except for textiles, wearing apparel and leather related products. Services sector, which is the largest sector in the economy with Rs. 7,265 billion in value addition, also contracted by 2.0 percent in 2022 compared to the growth of 3.5 percent recorded in 2021 due to the slowdown in real estate activities, insurance services, financial services, human health activities, professional services, IT programming, programming and broadcasting and wholesale and retail trade activities.

Despite the contraction of the GDP at constant (2015) market prices by historically higher levels, the GDP at current market prices increased

by 37.2 percent to Rs 24,147.7 billion (USD 77.1 billion) in 2022 compared to Rs. 17,600.2 billion (USD 88.5 billion) in 2021 reflecting the impact of increased price levels during the year. Accordingly, GDP per capita declined to USD 3,474 in 2022 from USD 3,997 in 2021.

Investment expenditure grew by 28.4 percent in 2022 mainly due to the notable price hikes of investment goods caused by the shortage in foreign exchange, the sharp depreciation in the local currency and high interest rates. Consumption expenditure comprising of private and government expenditure increased substantially by 34.3 percent in 2022 compared

to the 8.4 percent growth recorded in 2021, reflecting the surge in consumer prices. Net external demand improved significantly by 34.1 percent in 2022 at current market prices, benefiting from the substantial growth of the export of goods and services which surpassed the growth in the import of goods and services during the year. National savings grew by 37.6 percent in 2022, compared to 17.7 percent growth in 2021 while the national savings to GDP ratio improved marginally to 33.1 percent during the year. Further, the national savings-investment gap narrowed in 2022 due to the higher growth in savings compared to the investment.

^(a) Revised -The data revised on base year 2015 by the Department of Census and Statistic^(b) Provisional

Agriculture Sector

In value added terms, agriculture sector contracted by 4.6 percent in 2022 compared to the growth of 0.9 percent recorded in 2021. This was mainly due to the contraction of agricultural activities such as growing of cereals, tea, rice, other beverage crops, vegetables, rubber, marine fishing and marine aquaculture and animal production. Shortages of fertilizers and agrochemicals, substantial increase in production cost and disruptions in fuel supply hindered the overall performance of the agriculture sector. However, activities such as forestry and logging, fresh water fishing and fresh water aquaculture, growing of oleaginous fruits, spices, aromatic, drug and pharmaceutical crops and other perennial crops recorded positive growth in 2022.

Figure 2.3 | Agriculture Sector Composition – 2022

Source: Department of Census and Statistics

Paddy

Following the bumper harvest of 5.15 million metric tons in 2021, annual paddy production contracted by 34.1 percent to 3.39 million metric tons in 2022 recording its lowest annual production since 2017. This was driven by the combined outcome of a 36.9 percent drop in paddy harvest in the 2021/22 Maha season and a 30.0 percent drop in the 2022 Yala harvest. The consequences of the ban on the importation of inorganic fertilizers and other agrochemicals which was lifted during the latter part of 2021 together with the lack of foreign exchange to import required fertilizers, resulted severe fertilizer shortages causing a significant impact

on paddy production. The net land extent harvested during the year declined slightly by 1.1 percent to 1,114,246 hectares in 2022 from 1,126,605 hectares in 2021. The average yield of paddy declined to 3,045 kgs per hectare in 2022, compared to 4,571 kgs per hectare, recorded in 2021.

The rice production equivalent to the total paddy production of 2022 was around 2.1 million metric tons which was only sufficient to cater the household demand of rice for 11 months. Therefore, the Government imported 783,420 metric tons of rice during 2022 to meet the domestic rice requirement and to ease the price pressure exerted from the rice shortages. However, considering the availability of rice in the latter part of the year, importation of rice was banned from December 09, 2022 except for a few varieties.

In order to ensure reasonable price for the paddy farmers while maintaining continuous supply to the market, the Government Paddy Purchasing Programme was continued and guaranteed prices were imposed on paddy. The guaranteed prices for a kg of Samba, Nadu and Keeri Samba paddy were Rs. 92.00, Rs. 90.00 and Rs. 95.00, respectively, during the 2021/22 Maha season and the Paddy Marketing Board (PMB) purchased 71,280 metric tons of paddy during the season. Due to further increase in cost of production of paddy during the year, the guaranteed prices for a kg of Samba, Nadu and Keeri Samba paddy were increased to Rs. 125.00, Rs. 120.00 and Rs. 130.00, respectively, in the 2022 Yala season. However, due to lack of funding availability, the PMB was only able to purchase 7,076 metric tons of paddy in the Yala season.

Increased cost of production along with the drop in paddy production also resulted higher prices of rice during 2022. Accordingly, the average retail prices of Samba and Nadu were at Rs. 209.19 per kg and Rs. 213.36 per kg, respectively, in 2022. In order to stabilize retail prices of rice in the market, the Government imposed Maximum Retail Prices (MRPs) for Nadu, Samba and Keeri Samba at Rs. 220.00, Rs. 230.00 and Rs. 260.00 per kg, respectively from May 02, 2022. With the intention to provide relief for the most vulnerable sectors, the Government purchased Nadu paddy from

farmers at Rs. 100.00 per kg during 2022/23 Maha season to distribute 10 kgs of rice per month for low-income families.

Tea

In value-added terms, the tea sub-sector declined by 15.9 percent in 2022, compared to the growth of 8.5 percent in 2021. The tea production declined by 16.0 percent to 251.5 million kg in 2022, compared to 299.5 million kg in 2021 mainly due to the lagged effect of acute shortages of fertilizers and agrochemicals.

Tea prices at the Colombo Tea Auction (CTA) reached the historically highest level on average, by 105.2 percent to Rs. 1,270.50 per kg in 2022 from Rs. 619.15 per kg recorded in 2021. The average export price (FOB) of tea increased by 78.5 percent to Rs. 1,643.11 per kg in 2022 from Rs. 920.76 per kg in 2021, while the average export price (FOB) of tea in USD terms increased by 8.7 percent to USD 5.03 per kg during 2022 compared to USD 4.63 per kg in 2021. The increase in average tea prices during 2022 was partly attributable to the decline in the quantity supplied to the CTA amidst the decline in local production, while the depreciation of the Sri Lanka rupee also contributed to the price hike in rupee terms.

Rubber

In value-added terms, the rubber sub-sector contracted by 6.7 percent in 2022, compared to the growth of 6.2 percent in 2021 owing to the adverse weather conditions in rubber plantation areas, fertilizer shortages and the spread of the Pestalotiopsis disease. Accordingly, total rubber production declined by 7.8 percent to 70.9 million kg in 2022 from 76.9 million kg in 2021. Domestic raw rubber consumption by the industrial sector also declined by 12.4 percent to 117.3 million kg in 2022 from 133.9 million kg in 2021 partly due to the decline in demand for medical gloves in both domestic and global markets as the COVID-19 pandemic faded away.

The prices of most varieties of rubber at the Colombo Rubber Auction (CRA) reached historically high levels in the first half of 2022 due to the increased demand in global market. However, during the latter part of the year, rubber prices declined due to the weaker demand for rubber-based products in both domestic and global markets. Accordingly, the average FOB price of rubber increased merely to USD 2.73 per kg in 2022 from USD 2.72 per kg in 2021.

Coconut

The coconut production increased by 8.7 percent to 3,391 million nuts in 2022 recording the highest ever annual production from 3,120 million nuts in 2021 supported by the favourable weather conditions prevailed in coconut cultivation areas. These favourable effects offset the adverse impact of limited application of chemical fertilizer during the year. As such, some of the coconut related industries have also been benefited; desiccated coconut production increased by 5.2 percent to 35,030 metric tons in 2022 from 33,289 metric tons in 2021; coconut oil production increased significantly by 59.4 percent to 68,590 metric tons in 2022 mainly due to the restrictions imposed on the importation of coconut oil and palm oil combined with the availability of adequate nuts for oil production and production of coconut milk powder also increased by 15.8 percent during 2022.

Despite the improved coconut production, the average retail price of a coconut increased by 8.9 percent to Rs. 91.36 per nut in 2022 from Rs. 83.90 per nut in 2021 and auction price of a coconut on average increased by 6.4 percent to Rs. 60.14 per nut in 2022 from Rs. 56.51 per nut in 2021. Meanwhile, the average retail price of a bottle of coconut oil (750 ml) increased by 17.3 percent to Rs. 520.19 in 2022 from Rs. 443.42 in 2021 and the desiccated coconut price also increased marginally by 0.3 percent to Rs. 538.75 per kg in 2022 from Rs. 537.25 per kg in 2021. The total export volume of desiccated coconut, coconut oil, and copra recorded a significant growth in 2022, reflecting the favourable support from the increased domestic production.

Minor export crops

In value added terms, minor export crop sub-sector grew by 3.3 percent in 2022 from 4.5 percent growth in 2021 despite the issues in domestic supply chains and fertilizer shortages. Production of minor export agricultural crops increased notably by 30.6 percent to 186,962 metric tons in 2022 from 143,165 metric tons in 2021 with the increase in production of spices such as cinnamon, clove, cardamom, coffee, cocoa, nutmeg, areca nut and betel leaves.

The total export volume of the minor export crops recorded a contraction of 7.0 percent, while export earnings in rupee terms, increased notably by 44.8 percent in 2022. The earnings from cinnamon exports increased significantly by 50.1 percent in 2022 while contributing largely to the growth of export earnings from export agricultural crops. Geographical Indication (GI) certification was also obtained for Ceylon cinnamon from the European Union Commission (EUC) in 2022. Measures were undertaken by the Government to enhance the quality of export agricultural crops by introducing Good Agricultural Practices (GAP) and Good Manufacturing Practices (GMP).

* Including Re-export

Other crops

In value added terms, cereals (excluding rice) sub-sector contracted significantly by 21.6 percent in 2022 compared to the positive growth of 2.8 percent in 2021 mainly due to the shortage of fertilizer and agrochemicals in the market. The overall production of other field crops decreased by 37.5 percent in 2022 to 526,803 metric tons and the impact was largely mitigated through imports. Maize production declined significantly by 45.2 percent to 259,040 metric tons during 2022 and as a result, importation of maize increased to 190,686 metric tons to cater the demand of the animal feed industry. Potato production declined by 37.3 percent to 47,614 metric tons in 2022, while potato imports increased by 31.8 percent compared to previous year. Big onion production also declined significantly by 73.0 percent to 17,799 metric tons in 2022 and importation of big onions increased by 2.5 percent to 263,781 metric tons in 2022.

Production of vegetables also declined by 4.9 percent to 1,588,256 metric tons in 2022, compared to 1,669,515 metric tons recorded in 2021. Prices of vegetables also remained elevated during 2022 due to low production and transitory supply chain disruptions caused by fuel shortages during the year. In 2022, production of fruits declined by 26.9 percent compared to the previous year, with significant drop in the production of orange, lime, rambutan, avocado and melon, while mango, papaya, banana and pineapple recorded increases in production. With the increased production, 41,526 metric tons of fruits, including banana and papaw worth USD 37.6 million were exported whereas 32,591 metric tons of fruits worth USD 42.2 million were imported during 2022.

Livestock

In value-added terms, the animal production sub-sector contracted by 12.9 percent in 2022, compared to 8.2 percent increase in 2021. The total milk production declined by 1.3 percent to 506 million litres in 2022, compared to 513 million litres recorded in 2021 due to the scarcity and high cost of animal feeds, unavailability of required chemical fertilizers for pasture and fodder cultivation and difficulties in storage and transportation facilities. The poultry sector also experienced a setback during 2022 due to the inadequate feed material for poultry rearing and reductions in domestically produced feed ingredients. As a result, egg production declined by 5.4 percent to 1,849 million eggs in 2022, compared to 1,954 million eggs produced in 2021. Meanwhile, chicken production also declined by 3.7 percent to 228,130 metric tons in 2022 from 236,790 metric tons in 2021.

Marine and inland fishing

The total fish production declined by 8.9 percent to 397,230 metric tons in 2022 due to the disruptions caused by domestic fuel shortages particularly in marine fishing activities. Accordingly, in value-added terms, the marine fishing and marine aquaculture sub-sector contracted by 15.4 percent in 2022 from 1.4 percent growth recorded in 2021. However, in value added terms, the fresh water fishing and fresh water aquaculture sub-sector recorded a significant growth of 11.9 percent in 2022 compared to the moderate growth of 2.4 percent recorded in 2021 due to the proper management of the water bodies and increased fingerling stocking in reservoirs.

Industry Sector

In value added terms, industry sector contracted significantly by 16.0 percent in 2022, compared to the growth of 5.7 percent recorded in 2021 mainly due to the contraction of construction activities, mining and quarrying activities and manufacturing activities except for textiles, wearing apparel and leather related products. The prolonged energy crisis, shortage of key raw materials and the subdued demand conditions hampered the overall

performance of industry activities during the year. However, manufacturing of textiles, wearing apparel and leather related products, sewerage, waste treatment and disposal activities and water collection, treatment and supply activities expanded during 2022.

Figure 2.4 | Industry Sector Composition – 2022

Source: Department of Census and Statistics

Mining and quarrying

Mining and quarrying activities contracted significantly by 31.0 percent in 2022, in value-added terms, compared to the growth of 1.4 percent in 2021. These activities comprised mainly the mining activities that provide inputs to construction activities, such as sand mining. Reflecting the setback in gem mining, gem for the export volumes recorded a decline of 8.9 percent in 2022.

Manufacturing

In value added terms, the overall manufacturing activities contracted by 12.6 percent in 2022, compared to the 7.4 percent growth recorded in 2021. All the manufacturing activities except for the sub-sector of manufacturing textiles, wearing apparel and leather related products which is largely resilient to domestic shocks, contracted during 2022. Adverse impact of extended power cuts, shortages of fuel and key raw materials, logistic issues and subdued demand conditions were the major reasons for the poor performance of these manufacturing activities.

The manufacture of food, beverages and tobacco products, which is the largest contributor to the overall manufacturing activities, contracted substantially by 14.2 percent in 2022, compared to the growth of 3.4 percent recorded in 2021.

The manufacturing of textiles, wearing apparel and leather related products, which is the second largest contributor to the manufacturing activities, grew by 8.1 percent in 2022. The adverse implications of import restrictions, logistics issues and power outages on the wearing apparel sector were largely offset by policy decisions initiated by the Government such as providing tariff concessions for several raw material imports during the period under review.

Other manufacturing activities also contracted in 2022, compared to 2021 including other non-metallic mineral products (29.0 percent); rubber and plastic products (30.7 percent); basic metals and fabricated metal products (27.6 percent); furniture (26.4 percent); machinery and equipment (19.0 percent); chemical products and basic pharmaceutical products (14.0 percent); coke and refined petroleum products (58.2 percent); wood and wood products (16.4 percent); paper products (8.3 percent) and other manufacturing (21.7 percent). The electricity, gas, steam and air conditioning supply sub-sector recorded a negative growth of 5.9 percent in 2022, compared to the growth of 4.9 percent in 2021 due to the overall setback in Industry activities.

^(a) Provisional

Construction

In value added terms, the construction industry contracted significantly by 20.9 percent in 2022, compared to a 4.4 percent growth in 2021 due to both supply and demand side impediments. Shortages of raw materials and fuel, soaring input cost, lack of supplier credit and overdue payments on completed projects, led the supply side issues in the construction activities. Demand side turbulences were stemmed from the suspension of government-funded projects and the high interest rates.

The total cement availability of the country recorded a significant drop of 35.9 percent in 2022, compared to the marginal decline of 0.8 percent recorded in 2021. Building material imports also declined substantially by 35.8 percent in 2022, compared to 4.7 percent growth in 2021. Further, credit to the private sector granted by Licensed Commercial Banks for personal housing constructions also recorded a contraction as at end-December 2022.

Services Sector

In value added terms, services sector contracted by 2.0 percent in 2022, compared to the growth of 3.5 percent recorded in 2021 due to the negative growth recorded in real estate activities, insurance services, financial services, human health activities, professional services, IT programming, programming and broadcasting and wholesale and retail trade activities. Services activities were largely affected by the prolonged energy crisis, limited availability of goods and high inflation. However, accommodation, food and beverage service activities, transportation, telecommunication, education, public administration, other personal service activities and postal and courier service activities recorded a positive growth during the year.

Wholesale and retail trade

In value added terms, wholesale and retail trade activities contracted marginally by 0.2 percent in 2022, compared to 1.5 percent growth recorded in 2021 due to supply side impediments and subdued demand conditions. Declined local production, lower volume of imports due to import restrictions and shortage of fuel supply adversely affected the trade activities throughout the year. High inflationary pressure, increase in utility tariffs and high interest rates led to subdued demand conditions in the latter part of the year.

Transportation of goods and passengers

In value added terms, the transport sub-sector expanded by 3.5 percent in 2022, compared to the marginal increase of 0.9 percent in 2021 mainly due to the post pandemic recovery. The passenger kilometres operated by the Sri Lanka Transport Board, private bus operators and Sri Lanka Railways increased significantly in 2022, reflecting the increased demand for public transportation modes amidst significantly higher fuel costs and preferential supply of fuel for public transportation. Passenger kilometers flown by Sri Lankan Airlines also improved gradually due to the recovery of tourism activities. However, container handling and cargo handling activities contracted during the year, mainly due to the slowdown in global trade volumes.

Accommodation, food and beverage service activities

In value added terms, accommodation, food and beverage service activities expanded substantially by 27.0 percent in 2022, compared to the marginal increase of 1.7 percent recorded in 2021 due to the significant increase in tourist arrivals. As a result of introducing exclusive packages for the tourists along with the depreciation of the local currency made Sri Lanka more attractive as a holiday destination for foreign tourists. However, the exaggerated negative portrayal of the Sri Lankan economic crisis hindered the growth potential of the tourism industry during the year.

Financial, insurance and real estate activities

In value added terms, financial, insurance, and real estate activities including ownership of dwellings, contracted by 15.4 percent in 2022, compared to 7.5 percent growth in 2021, due to contractions reported in all three activities. Lower demand for credit caused by high interest rates, inflationary pressure together with lack of willingness to lend due to lower repayment capacity hampered the performance of the financial and real estate activities. Accordingly, financial and auxiliary financial activities declined by 11.0 percent in 2022, compared to 7.0 percent growth recorded in 2021. Real estate activities including ownership of dwelling contracted by 12.1 percent during 2022 compared to 4.4 percent growth recorded in 2021. Due to subdued performance in pension funding activities, insurance, reinsurance and pension funding activities contracted significantly by 47.2 percent in 2022 compared to the growth of 26.4 percent recorded in 2021.

Other service activities

The value-added telecommunication activities grew at a slower rate of 3.1 percent in 2022, compared to the significant growth of 14.2 percent recorded in 2021 due to subdued demand resulted from high inflationary pressures. IT programming, consultancy and related activities contracted by 2.3 percent in 2022, compared to the significant growth of 25.2 percent recorded in 2021 due to slowdown in global demand and prolonged power cuts which prevailed during the period.

In 2022, professional services and programming and broadcasting activities contracted by 4.0 percent and 11.0 percent, respectively. Human health activities also contracted by 8.4 percent in 2022 compared to the 5.6 percent growth recorded in 2021 which was a year affected by the COVID-19 pandemic. However, education, public administration and defense, other personal services and postal and courier services contributed positively to the overall economic growth in 2022.

Domestic demand and consumption

Domestic demand comprising of consumption and investment expenditure of the country expanded significantly by 32.3 percent to Rs. 25,005 billion at current market prices in 2022, compared to the total demand of Rs. 18,901 billion recorded in 2021 mainly due to the elevated price levels prevailed during the year.

Export of goods and services increased by 74.1 percent to Rs. 5,188 billion in 2022, compared to Rs. 2,980 billion in 2021 benefitting from the sharp depreciation of the Sri Lanka rupee against currencies of major export destinations. The import of goods and services increased by 41.2 percent to Rs. 6,045 billion in 2022, compared to Rs. 4,281 billion in 2021. The comparatively slower growth in imports was largely attributable to the decline in import volumes due to import restrictions and foreign exchange liquidity shortage. Accordingly, the net external demand

at current prices improved significantly by 34.1 percent in 2022, compared to the contraction of 34.7 percent recorded in 2021.

The total consumption grew substantially by 34.3 percent to Rs. 16,701 billion at current market prices in 2022 compared to 8.4 percent growth recorded in 2021 which was largely attributable to the surge in consumer prices. Private consumption which accounted for 89.7 percent of total consumption, substantially grew by 39.0 percent at current market prices in 2022 compared to 9.4 percent growth recorded in 2021 due to inflated prices. In this regard, significant contributions were observed from the major private consumption categories such as food and non-alcoholic beverages and transport which grew by 25.9 percent and 69.8 percent, respectively in 2022. The government consumption grew moderately by 3.8 percent in 2022 at current market prices, compared to the growth of 2.3 percent in 2021 contributing to the total consumption growth.

Investment and savings

Investment expenditure at current market prices grew by 28.4 percent to Rs. 8,305 billion in 2022 compared to 25.1 percent growth in 2021 reflecting the notable price hikes of investment goods. The shortage in foreign exchange, the sharp depreciation in the local currency and high interest rates were attributable for the elevation in prices of investment goods. Reflecting the increased prices of construction material, machinery and equipment, the gross fixed capital formation at current market prices grew by 21.9 percent in 2022 compared to the 15.8 percent growth recorded in 2021. Further, the Foreign Direct Investments (FDIs) increased significantly by 37.9 percent to USD 1,075.6 million in 2022, compared to USD 780.2 million in 2021. FDIs to infrastructure and manufacturing sectors which accounted for about 54.0 percent and 34.0 percent of total

FDI inflows, respectively, contributed to the overall growth in FDIs in 2022. The total value of projects approved by the BOI during 2022 was estimated at Rs. 546.4 billion, recording a growth of 6.3 percent compared to Rs. 514.1 billion recorded in 2021.

The significant growth of domestic savings by 44.2 percent in 2022 compared to the 22.9 percent growth recorded in 2021 was driven by the increase in private savings during the year. As a result, domestic savings as a percentage of GDP increased to 30.8 percent in 2022, compared to 29.4 percent recorded in 2021. However, in rupee terms, net primary income from the rest of the world contracted substantially by 57.1 percent in 2022 while net current transfers from rest of the world grew by 12.1 percent during the year. National savings recorded a growth of 37.6 percent in 2022, which was 33.1 percent of the GDP.

2.3 External Sector

In 2022, Sri Lanka's external sector faced numerous headwinds with the pressures on the balance of payments, depletion of GOR and the decline in inflows from workers' remittances amidst continuous disruptions in the foreign exchange market. Earnings from exports significantly increased by 4.9 percent to USD 13,106 million in 2022 surpassing the previous highest recorded amount of USD 12,499 million in 2021 owing to the increased earnings from industrial exports. Meanwhile, import expenditure considerably declined by 11.4 percent to USD 18,291 million in 2022 from USD 20,637 million in 2021 due to the implementation of import control measures such as imposing margin deposit requirements

against selected imports and curtailing non-urgent imports. However, this margin deposit requirement has been revoked effective from May 18, 2023. As a result, the trade deficit contracted by 36.3 percent to USD 5,184.6 million in 2022, compared to USD 8,138.8 million in 2021.

^(a) Revised^(b) Provisional

The external current account deficit narrowed to 1.9 percent of the GDP in 2022 from 3.7 percent of GDP in 2021 mainly due to the contraction in the trade deficit and improvement in trade in services. Accordingly, the current account deficit in the external sector contracted to USD 1.5 billion in 2022 from USD 3.3 billion in 2021.

The services account surplus increased to USD 2.1 billion from USD 1.6 billion in 2021 with the increased earnings from the tourism sector while subdued performances were recorded from air and sea freight transportation and the IT/BPO sector. The primary income account deficit slightly contracted to USD 1,874 million in 2022 from USD 1,959 million in 2021 with the higher interest income to the banking sector. The financial account deficit was recorded as USD 1.9 billion in 2022 compared to USD 4.2 billion in 2021 with modest inflows to the financial account.

Figure 2.6 | Growth in Exports & Imports and Trade Balance (Quarterly)

Source: Central Bank of Sri Lanka

The cumulative net inflow of USD 51 million was recorded from foreign investments in the government securities market in 2022. External debt service payments were USD 2,471 million in 2022 compared to USD 4,597 million in 2021. However, external debt service payments for bilateral creditors were temporarily suspended by the Government from mid-April 2022. The government was involved in a debt restructuring process and conducted negotiations with the IMF and other development partners such as Asian Development Bank (ADB) and the World Bank (WB) for a financing arrangements. Followed by successful negotiations, in September 2022 a staff level agreement was reached between the authorities of Sri Lanka and staff of the IMF for an Extended Fund Facility (EFF). Accordingly, the IMF Board approved a 48 month arrangement under the EFF which amounted to approximately USD 3 billion in March 2023.

The tourism sector demonstrated recovery signs with the increased tourist arrivals since the latter part of 2021 and recorded its peak in March 2022. GOR dropped to USD 1,898 million at the end of December 2022 compared to USD 3,139 million recorded as at the end of December 2021 due to the decreased liquidity in the domestic foreign exchange market and declined foreign financing sources. GOR included an international swap facility from

the Peoples' Bank of China (PBOC) amounted to around USD 1.4 billion which is subject to conditionalities on its usability. The total foreign assets of the country were equivalent to 3.9 months of imports as at the end of December 2022 compared to 3.6 months of imports by the end 2021. During the first half of 2022, Sri Lanka rupee demonstrated historically largest depreciation against the US dollar and the annual depreciation of the rupee was recorded as 44.8 percent against the US dollar in 2022.

Exports

Earnings from exports increased by 4.9 percent to USD 13,106.4 million in 2022, compared to USD 12,498.6 million in 2021 surpassing the highest export earnings recorded in 2021 due to the increased earnings from Industrial exports including textiles and garments, gems, diamonds and jewellery, machinery and mechanical appliances and petroleum products. Export earnings as a percentage of GDP increased to 17.0 percent in 2022 from 14.1

percent in 2021. This was due to the increased industrial and mineral export earnings despite the declining earning from agricultural exports, with the favorable exchange rate and the rise of global commodity prices. Accordingly, industrial exports earning grew by 7.9 percent to USD 10,465.3 million, mineral exports earnings grew by 12.3 percent to USD 50.0 million while agricultural exports declined by 5.9 percent to USD 2,568.0 million. Textile and garments, tea and rubber products were the highest contributors to the export earnings in 2022.

Figure 2.10 | Total Exports and Textile & Garments Exports

Source: Central Bank of Sri Lanka

Industrial export earnings, which share 79.8 percent of the total exports, grew by 7.9 percent to USD 10,465.3 million in 2022 compared to USD 9,702.1 million in 2021. The increased earnings from textiles and garments by 9.5 percent to USD 5,952.0 million, gems, diamonds and jewellery by 62.8 percent to USD 450.6 million, machinery and mechanical appliances by 16.0 percent to USD 580.9 million and petroleum products by 12.2 percent to USD 568.0 million were attributed to this surge. Meanwhile, mineral export earnings recorded an increase of 12.3 percent to USD 50.0 million and unclassified exports earnings recorded an increase of 2.6 percent to USD 23.2 million in 2022.

However, earnings from agricultural exports declined by 5.9 percent to USD 2,568.0 million in 2022 from USD 2,729.5 million in 2021 with the drop in earnings from tea, rubber, coconut, spices, vegetables and unmanufactured tobacco. Export earnings from tea declined by

5.0 percent to USD 1,258.8 million in 2022 from USD 1,324.4 million in 2021 with the decreased tea export volumes despite the higher average export tea prices. Export earnings from coconut-related products declined by 5.9 percent to USD 400.3 million owing to lower kernel export prices.

Imports

Total import expenditure declined notably by 11.4 percent to USD 18,291.0 million in 2022, compared to USD 20,637.4 million in 2021 with the declined demand, depreciation of the exchange rate, import restriction imposed for non-urgent imports despite the higher global oil prices. The decline in import expenditure on consumer goods and investment goods mainly contributed to this decline. Import expenditure as a percentage of GDP increased slightly to 23.7 percent in 2022 from 23.3 percent of GDP in 2021.

Import expenditure on consumer goods declined by 26.9 percent to USD 2,813.0 million in 2022 compared to USD 3,848.7 million in 2021 due to the decline in imports expenditure of both food and beverages and non-food consumer goods categories. Import expenditure on food and beverages dropped by 3.5 percent to USD 1,607.9 million in 2022 from USD 1,666.5 million in 2021, due to the lower import volumes despite increased global food prices. Accordingly, declined import expenditure was recorded from dairy products, vegetables, sugar and confectionery, lentils and seafoods. Expenditure on non-food consumer goods dropped by 44.8 percent to USD 1,205.1 million in 2022 due to the decrease in import expenditure of medical and pharmaceuticals, telecommunication devices, home appliances, household and furniture items, clothing and accessories and personal vehicles.

Meanwhile, Import expenditure on intermediate goods, which contributed 68.0 percent of the total imports, grew by 1.1 percent to USD 12,438.8 million in 2022 from USD 12,308.9 million in 2021, mainly due to increased expenditure on imports of fuel, diamonds, precious stones and metals and fertilizer. Expenditure on fuel imports increased by 30.8 percent to USD 4,896.8 million with the higher average import prices of crude oil, refined petroleum and coal despite the decrease in import volumes. Import expenditure on fertilizer significantly increased by 74.4 percent to USD 275.9 million in 2022 from USD 158.2 million in 2021 due to the increase in average import prices amidst low import volumes.

Import expenditure on investment goods declined by 32.1 percent to USD 3,030.5 million in 2022 from USD 4,462.7 million in 2021, due to the drop of import expenditure in machinery and equipment, building materials, transport equipment and other investment goods with the measures implemented to prioritise essential imports. Import expenditure of machinery and equipment dropped by 29.9 percent to USD 1,969.0 million due to the decline in imports expenditure on office machines, machinery and equipment parts and telecommunication devices. Meanwhile, import expenditure on building materials dropped by 25.8 percent to USD 926.3 million owing to declined import expenditure recorded from Iron and steel, cement, and mineral products. Expenditure on transport equipment decreased by 66.8 percent to USD 132.1 million with the decreased import expenditure on agricultural tractors, tankers and bowsers and railway equipment.

Earnings from Tourism

The tourism industry recorded a steady recovery during 2022 despite the significant headwinds due to heightened social tensions, fuel shortages and power outages. This recovery was largely supported by high global vaccination rates, increased air connectivity together with the lifting of travel restrictions issued by major source countries. Accordingly, tourist arrivals increased significantly to 719,978 in during 2022 from 194,495 recorded in 2021. Tourist arrivals from across all major regions increased in 2022 compared to 2021. Europe was the largest source region of tourist arrivals to Sri Lanka accounting for 60 percent of total tourist arrivals, amounting to 432,226 tourists. India was the largest single country of tourist arrivals with 123,004 arrivals accounting for

about 17 percent of total arrivals. Reflecting the improvement in tourist arrivals, earnings from tourism in 2022 increased significantly to USD 1,136.3 million, compared to USD 506.9 million in 2021, recording a considerable annual growth of 124.2 percent.

Workers' remittances

Workers' remittances declined substantially by 31.0 percent to USD 3,789.5 million in 2022, compared to USD 5,491.5 million in 2021 possibly due to the receipts of remittances through informal channels. As such, the Government introduced several incentives among which the CBSL introduced a national remittance mobile application branded as "Lanka Remit" which launched in February 2022, enabling migrant workers to have direct access to the

existing remittance channels of banking and other formal financial institutions. Meanwhile, due to the migration of 311,056 Sri Lankan workers in the latter part of 2022, workers' remittances revived in the second half of 2022, but remained low, compared to 2021. However, it is timely to promote alternative destinations offering employment for a wide range of job categories with high wage potential to increase the workers' remittances while reducing geopolitically driven vulnerabilities of remittance receipts.

^(a) Revised^(b) Provisional^(c) Includes additional components in the financial account based on BPM 6 new classification from 2012 onwards

2.4 Monetary Sector Developments

The Central Bank continued its tight monetary policy stance throughout 2022 along with other supportive policy measures to contain rising inflationary pressures, address vulnerabilities in the external sector and anchor inflation expectations to prevent possible hyperinflation and prolonged loss of economic activity. Standing Deposit Facility Rate (SDFR) and Standing Lending Facility Rate (SLFR) which were increased by 50 basis points to 5.5 percent and 6.5 percent, respectively in January 20, 2022 were further increased by 100 basis points to 6.5 percent and 7.5 percent, respectively in March 04, 2022. Sharp depreciation of the Sri Lanka rupee during March 2022 resulted in significant inflationary pressures compelling the Central Bank to raise the policy interest rates further. Accordingly, SDFR and SLFR which were increased by 700 basis points to 13.5 percent and 14.5 percent, respectively in April 08, 2022 were further increased by 100 basis points to 14.5 percent and 15.5 percent, respectively in July 07, 2022. Aggressive monetary tightening measures adopted by the Central Bank from April 2022 helped manage demand driven inflationary pressures and thereby preempting the escalation of adverse inflationary expectations, easing the pressure on the external sector and correcting anomalies observed in the market interest rate structure.

The deposits of Licensed Commercial Banks (LCBs) recorded a marginal increase during the year with SRR remaining unchanged at 4.0 percent during 2022. The Central Bank continued to maintain its tightened monetary policy stance thus far in 2023 by increasing the SDFR and SLFR to 15.5 percent and 16.5 percent, respectively in March 03, 2023 by 100 basis points to ensure that underlying inflation and inflation expectations remain sufficiently restrained.

Figure 2.12 | Reserve Money and Private Sector Credit Growth

Source: Central Bank of Sri Lanka

Figure 2.13 | Private Sector Credit Growth and Trade Deficit

Source: Central Bank of Sri Lanka

Due to the tight liquidity conditions and continuation of tight monetary policy stance, the Average Weighted Call Money Rate (AWCMR) remained around the upper bound of the Standing Rate Corridor (SRC) at the beginning of 2022 and touched the upper bound of SRC as a result of continuing large liquidity deficit of the banking system. AWCMR rose by 9.55 percentage points in 2022 in response to the cumulative adjustment in the policy interest rates during the year. AWCMR recorded a marginal reduction from the upper bound of SRC in mid-January 2023 onwards. However, with the increase in policy interest rates in March 2023, AWCMR increased to 16.46 percent as of March 07, 2023 and remained around the upper bound of SRC by end of March 2023. In response to the tightened monetary and liquidity conditions, market lending interest rates also increased notably during 2022. Accordingly, the Average Weighted Lending Rate (AWLR) increased by around 9 percentage points to 18.70 percent by end 2022, while the monthly Average Weighted Prime Lending Rate

(AWPLR) peaked at 28.25 percent in November 2022. Meanwhile, in order to retain existing deposits and promote new deposits owing to the substantial increase in policy rates and yields on government securities, banks offered

high interest rates for novel deposit products. Accordingly, the Average Weighted Deposit Rate (AWDR) increased to 14.06 percent at the end of 2022.

^(a) Based on the Quarterly Survey of Commercial Banks' Loans and Advances to the Private Sector which includes loans and advances of both DBUs and OBUs of commercial banks.

^(b) Includes loans, overdrafts, bills discounted and purchased and excludes cash items in the process of collection

^(c) Provisional

^(d) Excludes personal housing loans, which have been included under 'Construction' classified under 'Industry' and includes Safety Net Scheme related loans.

Credit to the Small and Medium Enterprise (SME) sector contracted by 8.3 percent by end 2022, compared to the growth of 21.7 percent at end 2021, mainly due to the significant increase in interest rates applicable on loans to the SME sector, subdued aggregate demand conditions and limited availability of raw materials for certain industries among other factors. Credit to the private sector increased moderately by 6.2 percent to Rs. 7,414 billion at the end of 2022 from Rs. 6,981 billion at the end of 2021 reflecting the tight monetary conditions and

the moderation of overall economic activity amidst unprecedented economic crisis. Meanwhile, Net credit to the government increased by 28.1 percent to Rs. 7,471 billion at the end of 2022 from Rs. 5,832 billion at the end of 2021 driven mainly by the Central Bank. The year-on-year growth of broad money supply (M_2b) moderated to 15.4 percent by end 2022. The growth of (M_2b) which accelerated notably in early 2022 to 20.0 percent by end April 2022 decelerated from May 2022.

Employment and Unemployment

The total employed population in the country increased to 8.148 million in 2022 compared to 8.114 million in 2021 mainly due to the increase of employment in industry and service activities despite the reduction in employment in agriculture activities. Accordingly, employment in Industry sector activities increased to 2.158 million in 2022 from 2.109 million in the previous year, while employment in service sector activities increased to 3.831 million in 2022 from 3.791 million in 2021. However, employment in Agriculture sector activities declined to 2.159 million in 2022 from 2.213 million in 2021. Accordingly, the shares of employment in Industry and Services sector increased to 26.5 percent and 47.0 percent, respectively, in 2022 from 26.0 percent and 46.7 percent in 2021, while the share of employment in agriculture sector declined to 26.5 percent in 2022 from 27.3 percent in 2021.

Meanwhile, public sector employees, own account workers and contributing family workers decreased in 2022 compared to 2021, whereas the private sector employees increased. Private sector also continued to remain as the major employment generator representing the largest share of 42.9 percent of the total employment during 2022. The total employment in the public sector at the end of 2022 was reduced to 1.394 million from 1.401 million recorded in 2021 mainly due to the curtailment of new recruitments to the public sector and reduction of employment in State Owned Enterprises (SOEs).

Showing a significant recovery of the economy from the pandemic, the unemployed population declined to 399,000 in 2022 from 440,000 in 2021. The unemployment rate declined significantly to 4.7 percent in 2022 from 5.1 percent in 2021. The female unemployment rate declined notably to 6.5 percent in 2022 from 7.9 percent in 2021 while the male unemployment rate remained unchanged at 3.7 percent in 2022. The unemployment rate among GCE A/L and above education category dropped significantly to 7.8 percent in 2022 from 9.1 percent in 2021. The unemployment rate of youth (15–24 years) also declined considerably to 22.8 percent in 2022 from 26.5 percent recorded in 2021. The significant increase in departures for foreign employment in 2022

was partially due to the economic hardship that prevailed in the country during the year. The departures for foreign employment increased substantially by 154.4 percent to 311,056 in 2022 from 122,264 in 2021. Despite the decline in overall unemployment rates, Labour Force Participation Rate (LFPR) decreased marginally to 49.8 percent in 2022, compared to 49.9 percent in 2021 in line with the increase in household population. The female LFPR increased to 32.1 percent in 2022 from 31.8 percent in 2021 while the male LFPR dropped to 70.5 percent in 2022 from 71.0 percent in 2021 which has warranted for labour market reform to increase female LFPR.

Inflation

Headline inflation, as measured by the year-on-year change in the Colombo Consumer Price Index (CCPI, 2013=100) sharply increased to 69.8 percent in September 2022 from 12.1 percent in December 2021 before declining moderately to 57.2 percent in December 2022. The increase in headline inflation was mainly due to the supply side disruptions including notable price hikes in food commodities, sharp depreciation of the Sri Lanka rupee, subsequent adjustments in energy and transport prices and aggregate demand pressures due to the lagged impact of monetary accommodation during the past few years. As measured by the year-on-year change in the CCPI (2021=100), the declining trend of headline inflation further continued during 2023 and decreased sharply to 25.2 percent in May 2023. Year-on-year headline inflation as measured by the National Consumer Price Index (NCPI, 2013=100) peaked at 73.7 percent in September 2022 from 14.0 percent in December 2021 and declined to 59.2 percent in December 2022. As measured by the year-on-year change in the NCPI (2021=100), the declining trend of headline inflation further continued during 2023 and decreased sharply to 33.6 percent in April 2023. Annual average inflation based on the CCPI (2013=100), increased sharply to 46.4 percent in 2022 from 6.0 percent in 2021 while the annual average inflation based on the NCPI (2013=100), soared to 50.4 percent in 2022, compared to 7.0 percent in 2021.

Core inflation, which reflects the underlying inflation in the economy, also began to rise significantly during nine months ending 2022, mainly due to the lagged impact of monetary accommodation in the past, price hikes in imported goods and increase in costs of some non-food categories and moderated thereafter. The decreasing trend of core inflation was slower than that of headline inflation due to exclusion of volatile food and energy components from the measurement of core inflation. Year-on-year core inflation as measured by the movements in CCPI (2013=100) rose from 8.3 percent in December 2021 to 50.2 percent in September 2022 and moderated to 47.7 percent in December 2022. Year-on-year core inflation as measured by the movements in NCPI (2013=100) also shown a similar trend increasing sharply from 10.8 percent in December 2021 to 64.1 percent in September 2022 and moderated to 57.5 percent in December 2022. Meanwhile, year-on-year core inflation as measured by the movements in CCPI (2021=100) decreased to 20.3 percent in May 2023 and year-on-year core inflation as measured by the movements in NCPI (2021=100) decreased to 31.8 percent in April 2023. Annual average core inflation based on the CCPI (2013=100) increased sharply to 34.6 percent in 2022 from 4.4 percent recorded in 2021 while the annual average core inflation based on the NCPI (2013=100) increased sharply to 43.9 percent in 2022 from 5.5 percent recorded in 2021.

Note: 2020 January – 2023 January based on CCPI (2013=100) and 2023 February – May based on CCPI (2021=100)

Equity Market Developments

Amidst the adverse macroeconomic developments, the equity market recorded a subdued performance in terms of price indices, market capitalization and annual average turnover during 2022 while a significant volatility in price indices was further observed. The All Share Price Index (ASPI) recorded the historically highest value of 13,462.4 points on January 19, 2022 and thereafter the indices witnessed a declining trend since early February 2022. Accordingly, the ASPI dropped to 8,490 points while the Standard & Poor's Sri Lanka 20 (S&P SL20) index which represents the top and the most liquid stocks, dropped to 2,636 points at end of 2022 while the ASPI and S&P SL 20 index contracted by 30.6 percent and 37.7 percent respectively, during 2022.

Meanwhile, market capitalization declined by 29.9 percent to Rs. 3,847 billion as at end 2022 from Rs. 5,489 billion as at end 2021 and the share of market capitalization as a percentage of GDP declined to 15.9 percent as at end 2022 compared to 31.2 percent as at end 2021.

The Colombo Stock Exchange (CSE) recorded an annual average turnover of Rs. 687 billion in 2022, which was a significant decline compared to Rs. 1,173 billion recorded in 2021. The listed companies trading under the Colombo Stock Exchange also decreased to 290 in 2022, compared to 296 in 2021.

Foreign sales fell substantially by 57.5 percent to Rs. 36,863 million in 2022, compared to Rs. 86,689 million in 2021 while foreign purchases increased considerably by 71.2 percent to Rs. 67,488 million in 2022, compared to Rs. 39,410 million in 2021. Accordingly, net foreign inflows witnessed a significant improvement during 2022 owing to foreign investment attracted by a few major companies. Accordingly, the net foreign inflows recorded Rs. 30.6 billion during 2022 compared to an outflow of Rs. 52.6 billion recorded in 2021.

03

Global Economic Developments

3.1 Overview¹

The world economy demonstrated a sign of recovery in 2022 with a decline in inflation from the peak and moderate economic growth. However, the outlook is gloomy with the intensified financial turmoil, the lagged effect of the COVID-19 pandemic, and the ramification effect of the Russia-Ukraine conflict, particularly on the global supply chain. In 2022, many economies were on the surge of high inflation hit across sectors of the economies emanating from the increased demand, supply disruptions, and commodity price hikes. As a result, the central banks have tightened their monetary policy stances by increasing policy rates to suppress inflation. The rise in policy rates has made financial sector vulnerable in bank and non-banking sectors. In addition, the debt levels rose to unsustainable levels in many developing countries posing fiscal challenges to manage their fiscal parameters. Meanwhile, benefiting from the improved global supply chain, particularly in China, the rise in commodity prices moderated in 2022 despite the ongoing Russia-Ukraine conflict.

The global economic growth was 3.4 percent in 2022 and it is expected to decline to 2.8 percent in 2023 and 3.0 percent in 2024. Meanwhile, global inflation is expected to decline to 7.0 percent in 2023 from 8.7 percent in 2022 and further to 4.9 percent in 2024. These developments demonstrated that structural changes are a prerequisite to bringing the economies to pre-pandemic levels.

The economic growth of advanced economies is predicted to decline to 1.3 percent in 2023, from 2.7 percent in 2022 before slightly increasing to 1.4 percent in 2024. This decline is mainly attributable to the expected slowdown in the Euro area with a mere growth rate of 0.7 percent and the contraction of growth of 4.0 percent in the United Kingdom in 2023. In contrast, emerging markets and developing economies are expected to experience higher growth, averaging 4.5 percent in 2023 and 4.4 percent in 2024 from 2.8 percent in 2022.

¹ Based on World Economic Outlook (April 2023, IMF), Fiscal Monitor (April 2023, IMF), Global Financial Stability Report (April 2023, IMF), Commodity Markets Outlook (April 2023, IMF), Global Economic Prospects (January 2023, World Bank) and other data and information from IMF, World Bank and the Worldwide Web.

Emerging and developing Asian economies are also expected to experience positive growth of 5.3 percent in 2023 and 5.1 percent in 2024. The reopening of the Chinese economy is also expected to have positive spillover effects with a growth of 5.2 percent in 2023 from 3.0 percent in 2022 before slightly decreasing to 4.5 percent in 2024.

The global economic outlook is forecast to be volatile and toward the downside stemming from the financial stresses which have forced central banks to increase their policy rates. This has been further aggravated by the sovereign debt crisis. Also, capital inflows have been disrupted generating large disparity in growth in the world which has been further intensified with the geo-political tensions, particularly in Russia and Ukraine. The exerted pressures on food and energy prices have compelled the central banks to tighten their monetary policy stances despite the status of developments. As such, many countries use both monetary and fiscal policy tightening measures to minimize possible risks emanating from the vulnerabilities of the financial sector and the high cost of living. Debt sustainability is needed to be addressed through aggressive revenue-based fiscal consolidation measures, which are also important for debt restructuring endeavours in countries such as Sri Lanka where debt is highly unsustainable.

3.2 World Output

In 2022, despite the persistent impact of the global pandemic and the difficulties faced by various spheres of the economy, countries demonstrated resilience and adaptability, leading to a notable recovery.

Global output grew by 3.4 percent in 2022 from 6.3 percent in 2021. Advanced economies also witnessed a slowdown in growth, with a growth rate of 2.7 percent in 2022 compared to 5.4 percent in 2021. This was primarily driven by a drop in growth rate in the United States, which declined to 2.1 percent in 2022 from 5.9 percent in 2021, and in the Euro area, which fell to 3.5 percent in 2022 from 5.4 percent in 2021. A notable decline in growth was recorded in Hong Kong SAR (-3.5 percent) and Macao SAR (-26.8 percent) in 2022. The growth rate recorded in Spain remained unchanged at 5.5

percent in 2021 and 2022. In the same vein, the growth of Emerging Market and Developing Economies (EMDEs) declined to 4.0 percent in 2022, compared to a higher growth rate of 6.9 percent recorded in 2021. However, the growth prospects for EMDEs remain stronger than those of advanced economies. The economic growth in South Asian economies expanded in 2022 except for Sri Lanka. India, Bangladesh, Maldives, Bhutan, Nepal, and Pakistan recorded growth rate of 9.1 percent, 7.1 percent, 4.3 percent, 5.8 percent, and 6.0 percent, respectively in 2022. However, the Sri Lankan economy contracted by 7.8 percent in 2022.

Despite high uncertainties, the growth forecasts for advanced economies are slightly more optimistic than previous forecasts. In 2023, most of the advanced economies are expected to demonstrate positive growth, except for the expected contraction of Germany and the United Kingdom by 0.1 percent and 0.3 percent, respectively. The growth rates for EMDEs are projected to be 3.9 percent in 2023 and 4.2 percent in 2024. Emerging Asia, which includes China and India, indicates an expected growth rate of 5.3 percent in 2023, before slightly declining to 5.0 percent in 2024 following the improved business and consumer confidence, declining food and energy prices, and the re-opening of the Chinese economy.

Table 3.1 | A Snapshot of the World – 2022

Country	2022

Sources: "World Economic Outlook", IMF, April 2023, Fiscal Monitor, IMF, April 2023, Annual Report 2022, Central Bank of Sri Lanka, Department of Fiscal Policy, Department of Census and Statistics
 ...n.a – Not available

The growth of China is expected to rebound by 5.2 percent in 2023 before slightly decreasing to 4.5 percent in 2024. India's economy, the largest economy in South Asia, is expected to expand by 5.9 percent in 2023 and 6.3 percent in 2024 supported by the increased domestic demand. Other emerging and developing Asia including Bangladesh, Bhutan, Maldives, and Sri Lanka, are projected to grow by 4.2 percent in 2023 and 5.6 percent in 2024, from 3.4 percent in 2022. Meanwhile, Latin America and the Caribbean region, emerging and developing Europe, the Middle East and Central Asia, and Sub-Saharan Africa are expected to grow moderately by 1.6 percent, 1.2 percent, 2.9 percent, and 3.6 percent, respectively in 2023.

Due to the variations in growth across economies, the growth rate of the global economy is expected to decline to 2.8 percent in 2023 from 3.4 percent in 2022 and 3.0 percent in 2024. Beyond 2023, global economic growth is anticipated to reduce to about 3.0 percent over the medium term, and this growth is lower than pre-pandemic levels. Despite a number of containment measures against the volatility of the global economy, the uncertainty of recovering the global economy remains at a faster pace. As such, the timely implementation of structural reforms including monetary, fiscal, financial and growth enhancing policies is important to restore macroeconomic and debt sustainability.

Table 3.2 | World and Regional Output

3.3 Inflation

In 2022, the global inflation was 8.7 percent. As IMF's April 2023 forecast, the global inflation rate is expected to reduce to 7.0 percent in 2023. The deflation is expected in the short to medium terms which will stem from the price falls of fuel and non-fuel commodities and the expected cooling effects of monetary tightening on economic activities.

Consumer prices in advanced economies increased to 7.3 percent in 2022 from 3.1 percent in 2021. The US and the Euro Area recorded an inflation of 8.0 percent and 8.4 percent, respectively in 2022. Inflation in the EMDEs increased to 9.8 percent in 2022 from 5.9 percent in 2021. Emerging and Developing Asia recorded relatively low inflation of 3.8 percent in 2022 compared to other regions of the EMDEs. Inflation in Emerging and Developing Europe has significantly increased by 18.3 percentage points to 27.9 percent in 2022 from 9.6 percent in 2021. Inflation in Latin America and the Caribbean has increased to 14.0 percent in 2022 from 9.8 percent in 2021. Inflation in the Middle East and Central Asia and Sub-Saharan Africa increased moderately to 14.3 percent and 14.5 percent, respectively

in 2022. A significantly high Inflation of 27.6 percent was recorded by non-fuel commodities of which primary products exporting nations and net debtor economies with arrears and/or rescheduling also registered a high inflation at 22.1 percent in 2022.

The inflation expectations will be stayed anchored in the near future. Inflation in 2023 is estimated at 4.7 percent in advanced economies: 4.5 percent in the US; 5.3 percent in the Euro Area; and 6.8 percent in the United Kingdom. Inflation in EMDEs is estimated at 8.6 percent in 2023, as soaring inflation of 19.7 percent is expected from Emerging and Developing Europe with high inflation of 50.6 percent, 21.1 percent, and 17.7 percent from Turkey, Ukraine, and Hungary, respectively. Emerging and developing Asia's inflation is expected to be moderate at 3.4 percent in 2023. Inflation expectations from Latin America and the Caribbean, the Middle East and Central Asia, and Sub-Saharan Africa are estimated at 13.3 percent, 15.9 percent, and 14.0 percent, respectively in 2024. The global headline inflation is expected to reduce to 7.0 percent in 2023 benefiting from the lower commodity prices. However, core inflation is predicted to be reduced slowly, and inflation rates are unlikely to reach their original targets before 2025.

3.4 Interest Rates

In the United States, the Federal Reserve continued raising its federal funds rate since October 2022 bringing the latest rate to 5.0 percent from 4.75 percent and Federal Open Market Committee anticipated this latest rate will rise slightly above 5.0 percent before it declines to 4.3 percent and 3.0 percent in 2024 and 2025, respectively. The European Central Bank increased policy rates by 50 basis points on March 16, 2023. As a whole since December 2021, the Bank of England, the European Central Bank, the Bank of Canada, and the Reserve Bank of Australia have increased policy rates by 400 basis points, 300 basis points, 425 basis points, and 350 basis points, respectively.

Similarly, almost all countries around the world have raised interest rates to dampen demand while arresting inflation. However, policymakers should immediately introduce corrective measures to strike a balance between reducing sticky inflation and ensuring sustainable growth while maintaining financial sector stability.

3.5 Fiscal Position

The signs of fiscal recovery are witnessed in 2022 after the three years of serious fiscal imbalances. In 2023, on average overall fiscal deficits in all economies are expected to expand slightly to 5 percent of GDP, due to increase in interest payments and public spending. The global debt level reached about 92 percent of the GDP in 2022 from 100 percent of the GDP in 2020 which is the steepest decline in 70 years stemming from impressive nominal GDP growth registered in 2021-2022.

3.5.1 Fiscal Deficits

Benefiting from the recent economic recovery, the global average fiscal deficit to GDP ratio declined to 4.7 percent in 2022 from 6.6 percent in 2021 and is estimated to slightly widen to 5.0 percent in 2023 before reducing to 4.6 percent in 2024. In the same vein, fiscal deficit to GDP ratio in advanced economies declined to 4.3 percent for the second year in a row in 2022 from the considerably high levels of 7.5 percent in 2021 and are expected to slightly widen to 4.4 percent in 2023 before declining to 4.2 percent in 2024.

The fiscal deficit to GDP ratio of EMDEs remained unchanged at 5.2 percent in 2021 and 2022 amidst the large increase in financing costs due to higher interest bills and a lack of revenue target attainment. However, the fiscal deficit to GDP ratio of EMDEs are anticipated to widen to 5.8 percent in 2023 before marginally declining to 5.3 percent in 2024. Among emerging and developing Asian

countries China exhibited a widening of fiscal deficit to 7.5 percent in 2022 from 6.0 percent in 2021. However, China's overall fiscal deficit is expected to decline to 6.9 percent and further to 6.4 percent in 2023 and 2024, respectively. In 2022 and 2021, India's fiscal deficit remained unchanged at 9.6 percent and is expected to decline to 8.9 percent in 2023 before further declining to 8.3 percent in 2024.

The fiscal deficit balance in Latin American countries declined to 3.9 percent in 2022 from 4.5 percent in 2021 and is expected to widen to 5.2 percent in 2023 before declining to 4.4 percent in 2024. Among low-income developing countries Kenya (to 6.0 percent from 7.1 percent), Nigeria (to 5.5 percent from 6.0 percent), and Vietnam (to 2.5 percent from 3.4 percent) recorded a reduction in fiscal deficit. Accordingly, the fiscal deficit of low-income developing countries declined to 4.2 percent in 2022 from 4.7 percent in 2021 and it is expected to remain at 4.2 percent in 2023 before further declining to 4.0 percent in 2024. On average, the fiscal deficit of the Russian Federation was widened to a deficit of 2.2 percent in 2022 from a surplus of 0.8 percent in 2021 owing to the escalation of the Russia-Ukraine conflict. In MENA (Middle East and North Africa) countries, on average the overall balance improved by 4.7 percentage points to a surplus of 2.6 percent in 2022 from a deficit of 2.1 in 2021 owing to an increase in oil revenue savings.

3.5.2 Government Debt

Global debt stock as a percentage of GDP declined by 3.4 percentage points to 92.1 percent in 2022 from 95.5 percent in 2021 benefiting from the strong nominal GDP growth in 2021–2022, which is still around 8 percentage points higher than the pre-pandemic level of 84.3 percent in 2019. However, the global debt stock is expected to increase to 93.3 percent in 2023 and to 94.6 percent in 2024 owing to a sizable share of public debt comprised of foreign currency, rapid currency depreciation, and rising interest rates. Public debt in advanced economies declined to 112.5 percent of GDP in 2022 from 117.4 percent in 2021, which is expected to further decline to 112.4 percent in 2023 before rising to 113.6 percent in 2024. The Government debt to GDP ratio of the

EMDEs increased to 64.6 percent in 2022 from 64.3 percent in 2021. The ratio is expected to widen to 67.5 percent in 2023 and 69.8 percent in 2024.

As such, both advanced and developing market economies excluding China demonstrated a drop in public debt in 2022, albeit their debt ratios are still 8 and 4 percentage points above pre-pandemic levels, respectively. In low-income developing nations, the public debt-to-GDP ratio remained high at about 48 percent, the highest level since the early 2000s.

3.6 Currency Movements

In most countries, wider exchange rate movements are observed against the US dollar, with monetary policy tightening to curb inflation in the United States. Premature easing of policy adopted by central banks to contain inflationary pressure could further depreciate exchange rates, which would enhance the distress of foreign currency-denominated debt and capital outflows. In low-income developing countries, with the depreciation of the nominal exchange rate, primary deficits are widening owing to the debt overhang. Owing to the exchange rate depreciation, food prices in domestic currencies remain significantly high in several countries. As food accounts for a significant share of the household consumption basket in low-income countries, high dependence on imported food in the event of a highly volatile exchange rate increases the vulnerability of low-income countries. Accordingly, assurance of exchange rate flexibility is a significant and urgent requirement in the highly uncertain environment that exists at present.

Figure 3.3 | Exchange Rates Against USD : 2009 – April 2023

Source : x-rates.com

3.7 World Trade

The volume of world trade increased in 2022 by 5.1 percent. The volume of trade in advanced economies and EMDEs increased by 5.2 percent and 4.1 percent in 2022, respectively. This was comparatively less than the increment in trade volumes recorded in 2021. The 5.5 percentage points decrease in the volume of world trade in 2022 compared to 2021 resulted from the decrease in the growth of exports in advanced economies by 4.3 percentage points and EMDEs by 8.4 percentage points. This has also been driven by the decrease in the growth of imports in advanced economies by 3.4 percentage points and EMDEs by 8.2 percentage points in 2022, compared to 2021.

The annual percent change in world trade volume is expected to decline to 2.4 percent in 2023 before slightly increasing to 3.5 percent in 2024 due to disruptions to international trade flows associated with the Russia-Ukraine conflict and increasing trade tensions between the United States and China. The volume of exports in advanced economies is expected to decline by 3.0 percent in 2023 before slightly increasing to 3.1 percent in 2024. The growth of exports in EMDEs is anticipated to decline to 1.6 percent in 2023 before rebounding by 4.3 percent in 2024. The growth of import volume in advanced economies is anticipated to decline to 1.8 percent in 2023 before increasing by 2.7 percent in 2024. Following the same trend, the growth of the import volume of EMDEs is predicted to decline to 3.3 percent in 2023 before increasing to 5.1 percent in 2024. Thus, fostering global trade through reinforcing multilateral trading systems, giving priority to favourable trade and investment treatments, strengthening existing trade and financial links, and enhancing the efficiency of global value chains are imperative to ensuring the presence of a healthy world trade system.

3.8 World Commodity Market

Commodity prices including energy and non energy commodities declined in 2022 compared to prices of 2021. However, commodity prices may escalate depending on the severity of the geopolitical tensions. In the first quarter of 2023, the commodity prices fell

by 14 percent, and by the end of March, the commodity prices had fallen around 30 percent from their remarkable peak in June 2022. The price of crude oil is anticipated to drop by around 24 percent in 2023 and a further 5.8 percent in 2024, while the prices of non-fuel commodities will remain unchanged.

3.8.1 Energy Prices

In the first quarter of 2023, energy prices were 20 percent lower than that of in the final quarter of 2022. In 2023, the energy price index is expected to fall by 26 percent from 152.57 in 2022 owing to the price reduction of natural gas. Compared to the peak price in June 2022, the price of Brent crude oil in March 2023 was 35 percent below the peak. In the first quarter of 2023, Brent crude oil averaged USD 81/bbl which is 30 percent less compared to USD 116/

bbl in March 2022. The daily prices per barrel fluctuated around USD 72–87 during the first quarter of 2023. The spot price of the Russian benchmark is expected to have averaged USD 47/bbl in early February, which is USD 13 lower than the G7 price cap of USD 60/bbl. The average price of Brent crude oil in China and other countries in Asia was USD 72/ bbl in January 2023. Though the global oil market initially expected a rapid increase in demand for oil due to China's reopening.

However, with the ease of travel restrictions in China, it is expected to have a sharp rise in oil demand in 2023. The average price of Brent crude oil is expected to reach USD 84/bbl in 2023 from USD 100/bbl in 2022. Further expected to slightly increase in 2024 and remain higher than the pre-pandemic level is (2015–2019) monthly average of USD 57/bbl.

Figure 3.4 | Crude Oil Prices : 2016 – April 2023

Source : World Commodity Outlook, World Bank, April 2023

Natural Gas price in the US in March 2023 was 16 percent below its pre-pandemic (2015–2019) average. The Liquefied Natural Gas (LNG) import price of Japan dropped by 9 percent in the first quarter of 2023 and as of March 2023. Natural Gas prices in the United States are expected to decline to USD 2.7/mmbtu in 2023 from USD 6.4/mmbtu in 2022 before increasing to USD 3.7/mmbtu in 2024, mainly due to rise in domestic production. Considering increased investments in LNG import facilities, prices in Europe are expected to decline to USD 19.0/mmbtu in 2023 and further to USD 17.0/mmbtu in 2024 from USD 40.3/mmbtu an all-time high in 2022.

Coal consumption in Europe grew by 7 percent in 2022, as power generators in Europe extensively used coal as an alternative to Russian natural gas. As the power sector of the United States gradually shifted to renewable sources, coal consumption fell by 6 percent in 2022. India's coal consumption in 2022 rose by 7 percent owing to the increasing demand from the power sector. China's coal consumption moderately increased as coal was used to fulfill the shortfall from hydropower. Australian coal prices are expected to decline to USD 200/mt in 2023 and further to USD 155/mt in 2024 from

a significantly high price of USD 344.9/mt in 2022. Owing to high carbon prices combined with lower liquefied natural gas prices in Europe, global coal prices are estimated to fall by 42 percent and 23 percent in 2023 and 2024, respectively.

3.8.2 Agricultural Prices

The agriculture price index increased to 122.75 in 2022 from 108.31 in 2021 due to high production costs and continued domestic and global demand increases. With the decline in input costs and increase in agriculture supplies, agricultural prices are expected to decline by 7 percent in 2023. Prices will further decline beyond 2023 with ease of production and supply channels. Owing to severe weather events and higher input prices, food security still remains a significant challenge, though it is expected to have a significant decline in agriculture prices in the future. US Hard Red Winder wheat price is expected to decline to USD 355/Mt in 2023 from USD 430/Mt in 2022 and further decline to USD 335/Mt in 2024.

However, most edible oil prices recorded a slight price increase in 2022 compared to 2021 due to production shortfalls. Palm oil prices are expected to decline to USD 980/Mt in 2023 from USD 1,276/Mt in 2022, before slightly reducing to USD 1,020/Mt in 2024. Thailand Rice prices decreased to USD 437/Mt in 2022 from USD 458/Mt in 2021 and this price is expected to increase to USD 510/Mt in 2023 before declining to USD 490/Mt in 2024.

More than 349 million people around the world are expected to suffer from food insecurity in 2023 due to high food and fertilizer prices, economic and climate shocks, geopolitical fragmentation, and conflicts. Reflecting the rise in food prices, the global year-on-year domestic food price inflation rate averaged at high about 19.5 percent, in the first quarter of 2023. While individual countries such as Argentina, Lebanon, and Zimbabwe experienced more than 100 percent food price inflation, MENA as a region recorded the average highest food price inflation in early 2023. In addition to low and middle-income countries, around 81.8 percent of high-income countries experienced high food price inflation between January– April 2023.

3.8.3 Metal and Mineral Prices

The metals and minerals price index rose by 10 percent in the first quarter of 2023 which marks a 3 percent lesser than a year ago. Metals and minerals such as Aluminum, Copper, Iron ore, Lead, Nickle, Tin, and Zinc prices are expected to decline by 11 percent, 3.6 percent, 5.2 percent, 2.4 percent, 14.8 percent, 23.4 percent, and 19.6 percent, respectively in 2023 compared to 2022. While prices of precious metals such as Gold and Silver are expected to increase by 5.5 percent each owing to geopolitical uncertainty and persistently high inflation, Platinum price is expected to drop by 11.8 percent in 2023 compared to 2022 due to lower demand.

3.9 Look forward within the Sri Lankan context

The global uncertainties and price hikes that emerged as a result of the COVID-19 pandemic, financial sector turmoil, high inflation, and Russia-Ukraine conflict together with the domestic macroeconomic imbalances have adversely impacted the prospect growth in Sri Lanka. This has been demonstrated in the sharp contraction of economic growth by 7.8 percent in 2022.

As such, the Government introduced a series of macroeconomic adjustment measures including much-neglected structural reforms to ensure macroeconomic stability and debt sustainability while safeguarding the poor and vulnerable segments of society. Comprehensive reform package introduced under the Extended Fund Facility Programme of the IMF, Sri Lankan economic growth is expected to take off in the medium term.

The global economy has also demonstrated signs of recovery after the sharp deceleration experienced in the second half of 2022. Following the decline in global commodity prices from historic high levels in mid-2022, the domestic inflationary pressure has also eased. Foreign exchange inflows generated through exports, tourism, and remittances have been improved to manage outflows. The overall fiscal deficit is estimated to decline with the successful implementation of revenue based fiscal consolidation measures together with the reforms in the State Owned Enterprises (SOEs).

A well planned economic policy adjustment framework covering all four sectors including fiscal, monetary, financial and real sectors will pave the way to restore macroeconomic stability and debt sustainability in the medium to long term.

04

Government Revenue

4.1. Overview

The year 2022 marked a notable shift in Sri Lanka's tax policy formulation as bold steps were taken to introduce a broad-based and progressive tax system. Government revenue mobilization surpassed Rs. 2,000 billion in 2022 owing to aggressive revenue enhancement measures combined with the positive effects of increased price levels and exchange rate depreciation amidst the severe economic downturn.

In nominal terms, government revenue including grants increased significantly by 37.5 percent to Rs. 2,012.6 billion in 2022 from Rs. 1,463.8 billion in 2021. The actual government revenue excluding grants of Rs. 1,979.2 billion in 2022 was a Rs. 104.8 billion aberration of the annual estimated revenue of Rs. 2,084 billion, which is a realization of 95 percent against the estimate. The surge in revenue collection mainly stemmed from Value Added Tax (VAT) due to the rate revision (by Rs. 154.9 billion), Surcharge Tax (a one-off tax which yielded Rs. 120.7 billion), Corporate Income Tax (CIT) (by 85.8 billion), sales and charges (by 47.4 billion) and the newly introduced Social Security Contribution Levy (SSCL) (which yielded Rs. 36.1 billion after being effective from October 1, 2022).

Despite the nominal increase in revenue, government revenue as a percentage of GDP declined to 8.2 percent in 2022 from 8.3 percent in 2021 due to the reduction of tax revenue to GDP ratio by 0.1 percentage points. The ratio was one of the lowest in the region in 2022 and this marked a deviation of 0.6 percentage points from the envisaged revenue estimate of 8.8 percent of GDP. Revenue from income taxes increased to 2.2 percent of GDP in 2022 from 1.7 percent of GDP in 2021 due to surcharge tax collection of 0.5 percent of GDP. Despite the increase in the VAT rate from 8 percent to 15 percent, the VAT revenue as a percentage of GDP increased slightly to 1.9 percent in 2022 from 1.8 percent in 2021 due to the rate changes that were made in the midst of 2022. However, revenue from excise taxes declined as a percentage of GDP to 1.4 percent in 2022 from 1.7 percent in 2021 due to non adjustment of Excise Duty rates in line with inflation and low revenue from Excise Duty on motor vehicles stemming from the import compression and petroleum, while revenue from taxes on external trade declined to 1.4 percent in 2022 from 2.0 percent in 2021 due to import restrictions.

4.2 Tax Policy Reforms

Sri Lanka introduced an extraordinarily low tax regime in late 2019. The reforms included the reduction of tax rates of Value Added Tax (VAT), Personal Income Tax (PIT) and Corporate Income Tax (CIT), and narrowing tax bases of VAT and PIT. However, these reforms led to a significant loss of Government revenue resulting in the lowest revenue to GDP ratio in the region. As such, the revenue to GDP ratio has declined to 8.2 percent in 2022 from 11.9 percent in 2019.

The low tax regime, and the impact of the COVID-19 pandemic on revenue mobilization, together with the relief measures associated with the pandemic and economic crisis widened the budget deficit significantly to 11.7 percent in 2021 from 9.0 percent of GDP in 2019. The ratio improved to 10.2 percent in 2022 as a result of revenue enhancement measures combined with the positive effects of expenditure rationalization. However, persistent fiscal deficits due to low revenue performance and relatively high and rigid recurrent expenditure coupled with less efficient public expenditure have created increased financing needs and have led to unsustainable levels of debt. This resulted in the government debt to GDP ratio increasing to Rs. 113.8 percent in 2022.

Due to high fiscal deficits, the Government had high borrowing requirements. In addition, the unavailability of a sufficient amount of net financing in the domestic non-bank sources and the loss of access to international capital markets restricted options to finance the budget deficits. This resulted in severe cash flow constraints as the Government had to resort to financing extensively from banking sources, particularly from the Central Bank of Sri Lanka. Such extensive monetary financing contributed to the soaring inflationary pressures experienced in 2022.

The fiscal imbalances prompted the government to introduce aggressive and ambitious revenue policy measures since June 2022. Such reforms mainly focused on increasing tax rates, widening tax bases, and removing a number of exemptions and concessions. The reforms aim to raise government revenue consistently up to 15 percent of GDP by 2026

and beyond. With the revenue-based fiscal consolidation measures, it is aimed to restore fiscal sustainability and strengthen the fiscal discipline of the country, which will ultimately contribute to restoring macroeconomic stability and debt sustainability.

4.2.1 Income tax measures

- Reducing tax-free threshold, increasing the marginal PIT rates and the top marginal rate, and rationalizing incremental tax slabs with effect from January 01, 2023.
 - The downward revision of the tax-free threshold for PIT from Rs. 3.0 million to Rs. 1.2 million per annum.
 - Removing expenditure relief of Rs. 1.2 million that had been granted for education, health, contributions for pension scheme, interest paid on housing loans, etc.
 - Reducing the tax slab from Rs. 3.0 million to Rs. 500,000 per annum.
 - Revising the tax rates progressively from 6% to 36% on every Rs. 500,000 exceeding the tax relief.
- Making Advance Personal Income Tax (APIT)/Withholding Tax (WHT) on employment income (PAYE) mandatory for all taxpayers exceeding the personal relief of Rs. 1.2 million per year of assessment.
- Making Advance Income Tax (AIT) on other payments compulsory at the following rates.

Table 4.2 | AIT/WHT rates

Category	Rate (%)	Final/Non-Final
Dividend	15	Final
Interest or discount paid	5	Non-Final
Rent payments exceeding Rs. 100,000 per month	10	Non-Final
Service payments exceeding Rs. 100,000 made to individuals such as professionals	5	Non-Final
In all other cases (other than non residents)	14	Non-Final
Non residents	14	Non-Final

Source: Department of Fiscal Policy

- Increasing the CIT rate to 30 percent from 24 percent and discontinuing exemptions and concessionary rates of CIT with effect from October 1, 2022, while maintaining CIT rate on liquor, tobacco and betting and gaming at 40 percent. The full effect of this revenue measure will be realized in 2023 and it will yield around 0.8 percent of GDP per annum.
- Imposing a one off surcharge tax of 25 percent on individuals, partnerships or companies whose taxable income exceeded Rs. 2.0 billion for the year of assessment 2020/2021 to uplift the revenue as a temporary measure. This yielded Rs. 120.7 billion which amounts to 0.5 percent of GDP.

4.2.2 Value Added Tax measures

- Increasing of the VAT rate from 8 percent to 12 percent with effect from June 01, 2022 and subsequently to 15 percent with effect from September 01, 2022.
- Lowering the VAT registration threshold to Rs. 80 million per annum from Rs. 300 million per annum with effect from October 01, 2022.
- Removing VAT exemptions on condominium housing apartments with effect from January 01, 2023.
- Removing the zero-rating of tourism related services effective from June 01, 2022.

4.2.3 Excise tax measures

- Increasing excise tax on cigarettes by 20 percent in all categories except cigarettes less than 60 mm (98 percent hike) effective from January 01, 2023 and alcohol by 20 percent with effect from January 03, 2023.
- Increasing excise tax on fuel by Rs. 25 per litre with effect from January 01, 2023, in order to raise fuel excises to yield 0.3 percent of the GDP in 2023 to finance the transferred liabilities to the Treasury from the Ceylon Petroleum Corporation (CPC).

4.2.4 Other tax measures

- Increasing Telecommunication Levy to 15 percent from 11.25 percent with effect from June 01, 2022.
- Imposing Social Security Contribution Levy (SSCL) of 2.5 percent on liable turnover exceeding Rs. 120 million per annum with effect from October 01, 2022.
- Increasing Betting and Gaming rates (pending Parliament approval)
 - Increasing Annual Levy for carrying on the business of gaming from Rs. 200 million to Rs. 500 million.
 - Increasing Annual Levy for betting
 - From Rs. 4 million to Rs. 5 million when it is carried on through agents
 - From Rs. 600,000 to Rs. 1 million when it is carried on using live telecast facilities
 - From Rs. 50,000 to Rs. 75,000 when it is carried on without the use of live telecast facilities
 - Increasing the rate of the levy on Gross Collection from 10 percent to 15 percent.
 - Imposing a Casino Entrance Levy of USD 50.
 - Imposing license fee of Rs. 500 million on casino business operators by issuing Regulations under Casino Business (Regulation) Act.

4.2.5 Tax Administrative measures

Significant tax administrative measures were implemented under the newly introduced Inland Revenue (Amendment) Act, No. 4 of 2023 as given below.

- Introducing legal provisions to make electronic tax filing mandatory for personal income taxpayers.
- Introducing legal provisions to streamline the refund process and expedite the refunding of amounts paid in excess of the tax liability by resident individuals.
- Introducing legal provisions to discourage cash transactions.
- Accordingly, payments made by any person in cash to another person to purchase or procure goods or services where such payment in aggregate is Rs. 500,000/= or more in a day, or in a single transaction or in a single event will not be allowed to deduct as expenses for tax purpose.
- Introducing legal provisions obligating financial institutions, government institution in charge of granting contracts for the supply of goods, works or consulting and non-consulting services procurements, stock exchange, Register General's Department, Registrar General of Companies and Department of Motor Traffic to submit taxpayer transaction information at the individual level to the Inland Revenue Department (IRD) in a systematic and time-bound manner.
- Exempting of amounts derived by a non-resident person from engaging in a project of the Government of Sri Lanka, funded from foreign grants and approved by the Minister of Finance taking into consideration the economic benefits to the country.
- Simplifying the RAMIS system only to require the minimum data elements to capture identity details, assign a Tax Identification Number (TIN), and capture the minimum income and tax withholding data points from a simplified version of the PIT return.
- Reorganizing and strengthen the administration of Large Taxpayers Unit (LTU) and High Net Wealth Individuals (HNWI).
- Streamlining processes and reducing vulnerabilities by simplifying the online portal for individual TIN registration and PIT filing and limiting VAT schedule cross-matching to material cases.
- Stepping up efforts of the Risk Management Committee and the fledgling Risk Management Unit and begin driving the audit process and other compliance actions.
- Updating and simplifying the 2005 IRD Staff Code of Ethics and Conduct and to operationalize it through a staff training program that requires all staff to certify in writing their full understanding and compliance with the code.
- Designing, resourcing, and launching a Reform Coordination Unit
- Establishing a Modernization Steering Committee to provide strategic oversight and direction.
- Introducing compulsory tax registration for all residents who are above 18 years of age in order to expand current tax base.

In addition, assessment of tax administration system of the IRD conducted using Tax Administration Diagnostic Assessment Tool (TADAT) has identified that substantive issues remain in all the four main tax obligations (registration, filing, payment and reporting) of the IRD. The Government remains committed to rectifying the identified weaknesses through a series of tax administrative reform measures. Such reforms will include:

Administrative measures regarding Excise (Ordinance) Duty were further strengthened by implementing Security features and Security features management system effective from January, 2022 to curtail revenue leakages. In addition, Excise Department has taken steps to introduce a digital system to regulate the supply chain of liquor and to collect information and data on liquor production, consumption and sales.

Box 4.1 | Revenue Enhancement Measures Announced in Budget 2023

Several measures related to tax policy and tax administration were announced in the Budget 2023 to be implemented in the short to medium term to further strengthen the government's revenue based fiscal consolidation efforts.

Income Tax –

- To appoint a tax ombudsman to address the concerns of taxpayers along with the introduction of a charter laying out the rights and obligations of taxpayers.
- To discontinue the payment of PAYE/APIIT liability of employees by SOEs.
- To exempt the earning of non-resident persons from engaging in projects approved by the Minister of Finance where such project is totally funded by foreign grants.

Value Added Tax –

- To introduce a new VAT Act, consolidating the amendments introduced from 2002 until 2022.
- To rationalize the schedule of VAT exemptions by limiting the exemption provisions to essential sectors such as health, education and agriculture.

Betting and Gaming Levy Act and Casino Business (Regulation) Act (Pending Parliament approval)

- To extend the definition of the "bookmaker" in the Betting and Gaming Levy Act to include persons that receive or negotiates bets on all type of sports events, including online betting.
- To introduce a licensing mechanism for the business of bookmaker and to make legislative amendments to permit the licensed bookmakers to register with Inland Revenue Department.
- To make engaging in the business of bookmaker without being licensed and registered a punishable offence.
- To extend the definition of gaming/casino to include online gaming/casino under the Casino Business (Regulation) Act.

CID, PAL, CESS and other taxes

- To phase out CESS levy in three years commencing January 2023 and PAL in five years.
 - Elimination of CESS Levy on a phased basis in three years commencing January 1, 2023. Preliminary steps have been taken in this regard by reducing CESS rates applicable to all liable items by 25–30 percent effective from March 28, 2023.
 - Phasing out of Ports and Airports Development Levy in five years. Preliminary steps have been taken in this regard by removing PAL applicable to 1,631 HS codes (tariff items) effective from April 3, 2023.
- To revise CID upwards from 0:10:15 percent to 0:15:20 percent to accommodate the proposed phasing out of para-tariffs with effect from March 28, 2023.
- To exempt Motor vehicles from Social Security Contribution Levy (SSCL).
- To extend the exemptions under the commercial hub activities to bunker services and exempt commercial hub enterprises from Social Security Contribution Levy.
- To increase Excise Duty on diesel and petrol with effect from January 2023.
- To impose a tax of Rs. 2.0 per Beedi stick with the view to discourage Beedi consumption and regularize Beedi industry.

Box 4.1 | Revenue Enhancement Measures Announced in Budget 2023 contd...**Non-tax**

- To increase fees and charges other than that have already been increased in the previous three years along with fees charged by the Department of Immigration and Emigration on passports and Visa.
- To appoint a committee to examine and make recommendations on the royalty, rent and other non-tax revenue fees and charges collected by the Government entities.

Tax Administration

- A number of measures including the expansion of mandatory electronic tax filing to non-corporate sector, encouraging electronic payment, the development of a mechanism to collect information from third-party institutions, making legislative amendments to improve the efficiency of tax collection, aimed at improving tax compliance and curbing tax related corruption were proposed.
- To enhance the tax administration in IRD, Sri Lanka Customs (SLC) and Excise Department of Sri Lanka (EDSL) through improvement in technology, process improvement and investment in human resources and to monitor the performance of the three main revenue collecting agencies via Key Performance Indicators (KPIs).
- To review and address deficiencies in the RAMIS system at the IRD and link the IT based platforms of the key revenue collecting agencies to share information to improve tax compliance.
- To mandate revenue collecting agencies to transfer all revenue and receipts to the Consolidated Fund daily with effect from January 2023.

4.3 Government Revenue Performance

The total Government revenue including grants increased significantly by 37.5 percent to Rs. 2,012.6 billion in 2022 from 1,463.8 billion in 2021. A notable improvement was recorded in the direct to indirect tax ratio to 30:70 in 2022 from 23:77 in 2021. The tax revenue increased notably by 34.9 percent to Rs. 1,751.1 billion in 2022 from Rs. 1,298 billion in 2021 due to significant increases in revenue collection from VAT and CIT and revenue yields from Surcharge Tax and SSCL. Non-tax revenue increased by 43.4 percent to Rs. 228.0 billion in 2022 from Rs. 159.0 billion in 2021 reflecting the increase in revenue from sales and charges stemming from the raising of government fees and charges in 2022 together with the rationalization of license fees.

Revenue from domestic consumption-based taxes increased by 40.8 percent to Rs. 590.3 billion in 2022 from Rs. 419.3 billion in 2021 mainly due to the increase in revenue from domestic VAT by 57.2 percent and Excise Duty on liquor by 19.2 percent. Revenue mobilized from import-based taxes grew by 8.6 percent to Rs. 593.0 billion in 2022 from Rs. 546.1 billion

in 2021 due to increases in revenue collected from import-VAT and PAL. Revenue collected from taxes on external trade declined by 2.5 percent to Rs. 341.1 billion in 2022 from Rs. 349.8 billion in 2021 due to the continuation of restrictions imposed on imports such as motor vehicles and other luxury items in the import basket. Revenue generated from SCL and Import duties declined by 28.0 percent to Rs. 40.2 billion and 22.3 percent to Rs. 50.0 billion, respectively in 2022.

4.3.1 Tax Revenue

In nominal terms, tax revenue increased to Rs. 1,751.1 billion in 2022 from Rs. 1,298.0 billion in 2021. The tax revenue to GDP ratio declined by 0.1 percentage points to 7.3 percent in 2022 from 7.4 percent in 2021. The share of tax revenue to the total revenue also dropped marginally to 88.5 percent in 2022 from 89.1 percent in 2021. Revenue from Income tax increased notably by 76.8 percent to Rs. 534 billion in 2022 from Rs. 302.1 billion in 2021 reflecting the impact of collecting higher revenue from one-off surcharge tax and Corporate and Non-Corporate taxes. Revenue from taxes on goods and services increased by 35.6 percent to Rs. 876 billion in 2022 from Rs. 646 billion in 2021 owing to the increase of revenue from Value Added Tax by 50.2 percent to Rs. 463.0 billion and Excise taxes by 11.6 percent to Rs. 342.5 billion. However, revenue collected from taxes on external trade declined by 2.5 percent to

Rs. 341.1 billion in 2022 from Rs. 349.8 billion in 2021 owing to the substantial decline in revenue from Special Commodity Levy by 28.0 percent to Rs. 40.2 billion and the Customs Import Duty (CID) by 22.3 percent to Rs. 50.0 billion in 2022.

^(a) Provisional

Income Taxes

Total revenue from income taxes increased notably by 76.8 percent to Rs. 534.0 billion in 2022 from Rs. 302.1 billion in 2021 with an increase in revenue from corporate and non-corporate taxes, Surcharge Tax, Tax on interest and capital gain tax. Income tax revenue as a percentage of GDP increased to 2.2 percent in 2022 from 1.7 percent in 2021. Revenue from income tax as a percentage of tax revenue increased to 30.5 percent in 2022 from 23.3 percent in 2021. The realization of income tax revenue was 95.7 percent of the estimate for 2022. Revenue from Corporate and non-corporate taxes increased by 31.4 percent to Rs. 358.5 billion in 2022 from Rs. 272.8 billion in 2021. Corporate tax revenue increased by 83.8 percent to Rs. 464.4 billion due to the collection of additional revenue of Rs. 120.7 billion from the imposition of Surcharge Tax. Revenue generated from the Pay-As-You-Earn/

APIT increased significantly by 66.4 percent to Rs. 25.5 billion in 2022 from Rs. 15.4 billion in 2021 due to salary increments in the private sector. Revenue from the tax on interest increased sharply by 59.9 percent to Rs. 19.8 billion in 2022 from 12.4 billion in 2021 while the revenue from capital gains tax increased to Rs. 5.3 billion in 2022 from Rs. 0.7 billion in 2021. Meanwhile, revenue collected from the Tax on Voluntary Disclosure (TVD) was Rs. 4.0 billion in 2022 which was imposed on the value of the investment on both domestic and foreign undisclosed funds and property at the rate of 1.0 percent effective from September 15, 2021 up to March 31, 2022.

Value Added Tax (VAT)

In nominal terms, revenue from VAT increased significantly by 50.2 percent to Rs. 463 billion in 2022 from Rs. 308 billion in 2021 due to the increase in rate on financial services to

18 percent from 15 percent and the standard rate to 15 percent from 8 percent. In 2022, revenue from VAT on domestic activities increased by 57.2 percent to Rs. 291.6 billion while VAT revenue from imports increased by 39.7 percent to Rs. 171 billion. However, the realization of revenue was low at 86.9 percent of the estimate which is attributable to

lower-than-anticipated revenue from import-VAT resulting from a decrease in imports due to the decline in imports compression. VAT revenue as a percentage of total tax revenue increased to 26.4 percent in 2022 from 23.7 percent in 2021 while VAT revenue as a percentage of GDP increased slightly to 1.9 percent in 2022 from 1.8 percent in 2021.

Social Security Contribution Levy (SSCL)

SSCL was introduced with effect from October 1, 2022 under Social Security Contribution Levy Act, No. 25 of 2022 and it is payable at a rate of 2.5 percent on the liable turnover by any manufacturer, wholesaler, retailer or service

provider whose turnover exceed Rs. 120 million per annum. Any importer is also liable to pay SSCL at a rate of 2.5 percent. The revenue from SSCL in last quarter of 2022 was Rs. 36.1 billion, SSCL-domestic and SSCL-import yielding Rs. 23.3 billion and Rs. 12.7 billion respectively.

Excise Duty

In nominal terms, revenue from excise duties increased notably mainly due to the increase in revenue from liquor and cigarettes stemming from the revision of respective tax rates in November 2021 together with the full implementation of security features and security features management system for liquor and liquor-based products. However, revenue

collection from the import of motor vehicles, petroleum products and other excisable articles declined in 2022 mainly due to import restrictions and supply side constraints, among others. The revenue collected from Excise duties as a percentage of GDP declined to 1.4 percent in 2022 from 1.7 percent in 2021, which is far below the international average of 4–5 percent of GDP, reflecting the need for further enhancement of excise revenue. In the same

Table 4.9 | Excise Duty Revenue

Item	Rs. Million						% Change 2021/2022
	2017	2018	2019	2020	2021	2022 (a)

(a) Provisional

vein, revenue from excise duties in nominal terms increased notably by 11.6 percent to Rs. 342.5 billion in 2022 compared to Rs. 306.9 billion in 2021. Further, the contribution of excise duty revenue declined to 19.6 percent of total tax revenue in 2022, from 23.6 percent in 2021. Revenue from excise duty has been one of the main sources of government revenue over the years. The realization of the excise duty collection was 91.6 percent of the revised estimated revenue in 2022.

The revenue collected from excise duty on liquor increased notably by 19.2 percent to Rs. 165.2 billion in 2022, compared to Rs. 138.6 billion in 2021. The production of alcohol also increased by 9.9 percent to 41.2 million absolute liters in 2022 from 37.5 million absolute liters in 2021. A proper monitoring system is warranted to address the issues in the security features and security features management system by the Department of Excise to augment the targeted revenue from liquor and liquor-based products.

Figure 4.3 | Liquor Production and Excise Tax Revenue

Sources : Department of Fiscal Policy and Department of Excise

Note: Liquor production after 2017 is in absolute liters

Excise duty from motor vehicles declined by 19.9 percent to Rs. 14.5 billion in 2022, compared to Rs. 18.1 billion in 2021 due to the continued curtailment of motor vehicles effective from May 22, 2020 to lessen the pressure on the exchange rate.

Meanwhile, the revenue from cigarettes increased notably by 17.6 percent to Rs. 104.1 billion in 2022, compared to Rs. 88.5 billion in 2021 mainly due to the upward revision of Excise Duty on cigarettes on November 12, 2021. Accordingly, cigarette sales increased by 18.6 percent to 2,828.7 million sticks in 2022, compared to 2,384.1 million sticks in 2021.

Sources: Department of Fiscal Policy, Department of Customs and Department of Excise

(a) Hard Liquor & Malt Liquor Production after 2017 is in absolute liters

Figure 4.4 | Cigarette Production and Excise Duty Revenue

Sources: Department of Fiscal Policy and Department of Excise

The revenue generated from petroleum products declined marginally by 4.1 percent to Rs. 53.1 billion in 2022 from Rs. 55.3 billion in 2021 mainly due to the decline in imports of refinery products and crude oil by 13.8 percent and 45.1 percent, respectively, coupled with implementation of QR code based quota system to ensure fair distribution of scarce fuel.

Furthermore, excise duty revenue generated from other excisable items such as sweetened beverages, refrigerators, palm oil and fatty acid etc. declined by 10.2 percent to Rs. 5.6 billion in 2022 from Rs. 6.2 billion in 2021 mainly due to the import restriction imposed on non-essential products.

Custom Import Duty (CID)

Revenue from Custom Import Duty (CID) declined by 22.3 percent to Rs. 50.0 billion in 2022 compared to Rs. 64.3 billion in 2021 mainly due to continued import restrictions on nonessential items. Revenue generated from Petrol 92 and 95, lubricating oils, super diesel and other diesel were the largest contributors to CID revenue in 2022. However, the realization of CID revenue collection was 119.1 percent of the revised estimate of Rs. 42 billion.

Special Commodity Levy (SCL)

Revenue collection from Special Commodity Levy (SCL) declined significantly by 28 percent to Rs. 40.2 billion in 2022 compared to Rs. 55.8 billion in 2021. This was mainly due to the continuation of nominal SCL rates on essential commodities such as sugar, and lentils, the periodical downward revision of SCL rates of other essential commodities such as potatoes and onions and the overall decline in quantity

of imports. However, the realization of SCL revenue was 114.8 percent of the revised estimate of Rs. 35 billion.

Ports and Airports Development Levy (PAL)

Revenue generated from the Ports and Airports Development Levy (PAL) increased considerably by 17.2 percent to Rs. 180.6 billion in 2022, compared to Rs. 154.1 billion in 2021. This was mainly attributable to the increase in revenue generated from key import items such as Auto Diesel, Petrol (92 Octane), Urea, wheat flour and wheat grain together with the effect of the depreciation of the Sri Lankan Rupee during the year. The realization of PAL revenue was 102 percent of the revised estimate of Rs. 177 billion in 2022.

Commodity Export Subsidy Scheme Levy (CESS)

Revenue from CESS Levy generated from both imports and exports declined by 6.9 percent to Rs. 70.3 billion in 2022 compared to Rs. 75.5 billion in 2021 due to the drop of imports stemming from the government's restrictive policy measures to curtail non-essential imports and the imposition of marginal deposit requirements on selected imports. Accordingly, revenue collected from CESS Levy on imports declined by 7.1 percent to Rs. 68.1 billion in 2022 from Rs. 73.3 billion in 2021. Lubricating oils (Base oils) used for the preparation of lubricant oils were the largest contributor to the import CESS revenue in 2022. In addition, beedi leaves, tires, woven fabrics and Portland cement were the other major revenue sources for CESS. CESS revenue on exports merely increased to Rs. 2.24 billion in 2022 from Rs. 2.22 billion in 2021. The highest export CESS revenue generated products were tea, ilmenite, coconut, granite and pale crepe rubber. The realization of CESS revenue collection was 103.4 percent of the revised estimate of Rs. 68 billion for 2022.

Other Taxes

Telecommunication Levy (TL): Revenue generated from Telecommunication Levy increased moderately by 16.8 percent to Rs. 15.0 billion in 2022 from Rs. 12.8 billion in 2021. This was mainly due to the increase in telecommunication levy to 15 percent from 11.25 percent in June, 2022 combined with the overall increase in telecommunication services.

Embarkation Levy (EL): Revenue collected from EL increased significantly by 570 percent to Rs. 22.2 billion in 2022 from Rs. 3.3 billion in 2021 benefiting from the increase in international travel with the removal of COVID-19 travel restrictions together with the positive impact on the depreciation of Sri Lankan Rupee.

Betting and Gaming Levy (BG): Revenue from Betting and Gaming Levy significantly increased by 170.5 percent to Rs. 5.2 billion in 2022 from Rs. 1.9 billion in 2021 benefiting from the resumption of tourism and travel related activities. In order to streamline the industry, Regulations published in a Gazette notification under the Casino Business (Regulation) Act, No. 17 of 2010 making compulsory registration of Casino operators.

4.3.2 Non-Tax Revenue

In nominal terms, non-tax revenue increased significantly by 43.4 percent to Rs. 228.1 billion in 2022 from Rs. 159 billion in 2021, reflecting the increase in revenue collection from the sharp increase in Sales and Charges by 111.2 percent to Rs. 90 billion in 2022 from Rs 42.6 billion in 2021 stemming from the upward revision in many service charges. Passports charges and other charges including visa fee, vehicle registration fee and revenue license fee have been revised upward. However, non-tax revenue as a percentage of GDP remained unchanged at 0.9 percent in 2022. Non-tax revenue from rent income and interest income increased to 14.1 percent to Rs. 13.2 billion in 2022 from Rs. 11.6 billion in 2021. The profit transfers from the Central Bank increased to Rs. 30 billion in 2022 compared to Rs. 15.0 billion in 2021. Revenue from Social Security Contributions increased by 8.1 percent to Rs. 37.4 billion in 2022 from Rs. 34.6 billion in 2021. Other sources of non-tax revenue including earnings from Treasury Bond Premiums increased by 19 percent to Rs. 29.3 billion in 2022 from Rs. 24.6 billion in 2021.

Table 4.13 |Variance Analysis of Government Revenue

Rs. Billion

Item	2021	2022 Est.	2022	Reasons
Income Taxes	302.1	558	534	Revenue collection from income taxes increased by 76.8 percent to Rs. 534.0 billion in 2022 compared to Rs. 302.1 billion recorded in 2021, realizing 95.7 percent of the revised estimate of 2022. This was mainly due to the increase of 31.4 percent in the corporate and non-corporate tax revenue to Rs. 358.5 billion from Rs. 272.8 billion including the revenue of Rs. 120.7 billion received from the Surcharge Tax which was introduced as one-off levy in August, 2022. Further, Rs. 4.0 billion of Tax on Voluntary Disclosure which was introduced in September 2021, positively contributed to this achievement. Moreover, Pay-As-You-Earn/Advance Personal Income Tax (APIT) also increased significantly by 66.4 percent to Rs. 25.5 billion in 2022 from Rs. 15.4 billion in 2021 and tax on interest increased by 59.9 percent to Rs. 19.8 billion in 2022 from Rs. 12.4 billion in 2021. In addition, the Capital Gain Tax increased significantly by 695.9 percent to Rs. 5.3 billion from Rs. 668 million in 2022.
Value Added Tax (VAT)	308.2	533	463	VAT revenue increased significantly by 50.2 percent to Rs. 463.1 billion in 2022, compared to 2021, realizing 86.9 percent of the estimated revenue on VAT for 2022. This revenue performance was mainly due to the increased VAT rate to 12 percent from 8 percent and to 15 percent from 12 percent with effect from June 01, 2022 and September 01, 2022, respectively. The increase of VAT rate on financial services to 18 percent from 15 percent with effect from January 2022 also positively contributed to this performance. Despite the contraction of domestic economic activities and imposition of import restrictions, depreciation of Rupee against the US Dollar and higher commodity prices in both domestic and international market also caused this nominal increase in VAT revenue. Revenue from both VAT on domestic economic activities and import related activities increased by 57.2 percent to Rs. 291.6 billion and 39.7 percent to Rs. 171.5 billion, respectively in 2022.

Table 4.13 | Variance Analysis of Government Revenue contd...

Rs. Billion				
Item	2021	2022 Est.	2022	Reasons
Excise Duty	306.9	374	342.5	Revenue collection from excise duty increased by 11.6 percent to Rs. 342.5 billion in 2022 compared to Rs. 306.9 billion 2021, a realization of 91.6 percent of the revised estimate for 2022. This was mainly due to the increase in revenue from liquor and cigarettes. The revenue collection from liquor increased significantly by 19.2 percent to Rs. 165.2 billion in 2022 from Rs. 138.6 billion in 2021 mainly due to the upward revision of Excise Duty on liquor with effect from November 12, 2021 together with the introduction of Security Features and Security Features Management System on liquor and liquor-based products from January 03, 2022. Revenue collection from cigarettes also increased by 17.6 percent to Rs. 104.2 billion during the period under review, mainly due to revision of duty rates of cigarettes in Budget 2022 together with enhanced sales of sticks by 18.7 percent in 2022. However, excise duty on motor vehicles declined by 19.9 percent to Rs. 14.5 billion in 2022, compared to Rs. 18.1 billion in 2021 due to the measures introduced to curtail the motor vehicle imports since March 2020. Moreover, revenue from the excise duty on petroleum products also declined by 4.1 percent to Rs. 53.1 billion in 2022 as a result of reduction of fuel consumption with the implementation of fuel pass system with the view to managing fuel demand. The revenue collection from other products also contracted by 10.2 percent to Rs. 5.6 billion compared to the last year.
Import Duties	64.3	42	50.0	The revenue from Import Duty significantly declined by 22.3 percent to Rs. 50.0 billion during the year 2022 compared to 2021, realizing 119.1 percent of estimated revenue for 2022. Imposition of import control measures, introduction of license system on non-essential goods and imposition of surcharge on several non essential imports in order to manage forex outflow negatively contributed for the import duty revenue in the period under review.
Port and Airport Development Levy (PAL)	154.1	177	180.1	Revenue collection from PAL increased by 17.2 percent to Rs. 180.6 billion in 2022 with a realization of 102 percent of the annual revised estimate for 2022. This was mainly due to the depreciation of rupee against the US Dollar together with increase in revenue generated from key import items such as Auto Diesel, Petrol (92 Octane), Urea, wheat flour and wheat grain and other consumable commodities.
Special Commodity Levy (SCL)	55,828	35	40.2	Revenue from SCL showed a significant decline by 28.0 percent to Rs. 40.2 billion during the year 2022, realizing 114.8 percent from annual revised estimate 2022. This performance was mainly supported by the continuation of nominal SCL rates on essential commodities such as sugar, and lentils as well as periodical downward revision of SCL rates of other essential commodities such as potatoes and onions as well as overall decrease in import quantities

Table 4.13 | Variance Analysis of Government Revenue contd...

Rs. Billion				Reasons
Item	2021	2022 Est.	2022	
Other Taxes	106,537	133	140.7	The revenue collection from other taxes increased by 32.1 percent to Rs. 140.7 billion in 2022 from Rs. 106.5 billion in the same period under review, realizing 105.8 percent of the annual revised estimate for 2022. This was mainly due to the implementation of Social Security Contribution Levy which was introduced in October 01, 2022. The revenue collection from Telecommunication Levy increased by 16.8 percent to Rs. 15.0 billion benefiting the upward revision of Telecommunication Levy rate to 15 percent from 11.25 percent with effect from June, 2022. However, decrease in revenue from CESS Levy by 6.9 percent to Rs. 70.3 billion in 2022 reflecting the impact of import restriction imposed on selected CESS Levy applicable goods negatively affected this performance.
Non Tax Revenue	159.1	232	228.1	Non-tax revenue increased significantly by 43.4 percent during the year 2022 compared to the preceding year. It was a realization of 98.3 percent of the annual revised estimate for 2022. This was mainly due to the revision of fees of sales and charges together with improved revenue collection from rent, interest income and other non tax revenue sources. Further, receipt of Central Bank profit transfers of Rs. 30 billion and Social Security Contributions also significantly contributed to the revenue enhancement of non-tax revenue in year 2022.

Government
Expenditure

5.1 Overview

In 2022, the Government expenditure to GDP ratio fell by 1.5 percentage points to 18.5 percent from 20.0 percent in 2021 mainly due to the curtailment of recurrent expenditure to 14.6 percent of GDP in 2022 from 15.6 percent of GDP in 2021 and the freeze of the capital expenditure to 3.0 percent of GDP in 2022. All expenditure outlays as a percentage of GDP declined except the interest payments which increased to 6.5 percent in 2022 from 6.0 percent in 2021 absorbing nearly half of the total recurrent expenditure. As such, the non-interest recurrent expenditure to GDP ratio declined by 1.6 percentage points to 8.1 percent in 2022 from 9.7 percent in 2021. The expenditure to GDP ratio on salaries and wages declined to 4.0 percent in 2022 from 4.8 percent while such ratio on goods and services also fell to 0.8 percent in 2022 from 1.0 percent in 2021. However, in nominal terms, government expenditure significantly increased by 27 percent to Rs. 4,472.6 billion in 2022 from Rs. 3,521.7 billion in 2021 reflecting the increased interest payments and household subsidies including the pension bill. Recurrent expenditure increased by 28.1 percent to Rs. 3,519.6 billion in 2022 from Rs. 2,747.5 billion in 2021 whereas capital expenditure declined by 6.8 percent to Rs. 715.4 billion in 2022 from Rs. 767.6 billion in 2021.

The increase in non-interest recurrent expenditure was mainly driven by the increase in expenditure for Samurdhi payments with the grant of additional financial assistance provided for the low-income vulnerable families, an increase in spending for providing fertilizer subsidy and pension payments, among others. The wage bill only increased by nominal growth of 13 percent to Rs. 956 billion in 2022. The expenditure on goods and services was carefully managed with a growth of 8.2 percent despite the significant increases in prices of fuel, electricity and other goods and services. Meanwhile, the interest payments, in nominal terms, increased to Rs. 1,565.2 billion in 2022 from Rs. 1,048.4 billion in 2021 mainly due to the rise in domestic interest payments triggered by the rise in interest payments on Treasury Bills and Treasury Bonds.

5.2. Appropriation Act for 2022

The Appropriation Bill for 2022 was tabled in Parliament on October 07, 2021 and approved on December 10, 2021 and the Bill was subsequently passed as the Appropriation Act, No. 30 of 2021.

According to the Appropriation Act, the total government expenditure was estimated as Rs. 5,420 billion which included Rs. 1,827 billion for recurrent expenditure, Rs. 945 billion for capital expenditure, Rs. 2,647 billion for debt servicing (interest payments and amortization) and Rs. 6 billion for Advance Account activities. Those provisions were allocated among 181 Expenditure Heads. The summary of three schedules included in the Appropriation Act, No. 30 of 2021 is detailed in Table 5.1. As per Section 2(1) (b) of the Act, the Government borrowing limit for 2022 was Rs. 3,200 billion, compared to the Rs. 2,997 billion in 2021.

5.2.1. Appropriation (Amendment) Act, No. 21 of 2022

In 2022, public financial management encountered significant challenges which mainly stemmed from the economic crisis. Despite the constrained fiscal space and substantial cashflow difficulties, the Government continuously provided the required budgetary provisions to support low-income and vulnerable segment in society to relieve the cost of living. Also, the Government took steps to curtail non-priority and non-essential expenditure.

A supplementary estimate of Rs. 695 billion was approved by Parliament on June 08, 2022 enabling the Government to cover the expenditure for the provision of an additional cash grant to low-income households affected by the crisis and to increase the budgetary provision to meet the increased price levels of goods and services. Additionally, Rs. 300 billion allocated for certain less-priority projects was freed under Section 7 of the Appropriation Act.

Following the change in Government in mid-2022, there was a major reshuffle of the Cabinet of Ministers including the elimination of certain Ministries and the consolidation of others. Hence, it was required to amend the

Appropriation Act, No. 30 of 2021 in line with the prevailing structure of Ministries to ensure the smooth functioning of Ministries and avoid accounting complications. Accordingly, interim budget 2022 was presented in Parliament. The Appropriation Act, No. 30 of 2021 was amended including additional provisions for new expenditure requirements for additional welfare payments and adjustments for incorporating supplementary estimates approved by Parliament on June 08, 2022, while excluding the frozen amounts under Section 7 of the Act. Accordingly, the Appropriation (Amendment) Act, No. 21 of 2022 was passed in Parliament on September 09, 2022.

Simultaneously, the interim budget 2022 was presented in Parliament to move comprehensive economic policies for restoring macroeconomic sustainability and confidence.

5.2.2. Appropriation (Amendment) Act No. 42 of 2022

Under severe cash flow constraints and tightening of monetary policy, the interest rates on government securities i.e., Treasury Bills and Treasury Bonds increased beyond the expected levels towards the end of year 2022. The maturing government securities were mainly financed through re-issuances to the market and the Central Bank. Accordingly, the issuance of borrowing instruments such as Treasury Bills and Treasury Bonds are recorded as borrowing at the face value of the instrument. Hence, the realized values of the issuance of such instruments are lower than the recorded values of borrowings. Consequently, additional borrowing was required to finance the maturing Treasury bills and Treasury Bonds, along with their interest. Therefore, the Borrowing Limit approved by the Parliament under the Appropriation (Amendment) Act, No. 21 was required to be revised.

Accordingly, the Appropriation (Amendment) Bill for the upward revision of the borrowing limit by Rs. 663 billion was tabled in Parliament on November 30, 2022 which was subsequently passed as the Appropriation (Amendment) Act, No. 42 of 2022.

Table 5.1 | Schedules of the Appropriation Act for 2022
Rs. Billion

Schedule	Description	Act, No.30 of 2021	Act, No. 21 of 2022
First Schedule	Expenditure of General Services of the Government by Programme	2,797	3,330

Third Schedule	Expenditure related to Advance Account Activities	6	6
Total Government Expenditure		5,426	6,237

Source : Department of National Budget

5.3 Supplementary Estimates

In order to allocate provisions for additional expenses to expeditiously provide relief to the people and farming community who were affected by the current economic and social crisis and to maintain essential public services without interruption, a supplementary estimate of Rs. 695 billion was presented to Parliament on June 08, 2022 and was approved on the same day.

The additional provision to increase expenditure in the above supplementary estimate was included in the amendment to the Appropriation Act, No. 30 of 2021.

5.3.1. Special Law Warrants as Supplementary Allocations

As per the powers vested with the Minister of Finance by the Constitution, two (02) Special Law Warrants were issued to authorize the withdrawal of money from the Consolidated Fund in order to fulfil the additional fund requirements of the government that had been recognized as Special Law Services in the Schedule 2 of the Appropriation Act, No. 21 of 2022.

Table 5.2 | Issued Special Law Warrants in 2022

Authority No.	Expenditure Head No.	Institution	Purpose/Objective	Amount (Rs.)
1	1	His Excellency the President	To pay the retirement benefits to former President Hon. Gotabaya Rajapaksa from 2022.07.14 to 2022.12.31	544,113
2	249	Department of Treasury Operations	To meet the shortfall of provisions allocated on debt servicing	251,000,000,000

Source : Department of National Budget

5.4 Revised Budget for 2022

The budgetary allocations approved by Parliament were revised with the issuance of Special Law warrants by the Minister of Finance.

As such, Table 5.3 indicates the total budgetary allocation in 2022 after revising the budget by issuing above mentioned two Special Law warrants.

Table 5.3 | Total budgetary allocations applicable for 2022

Authority Source	Recurrent (Rs)	Capital/Debt Amortization (Rs)	Total (Rs)
1st Schedule ,Appropriation (Amendment) Act No.21 of 2022	2,239,829,595,000	1,090,396,963,000	3,330,226,558,000
2nd Schedule Appropriation Act	1,396,123,442,000	1,505,000,000,000	2,901,123,442,000
3rd Schedule Appropriation Act	-	-	6,000,000,000
Supplementary Estimates approved by Parliament	-	-	-
Special Law Warrants issued by the Minister of Finance	251,000,544,113	-	251,000,544,113
Total	3,886,953,581,113	2,595,396,963,000	6,488,350,544,113

Source : Department of National Budget

*At the time Appropriation (Amendment) Act No. 21 of 2022 was prepared, the supplementary estimate of Rs.695 billion approved by Parliament on 08.06.2022 was also included in the schedule 1 of Appropriation Act.

5.5 Advance Account Activities

Advance Accounts Activities are the activities of commercial nature and advances to public officers excluding the property loans which are implemented through selected Banks. The actual expenditure of the Advance Account Activities of the year 2022 was Rs. 19.14 billion, as against the estimated maximum expenditure of Rs. 29.19 billion. Accordingly, the Advance Account Activities were well within the approved total expenditure limits of the Appropriation Act, No. 30 of 2021. However, the minimum receipts limit could not be realized. The actual total receipts were Rs. 19.40 billion, compared to the estimated minimum receipts of Rs. 23.19 billion.

Compared to the year 2021, a 4 percent drop in the performance of advance account activities was recorded in 2022. This drop was mainly due to the suspension of credit facilities to staff officers by the National Budget Circular

03/2022 which was effective until the end of 2022. Further, difficulty in identifying the exact cadre under each expenditure head as a result of the Cabinet reshuffle that took place around the time of preparation of budget estimates has also impacted negatively the performance of Advance Account Activities.

5.6. Public Expenditure Management

5.6.1 Transfer of Funds

As per Section 5 of the Appropriation Act, No. 30 of 2022, approval was granted to reallocate or transfer unutilized provisions within the total expenditure limit approved by Parliament under the Virement procedure specified in Financial Regulation No. 66 and 69 (FR 66 and FR 69). In 2022, National Budget Department granted approval for 1,556 of such FR 66 and 69 transfer applications amounting to Rs. 313 billion.

5.6.2 Reallocation of Provisions under the Project "Supplementary Support Services and Contingent Liabilities"

The "Supplementary Support Services and Contingent Liabilities" project under the Expenditure Head 240 – Department of National Budget continued to facilitate unforeseen, unexpected or urgent additional fund requirements of spending agencies in 2022. Accordingly, Rs. 72.7 billion was

reallocated to relevant spending agencies as supplementary allocations for 2022 in line with the guidelines specified in printed estimates of 2022. A summary of such allocation is detailed in Table 5.4. Reports related to the reallocation of the provisions were tabled in Parliament as per the Appropriation Act, No 30 of 2022. In addition, the details of all such transfers have been incorporated into the Final Budgetary Position Report (Annual Report) as per the Fiscal Management (Responsibility) Act, No. 03 of 2003.

Table 5.4 | Ministry-wise summary of additional allocation from 01.01.2022 to 31.12.2022

5.6.3 Directives issued through circulars on Expenditure Management, Budget Preparation and Execution

Guidelines for the management of Budget 2022 were issued through the National Budget Circular No. 03/2021. In addition, the following circulars shown in the table 5.5 have been issued in 2022 in the areas of budget preparation, execution and expenditure management by the National Budget Department. Department

of Public Enterprises has issued corresponding circulars numbered 01/2022, 02/2022, 04/2022 and 09/2022 for the management of expenditure of State Owned Enterprises.

In 2022, the Minister of Finance issued quarterly warrants enabling the withdrawal of money from the Consolidated Fund. Hence, a circular was issued for each quarter subsequent to the issuance of warrants.

5.7. Composition of Government Expenditure

The expenditure on interest payment was Rs. 1,565.2 billion constituting 44.5 percent of the total recurrent expenditure. The expenditure on salaries and wages amounted to Rs. 956.2

billion which is a 27.2 percent of recurrent expenditure. The expenditure on welfare programmes including Pensions, Samurdhi, medical supplies, fertilizer subsidies and interest subsidies was Rs. 719.5 billion.

Table 5.6 | Government expenditure by categories

5.7.1. Salaries and Wages

The expenditure on salaries and wages for public servants including those in the Provincial Councils, Armed Forces and Police in 2022 was Rs. 956.2 billion, an increase of 13.1 percent

compared to Rs. 845.7 billion in 2021. The increase was mainly due to the provision of annual salary increments, provision of Rs. 5,000 monthly special allowance and salary increase owing to making around 50,000 graduate trainees permanent with the increase of their monthly salary from Rs. 20,000 to Rs. 41,700.

^(a) Provisional

Pensions

The total pension payments increased by 14.5 percent to Rs. 309.1 billion in 2022 from Rs. 269.8 billion in 2021. This increase was mainly due to the net increase in the number of pensioners by 0.6 percent from 672,196 in 2021 to 676,430 in 2022 and Rs. 5,000 monthly special allowance paid to the pensioners. Further, the payments for the new pensioners are considerably higher than that of the existing pensioners and those who are deceased.

In addition to the pension payments, the Government incurred Rs. 40.2 billion for the payment of all-inclusive due salaries as compensation for the injured and deceased security personnel in 2022. This was an increase of 6.1 percent compared to Rs. 37.9 billion in 2021. Until April 2021, dependents of the deceased personnel were entitled to this compensation till the deceased personnel completes the age of 55 years. In April 2021, The Government decided to continue to pay this compensation to the dependents of the deceased members through out the dependents' lifetime with the payment of the pension after the deceased member reaches 55 years of age.

5.7.2. Fiscal Decentralization

As per the 13th amendment to the Constitution of the Democratic Socialist Republic of Sri Lanka, the Government shall, on the recommendation of and in consultation with the Finance Commission, transfer funds to the Provincial Councils for recurrent and capital expenditure from the Annual Budget.

Accordingly, the Central Government has granted Rs. 313.1 billion directly to the Provincial Councils of which Rs. 298.7 billion was for the recurrent expenditure and Rs. 14.4 billion was for the capital expenditure. In addition, Rs. 5.6 billion was channelled through the Ministry of Public Administration, Home Affairs, Provincial Councils and Local Government for capital expenditure. Accordingly, a sum of Rs. 20 billion was transferred to Provincial Councils for Capital Expenditure in 2022. The transfer for recurrent expenditure increased by 4.9 percent in 2022 from Rs. 284.6 billion in 2021. The increase in recurrent expenditure was due to annual salary increments of public servants and the provision of Rs. 5,000 monthly special allowance.

5.8. Sectoral Classification of Government Expenditure

5.8.1. Human Resource Management

Health

Investment in Healthcare

After an increase in expenditure to combat the COVID-19 pandemic during the past 2 years, continued investments were made in 2022 with the focus of restoring healthcare services to the pre-pandemic level. The total expenditure on the health sector by the central government which includes the Ministry of Health and the Provincial Councils (PCs)¹ fell by 19.9 percent to Rs. 308.5 billion. The recurrent expenditure and the capital expenditure declined by 1.2 percent and 65.1 percent to Rs. 269.2 billion and Rs. 39.2 billion, respectively in 2022. This decline was mainly due to the capitalization of Rs. 69.08 billion incurred for the vaccination programme and the inclusion of the expenditure relating to Social Services under the Ministry of Health in 2021.

Figure 5.1 | Central Government Expenditure on Healthcare in 2022

*Elder benefited programme is included in 2020/2021
Source : Department of National Budget

The personnel emoluments of the healthcare staff increased by 3.9 percent to Rs. 166.5 billion in 2022 from Rs. 160.2 billion. Overtime payments and extra duty allowances grew to Rs. 36.2 billion in 2022 from Rs. 32.6 billion in 2021, as one distinctive feature in incurred recurrent expenditure in 2022.

The special COVID-19 treatment center constructed at the Mulleriyawa Base Hospital with labour and technical assistance from the Sri Lanka Air Force was officially handed over to the Ministry of Health on August 3, 2022. In order to improve the quality of health-care and ensure the interrupted treatment facilities, the Ministry of Health handed a fleet of 25 new ambulances and 38 cabs to selected hospitals and regional health offices around the island on February 17, 2022. This was conducted with the support of Asian Development Bank funding.

Meanwhile, an investment of Rs. 715.9 million was made in 2022 for the production of Thripasha, and the Thripasha Packets were distributed among 0.85 million beneficiaries.

Achieving a significant milestone in mental health, the National Mental Health Policy for the next 10 years was presented on August 16, 2022, focusing on mental health wellbeing. Additionally, on February 24, 2022, the Ministry of Health launched an initiative in collaboration with the Pharmacists' Association and S.L.T Mobitel to enhance the availability of data on pharmaceuticals sent to clinical patients through the post.

The health-care workforce was further increased by 938 medical officers and 2,153 nurses in 2022. The summary of the in-position cadre of selected categories is as follows.

Table 5.9 | In position cadre of selected categories

General Education

The total expenditure on school education by the Government amounted to Rs. 298.1 billion, an increase of 15.9 percent in 2022 compared to Rs. 257.3 billion in 2021. Accordingly, the expenditure of the Ministry of Education was Rs. 100.3 billion and the Central Government transfers to the nine Provincial Councils amounted to Rs. 197.9 billion. The recurrent expenditure increased by 19.5 percent to Rs. 290.1 billion in 2022. Due to the economic hardships in 2022, the capital investments were restricted to settling outstanding bills of the works carried out and accordingly, the capital investment declined by 44.9 percent to Rs. 8.0 billion in 2022.

Teachers and Principals undertook a prolonged trade union action demanding solutions to long-standing salary anomalies and the issue was resolved through the increase in salaries announced in the 2022 Budget Speech. Therefore, personnel emoluments increased by 80.7 percent compared to 2021.

The student welfare programs were continued as it is, despite the contemporary hardships in 2022, to ensure free education while minimizing regional disparities. The total expenditure of the welfare programs was Rs. 10,230 million, a decrease of 14.3 percent compared to 2021. Due to the delay in printing of school text books and reducing the no of insurance claims. The School Text Books for the year 2023 have not been printed in 2022 due to the postponement of starting date of first term

of the schools in 2023 and shortage of papers as well as necessary printing material. In order to minimize the upsurge price hike of the food which in turn affected on the nutritional status

of the school children, the Government has responded by increasing the per student per day price of nutritious meal from Rs. 30 to Rs. 100 and spent Rs. 3,308 million in 2022.

University Education

The total government expenditure on university education was Rs. 75.6 billion, a slight decline of 1.3 percent compared to 2021. Out of the recurrent expenditure of Rs. 57.4 billion, Rs. 50.1 billion was spent on the payment of salaries and wages of 25,717 academic and non-academic staff in the higher education sector.

The total capital investment was Rs. 18.3 billion in 2022, compared to Rs. 21.9 billion in 2021 and this was mainly utilized for the construction, rehabilitation and improvement of capital assets, acquisition of fixed assets, human capital development and strengthening

research activities. 62 construction projects are ongoing in the universities. The 17 storied building for pre-clinical building for the Medical Faculty of Colombo University was completed in 2022 with a total estimated cost of Rs. 5,688 million. And it is the largest project in the higher education sector under local funds.

Twenty new degree programmes were introduced in 2022 to meet the changing demand of the local and global labour market. Further, pre-university Online/E-Learn English Teaching programme has been introduced to the new university entrants to upgrade graduate profiles by strengthening soft skills.

Non state Higher Education

Given the limited opportunities available in the state university system, Rs. 403 million was invested in 2022 to continue interest free loan scheme to enhance higher education opportunities for A/L qualified students in non-state universities. Accordingly, 4,665 students were granted the opportunity of following 108-degree courses offered by 17 non-state higher education institutes during the year under the loan scheme.

Skills Development

The total expenditure on Skills Development, Vocational Education was Rs. 9,281 million in 2022, of which, Rs. 7,568 million was spent on recurrent expenditure and Rs. 1,713 million for capital investment.

5.8.2 Transport

Bus Passenger Transport

Government spent Rs. 13.5 billion for this sector in 2022, of which Rs. 11.3 billion was spent as recurrent expenditure. Meanwhile, Rs. 6.4 billion was spent by the government as recurrent expenditure in order to provide season tickets to school and higher education student. Rs. 3.3 billion was spent on other relief services such as an operating of Sri Lanka Transport Board (SLTB) buses on unremunerated routes in rural areas, contribution to maintaining a socially obligatory bus service and providing armed forces bus passes. The recurrent expenditure in 2022 declined by 10 percent to Rs. 11.3 billion in 2022 compared to Rs. 12.5 billion in 2021. A sum of Rs. 2,224 million was spent as capital expenditure including the purchase of 500 new buses for the Sri Lanka Transport Board, improvement of the bus fleet and printing of driving licenses.

Railways

In light of the limited operations of private bus services owing to the economic crisis and subsequent rise in fuel prices, there was a surge in demand for railway transportation in 2022. A sum of Rs. 23.5 billion was incurred as recurrent expenditure on the railway sector in 2022 whereas Rs. 21.6 billion was spent as capital expenditure including the expenditure on Colombo Suburban Railway Efficiency Improvement Project implemented with the aim of providing comfortable and uninterrupted railway services to the public. In this context, the railway administrative and operational costs increased by 61 percent in 2022 compared to the year 2021. Despite the increase in recurrent expenditure, due to the slowdown in construction activities, the total expenditure on the railway transport sector in 2022 was Rs. 45.2 billion, a 7 percent decline compared to the total expenditure of Rs. 48.7 billion in 2021.

Port and Shipping

The Government incurred Rs. 3,267 million in 2022 for the port shipping and civil aviation sector, of which, Rs. 962 million was spent for recurrent expenditure and Rs. 2,305 million was for capital expenditure. Out of recurrent expenditure, Rs. 591 million and Rs. 329 million were spent on interest and loan installment payments, respectively, in relation to the Sooriyawewa International Cricket Stadium project. The recurrent expenditure of 2022 marked an increase of 27 percent compared to Rs. 758 million recorded in 2021. This was due to taking civil aviation activities under the purview of the Ministry of Ports and Shipping which was previously under the Ministry of Tourism.

Road Development

The expenditure in the road development sector for 2022 encompassed the construction of expressways and bridges, rehabilitation of roads, widening and improvement of roads and maintenance of both roads and bridges. In 2022, road development projects generally recorded low progress compared to previous years as a result of the shortage of some construction materials, high material prices and import restrictions. Further, the government initiatives adopted to overcome the economic crisis placed less priority on infrastructure development.

However, in 2022, the government invested around Rs. 200 billion in the road sector development, a decline of 6 percent compared to the expenditure of Rs. 213 billion in 2021.

Out of the total investment in road development, nearly Rs. 34.4 billion (nearly 17%) was invested in expressway development. Construction of Central Expressway section I from Kadawatha to Meerigama and Port Access Elevated Highway from Ingurukade junction to Port City are the two main expressway development projects that were continued in 2022.

In 2022, expenditure on highway development including the Integrated Road Development Programme and the development of an alternative road network to access main roads and expressways amounted to approximately Rs. 146.3 billion. In addition, Rs 3.9 billion was invested in road maintenance.

The investment in bridge construction amounted to around Rs. 7.5 billion in 2022 and a significant amount was allocated to continue the construction of flyovers in Kohuwala, Gatambe, Uththarananda Mawatha and Slave Island.

5.8.3 Social Welfare and Social Security

Government expenditure on social welfare and social security amounted to Rs. 738 billion in 2022 compared to Rs. 609.8 billion in 2021, an increase of 21 percent. This increase was driven by the increase in fertilizer subsidy, grant of an additional allowance on top of the existing allowance granted by the World Bank and the Asian Development Bank to the existing Samurdhi, Elderly, Kidney patients and Disabled persons and grant of welfare payments to wait-listed people who are suffering from economic difficulties for a period of 06 months. Accordingly, the government has incurred Rs. 116 billion for Samurdhi subsidy, Rs. 16.4 billion for the Elderly allowance, Rs. 2.7 billion for the allowance for Kidney patients and Rs. 5.1 billion for the allowance for Disabled persons during 2022. The government spent Rs. 3.7 billion to continue the payment of Rs. 20,000 allowance per woman under the Nutrition Food

Package Program which aims at increasing the nutritional level of pregnant women. Also, in the year 2022, approximately 35,900 school children were covered under the health insurance coverage at a cost of Rs. 993 million.

5.8.4. Agriculture

The Government incurred Rs. 107 billion in 2022 for the agriculture sector with an increase of 48 percent compared to 2021.

Table 5.24 | Expenditure on Agriculture Sector in 2022

^(a) Provisional

Food Crops

In 2022, the Government incurred Rs. 94 billion on food crops such as paddy, maize, potatoes, big onions, vegetables and fruits, including expenditure on organic fertilizer subsidy amounting to Rs. 62 billion. In 2022, several projects and programmes continued to boost agriculture production through improving agriculture extension, production of seeds and planting materials as well as research and development. Rs. 5.2 billion was spent on the implementation of the Agriculture Sector Modernization Project and Smallholder Agribusiness Partnership Programme which aims to improve the productivity, commercialization, value addition and market access for selected crops. The Government contribution to the farmer insurance scheme was Rs. 4 billion which is expected to reduce the risk to farmers from crop damages due to natural disasters.

Plantation

In 2022, the Government invested Rs. 7.7 billion on the cultivation of tea, rubber, coconut and other export crops through the provision of extension services and planting materials at a subsidized rate. In addition, the Government continued the promotion of the value addition of the plantation crops and provision of financial assistance for replanting and new planting activities.

In 2022, Rs. 241 million was incurred through the Department of Export Agriculture to facilitate the production and quality improvements of perennial export crops such as Cinnamon, Pepper, Cardamom, Clove, Nutmeg, Coffee, Cocoa, Vanilla, Betel, Citronella, Lemongrass, Ginger, Turmeric, and Areca-nuts.

Fisheries

The government expenditure for the fisheries industry in 2022 amounted to Rs. 2.7 billion, of which Rs. 1.6 billion was spent for the rehabilitation and improvement of fishery harbours and anchorages to improve infrastructure facilities in the marine fisheries sector. Also, around Rs. 709 million was utilized in 2022 for the development of the inland fisheries sector, particularly through the

implementation of projects on the cleaning of lagoons, fish breeding, and stocking of fish fingerlings in freshwater bodies.

Livestock

In 2022, Rs. 971 million was incurred in the livestock sector including expenditure on breeding farms, animal breeding through artificial insemination, disease control, production of vaccines, livestock research and training programmes.

5.8.5. Irrigation

The total government expenditure for the irrigation sector in 2022 amounted to Rs. 58 billion. In 2022, priority was placed on the smooth implementation of ongoing projects, rehabilitation of minor tanks and canals and improvement of existing medium and major irrigation schemes. Rehabilitation of major, medium and minor irrigation schemes continued in 2022, especially focusing on the protection of the upper catchment area to ensure the water sources to down streams and desiltation of reservoirs. In 2022, several ongoing schemes such as Mahaweli Water Security investment Programme, Uma Oya Diversion Project and Uma Oya Downstream development, and Yan Oya project continued.

5.8.6. Housing and Common Amenities

Housing Development

Total expenditure for housing construction and related infrastructure development was Rs. 10.4 billion in 2022, of which Rs. 1.3 billion was spent on recurrent expenditure and Rs. 9.1 billion was incurred for capital expenditure. Middle Income Housing Scheme, Urban Regeneration Programme for the resettlement of underprivileged settlements in Colombo city and suburban area, permanent housing for families affected by conflicts in the Northern and Eastern provinces, Estate housing programme and "Semata Niwahana " housing programme were the main housing projects continued in 2022. In the context of the economic crisis in the country in 2022 and due to the huge increase in the price of construction materials, there was a severe setback in the entire construction sector and house construction activities were

also very slow. Under such circumstances, the expenditure incurred in 2022 for providing housing facilities decreased by 22 percent compared to the expenditure of Rs. 13.4 billion in 2021.

Urban Development and Coast Conservation

Amidst the economic crisis, there was an abnormal increase in the prices of construction materials in the market and it was a major hindrance to the construction industry. Accordingly, it was not possible to expect a positive growth in urban development

activities. Accordingly, the total expenditure incurred by the government in the urban development sector declined by 53 percent to Rs. 13.5 billion in 2022 from Rs. 29.2 billion in 2021. Out of the total expenditure, Rs. 1.7 billion was spent on recurrent expenditure and Rs. 11.9 billion was incurred on capital expenditure. Rs. 4.3 billion was spent on solid waste management, and ocean clean-up programs including management of environmental damage caused by the MV X-Press Pearl ship accident. Meanwhile, the Greater Colombo Urban Development Project, which was implemented with the aim of flood control was continued.

Drinking water and Sanitation

The government spent Rs. 31.9 billion in 2022 for the water supply sector, of which Rs. 719 million was spent as recurrent expenses including the payment of salaries and wages and Rs. 31.2 billion was spent as capital expenditure. The total expenditure of 2022 declined by 41 percent compared to Rs. 54.2 billion recorded in 2021, largely owing to the reduction in capital expenditure.

As in previous years, most of the projects implemented in the water supply sector in 2022 were implemented under foreign loans. Due to the economic crisis, there was a need to restructure the foreign debt. Accordingly, there was a lag in the physical progress of most of the bilateral loan projects and the cost of accounting was also not done properly.

5.8.7 Environment

Government has placed significant importance on the conservation and protection of the environment through proper waste management and conservation of forests and wildlife, while addressing issues such as the human-elephant conflict and the depletion of forest cover.

Forest conservation

Government spent Rs. 500 million on forest conservation which included the activities such as the expansion of the forest coverage, establishment and management of industrial plantations, production of planting materials, and conversion of Pine plantations to native broad leave species and prevention of forest fire. In addition, a sum of Rs. 31 million was spent to protect rivers under the 'Surakimu Ganga' river protection program.

Wildlife conservation

Under the wildlife conservation, priority was given to mitigate human-elephant conflict for which Rs. 386 million was spent in 2022. Further, a sum of Rs. 97 million was allocated to construct electric fences, while spending Rs. 48 million to habitat enrichment of wildlife. In addition, Rs. 9 million was spent to improve road network in National Parks to facilitate tourists.

06

Cash Flow Management, Deficit Financing and Debt

6.1 Overview

In 2022, total cash inflows and outflows amounted to Rs. 1,876.8 billion and Rs. 4,233.4 billion. The overall net cash deficit of Rs. 2,356.6 billion was mainly financed by domestic sources. Accordingly, total domestic debt stock as at end of the year was amounted to Rs. 16.0 trillion while total foreign debt was amounted to Rs. 12.5 trillion. Total debt to GDP ratio increased to 113.8 percent in 2022 from 100.1 percent in 2021. Domestic and foreign debt as a percentage of GDP stood at 62.3 percent and 51.6 percent respectively 2022.

Treasury Cash Flow Management

Treasury cash flow management aims to ensure the availability of adequate funds to operationalize government fiscal policy during the fiscal year through implementing agencies efficiently and effectively. Treasury cash flow management process transforms the Annual Budget approved by Parliament for a particularly financial year into an implementable cash flow. The fund flows include cash inflows in the form of revenue and borrowings and cash outflows in the form of expenditure, which comprise of both recurrent and capital payments including debt service payments.

6.2 Government Treasury Cash Flow Operations – 2022

The total receipts to the Treasury cash flow in the form of revenue and other sources amounted to Rs. 1,876.8 billion with the realization of 78 percent from the revenue estimate of Rs. 2,383.7 billion. Meanwhile, the cash outflow for both recurrent expenses and public investment in 2022 amounted to Rs. 4,233.4 billion including interest payment of Rs. 1,366.2 billion and excluding debt repayment as against the estimate of Rs. 4,741.5 billion representing 89.0 percent from the estimate.

The net borrowings amounted to Rs. 2,961.3 billion in 2022 which was used to finance the net cash deficit, mainly the interest payments. In addition, part of the bank overdraft was also settled during the year in 2022 resulting in a decrease in the year end negative cash balance up to Rs. 84.2 billion from the opening negative cash balance of Rs. 831.6 billion. The cash outflow for debt repayments in 2022 amounted to Rs. 1,449.2 billion as against the estimate of Rs. 1,510.5 billion.

Table 6.1 | Government Treasury Cash Flow Operations – 2022

6.3 Government Borrowing Programme – 2022

Parliament approved the borrowing limit of Rs. 3,200 billion as specified in the Appropriation Act, No. 30 of 2021 and it was subsequently increased to Rs. 3,844 billion in the Appropriation Act, No. 21 of 2022 and further increased up to Rs. 4,507 billion in the Appropriation Act, No. 42 of 2022 for financing the resource gap in the Budget 2022. The Actual gross borrowing in 2022 was Rs. 4,337.6 billion of which Rs. 3,554.2 billion was from domestic sources and the rest of Rs. 783.4 billion was from foreign sources.

6.4 Financing of the Budget

In a economic classification, the overall budget deficit of Rs. 2,459.9 billion was financed mainly through domestic sources in 2022. Financing through domestic sources amounted to Rs. 2,035.1 billion or 8.4 percent of GDP in 2022, while net foreign financing accounted Rs. 424.8 billion or 1.8 percent of GDP in 2022. The net domestic financing decreased by 1.7 percent to Rs. 2,035.1 billion in 2022 from Rs. 2,071.8 billion in 2021 while the net foreign financing increased significantly Rs. 424.8 billion in 2022 from the net repayment of Rs. 13.9 billion in 2021.

Foreign Financing Commitments

Despite the measures taken by the Government in early 2020 to stabilize the economy hampered by the Easter Sunday attack in 2019 and the Covid-19 pandemic during 2020–21

period, which has caused to decline in foreign earning inflows coupled with increasing debt burden mainly due to International Sovereign Bonds (ISBs) maturities due in 2022 and hiking exchange rate pressure from first quarter of 2022, the Government was compelled to adopt a debt standstill policy in 2022 to stabilize the economy, which further closed the access to the market in the short run, the Government was able to secure foreign financing commitments in the form of Official Development Assistance (ODA), mainly from India and Asian Development Bank (ADB) for importing essential goods. Government obtained total ODA commitment amounting to USD 1,915.2 million by entering into 15 agreements with foreign development partners and lending agencies from 1st January to 31st December in 2022, of which, USD 1,805.5 million in the form of loans together with USD 109.7 million grants.

During this period, India leads by its commitments amounting to USD 1,555 million, followed by the ADB (USD 203 million), the United States of America (USD 73 million), Kuwait (USD 32.9 million), Germany (USD 17.6 million), European Union (EU) (USD 13.9 million), Korea (USD 12 million) and Japan (USD 7.8 million), respectively.

The highest amount of commitment was made for the trade sector which amounted to USD 1,000 million or 52 percent of the total commitments, followed mainly by the power and energy sector (USD 500 million or 26 percent) and the humanitarian assistance sector (USD 203 million or 10 percent).

Committed Undisbursed Balance (CUB)

As at 31st December in 2022, the total undisbursed balance of foreign financing available from the loans committed that are to be utilized in the next 3–5 years, was USD 6.8 billion. The major portion of the balance is to be disbursed from the projects committed with China and others are from ADB, India, Japan and WB, respectively.

Almost 20 percent of the CUB is to be utilized in the roads and bridges sector whereas 18 percent is for water supply and sanitation and 12 percent in the ground transport sector.

6.5 Central Government Debt

The total outstanding central government debt, in nominal terms, increased notably by 56.1 percent to Rs. 27,492.0 billion by the end 2022 compared to Rs. 17,614.2 billion by the end 2021. This was mainly due to the sharp depreciation of the Sri Lankan Rupee by 44.8 percent against the USD during 2022 and the announcement of a debt standstill for selected debt payments while commencing negotiations with the International Monetary Fund (IMF). Also, the increase in the debt stock in 2022 was further tightened with the absorption of selected State Owned Enterprises (SOEs) debt to the Central Government. The total debt stock as a percentage of GDP increased by 13.7 percentage points to 113.8 percent at the end 2022 from 100.1 percent at the end 2021.

Foreign debt as a percentage of GDP increased to 51.6 percent of GDP by the end 2022 compared to 37.0 percent of GDP at the end 2021 due to the depreciation of the Sri Lanka rupee against major currencies during 2022. However, the domestic debt as a percentage of GDP declined slightly by 0.7 percentage points to 62.3 percent at the end 2022 compared to 63.0 percent at the end 2021.

Of the total debt, domestic debt increased by 35.5 percent to Rs. 15,033.9 billion at the end of 2022 from Rs. 11,097.2 billion at the end of 2021 while foreign debt increased significantly by 91.2 percent from Rs. 6,517.0 billion at the end 2021 to Rs. 12,458.2 billion at the end 2022.

The share of domestic debt in the total debt stock decreased to 54.7 percent at the end of 2022 from 63.0 percent recorded at the end of 2021. In contrast, of the total debt stock, the share of foreign debt increased to 45.3 percent at the end of 2022 from 37.0 percent at the end of 2021 due to the depreciation of Sri Lanka Rupee against the USD during 2022.

Figure 6.6 | Central Government debt

Sources: Department of External Resources & Central Bank of Sri Lanka.

Outstanding short term domestic debt stock significantly increased by 35.9 percent to Rs. 4,267.7 billion at the end of 2022 from Rs. 3,139.8 billion at the end of 2021 due to the significantly enhanced Treasury bills stock by 81.2 percent, to Rs. 4,113.9 billion by end 2022, compared to Rs. 2,270.5 billion recorded at the end of 2021. The share of short-term debt in total domestic debt stock increased slightly to 28.4 percent by the end of 2022 from 28.3 percent reported at the end of 2021. Furthermore, the share of Treasury Bills in total domestic debt stock increased to 27.4 percent at the end of 2022 from 20.5 percent at the end of 2021.

The medium and long term domestic debt stock increased by 24.2 percent to Rs. 9,882.1 billion by the end of 2022 from Rs. 7,957.4 billion recorded at the end of 2021. However,

the share of medium and long term debt in the total domestic debt stock further declined to 65.7 percent in 2022 from 71.7 percent at the end of 2021 due to the continued dependency on short term instruments for deficit financing in 2022 than medium and long term financing. The share of Treasury Bonds of the total outstanding domestic debt stock declined to 57.9 percent at the end of 2022 from 62.8 percent at the end of 2021.

The banking sector debt increased by 62.5 percent to Rs. 8,525.7 billion at the end of 2022 from Rs. 5,247.9 billion in 2021 due to the increased debt to commercial banks and the Central Bank. Meanwhile, nonbank sector debt also increased by 27.8 percent to Rs. 6,164.1 billion at the end of 2022 compared to Rs. 4,822.1 billion at the end of 2021. Of the total domestic debt, the share of the banking sector debt increased to 56.7 percent by the end of 2022 from 47.3 percent at the end of 2021 whereas the share of the non-banking sector debt declined to 41.0 percent by the end of 2022 from 43.5 percent by the end 2021.

6.5.1 Domestic Debt

The outstanding domestic debt excluding the rupee denominated Treasury Bills and Bonds issued to non-residents, increased by 35.5 percent to Rs. 15,034 billion at end 2022 from Rs. 11,097.2 billion at end 2021.

Composition by Type

As at end 2022, Treasury Bonds, Treasury Bills and Sri Lanka Development Bonds (SLDBs) stood at 57.9 percent, 27.4 percent and 2.5 percent, respectively of the outstanding domestic debt. The stock of Treasury Bonds increased by 25.0 percent to Rs. 8,709.0 billion in 2022 while the stock of Treasury Bills increased by 81.0 percent to Rs. 4,113.9 billion, compared to 2021. The outstanding stocks of SLDBs declined by 16.0 percent in 2022. The share of provisional advances obtained from the CBSL increased to 57.0 percent in 2022 from 1.4 percent in 2021.

Figure 6.7 | Composition of Domestic Debt by Type

Sources: Central Bank of Sri Lanka & Department of Treasury Operations

Composition by Maturity Profile

The share of domestic debt matured within a year from the total outstanding domestic debt represented 42.7 percent while the balance 57.3 percent represented the maturities beyond 2022. The total medium to long-term debt portfolio included 88.1 percent of Treasury Bonds and the remaining 11.9 percent consisted of SLDBs, ISBs held by the residents and offshore banking units and other borrowings.

Figure 6.8 | Domestic Debt Maturity Profile

Sources: Central Bank of Sri Lanka & Department of Treasury Operations

Composition by the Ownership of Domestic Debt

The ownership of government domestic debt in the banking and non-banking sectors increased by 62.5 percent and by 27.8 percent, respectively at the end 2022. Out of the total outstanding domestic debt, the share of banking sector increased to 56.7 percent in 2022 whereas the share of non-banking sector decreased to 41.0 percent as at end 2022, compared to 2021. However, the domestic debt owned by the Central Bank increased by 81.0 percent due to the significant increase in Treasury Bill holdings while the commercial banks' holdings also increased by 54.6 percent in 2022 particularly due to the increase in Treasury Bond holdings as against the previous year. Further, Treasury Bill holdings of commercial banks increased by 15.6 percent in 2022.

Sources: Ministry of Finance, Economic Stabilization and National Policies, Central Bank of Sri Lanka

(a) As per the guidelines of compiling government debt statistics in the Manual of Government Finance Statistics published by the IMF in 2014, non resident holdings of outstanding SLDBs have been classified under foreign debt and resident holdings of outstanding ISBs of the Sri Lankan Government have been classified under domestic debt.

(b) Revised

(c) Provisional

(d) The outstanding central government debt excludes several debt service payments that became overdue after 12 April 2022, the date of which the Interim Policy regarding the servicing of Sri Lanka's external public debt was announced by the Ministry of Finance, Economic Stabilization and National Policies. These debt service payments comprise of overdue interest payments of affected debt which deemed to be capitalized as per the Interim Policy and several overdue interest payments in relation to SLDBs.

(e) Excludes Treasury bills held by non resident investors.

(f) Includes liabilities of the Central Government to commercial banks reported in the Monetary Survey of the Central Bank

(g) Excludes Treasury bonds held by non resident investors and includes Government Treasury bonds of Rs. 78,441 million issued for CPC in January 2012, of which Rs. 21,778 million matured on 01 January 2017 and Rs. 25,217 million matured on 01 January 2022 and current outstanding is Rs. 31,446 million. the

(h) Several interest payments that fell overdue after the debt standstill may not be included in the outstanding balance for 2022 since recording of these debt service payments in the debt recording systems is not yet finalized.

(i) Represents ISB outstanding owned by the Licensed Commercial Banks

(j) Data for 2022 includes outstanding balance of the government guaranteed foreign currency debt of the Ceylon Petroleum Corporation that was absorbed into central government debt w.e.f. December 2022, which amounted to Rs. 884,093.4 million

(k) The composition of domestic debt held by the banking and non banking sectors was revised from 2016 due to the adjustment for holdings of SLDBs of businesses and individuals

(l) Institution wise classification was revised from the Annual Report 2022 based on records of the Central Depository System and the data for 2018-2021 have been revised accordingly.

(m) The CBSL introduced outright purchase of Treasury bonds through Open Market Operations w.e.f. 06 September 2019

(n) Includes sinking fund

(o) Includes the holdings of Standalone Primary Dealers, leasing companies, private companies, mutual funds, etc.

(p) Includes the holdings of EPF, ETF, pension funds, provident funds, etc.

(q) Includes the holdings of Government authorities, Government departments, Ministries, etc.

(r) Includes the holdings of societies, clubs, associations, etc.

(s) Includes securities holdings under Repurchase agreements for which absolute ownership could not be established

(t) Holdings under repurchase transactions with respect to Open Market Operations, have been allocated to the respective Licensed Commercial Bank or Standalone Primary Dealer

6.5.2 Outstanding Central Government Foreign Debt

At the end of 2022, the total outstanding external debt of the Central Government amounted to USD 35.96¹ billion. Of which, 37 percent of the total outstanding debt is to be matured within next five years, almost 51 percent is to be matured 6 -20 years and 12 percent to be matured after twenty years.

6.6 Debt Service payments

In nominal terms, the total debt service payments significantly increased due to the notable increase in debt repayments and interest payments related to domestic debt.

In nominal terms, the total debt service payments increased by 25.9 percent to Rs. 2,997.6 billion in 2022 compared to Rs. 2,380.6 billion in 2021. Total domestic debt service payments which accounted for 83.7 percent of total debt service payments notably increased by 57.4 percent to Rs. 2,510.3 billion in 2022 whereas total foreign debt service payments marginally declined by 38.0 percent to Rs. 487.4 billion in 2022. The total debt repayments increased by 7.5 percent to Rs. 1,432.5 billion in 2022 from Rs. 1,332.2 billion in 2021 combined with the total interest payments by 49.3 percent to Rs. 1,565.2 billion in 2022 from Rs. 1,048.4 billion in 2021.

Total domestic repayments increased significantly by 34.3 percent to Rs. 1,073.7 billion in 2022 from Rs. 799.7 billion in 2021 mainly due to the increase in maturing of Treasury Bonds and SLDBs. Foreign debt repayment declined by 32.6 percent to Rs. 358.7 billion in 2022 from Rs. 532.5 billion in 2021. This was mainly due to the debt standstill of the Government in April 2022.

Interest payments on domestic debt increased notably by 80.8 percent to Rs. 1,436.6 billion in 2022 from Rs. 794.6 billion in 2021 due to the increased domestic borrowings with the limited foreign financing receipts and the rise in domestic interest rates. In contrast, interest

payments on foreign debt declined by 49.3 percent to Rs. 128.6 billion in 2022 from Rs. 253.7 billion in 2021.

As a percentage of government revenue, total debt service payments dropped to 148.9 percent in 2022 from 162.6 percent in 2021. The total debt repayments fell to 71.2 percent in 2022 from 91.0 percent in 2021 whereas the total interest payment as a percentage of government revenue declined to 77.7 in 2022 from 71.6 percent in 2021. Total debt service payments as a percentage of GDP declined to 12.4 percent in 2022 from 13.5 percent in 2021. Debt repayments to GDP ratio decreased to 5.9 percent in 2022 from 7.6 percent in 2021. In contrast, interest payments as a percentage of GDP declined to 6.5 percent in 2022 from 6.0 percent in 2021.

6.6.1 Domestic Debt Service Payments

Domestic debt service payments increased by 57.5 percent to Rs. 2,510.2 billion in 2022 reflecting an increase in amortization payments on the domestic debt by 34.3 percent to Rs. 1,073.7 billion and the rise in interest payments on the domestic debt by 80.8 percent to Rs. 1,436.6 billion in 2022, over the previous year.

Domestic debt service payments as a percentage of GDP increased to 10.4 percent in 2022 from 9.1 percent in 2021. Domestic debt service payments recorded 126.8 percent of Government revenue in 2022, compared to 109.4 percent in 2021.

Table 6.7 | Domestic Debt Service Payments

6.6.2 Foreign Debt stock and Foreign Debt Service Payments

Total Central Government external debt as at the end of December 2022 amounted to USD 35.96¹ billion. Composition of external debt as per lender category is depicted in the Figure 6.10.

Figure 6.10 | Composition of Central Government External Debt – as of 31st December 2022 (USD Million)

■ Multilateral ■ Bilateral ■ Commercial

Source : Department of External Resources

Commercial debt represented the majority of the total Central Government external debt (41 percent), which consists of ISBs and Term Loan Facilities followed by the Bilateral debt (31 percent) and Multilateral debt (28 percent). Of which, 37 percent of the total outstanding debt is to be matured within next five years, almost 51 percent is to be matured 6 -20 years and 12 percent to be matured after twenty years.

¹ Provisional, Only the Central Government outstanding Foreign Debt are depicted including unpaid Principal accumulated after debt standstill policy was adopted.

Total debt service payments² from 1st January to 31st December in 2022 was amounted to USD 1,955.7 million of which, USD 1,456.3 million was in lieu of principal repayments and the balance USD 499.4 million for the payment of interest.

In line with the interim policy adopted by the Government, the servicing of the external debt of affected bilateral and commercial creditors have been temporary suspended for an interim period commencing from 12th April, 2022. Accordingly, Principal amount of USD 1,849 million and Interest of USD 842 million have been accumulated as unpaid debt service by end 2022.

PART III

Development Finance for Balanced and Inclusive Growth

07

Development
Finance

7.1 Overview

Small and Medium-sized Enterprises (SMEs) have been powerful economic growth drivers that contribute more than 20 percent of exports, 45 percent of employment, and 52 percent of the GDP in Sri Lanka in 2022. Despite playing such a major role in the economy, they have been severely impaired by sub-optimal growth and lack of access to finance, among others. This has been further distressed by the ramifications of the economic crisis that erupted in 2022. However, the Government continued to facilitate SMEs through the mobilization of financial resources to alleviate the adverse effects of the crisis amidst the severe cash flow issues confronted by the new Government.

The SME sector was severely affected by the high inflation, pressure for salary hikes, depreciation of the Sri Lankan Rupee, lack of raw materials, power shortages and high financing costs, upward tariff adjustments on utility services and import restrictions, among others. As such, SMEs were in difficulty meeting their financing needs and servicing their loans. Hence, a number of moratorium schemes were implemented to assist SMEs despite the potential negative impact of such moratoriums on the banking sector in the long run. Therefore, in the latter part of 2022, banks were allowed to decide how to treat affected SMEs on a case-by-case basis. In addition, the General Treasury implemented financial and non-financial programmes in order to facilitate the affected SMEs. In 2022, thirteen banks implemented three primary components: (i) SME Credit Line; (ii) Emergency Response Facility and; (iii) Tea Smallholder Credit Line of the Small and Medium-sized Enterprises Line of Credit (SMELoC) project. Due to such assistance, many SMEs were able to continue their activities despite the challenges stemming from the economic disturbances.

Under the non-financial support programmes for strengthening the institutional and legislative framework, actions are being taken to register the National Credit Guarantee Institution (NCGI) with the Department of Registrar of Companies. After receiving approval, the institution will be established with thirteen Participatory Financial Institutions (PFIs) to assist SMEs in overcoming obstacles,

in particular, the lack of adequate acceptable collateral.

In addition, given the importance of revitalizing the industrial sector to re-energize the economy, the General Treasury supported the implementation of special programme to assist the Small and Medium Industries (SMIs). In accordance with the Cabinet decision dated March 7, 2022, the Ministry of Finance and the State Bank of India signed the credit facility agreement on March 17, 2022, in order to obtain a USD 1 billion credit facility. The purpose of this agreement was to aid Sri Lankan importers, who had difficulties in opening Letters of Credit to import food and other necessities due to the shortage of foreign currency in the domestic banking system and in the market. Essential foods, pharmaceuticals, industrial raw materials, and fuel are imported from India, using Indian Credit Line (ICL) proceeds. This was done after analyzing the factors that would boost the economy while easing the impact on low income households during the crisis.

Having considered the importance of the agriculture sector to the economy, steps were taken to ensure the sector's viability by supporting the Government's fertilizer subsidy policy for paddy cultivation and other crops. The Government's fertilizer subsidy policy for paddy cultivation has shifted from a "100 percent organic fertilizer policy" to a "70:30 chemical-organic hybrid fertilizer policy" effective from the 2022/23 Maha season. To fulfill the 70 percent chemical fertilizer requirement, the Government obtained Credit facilities from India and the World Bank to import 65,000 metric tonnes and 105,000 metric tonnes of Urea fertilizer, respectively. In addition, 40,000 metric tonnes of Muriate of Potash (MOP) fertilizer was imported with funding support from the Asian Development Bank (ADB). Further, several programmes were implemented in 2022 to promote the plantation industry and assist livestock developers.

Food and nutrition security has been a major challenge to the Government during 2022. Accordingly, Minimum Guaranteed Prices, managing Maximum Retail Prices (MRPs) at the desirable level and making adjustments to the Special Commodity Levy (SCL) were used to manage food security and nutrition requirements. Paddy Marketing Board (PMB) implemented the Government Paddy

Purchasing and Disposal Program in 2022, releasing approximately 42,080 metric tonnes of rice to the market. Further, considering the increase in prices of rice in the market, SCL on rice imports has been reduced with effect from November 02, 2021 to encourage the importation to assure the availability of rice in the market at an affordable price. However, considering the availability of adequate stocks of rice in the market, and the expected increase in rice production in 2022/2023 Maha Season, the Government took steps to suspend the issuance of import control licenses for the importation of all types of rice except for the Basmathi with effect from December 2022 until further notice.

7.2 Financial Assistance for MSMEs

7.2.1 Local Funded Loan Schemes

Enterprise Sri Lanka interest subsidy loan scheme

The 'Enterprise Sri Lanka' programme was implemented during the period from 2017 to 2019. However, the liability of interest subsidy payments of disbursed loans has to be borne by the General Treasury until the year 2033. Accordingly, Rs. 3,103.5 million was paid as interest subsidies for banks in the year 2022.

SME financing through the commercial and specialized banks

While supporting the Government to implement its loan schemes, both the commercial and specialized banks implement various loan schemes by utilizing their funds at the market interest rates supporting SMEs. In 2022, approximately Rs. 619,900 million worth of loans have been granted through their loan schemes to fulfill the financial needs of the SMEs.

Sources : Respective Banks

In 2022, eighteen state and private banks provided 126,899 loans to the SME sector. Out of the total loan amount granted, around 12 percent has been disbursed for the agriculture sector and around 42 percent and 26 percent have been disbursed for the industry and services sectors, respectively, while the balance of 20 percent has been disbursed for SMEs in other sectors.

Figure 7.1 | Sector-wise SME loan disbursements

7.2.2 Donor Funded Loan Schemes

Small and Medium-sized Enterprises Line of Credit (SMELoC) Project

There are three major loan components implemented under the SMELoC Project: (i) SME Credit Line attached with Women Entrepreneur Finance Initiative (We-Fi) Grant

to provide investment loans for SMEs; (ii) Emergency Response Component (ERC) to provide permanent working capital loans for affected MSMEs, due to COVID-19 pandemic and the prevailing economic downturn; and (iii) Tea Smallholder Credit Line attached with Japan Fund for Poverty Reduction (JFPR) Grant to provide investment loans to tea smallholders for new planting, replanting, infilling, irrigation, nursery development and mechanization, among others.

In addition to the initially joined ten Participating Financial Institutions (PFIs) i.e Bank of Ceylon, People's Bank, Regional Development Bank, Hatton National Bank, Commercial Bank, Sampath Bank, Seylan Bank, National Development Bank, DFCC Bank and Nations Trust Bank, three new banks i.e Pan Asia Bank, Union Bank of Colombo PLC and the Sanasa Development Bank joined as PFIs to implement this project in 2022.

I. SME credit line and We-Fi grant

Under SME Credit Line, around Rs. 5,700 million was disbursed among 692 SMEs as investment loans and We-Fi grants during the year 2022 and out of which Rs. 251 million was disbursed among 343 women entrepreneurs as We-Fi grants by blending it with the investment loans.

II. Emergency Response Component (ERC)

Under this component, around Rs. 19,348 million was provided for 3,842 MSMEs affected by COVID-19 by the end of the year 2022 as working capital loans to re-energize their businesses. Through this ERC facility, Rs. 4,867 million worth of loans were provided for agriculture and agro processing sector, while Rs. 483 million and Rs. 684 million worth of loans were disbursed among MSMEs in Animal Husbandry and Fisheries sectors, respectively. Moreover, Rs. 6,981 million worth of loans were provided to re-energize the industry sector and, Rs. 719 million and Rs. 5,615 million worth of loans were granted to tourism and other service oriented MSMEs, respectively in 2022.

Moreover, ADB agreed to repurpose USD 13.5 million allocated under the SME Credit Line, as additional finance for 'ERC' to facilitate the MSMEs affected due to the economic downturn. This USD 13.5 million was allocated, among eight banks, i.e Bank of Ceylon, Hatton National Bank, Commercial Bank, Regional Development Bank, Sampath Bank, National Development Bank, Nations Trust Bank and Seylan Bank equally in October 2022. The eligible sectors for obtaining loans under new additional financing of ERC are agriculture and agro-processing, fisheries (offshore and inland), ornamental fisheries, aquaculture, livestock, animal husbandry, poultry, tourism and other export-oriented sectors and the banks are in the process of disbursing loans under this additional financing of ERC.

III. Tea Smallholder Credit Line & Japan Fund for Poverty Reduction (JFPR) grant

Under the Tea Smallholder Credit Line, Rs. 1,515 million was provided to 982 tea smallholders for new planting, replanting, irrigation, infilling nursery development and mechanization as

investment loans and JFPR grants. Out of that, 660 tea smallholders were provided with nearly Rs. 86 million worth of JFPR grants for new planting and replanting of tea. Further, 56 percent of Rs. 1,515 million was provided for replanting and 31 percent was provided for new planting.

Rooftop Solar Power Generation Line of Credit (RSPGLoC) Project

The RSPGLoC project is implemented under the financial assistance of ADB to move from the usage of fossil fuel to renewable energy sources to manage energy sources at low cost with environment friendly resources. Initially, in 2018, ADB provided USD 50 million to supply 50 MW to the national grid by the year 2021 and this target was achieved by providing 70 MW to the national grid at the completion of 1st phase of this project in 2022.

Further, considering the emerging energy crisis and the demand that has created for power generation through solar panels, a request has been made for obtaining additional financing from the ADB and the discussions in this regard are in progress.

7.2.3. Non-financial Support Programmes - Improving Institutional and Legislative Framework

National Credit Guarantee Institution (NCGI)

The Cabinet of Ministers has approved NCGI's incorporation as a public limited company under the Companies Act, No. 7 of 2007. The Shareholder Agreement (SHA) and Articles of Association (AoA), which are required to establish the institution, have been finalized with the ADB's Technical Assistance (TA) and approved in consultation with the ADB, Central Bank of Sri Lanka (CBSL), and other relevant Treasury Departments. Thirteen PFIs, (ten Licensed Banks and three Non-Bank Financial Institutions) have expressed their willingness to join as the initial equity contribution shareholders of the NCGI.

Actions are being taken to register the company's name with the Department of the Registrar of Companies; once approval is received, the institution will be established, and the Board of Directors will be appointed in accordance with the Articles of Association. In this regard, three nominations from the Ministry of Finance and one from the CBSL have been obtained. After establishing the institution, steps will be taken to sign the SHA with the PFIs, in the first half of the year 2023.

GIZ – SME Development Programme

The GIZ-SME Development Programme started in 2012 with financial assistance from the German International Cooperation (GIZ) to improve the overall business conditions of SMEs and to encourage foreign investments. The programme is currently implementing a multi-donor action co-financed by the European Union and the Federal Ministry of Economic Cooperation and Development of Germany. In the third phase of this programme, Euro 9.2 million was provided as GIZ grants. The total expenditure of the programme in 2022 was Rs. 617.2 million.

7.3. Support to Enhance the Productivity of the Agriculture Sector

7.3.1. Fertilizer Subsidy

Fertilizer for paddy

The fertilizer subsidy policy of the government for paddy cultivation has been changed to a "70 percent chemical and 30 percent organic fertilizer policy" in the 2022/23 Maha Season from a "100 percent organic fertilizer policy". The policy change was taken considering the substantial reduction of paddy harvest due to the utilization of 100 percent organic fertilizer and the recommendation of the Department of Agriculture on the usage of both chemical and organic fertilizer.

Due to the shortage of foreign currency, the availability of an adequate amount of chemical fertilizer could not be ensured in the 2021/22 Maha Season as well as in the 2022 Yala Season. However, the Government managed to obtain USD 55 million under the Indian Credit Line facility to import 65,000 metric tonnes of Urea fertilizer for the 2022 Yala Season. From the 2022 Yala Season, this urea fertilizer has been distributed at a subsidized price of Rs. 10,000 per 50 kg bag. In addition, eco-friendly fertilizer worth Rs. 6,608 million was distributed in the 2021/22 Maha Season and Rs. 16,245 million was distributed in the 2022 Yala Season to farmers at 100 percent subsidized price in the form of compost, liquid fertilizer, bio fertilizer and special fertilizer.

Under the 'new 70:30 hybrid fertilizer policy' commenced in the 2022/23 Maha Season, the Government was able to import 105,000 metric tonnes of Urea fertilizer under the financial assistance of the World Bank and 40,000 metric tonnes of MOP fertilizer under the financial assistance of ADB to manage the chemical fertilizer requirement. Urea imported under World Bank assistance was also distributed to farmers at Rs. 10,000 per 50 kg bag while the MOP imported under ADB funds were distributed at Rs. 19,500 per 50 kg bag. In order to ensure farmer's affordability of MOP fertilizer, Rs. 10,000 per hectare upto 2 hectares was deposited directly to the bank accounts of farmers to purchase MOP fertilizer. In addition, actions have been taken to distribute Rs. 16,000 million worth of organic fertilizer to paddy farmers in the 2022/23 Maha Season under the supervision of District Secretariats in order to fulfill the 30 percent fertilizer requirement.

Fertilizer for other crops

Subsidized fertilizer was not provided for crops other than paddy in 2022 and the private sector was empowered to fulfill the fertilizer requirement for Other Field Crops (OFC). However, Urea Fertilizer amounting to 3,105 metric tonnes and 8,770 metric tonnes were distributed for Tea Smallholders and maize cultivation, respectively, at Rs. 15,000 per 50 kg bag, utilizing the urea imported by the government to fulfill the urgent fertilizer requirement of these crops.

Loan scheme for local organic fertilizer manufacturers

As per the Cabinet Decision dated April 27, 2021, the General Treasury was directed to provide the required financial support to implement

the proposals of the Cabinet Memorandum including the proposal of providing subsidies to organic fertilizer producers and farmers who are utilizing organic fertilizer. Accordingly, a special loan scheme for manufacturers of organic fertilizer, pesticides and herbicides was introduced in collaboration with Bank of Ceylon, People's Bank and Regional Development Bank.

Accordingly, 25 loans amounting to Rs. 162 million were granted by the above three banks to qualified manufacturers of local organic fertilizers, pesticides and herbicides. Interest subsidy of such loans is being paid by the General Treasury at present. Further, the General Treasury has released Rs. 4.5 million as an interest subsidy for this loan scheme.

7.3.2. Encouraging Plantation Sector

Assistance to smallholder planters

In order to increase the production of the main export crops by strengthening the capacity of the smallholder planters, the Government provided subsidies for new planting, re-planting, preparation for land, plant protection and other activities in relation to tea, rubber and coconut smallholders. Accordingly, Rs. 2,357 million was distributed among 316,363 tea, rubber and coconut smallholder planters, out of which Rs. 1,643 million was provided for 39,007 tea planters in the year 2022, while Rs. 164 million and Rs. 288 million have been distributed among 42 rubber plantation companies and 2,364 rubber planters, respectively. In addition, Rs. 262 million was provided to 274,950 coconut growers under this subsidy programme.

Table 7.6 | Performance of Smallholder Plantation Sector, 2019-2022

Year	Tea			Rubber			Coconut		
	Extent (Ha)	Total Production (Kg. Mn.)	Total Value of the Production (Rs. Mn.)	Extent (Ha)	Total Production (Kg Mn.)	Total Value of the Production (Rs. Mn.)	Extent (Ha)	Total Production (Nuts. Mn.)	Total Value of the Production (Rs. Mn.)
2019	122,900	226	180,959	137,608	75	22,537	443,538	3,086	101,499

Sources: Ministry of Plantation Industries

7.3.3. Support for Livestock Developers

Poultry Sector

The main constraint faced by the poultry industry is the lack of domestic production of maize, which is the main ingredient of poultry feed. Maize was cultivated in an extent of 77,979 hectares in the 2021/22 Maha Season

and around 6,178 hectares in the 2022 Yala season. The yield in the 2021/22 Maha and the 2022 Yala Seasons were around 236,927 metric tonnes and 22,112 metric tonnes, respectively. Due to the unavailability of adequate fertilizers and pesticides in 2022, a considerable reduction in maize production was observed in 2022, compared to 2021.

Table 7.7 | Maize Cultivation

Year	Maha		Yala	
	Extent (ha)	Production (Mt)	Extent (ha)	Production (Mt)
2015	60,950	230,870	9,020	30,240
2016	57,090	207,070	10,540	36,890
2017	44,515	163,733	8,029	32,011
2018	63,926	242,935	6,969	27,106
2019	57,380	220,425	6,114	22,959
2020	66,486	267,767	11,763	45,754
2021	97,122	435,159	11,402	45,185
2022	77,979	236,927	6,178	22,112

Source: Department of Development Finance

Since the annual requirement of maize is around 600,000 metric tonnes, the importation of maize or its substitutes such as wheat grain, sorghum, barley etc. was facilitated in 2022 to fulfill the demand arising from the poultry industry. Accordingly, around 184,611 metric tonnes of maize and 34,141 metric tonnes of wheat grain had been imported in 2022 for poultry feed manufacturing.

7.3.4. Other Agriculture – Support Schemes

Government storage facilities for agricultural products

Under World Bank and the Government of Sri Lanka (GoSL) funds, five warehouses were constructed with modern technology and an innovative system in the major agricultural districts of Anuradhapura, Moneragala, Mannar, Kilinochchi and Polonnaruwa. Farmer's Grain Preservation Centers (FGPCs) established in these 5 districts offer state-of-the-art, high-quality storage facilities for farmers to store their paddy, maize, soybean, sesame, black gram, pepper, peanut, and other agricultural products during the harvesting season until a just and reasonable price is received for their

products in the market. These five warehouses have a combined storage capacity of about 17,200 metric tonnes. They offer a wide range of supplementary facilities, including drying, cleaning, and testing for grain quality, in addition to the storage facility. The most intriguing aspect is the provision of warehouse receipt financing to farmers, which enables them to use their stock as collateral to obtain a loan at a concessionary rate.

Due to effective public finance management, the operational cost has been reduced by around 3.16 percent to Rs. 43 million in 2022 from Rs. 44.36 million in 2021. By reflecting a slight increase in the operational incomes of those five projects, Rs. 22 million has been contributed to the Consolidated Fund in 2022. The net financial benefit to farmers due to the storing process has increased by about 49 percent while they received Rs. 261 million in financial support from the RDB through the warehouse financing receipt programme in 2022. In 2021, farmers had only utilized Rs. 133 million from the warehouse receipt financing programme. It elaborates that farmers tend to move towards the banking sector to resolve their liquidity problems in the present financial crisis.

Table 7.8 | Progress of Grain Preservation Centers – 2021 – 2022

Year	Buttala WH		Polonnaruwa WH		Anuradhapura WH		Kilinochchi WH		Mannar WH

Compulsory crop insurance

The Compulsory Crop Insurance Scheme was introduced to provide extensive insurance coverage for crop damage of paddy and other commercial crops i.e. maize, soya, big onions, potatoes and chillies. The scheme covers the losses caused due to droughts, floods and wild elephants up to a maximum land extent of five acres for paddy and 2.5 acres for other commercial crops and the insurance coverage per acre is Rs. 40,000. During the the 2021/22 Maha season, Rs. 657.1 million has been paid for 31,542 farmers as compensation for crop damages in cultivated land areas of 42,872 acres. In addition, Rs. 244.8 million has been paid to 13,755 farmers in 2022 as compensation for crop damages that occurred in the 2021 Yala Season in cultivated areas of 14,054 acres. The General Treasury has provided Rs. 600.0 million to Agriculture and Agrarian Insurance Board (AAIB) for this purpose. Further, it has been estimated that the compensation for the 2022 Yala season would be nearly Rs. 150.0 million and this amount will be paid to farmers as per the availability of funds.

Table 7.9 | Progress of Compulsory Crop Insurance Scheme – 2022

Writing off the non-performing loans obtained by paddy farmers with less than two hectares

The agricultural workforce, which amounts to around 30 percent of the total labour force, was severely affected by the economic crisis. In addition, switching from chemical fertilizer to organic fertilizer, exacerbated the situation. Due to the decline in paddy production in two consecutive seasons and increase in interest rates, small-scale paddy farmers in particular found difficulties to repay the bank loans they obtained for their cultivation. Even though the Government provided chemical fertilizer, it was not possible to get the funds required to carry out cultivation activities as expected.

Hence, the Government decided to write off Non-Performing Loans (NPLs) that were obtained by paddy farmers who cultivated two hectares or less of paddy lands, by May 31, 2022. The total sum of Rs. 675.9 million for 28,711 farmers were approved by the General Treasury for BOC, Peoples' Bank and RDB under this scheme. Out of which, the General Treasury reimbursed the sum of Rs. 350 million for the respective banks in the year 2022 and information of writing off loans is detailed in Table 7.10. This reduced the financial burden of paddy farmers, encouraging them to engage in the cultivation of paddy from the 2022/23 Maha season onwards.

Table 7.10 | Progress of Writing off Paddy Farmers' Loans

Bank	Estimates to be write-off		Written off as at 31/12/2022

7.4. Social Security for Targeted Segments of the Society

7.4.1. Special Interest Scheme for Senior Citizens

This scheme was designed to provide a 15 percent special interest rate for Senior Citizens' fixed deposits aiming to give them a stable and secure retirement life. The gap between 15 percent interest and the normal fixed deposit interest rate was paid by the General Treasury to the respective banks.

However, with the tightened monetary policy stance adopted by the Central Bank of Sri Lanka, Licensed Banks were in a position to offer an interest rate exceeding the 15 percent for the fixed deposits holders including 'Senior Citizens' accounts. Since there was an opportunity for senior citizens also to earn more than 15 percent interest income for their fixed deposits, the implementation of this scheme was discontinued effective from October 01, 2022.

The total outstanding interest subsidy amount to be paid for banks from 2nd quarter of 2021 to 3rd quarter of 2022 was Rs. 113,042 million and out of which Rs. 10,000 million worth of interest subsidy payments were made in 2022 by the ways of issuing Treasury Bonds and cash to settle a portion of the outstanding amount for the 2nd quarter of 2021. Accordingly, the outstanding interest subsidy amount to be settled for banks upto 4th quarter of 2022 is Rs. 114,293 million.

Table 7.11 | Settlement of Interest Subsidy for Senior Citizen's Fixed Deposits, 2015 – 2021

7.4.2 Providing Rs. 2.00 incentive per dollar on converted inward workers' remittances

As proposed by the Budget 2021, an additional Rs. 2 per dollar has been paid for the foreign exchange remittances sent by Sri Lankans, who had been employed abroad or resided in Sri Lanka and earned foreign currency income by rendering services abroad in nature of employment, to banks in Sri Lanka with the objective of promoting inward workers' remittances. Accordingly, Rs. 6,175 million was reimbursed during the year 2022 to banks to settle the outstanding amount to be paid from December 2020 to December 31, 2021.

The instructions were issued to terminate this programme and revoke the respective circulars issued in this regard due to the decision taken by the CBSL to allow the exchange rate to be determined on the market forces with effect from March 07, 2022.

7.4.3 Pension Scheme for Farmers

The Agriculture and Agrarian Insurance Board (AAIB) has established the farmers' pension scheme to safeguard elderly farmers who have contributed to the agricultural development of the country. Approximately, 959,254 farmers have been registered under the farmers' pension scheme and around 168,000 farmers on average receive benefits monthly. In 2022, Rs. 4,053 million was distributed among 169,741 qualified farmers as monthly pension payments under this scheme. Since farmers' contribution to the scheme is not adequate for the scheme to operate as a self-financing scheme, the gap in funds is provided by the General Treasury to the AAIB annually. Accordingly, the General Treasury has provided Rs. 4,158 million to pay pensions for farmers for the year 2022.

As per the instructions issued by the Extra Ordinary Gazette Notification No. 1853/49 dated March 14, 2014, the existing Farmers' Pension and Social Welfare Scheme was re-designed and re-launched on October 31, 2022 with the objective of operating the new farmers' pension scheme as a self-financed scheme. Accordingly, 503 new farmers have registered under this new farmers' pension scheme during the year 2022.

Figure 7.2 | Progress of Farmers' Pension Scheme – 2022

Source: AAIB

7.4.4 Pension Scheme for Fishermen

The fishermen's pension scheme operated as a self-sustained scheme is being implemented by the AAIB as a contributory pension scheme for fishermen. There are nearly 69,000 registered fishermen under this scheme and, Rs. 80 million was distributed among 5,592 fishermen as their monthly pension during the year 2022.

Figure 7.3 | Progress of Fishermen's Pension Scheme – 2022

Source: AAIB

Under the existing scheme, the minimum and maximum monthly pension of a fisherman are Rs. 1,000 and Rs. 4,000, respectively. Since this amount is not sufficient when compared with the current cost of living, the necessary arrangements are being made to implement a new pension scheme for fishermen, as a more beneficial and self-financing scheme, in cooperation with the AAIB.

7.5 Food Security

7.5.1 Government Paddy Purchasing Programme

Paddy production is a key determinant of food security in Sri Lanka as rice is the staple food of the country. High priority was given by the Government to facilitate paddy sector by providing various incentives including fertilizer

subsidy, quality seed paddy at subsidized prices, extension services and ensuring Government Guaranteed price for paddy. Accordingly, the paddy production in the country increased over the period. However, paddy cultivation in 2022 was adversely affected due to fertilizer and fuel shortages. As a result, paddy production in 2022 decreased

by 34.1 percent to 3.39 million metric tonnes in 2022 from 5.15 million metric tonnes in 2021. As shown in the Chart 7.4, paddy production in 2022 was the lowest recorded annual paddy production during the last five year period. Therefore, the Government intervention was at a minimal level for purchasing paddy to ensure a reasonable price for farmers.

Figure 7.4 | Total Paddy Production 2010 – 2022

Source: Department of Agriculture

Considering the low level of paddy production, the Government Paddy Purchasing Programme in 2022 was implemented only through the Paddy Marketing Board (PMB) by utilizing Rs.

6,500 million of funds arranged by the General Treasury through the Bank of Ceylon. The PMB purchased 78,355 metric tonnes of paddy from farmers island-wide during the year.

7.5.2. Paddy Disposal Programme

Considering the continued higher retail prices of rice in the market in 2022, the Government made rice available in the market at an

affordable price under the Maximum Retail Price (MRP). For this purpose, the Government Paddy Disposal Programme has been implemented by PMB in 2022 releasing approximately 42,080 metric tonnes of rice to the market through the sales network of Lanka Sathosa Limited and private supermarkets at a price below the MRP.

7.5.3. Paddy Purchasing by the Private Sector

Both state and private sector banks supported the private sector's paddy purchasing process by providing required funds, and it was the main source of funds utilized by the private sector for paddy purchasing programmes throughout the period. The total number and the value of loans granted to the private sector by state and private banks to purchase paddy in 2022 have decreased by 32 percent and 8 percent respectively compared to the year 2021.

Table 7.14 | Progress of Granting Loans for Purchasing Paddy for Private Sector (2021–2022)

Name of the Bank	2021		2022		Comparison	
	No of Loans	Loan Amount (Rs. Million)	No of Loans	Loan Amount (Rs. Million)	No of Loans as a %	Total Loan Amount as a %

7.5.4. Developing other Local Food Crops

The Government implemented measures to achieve self-sufficiency in the production of 15 selected local crops including green gram, soya beans, turmeric, cowpea, onions, ginger, peanut, potatoes, dried chilies, etc. and related agro based industries in 2020 and 2021. As such, the Government continued the control of imports imposed on certain crops which

could be grown locally such as black gram, green gram, tamarind, pepper, cinnamon, cloves, ginger, turmeric, etc. in 2022 as well.

In particular, in September 2022, during the local harvesting season of big onion, the Government increased the SCL for big onion from Rs. 10 per kg to Rs. 50.00 per kg for protecting local farmers by controlling imports. With all such efforts, the production of identified

local crops have increased considerably, and in particular, local production of turmeric, sesame and ginger have achieved the self-sufficiency in 2022.

7.5.5. Cost of Living

Food and nutrition security has been a major challenge to the Government during 2022 due to the adverse economic conditions

prevailed in the country. Hence, the Government continuously faced the challenge of protection of consumers and producers in 2022. Accordingly, as implemented in 2021, the continuation of Minimum Guaranteed Prices, managing MRP at the desirable level and making adjustments to the SCL were used to manage those issues in 2022.

Table 7.15 | Several measures taken to control Cost of Living 2021/22

Commodity	Description of Special Commodity Levy (SCL)/ Maximum Retail Price (MRP)	Effective Date
Big Onion	SCL was reduced from Rs 40/- to Rs 10/- per kg	01.01.2022
	and increased from Rs.10/- to Rs. 50/- per kg	23.09.2022
Mysore Dhal	SCL was continued as 25 cents per kg for another 1 year	14.10.2022
Maize	SCL was removed	25.01.2023
Rice	MRPs were imposed	
Keeri Samba	Rs. 260/- per kg	
White/Red Samba	Rs. 230/- per kg	02.09.2021
White/Red Nadu	Rs. 220/- per kg	
White/Red	Rs. 210/- per kg	10.06.2022
Raw Rice (Local)		
Rice	SCL was removed	09.12.2022
Cowpea	SCL was continued as Rs.70/- per kg for one year	02.03.2022
Green gram	SCL was continued as Rs. 40/- per kg for one year	14.10.2022
Sugar	SCL was continued as 25 cents per kg for another 1 month	15.06.2022
Potato	SCL was reduced from Rs. 50/- to Rs. 20/- per kg	01.01.2022
Black Gram – whole	SCL was continued as Rs. 200/- per kg for one year	03.03.2022
Egg	MRPs were imposed	
	White Egg Rs.44- per egg	20.01.2023
	Brown Egg Rs.46- per egg	

Source: Consumer Affairs Authority and Department of Trade and Investment Policy

In 2022, as a holistic approach for addressing the challenges of assuring the food security and containing the cost of living, "Multi-Sector Combined Mechanism for ensuring Food Security and Nutrition" has been approved by the Cabinet of Ministers. This Multi-Sector Combined Mechanism was implemented with the establishment of a National Food Security and Nutrition Council and Combined Mechanism for Food Security and Nutrition at Provincial, District and Divisional levels.

Under this mechanism, National Food Security and Nutrition Council (NFSNC), National Combined Mechanism for Food Security and Nutrition (NCMFSN), Technical Advisory Committee for Food Security and Nutrition (TACFSN), Provisional Combined Mechanism for Food Security and Nutrition (PSCMFSN), District Combined Mechanism for Food Security and Nutrition (DisSCFSN), Divisional Combined

Mechanism for Food Security and Nutrition (DivCMFSN), Village Center for Economic Revival, Food Security and Nutrition (VERCFSN) were established in 2022.

In August 2022, the Government took actions to re-establish the "Cabinet Sub-Committee on Cost of Living" and establish the "Food Security Committee" to make recommendations to the Cabinet of Ministers on policies and practical solutions to maintain the cost of living while ensuring the availability of essential goods amidst the economic downturn.

However, amidst problems such as excessive imports, disruption of the market, losses to producer etc, the "Food Policy Committee", chaired by the Secretary to the President was established instead of the "Cabinet Sub-Committee on Cost of Living" and the "Food Security Committee" as per the Cabinet

Memorandum No. 22/1495/601/014 and decision dated October 03, 2022. Accordingly, the "Food Policy Committee" was specifically designated as the focal point to provide strong policy approach and effective facilitation of inter-agency coordination to help resolve the issues related to the Cost of Living and in a broad sense of food security in 2022.

7.5.5.1. Import of rice

Considering the increased prices of rice in the market, Special Commodity Levy on rice imports has initially been reduced from Rs. 65 per kg to 25 cents on November 02, 2021 to assure the availability of rice in the market by encouraging rice imports.

However, in 2022, considering the upward trend in prices of rice prevailed in the market, in particular Nadu and Samba rice to the range of Rs. 130–180 per kg and Rs. 160–190 per kg, respectively at the beginning of the year, the government took measures to continue the import of rice to the country in 2022 as a strategic approach to assure the availability of rice in the market at an affordable level.

Even though, up to the festive season of April, 2022 the prices of local rice in the market increased at a considerably higher rate, after the end of the festive season, the prices of rice in the market were relatively stable. However, as the monthly rice consumption in the country is around 200,000 metric tonnes, and the total annual requirement of rice is around 2,400,000 metric tonnes, it had been estimated that there would be a shortage of around 600,000 metric tonnes of rice in the year 2022. Therefore, the Government continued the import of rice up to December 2022.

Accordingly, both government institutions and private sector institutions have imported around 922,620 metric tonnes of rice in total from November 02, 2021 to February 15, 2023. The Government facilitated the State Trading Corporation (STC) to import rice from India by issuing Treasury Guarantees to People's Bank with the value of Rs. 1,350 million in January 2022 and Rs. 5,135 million in February 2022. Out of the total imports, a quantity of 80,842 metric tonnes of rice has been imported to the country by STC as at February 15, 2023, and

sold to the consumers through Lanka Sathosa outlets, Cooperative society network, STC Q shops and private sector super markets.

Table 7.16 | Progress of Rice Imports

District	Rice imports (MT)		
	The Government through STC	The private sector	Total quantity
10.11.2021 – 31.12.2021	15,252	120,843	136,095
01.01.2022 – 31.12.2022	65,590	715,049	780,639
01.01.2023 – 15.02.2023		5,886	5,886
Total	80,842	841,778	922,620

Source: Sri Lanka Customs

However, considering the quantities of rice in the market and the estimated harvest in the 2022/23 Maha season predicted by the Ministry of Agriculture taking in to account the availability of fertilizer and other agro-chemicals, fuel and seeds to the farmers, the policy decision was taken to categorize the importation of all types of rice (Except Basmati Rice) under import Control License (ICL) system and to suspend the issuance of Licenses until further notice by the Imports and Exports Regulations No. 23 of 2022 published in the Extraordinary Gazette Notification No. 2309/40 dated December 9, 2022.

'Gama Samaga Pilisandara'– Rural Development Programme

In order to assure the trickling-down of benefits of the development among the entire community in the society, the Government has paid its attention to expedite the regional development initiatives through the Budget 2022 under the Medium-Term Budgetary Framework 2022–2024.

Accordingly, based on the identified needs in the regional and rural development of the country, the Government has allocated Rs. 85,000 million to implement the 'Gama Samaga Pilisandara' (Discussion with the Village) Rural Development programme as per the Budget 2022.

A seminar series on ensuring the home economy and food security through strengthening rural production economy have been organized by the Government covering all the Divisional Secretariats in the country. However, due to

the adverse economic situation prevailed in the country in 2022, this programme has been terminated.

Securing home economy

The Government has allocated Rs. 31,000 million in the Budget 2022 to provide relief to the people under the Home Economy Security Programme by assessing the critical issues faced in assuring the food security among the village level people during the COVID-19 pandemic situation.

Accordingly, Rs. 1,000 million has been allocated for the provision of a nutrition basket for pregnant mothers for a period of 24 months. And also, Rs. 15,000 million has been allocated for implementing a programme on providing a relief basket for economically disadvantaged

families at the Grama Niladhari division level to alleviate the pressure of the rising cost of living, whereas the balance Rs. 15,000 million has been allocated for the establishment of a mini supermarket chain (Home Shop) for women entrepreneurs.

Implementation process was commenced by Ministry of Trade, Commerce and Food Security with the identified implementing agencies of particular Divisional Secretariats, State Ministry of Cooperative Services, Marketing Development and Consumer Protection and State Ministry of Women and Child Development to complete the programme in 2022.

However, due to the adverse economic situation prevailed in the country in 2022, the implementation process of the "Home Shop" programme has been terminated.

Table 7.17 | The Implementation Progress of the Home Shop Programme

Commodity	Physical Progress			Financial Progress (Rs Mn)	Responsible Institute
	Unit	Target	Progress		
Construction of home shops	Nos	14021	45	2894	Divisional Secretariats
Completion of other infrastructure such as fixing shelves, purchasing equipment for home shops, installation of computer systems etc. *	%	14021	-	-	State Ministry of Cooperative Services, Marketing Development and Consumer Protection
Training of women Entrepreneurs *	Nos	14021	-	-	State Ministry of Women and Child Development
Functioning of home shops	Nos	45	23		Beneficiaries

Source: Ministry of Trade, Commerce and Food Security

*Terminated as per the Budget Circular No. 03/2022 dated 26.04.2022

Out of the commenced 45 Home Shops, 23 have been fully completed whereas 22 Home Shops have partly been completed.

Based on the budgetary allocation of Rs. 4,591 million, the programme of Nutrition Allowance for Pregnant and Lactating Mothers has been implemented by the Ministry of Women, Child Affairs and Social Empowerment covering all districts with a cost of Rs. 3,694 million in 2022.

7.6. Facilitating Housing for Middle Income Earners

In 2021, the "Sonduru Kedella" housing loan scheme was introduced as a Budget proposal to support the low- and middle-income earners

of the emerging workforce for purchasing a housing unit from housing complexes constructed by Urban Development Authority (UDA), Urban Settlement Development Authority (USDA) and National Housing Development Authority (NHDA).

Accordingly, it was expected to provide Loan facilities through BOC, People's Bank and NSB at a concessionary interest rate. Total number of 4,053 housing units were scheduled to be constructed by UDA, NHDA and USDA, and 479 housing units have been reserved in 2021.

However, due to the increased interest rates, granting subsidized loans by participatory banks have been delayed in 2022.

Box 7.1 : Indian Credit Line (ICL) of USD 1,000 Million

The Credit Facility Agreement between the GoSL and the State Bank of India (SBI) was signed on March 17, 2022 to obtain a loan of USD 1,000 million for the importation of essential items from India under the approval of the Cabinet of Ministers which was granted at its meeting held on March 05, 2022. The objective of this agreement was to facilitate Sri Lankan importers who faced many difficulties in opening Letters of Credit to import foods and other essential items due to the shortage of foreign currency in the banking system and the market. Concerning the severe economic crisis at the time, analyzing the factors that help to boost the economy of the country, the credit facility was initially allotted among three sectors namely, Industrial Raw Materials (USD 500 million), Essential Commodities (USD 300 million) and Pharmaceuticals (USD 200 million) and later considering the shortage of food and fuel in the country, based on the requirements arisen from time to time, the allocation was revised several times and finally revised as: Essential Commodities (USD 371 million), Pharmaceuticals (USD 235 million), Industrial Raw Materials (USD 194 million) and Fuel (USD 200) million.

Importation requirements and the importers are identified and recommended by reviewing the applications received from importers to the main committee which was established under the Ministry of Trade, Commerce and Food Security following the initial recommendation received from three subcommittees which have been established under the respective line Ministries for the three main sectors, Essential Commodities, Industrial Raw Materials, and Pharmaceuticals. Main committee recommended invoices along with the importer and exporter details are forwarded for approval of the High Commission of India (HCI) and approved invoices are conveyed to importers to start the importation by the Indian Credit Facility Coordination Unit (ICFCU) which has been established under the Ministry of Finance (MoF) to facilitate the implementation of the ICL. Once the importation completed, ICFCU facilitates for payment for the exporters through HCI and SBI. Further, Special Investigation Unit (SIU) has been established under the Sri Lanka Customs to facilitate the clearance of goods imported under the ICL.

Accordingly, as of December 31, 2022, applications totaling USD 826 million had been submitted to the HCI by ICFCU for approval, accounting for 82.6 percent of the total allocation. Out of which, USD 590 million worth of applications have been approved. USD 345 million worth of goods have been imported into the country and out of that USD 328 million Payment Authorizations have been issued to HCI to process exporters' payments.

Summary of Indian Line of Credit Facility as of December 31, 2022

Category	Total Allocation	Sent for Approval to HCI	Approved Value	Goods Received	USD Million	
					Payment Authorizations (PA) Issued	% of PA Issued from goods received

Performance of
State Owned
Enterprises

8.1 Overview

State Owned Enterprises (SOEs) play an important role in meeting strategic development objectives, primarily the supply of essential services on a commercial basis and optimization of strategic resources. However, despite the significant presence of SOEs in the Sri Lankan context, SOEs have not yielded the desired benefits to the economy. Several factors have contributed to these failures including mispricing of products and services leading to accumulated losses, inefficient operations, weak human resources management including over-staffing and industrial actions, weak governance, and management. The weak financial positions of key SOEs left them vulnerable to the shocks that emanated from the 2022 economic crisis. Furthermore, SOE weaknesses exacerbated the impacts of the crisis as shortages of fuel, electricity, and other key commodities were affected by the inability of relevant SOEs to raise finance due to weak balance sheets.

The financial weaknesses in SOEs have other important implications for the economy, particularly in the banking sector. The long-standing absence of cost-reflective pricing, especially in the energy sector has created a legacy debt stock which has been financed by state owned banks. The accumulation of such debts has created stress on these banks and by extension the creating systemic risks in the entire banking sector. Much of the bank debt from these SOEs is guaranteed by the Government creating fiscal risks. The risk arising from these large contingent liabilities crystallised during the 2022 crisis as the guaranteed foreign exchange debt of the Ceylon Petroleum Corporation (CPC) was taken onto the Government balance sheet.

Furthermore, there are cross liabilities between SOEs (particularly CPC, Ceylon Electricity Board (CEB), and Sri Lankan Airlines (SLA)), leading to transmission of balance sheet risk among entities. Considering the systemic financial risks and major fiscal risks associated with SOEs, the restructuring of SOEs is identified as a crucial component of Government policy and is also reflected in the Extended Fund Facility (EFF) programme agreed with the International Monetary Fund (IMF).

Several SOE reforms have already been implemented, particularly the introduction of automatic cost reflective pricing for fuel on a monthly basis and electricity on a biannual basis. Measures have also been taken to introduce competition in the petroleum retail sector and to initiate the unbundling of the electricity sector. Nonetheless, there are several more steps required in the reform journey, particularly in terms of addressing residual weakness in SOE balance sheets and improving corporate governance.

In addition to restructuring of the key fiscally significant SOEs (CPC, CEB, SLA), the Government also intends to restructure several other SOEs. This is intended to reduce fiscal leakage in the case of loss making SOEs, to divest non-strategic assets in the context of overall objectives to make public debt sustainable, and to rationalize the role of the state in commercial activity.

To drive the SOE reform process forward an SOE restructuring unit was established under the Ministry of Finance. An SOE policy has also been approved by the Cabinet and a holding company will be set up to own shares of SOEs on behalf of the Government. SOEs will be required to adhere to transparency and Governance standards that are similar to those of companies listed on the Colombo Stock Exchange. Fit and proper standards will be applied to directors of SOE Boards. State bank lending to SOEs will be subject to more rigorous rules to mitigate the concentration risks arising from SOE debt. Government will divest shares in SOEs where there is limited case for Government engagement in commercial activity. Measures have already been taken to issue for Proposals (RFPs) for divestment of Government owned shares in several SOEs. In some cases where there is a justification for joint state ownership, the public private partnership (PPP) model will be utilized and a new PPP unit has been established at the Ministry of Finance.

In 2022, the financial performance of SOEs was weaker than historical trends. In terms of the overall outturn of the key 52 SOEs, the overall loss increased by sixfold to Rs. 744.7 billion in 2022. However, 34 SOEs recorded a collective net profit of Rs. 214 billion in spite

of challenging economic conditions. The other 18 SOEs recorded a collective loss of Rs. 958.7 billion in 2022. The major cause of these losses was the foreign exchange loss experienced by the key SOEs including the CEB and CPC due to the sharp rupee depreciation in 2022. The

banking and finance sector was also adversely affected by overall economic conditions as the profitability of this sector declined by 25 percent in 2022. The total collection of levies and dividends reduced to Rs. 28 billion in 2022 compared to Rs. 30.6 billion in 2021.

8.2 Energy

8.2.1 Ceylon Electricity Board

The Ceylon Electricity Board (CEB) faced a tumultuous year in 2022 as foreign exchange shortages caused significant supply chain challenges as sufficient imported raw materials could not be sourced. Furthermore, the cost of key imports (fuel and coal) increased significantly due to currency depreciation and global commodity trends influenced by the Russia-Ukraine conflict. As a result, the CEB was unable to provide continuous electricity supply with extensive power outages experienced during the year.

As a result of these power outages, electricity consumption decreased by 4.6 percent compared to the year 2021. However, the revenue generated from electricity sales for 2022 increased by 24 percent to Rs. 308.5 billion compared to Rs. 248.8 billion in 2021, primarily due to the upward price revision that took place in August 2022. The failure to revise electricity tariffs since 2014 contributed to acute liquidity issues faced by the CEB, which have hindered the required investments in the sector. The Government took measures to increase the end-user electricity tariff by 75 percent in August 2022 as the first step in implementing an automatic semi-annual cost-recovery-based electricity tariff methodology.

End user electricity tariff was again revised with an average increase of 66 percent with effect from February 15, 2023 in order to fully reflect cost recovery adjustments. Going forward, the CEB will have a regular biannual tariff revision which will be on a forward looking cost recovery basis. This would ensure that future losses would be eliminated and the fiscal burden arising from the CEB would be reduced.

As a result of higher fuel and coal prices in the international market coupled with the rupee devaluation during the year 2022, the direct generation cost was more than doubled, in comparison to the preceding year. Even though the electricity tariff was increased, CEB incurred an operating loss of Rs. 167.2 billion for the year 2022 due to the delayed and limited tariff increase being inadequate to fully compensate for the significant increase in generation cost. The average cost per unit at the selling point increased to Rs. 33.65 per KWh during the year 2022 compared to Rs. 19.42 per KWh in 2021. The generation mix in the year 2022 largely remained the same at thermal (coal) (35%), hydro (33%), NCRE & Wind (17%) and thermal (fuel) (15%) in 2021.

During the year 2022, the Government took a policy decision to re-classify the selected foreign currency debts on the CEB balance sheet obtained from the China Exim Bank into the Government Balance sheet. Accordingly, the outstanding loan balance of Rs. 214.7 billion (USD 591.4 million) as at the end of December 2022 obtained for the construction of the Norochcholai power plant was transferred into the Government Books of Accounts. Further, action was also taken to convert the debts amounting to Rs. 146.5 billion, which were recorded as sub-loans in the CEB financial statements, into equity investment by the Government in CEB as at end December 2022. An exchange loss of Rs. 94.7 billion recorded on the above transaction due to the recognition of the loan in the CEB's book of accounts at the historic exchange rate which was at a significantly lower value than the exchange rate that prevailed at the end of 2022. This has resulted to increase CEB's net loss to Rs. 261.9 billion in 2022.

Further, in light of the challenged liquidity positions of both the CEB and CPC, the Government channeled Rs. 80 billion to the CEB to settle its outstanding debts to CPC during the year 2022. Nonetheless due to large legacy debts, as of the end of the year 2022, CEB's total outstanding debt to CPC and Independent Power Producers (IPP) remained elevated at Rs. 193.1 billion. In the meantime, the total debt liability of the CEB to the state banks and project loans stood at Rs. 220.7 billion at the end of year 2022.

Moreover, the Government has appointed a high-level committee to recommend reforms to the institutional framework of the CEB and its subsidiaries. A comprehensive report in this regard was submitted to the Cabinet of Ministers and approval was granted to implement the proposed recommendations of the committee.

8.2.2 Ceylon Petroleum Corporation

The petroleum industry in general, is subject to uncertainty and volatility within global economic and political contexts. Major volatility in oil-producing regions in 2022 have created constraints such as logistical bottlenecks, sanctions on trade, destruction of capital infrastructure on the supply side, and high volatility in consumer demand.

In this uncertain context, Brent crude oil price increased by around 26 percent to USD 120 per barrel at the end of June 2022, from USD 95 per barrel in early February 2022, recording the

highest price in the last decade. The volatility of global oil prices has compounded Sri Lanka's economic challenges in 2022. However, pricing trends reversed course in August 2022, with Brent crude oil price dropping by almost 32 percent to USD 81 per barrel by the end of December 2022.

Figure 8.3 | Crude Oil (petroleum) Brent Price in 2018-2022 (USD)

Source: tradingeconomics

CPC struggled to meet the demand in 2022 as supply was highly curtailed due to the foreign exchange shortage faced by the banking system. In this context, India and Sri Lanka entered into an agreement for a credit line worth USD 700 million with an aim to facilitate fuel importation which was crucial to reactivate the supply chain. Subsequently, the Ministry of Power and Energy introduced a fuel rationing system utilizing a unique QR code which was a turning point in managing demand and ensuring sufficient supply to enable regular economic activity and eliminate queues and the associated social unrest.

Due to the supply chain disturbances, the total import quantity of crude oil and petroleum products of the country was limited to 4.6 million MT in 2022 which was a 20 percent decline on a year-on-year basis. The CPC imported only 0.7 million MT of crude oil and 2.7 million MT of refined products in 2022 compared to 1.2

million MT of crude oil and 3.1 million MT of refined products in 2021. Nevertheless, the total fuel import bill of the country for 2022 increased by 31 percent over 2021, to USD 4.9 billion due to the increase of world market oil prices. Accordingly, the oil import bill of the CPC also increased by 50 percent to USD 3.3 billion in 2022.

^(a) Provisional

The CPC's overall cost of sales increased by 88 percent to Rs. 1,109 billion in 2022 from Rs. 589 billion in 2021. This was influenced by the higher cost of imported fuel and currency depreciation.

The Government re-introduced a cost-reflective pricing formula at the end of May 2022 as a strategic move to minimize operational losses and address CPC liquidity issues. Despite the regular price adjustments since May, the CPC recorded an operating loss of Rs. 6.2 billion for the full year in 2022, compared to a loss of Rs. 41.3 billion in 2021.

Furthermore, the depreciation of the Sri Lankan Rupee against the USD also adversely affected the performance of CPC. Due to the high level of foreign currency denominated liabilities on the CPC balance sheet, any depreciation of the currency translates into a foreign exchange loss for the CPC. The adverse exchange rate impact recorded its historically highest level in 2022 with a foreign exchange loss of Rs. 527 billion compared to Rs. 33.2 billion in 2021. Meanwhile, the CPC's finance cost increased by 3.5 times to Rs. 119.5 billion in 2022, compared to Rs. 25.6 billion in 2021 due to local currency depreciation. As a result, CPC ended up with a record net loss of Rs. 615 billion and thereby increasing the accumulated loss to Rs. 1,031.3 billion at the end of December 2022.

In addition, the weak financial position and liquidity constraints of CEB and Sri Lankan Airlines had a knock-on impact on the CPC's balance sheet as these two entities were unable to fully finance their fuel purchases from CPC. The total outstanding liability including CEB and SLA to the CPC increased to Rs. 226 billion. This asset on the CPC balance sheet was in turn financed by the state banks, resulting in a higher liability of CPC to the Bank of Ceylon and People's Bank. This illustrates the adverse nexus between the balance sheets of the large SOEs and the banking system. The Government is in the process of identifying strategies to address the weaknesses in the balance sheets of each of these entities, which has also been identified as a priority in the IMF EFF programme.

As an initial step, the Government decided to restructure CPC's balance sheet by transferring the outstanding balance of the Government-guaranteed foreign currency denominated debt stock of the CPC, to the central Government debt stock. This amounted to USD 2.44 billion (Bank of Ceylon: USD 1.34 billion and People's Bank: USD 1.09 billion), as of end December 2022. Nonetheless the CPC has residual liabilities to the Government for its on-lending of the Indian Line of Credit facility (USD 697 million), liabilities to the National Iran Oil Company (USD 251 million), and the Bank of Ceylon (Rs. 87 billion), respectively with regard to importation of petroleum products. The treatment of these residual liabilities and cross liabilities between the CEB, SLA, and CPC would be addressed in the Government's overall strategy for restructuring the balance sheets of key SOEs.

Another important reform initiative was the Petroleum Products (Special Provisions) (Amendment) Act, No. 27 of 2022 which allows global suppliers to enter the Sri Lankan market thereby liberalizing the petroleum retail sector.

The Government has called for Expressions of Interest (EOI) from established companies in petroleum-producing countries for the importation, storage, distribution, and sale of petroleum products through the predetermined distribution dealers operated in Sri Lanka. This landmark reform is expected to introduce competition in petroleum retail in Sri Lanka, driving efficiencies, reducing costs, and improving service standards for the benefit of Sri Lanka's consumers.

Figure 8.5 | Composition of Product Portfolio

Source: Ceylon Petroleum Corporation

Figure 8.6 | Sector wise Profitability

Source: Ceylon Petroleum Corporation

The CPC's sales volume decreased by almost 1,080 million liters in 2022 due to weaker economic activity including power generation. As per the sector-wise analysis of petroleum sales, transport, power generation and the domestic sector recorded considerable losses amounting to Rs. 526.9 billion, Rs. 59.6 billion and Rs. 26.1 billion, respectively in 2022 compared to Rs. 58.5 billion, Rs. 16.7 billion and Rs. 8.8 billion in 2021.

8.3 State Banks

During 2021, Sri Lankan banks rebounded from impact of the pandemic with strong revenue growth and improved profitability. However, the context changed dramatically in 2022 due to a series of shocks in the operating environment, including sharp economic contraction, downgrading of the sovereign rating, liquidity constraints in both rupee and foreign exchange markets, spiraling inflation which required sharp interest rate increases, and so on.

In the local banking industry, state-owned banks play a crucial role in promoting financial inclusion, supporting economic growth, and ensuring stability in the banking sector while working closely with the Government to implement policies and programs that

promote development and social welfare of the country. The state banks having almost 49 percent of the total assets of the banking sector (comprising licensed commercial banks and licensed specialized banks) continued to dominate the banking industry in 2022.

However, due to the adverse macro-economic conditions that prevailed in the economy and other negative factors affecting the banking industry in 2022, the state banks faced significant pressure in managing liquidity, profitability, and capital adequacy.

During 2022, the total profitability of the state-owned banking sector decreased by 43.5 percent to Rs. 59.2 billion compared to the Rs. 104.9 billion in 2021. This was mainly due to the drop in net interest margin and increased impairment of investments in foreign currency denominated Government securities. The state banks contributed to 30.8 percent of the total profit earned by Sri Lanka's banking sector in 2022.

The state banks' combined branch network, including service delivery points, expanded to 1,924 by addition of 4 new branches in 2022 while almost all the banks adopted digital platforms to serve their customers.

8.3.1 Bank of Ceylon

The Bank of Ceylon (BoC) continued to be the largest bank in the industry with an asset base of Rs. 4,336 billion and a deposit base of Rs. 3,334.7 billion. In 2022, both the total assets and the deposits increased by 14.0 percent and 16.3 percent, which are below the industry average increase of 15.4 percent and 18.8 percent, respectively.

Despite the increase in total operating income by 28.4 percent in 2022 over the previous year, the BoC's profit decreased by 28.3 percent to Rs. 30.9 billion in 2022 compared to Rs. 43.1 billion in 2021 mainly due to the escalated impairment charges for loans and other assets.

BoC's total loans and advances to customers decreased by 3.7 percent to Rs. 2,325.5 billion at the end of 2022 from Rs. 2,413.7 billion at the end of 2021 as against the industry average decline of 5.7 percent. However, BoC managed to maintain its impaired (Stage 3) ratio at 5.2 percent in 2022, while the industry average was 11.3 percent.

BoC has also reached a Rs. 3,334.7 billion deposit base with a 16.3 percent expansion in 2022. However, the Current Account Savings Account (CASA) ratio has reduced to 29 percent as at end 2022, compared to 36 percent at the end previous year reflecting a high cost of funding.

Figure 8.7 | Loans and Advances to the Customers – By product

Source: Bank of Ceylon

During the first week of February 2023 the Fitch Ratings upgraded the Long-Term Foreign Currency Issuer Default Rating (IDR) of the Bank to 'CC' from 'RD (Restricted Default)' and Short-Term IDR to 'C' from 'RD', while the national rating of the Bank continued to be at A(Ika). During the year 2022, BoC was named as the No.1 Banking Brand for the 14th consecutive year by Brand Finance Lanka with a Brand value of Rs. 53.9 billion.

8.3.2 People's Bank

People's Bank's (PB) asset base grew by 12.3 percent to Rs. 2,972 billion in 2022 compared to the industry growth rate of 15.4 percent. Furthermore, the deposit base of the bank increased by 14.5 percent to Rs. 2,372 billion against the industry average of 18.8 percent growth. Lending to customers decreased by 2.9 percent to Rs. 1,783.1 billion compared with the industry average decline of 5.7 percent in 2022.

The net interest income of PB decreased by 8.1 percent to Rs. 75.7 billion in 2022 mainly due to the drop in net interest margin to 2.7 percent in 2022 from 3.4 percent in 2021. Even with the decrease in the net interest income and higher provisions made for impairments, the bank was able to achieve Rs. 21.3 billion profits in 2022, compared to Rs. 30.3 billion in 2021 due to the increase in net fee and commission income by Rs. 7.9 billion.

The Capital Adequacy Ratio for Tier -1 capital of PB at the end of 2022 has been recorded as 11.9 percent, which is well above the minimum regulatory requirement of 8.5 percent.

8.3.3 National Savings Bank

National Savings Bank (NSB) operates with a strong branch network of 262 branches and 4,064 post offices/sub post offices across the island. At the end of 2022, the NSB's asset base

reached Rs. 1,616.7 billion with a 2.4 percent growth in comparison with the previous year. Moreover, the deposit base and the lending portfolio recorded as Rs. 1,476.7 billion and Rs. 578.6 billion, respectively at the end December 2022, an increase of 3.4 percent and 7.4 percent, respectively over 2021.

In 2022, NSB recorded a profit before tax of Rs. 4.5 billion, with a decrease of 84 percent compared to 2021 mainly due to the decrease in net interest income by 40 percent from Rs. 54.6 billion in 2021 to Rs. 32.5 billion in 2022.

The Personal/pawning and other loans category contributed to 48.0 percent of the Bank's loan portfolio whilst construction and infrastructure sectors are the other major sectors that contributed to 32.0 percent and 11.0 percent, respectively to the loan book.

8.3.4 Housing Development and Finance Corporation Bank

Housing Development Finance Corporation Bank (HDFC), which is primarily engaged in granting credit facilities for housing purposes, is the only state-owned bank listed in the Colombo Stock Exchange.

The lending portfolio of HDFC grew by 2.1 percent to Rs. 42.7 billion against a growth of 5.7 percent in the industry. However, the Non Performance Loan (NPL) ratio of the bank increased from 32.4 percent in 2021 to 35.6 percent in 2022 due to persistent unfavorable economic conditions that prevailed during the year. The deposit base of the bank also increased by 0.9 percent to Rs. 50.3 billion whilst the average growth in the industry stood at 18.8 percent.

HDFC's profit before tax recorded a decrease of 57.1 percent to Rs. 377 million for the year 2022 with a decline in the net interest margin to 4.3 percent. This resulted in a return on equity of 5.9 percent in 2022 as against 9.0 percent in 2021. Though the net assets per share of the bank increased Rs. 104.7, the share price as at end December, 2022 was recorded as Rs. 27.8.

8.3.5 State Mortgage and Investment Bank

The State Mortgage and Investment Bank (SMIB), a licensed specialized bank, has been in the mortgage loan business for housing and housing-related purposes since 1931. The bank's deposit base has increased to Rs. 49.1 billion at the end 2022 recording a growth of 7.4 percent over 2021.

The total assets increased by 7.0 percent to Rs. 57 billion by the end of 2022 mainly due to the increase in loans and advances by 3 percent to

Rs. 39.3 billion. The Bank's loan portfolio stood at Rs. 39.3 billion recording an increase of 3.1 percent over Rs. 38.1 billion of 2021, which is below the industry growth of 5.7 percent. The asset quality of the bank has deteriorated during the year 2022 reflecting an increase in the NPL ratio from 9.2 percent in 2021 to 10.2 percent.

Due to the decrease in net interest income coupled with fee and commission income, SMIB recorded a net loss before tax of Rs. 48.3 million in 2022 against the profit before tax of Rs. 405 million recorded in 2021.

8.3.6 Pradeshiya Sanwardana Bank

With a branch network of 272, Pradeshiya Sanwardana Bank (PSB) operates with the objective of improving the living standards of the rural community by providing accessible and affordable credit facilities.

Gross Loans and Advances increased to Rs. 210 billion during the year 2022, which is a 12.3 percent growth compared to the year 2021.

Despite the increase the industry average NPL ratio (stage 3 impairment) to 11.3 percent by the end 2022, the bank has improved the NPL ratio to 8.5 percent from 8.7 percent recorded in 2021. The deposit base also increased by 9.3 percent to Rs. 201.5 billion by the end of 2022. The PSB recorded a significant increase in profit to Rs. 1.8 billion in 2022 compared to Rs. 0.8 billion in 2021 mainly due to the increase in net interest income.

8.3.7 Employees' Trust Fund Board

Employees' Trust Fund Board (ETFB) was established to provide social security by way of multiple benefits to its members. At the end of 2022, the number of members of the ETFB was 2.4 million. The total contribution received from employers on behalf of their employees increased by 17.4 percent to Rs. 34.8 billion in 2022, compared to Rs. 29.7 billion in 2021.

In 2022, Rs. 477.0 million was paid as benefit claims and Rs. 87.6 million was paid for grade 5 scholars. Also, members are paid the balance available in the account along with dividends and interest upon termination/retirement. Accordingly, 198,797 refund claims were

processed in 2022 and the total amount paid on refund claims was Rs. 25.0 billion.

The investment portfolio grew up to Rs. 442.5 billion by recording an increase of 7.8 percent, compared to Rs. 410.5 billion in 2021. The majority of the investments made by ETFB are placed in Government securities which was 94 percent as at end 2022, compared to 86.7 percent as at end 2021 ensuring a steady stream of secured returns.

Moreover, in 2022, ETFB earned a total income of Rs. 46.1 billion which largely consisted of interest income. In 2022, the fund earned a net profit of Rs. 43.4 billion and declared a total dividend plus interest rate of 8.75 percent to all members, which amounted to Rs. 36.9 billion.

8.4 Water

8.4.1 National Water Supply and Drainage Board

In line with the Government's National Policy Framework which outlines the provision of clean and safe drinking water for every household by 2025, the Board continued to increase the piped borne water and safe drinking water supply coverage in the country to 60.4 percent and 96 percent, respectively. The National Water Supply and Drainage Board (NWS&DB) provided 153,127 new connections to the system through the completion of 3 large scale water supply development projects and 1 local bank funded project in the year 2022. As a result, the total connections increased to 2.9 million from 2.8 million as at the previous year.

Moreover, in 2022, NWS&DB was able to produce 818 million cubic meters (m³) of drinking water at a cost of Rs. 23.1 billion and distributed 614 million m³ with a unit cost of production at a rate of Rs. 67.7 in 2022 against the production cost per unit of Rs. 60.6 in year 2021 due to the increase of electricity and material cost. However, the average sales price per unit stood at Rs. 45 resulting in a loss of Rs.

22.7 per unit. Therefore, a cost-reflective tariff revision for the water and sewerage system was approved by the Cabinet of Ministers, and the new tariff structure was implemented from September 2022 after 10 years.

The tariff revision, substantially increased the revenue of the NWS&DB to Rs. 35.5 billion at the end of 2022 compared to Rs. 28.9 billion at the end of 2021 which resulted in a reduction in the operational loss to Rs. 1.2 billion by 63 percent. However, NWS&DB recorded a net loss of Rs. 3.1 billion for the year under review similar to the previous year due to the increased cost of borrowings for water supply projects under the high interest rates that prevailed during the year.

The General Treasury extended its budgetary support to facilitate the settlement of local and foreign-funded project loans amounting Rs. 20 billion in 2022 including the repayment of loan component on behalf of the NWS&DB.

Even though 24 water supply projects were on going in the year 2022 with an aim of improving the safe drinking water of the country, due to the adverse economic condition the NWS&DB has faced difficulties in achieving the targeted outcomes.

8.5 Ports

8.5.1 Sri Lanka Ports Authority

Sri Lanka Ports Authority's (SLPA) throughput (Container operations) has reduced from 2.2 million total TEU's in 2021 to 1.9 million in 2022

due to the slowdown in global trade volumes and adverse economic conditions of the country. Further, total Metric Tons (MT) handled by SLPA has reduced from 40.65 million MT in 2021 to 33.82 million MT in 2022.

	SLPA	SAGT	CICT	Port of Colombo (POC)
Total Handled TEU 2022	1,925,895	1,752,236	3,184,053	6,862,184
Total Handled TEU 2021	2,198,334	1,838,693	3,212,331	7,249,358
% Change	-12.40%	-4.70%	-0.90%	-5.30%

The overall number of ship arrivals at the port of Colombo has decreased when compared to the ship arrival statistics of previous years as smaller containerized vessels have been replaced by mega containerized vessels in the shipping industry. However, SLPA revenue has increased from Rs. 45.5 billion in 2021 to Rs. 68.4 billion in 2022 mainly due to increased tariff after 7 years to meet the tariff rates of private port operators and regional operators' tariff levels. As a result, SLPA's profit after tax has increased from Rs. 20.7 billion in 2021 to Rs. 42.3 billion in 2022 by 105 percent.

8.6 Insurance

The insurance industry consists of 21 local insurance companies and 6 foreign-based companies. The State presence is visible in the insurance sector through the Sri Lanka Insurance Corporation Ltd. (SLIC), Agricultural and Agrarian Insurance Board (AAIB), National Insurance Trust Fund (NITF), and Sri Lanka Export Credit Insurance Corporation (SLECIC).

In 2022, the insurance industry grew by 10.3 percent in Gross Written Premium to Rs. 257.6 billion from Rs. 233.5 billion at the end of 2021. The value of total assets of the insurance sector increased by 7.4 percent to Rs. 947.3 billion in 2022, compared to Rs. 881.8 billion in 2021.

8.6.1 Sri Lanka Insurance Corporation Limited

Being the largest state-owned insurance company in the country, Sri Lanka Insurance

Corporation Ltd. (SLIC) holds an asset base of Rs. 274 billion and the largest life fund of Rs. 159 billion in the insurance industry at the end of 2022.

SLIC recorded a revenue of Rs. 63.7 billion in 2022, a marginal decrease, compared to Rs. 64.1 billion in 2021. Gross Written Premium (GWP) declined to Rs. 41.3 billion in 2022 from Rs. 43.2 billion in 2021 as insurance sector growth of 10.3 percent. The GWP from the life insurance business also decreased by 4.7 percent to Rs. 20.9 billion in 2022 from Rs. 22 billion in 2021. SLIC reported a GWP of Rs. 20.3 billion for non-life insurance in 2022, a decrease of 4.3 percent, compared to Rs. 21.3 billion in 2021. Meanwhile, the declared dividends amounted to Rs. 0.9 billion in 2022.

The overall profitability of SLIC shows a moderate increase of 6.4 percent to Rs. 12.5 billion in 2022, whereas the industry recorded a growth of 19.4 percent.

8.6.2 National Insurance Trust Fund

National Insurance Trust Fund (NITF) has been established in 2006 by an Act of Parliament and engages in the insurance business by offering several products including, the Agrahara Insurance Scheme, Agricultural Loan Protection

Insurance Scheme, Crop Insurance Scheme and General Insurance – (Motor and Non – Motors sector policies). Further, NITF acts as a reinsurer of any liability carried by any person in the insurance industry or any insurer in or outside of Sri Lanka since 2007, it maintains the Strike, Riot, Civil Commotion and Terrorism (SRCC&T) Fund.

^(a) Provisional

NITF's revenue has significantly increased from Rs. 19.0 billion in 2021 to Rs. 25.1 billion in 2022 mainly due to increase in investment income by Rs. 3.5 billion. GWP also increased by 8.5 percent to Rs. 11.5 billion in 2022, compared to Rs. 10.6 billion in 2021. NITF's profit has increased by 35 percent to Rs. 8.0 billion in 2022 from Rs. 5.9 billion in 2021. Nevertheless, Agrahara Medical Scheme and Motor Insurance Scheme recorded a loss of Rs. 2.3 billion and Rs. 146 million, respectively in 2022. NITF's investments in Government securities increased from Rs. 18.2 billion in 2021 to Rs. 25.6 billion in 2022 recording, a growth of 40.6 percent which enabled to enhance the investment income under high interest rate regime. NITF paid Rs. 1.6 billion of levies to the Consolidated Fund in 2022.

8.7 Commuter Transportation

8.7.1 Sri Lanka Transport Board

Passenger transport service consists of all passenger movements by means of public (buses and trains) and private modes of transport via own vehicles such as cars, vans, motorcycles, three wheels etc. Around 38 percent of citizens use public transportation, while the rest depends on their own vehicles in order to fulfill the transport needs. The biggest bus fleet is owned by the Sri Lanka Transport Board (SLTB) consisting nearly 7,000 buses. SLTB functions as the largest public transport provider with a head office, 12 regional offices, 107 main depots, 09 sub-depots, 12 provincial workshops, 21 driver training schools, and employs around 26,800 individuals. Moreover, the SLTB provides transport services that are

under-provided by the private sector. This includes transport in uneconomical routes in remote areas through Gemi Seriya, night-time services by Nisi Seriya, and provides low-cost transportation services to school children through Sisu Seriya.

SLTB reported a 48 percent increase in its operated kilometers in the year 2022 by recording 351 million operated kilometers using 4,330 buses compared to 237 million kilometers using 3,232 buses in 2021. Further, the revenue of SLTB increased by threefold to Rs. 58.3 billion in 2022 from Rs. 14.6 billion in previous year, primarily due to the increase in bus fares to reflect higher operating costs.

The General Treasury supported SLTB with Rs. 8.8 billion of imprest out of Rs. 9.4 billion

of budgetary allocation for the year 2022 as subsidy for season tickets and un-economic routes. Even though the operational expenses of SLTB increased rapidly to Rs. 68 billion in 2022 from Rs. 28.6 billion in 2021 due to the increase in fuel prices and spare parts, the SLTB recorded a net profit of Rs. 0.5 billion in 2022.

8.8 Aviation

8.8.1 Airport and Aviation Services (Sri Lanka) Limited

Airport & Aviation Services (Sri Lanka) (Private) Limited (AASL) performs statutory duties under the mandate granted by the Civil Aviation Act, No. 14 of 2010 by providing certain specific

aeronautical services in Sri Lanka. As the statutory service provider of the Government, AASL develops the airport infrastructure utilizing its own funds and Government backed foreign loans and grants. AASL has deployed an asset base over Rs. 165 billion and a workforce of 3,900 employees.

^(a) Provisional

AASL's revenue tripled from pandemic levels in 2020 and 2021 of Rs. 11.7 billion and Rs. 11.1 billion, respectively, to Rs. 33.8 billion in 2022, exceeding the pre-pandemic level of Rs. 29.9 billion in 2019 by approximately 14 percent. Although the revenue from aeronautical services increased by 14 percent from Rs. 5.4 billion in 2019 to Rs. 6.2 billion in 2022, the revenue from non-aeronautical services decreased by 2 percent, from Rs. 20.2 billion in 2019 prior to the pandemic level to Rs. 19.8 billion in 2022.

The increase in financial expenses from Rs. 0.5 billion in 2021 to Rs. 12.4 billion in 2022 is the primary reason for the 129 percent expenditure growth from Rs. 11.9 billion in 2021 to Rs. 27.3 billion in 2022.

However, AASL was able to record Rs. 6.4 billion profits before tax in 2022, positioning itself as a profitable entity after two years as a loss-making entity.

8.8.2 SriLankan Airlines Ltd.

Although the global aviation sector was on its path to recovery following the pandemic, Sri Lankan Airlines (SLA) suffered in 2022 as a result of the political and economic unrest in Sri Lanka. The number of tourist arrivals dropped significantly, forcing the airlines to concentrate more on transit traffic linking to markets in the Indian subcontinent, the Far East, the Middle East, and Europe.

From June to August 2022, there was a major Jet fuel supply deficit in the entire country. In order to maintain connectivity of the nation in

a situation where many international airlines had halted or reduced services to Sri Lanka, SLA was forced to use "tankering" (carrying extra fuel for the return sector) and operate via additional stops for re-fueling. The loss of passenger revenue due to disruptions in passenger connectivity on long-haul flights caused by flight diversions via India for re-fueling and the loss of cargo revenue due to payload restrictions have significantly increased SLA's operational costs.

^(a) Provisional

The SLA generated passenger revenues of Rs. 293 billion for 2022/2023, a 97 percent recovery of the pre-COVID passenger revenues for the same period. Passengers carried during the period were 3.2 million with an emphasis on running profitable routes and including additional locations that weren't previously directly connected to Sri Lanka, such as Frankfurt in Germany, Seoul in South Korea, and Sydney in Australia.

As a result of the increased year-end impairment of the financial assets and liabilities with the currency devaluation, SLA incurred a substantial exchange loss of Rs. 63.7 billion. Further, the high finance cost of Rs. 47.9 billion and operational cost enhancement led the SLA group to have a net loss of Rs. 72.2 billion in 2022/2023.

SLA is carrying an unsustainable level of debt. As of February 28, 2023, the entire debt, when converted to USD, was USD 834 million (90 percent is in foreign currency). Additionally, the USD lease liabilities are revalued and capitalized.

The Government is in the process of restructuring SLA both in terms of driving operational efficiency and addressing challenges in the SLA balance sheet. The Cabinet has approved a strategy to restructure the airline in order to eliminate the fiscal risks arising from the entity and to address its legacy debt. Globally reputed transaction advisors are expected to support this process.

8.9 Construction

The Sri Lankan construction industry has made a limited contribution to the GDP in 2022 compared with the previous years due to the economic downturn of the country. Total turnover of State Engineering Corporation (SEC), Central Engineering Consultancy Bureau (CECB) and State Development and Construction Corporation (SD&CC) has recorded an almost 24 percent decrease in revenue compared to 2021.

Being the three major SOEs engaged in the construction industry, SEC, CECB and SD&CC undertake most of the Government contracts. However, liquidity constraints, suspension and termination of contracts, rapid increase of construction material prices, scarcity of the construction materials and import restrictions, have prevented these three entities from engaging in new contracts which has hampered their capacity to make use of the skilled workforce, which is their asset.

8.9.1 State Engineering Corporation

State Engineering Corporation of Sri Lanka (SEC) has work in hand projects worth of Rs. 9.5 billion in 2022 such as Construction of the Faculty of Nursing at Sri Jayewardenepura, Soysapura Housing Scheme – Stage III and Construction of Quarters Building for New Prison Complex at Palkelele.

Sources: State Engineering Corporation's

^(a) Provisional

Revenue decreased by 9 percent to Rs. 2.7 billion in 2022 from Rs. 3 billion in 2021 and expenditure also decreased by 20 percent. SEC recorded a loss of Rs. 0.9 billion in 2022 which is a decrease of 41 percent from 2021. Limitations in releasing Government funds during 2022 have increased the SEC's receivables by 10 percent to Rs. 6.5 billion thus creating significant liquidity issues for the entity. This has resulted in an increase of outstanding debt to banks by 28 percent from Rs. 2.1 billion to Rs. 2.7 billion.

Cabinet of Ministers has granted the approval to implement the Voluntary Compensatory Retirement Scheme (VRS) for 1,056 employees and to provide financial assistance of Rs. 0.5 billion to pay the salary bills for the period from August to October 2022.

8.9.2 Central Engineering Consultancy Bureau

Central Engineering Consultancy Bureau (CECB) has been engaged in consultancy services since 2016 focusing on the objectives that have been set out at the initiation of the entity, while Central Engineering Services (Pvt) Limited being a fully owned subsidiary of CECB engaged in construction activities.

CECB has completed Rs. 5.3 billion worth of Government projects out of the total completed projects worth of Rs. 5.7 billion during the year 2022. Work-in-hand consultancy project at the end of the year 2022 amounts to Rs. 3.7 billion and construction projects amounts to Rs. 20.6 billion.

Revenue decreased by 20 percent to Rs. 5.1 billion in 2022 from Rs. 6.4 billion in 2021. In 2022, CECB has recorded a profit of Rs. 69 million which is a 43 percent increase compared to 2021. The total receivables of CECB stood at Rs. 9.4 billion at the end of the year 2022.

8.9.3 State Development & Construction Corporation

During 2022, State Development & Construction Corporation (SD&CC) has completed Government projects worth of Rs. 0.3 billion and the value of projects in hand at the end of the year was Rs. 10.2 billion. Among the projects completed, there were 14 rural bridges valued at Rs. 71 million.

^(a) Provisional

Total revenue of SD&CC amounted to Rs. 4.5 billion recorded in 2021, a decrease by 39 per cent to Rs. 2.7 billion while total expenditure in 2022 has also decreased from Rs. 4.4 billion to Rs. 2.7 billion by 38 percent resulting in a decrease of profit from Rs.96 million in 2021 to Rs. 27 million in 2022. Long delays in payment of Government contracts has resulted in an increase of SD&CC's receivables to Rs. 578 million by 4 percent. Total outstanding debts to banks has decreased only by Rs. 7 million to Rs. 1,982 million during the year 2022 resulting in serious liquidity issues at SD&CC.

8.10 Lotteries

Sri Lankan lotteries market is categorized as a duopoly market that has split the market share between the National Lotteries Board (NLB) and Development Lotteries Board (DLB) both of which are fully owned by the Government. Being the key market players, the NLB and DLB hold 51.8 percent and 48.2 percent of market share respectively in 2022. NLB's product portfolio consists of 14 brands of lotteries (13 passive and 1 instant) while DLB's product portfolio consists of 10 brands (9 passive and 1 instant). Pursuant to the Establishment Acts of the two entities, NLB contributes directly to the Consolidated Fund, while DLB contributes its profit to the President Fund, part of which is transferred to Mahapola Higher Education Trust Fund.

The total income of lottery sales during the year 2022 amounted to Rs. 40.3 billion, while the prizes declared by both entities amounted to Rs. 20.6 billion. The revenue of the boards has significantly increased in 2022 compared to previous year, enabling an increase in the contribution to the Consolidated Fund and the President's Fund.

In 2022, both entities faced challenges associated with high inflation, namely, higher cost of printing, transport, and the non-availability of raw materials. Amidst these challenges, both entities shifted towards digital platforms, especially using Short Message Services (SMS). Furthermore, the DLB has developed a mobile application for online lottery sales.

8.10.1 National Lotteries Board

During the year 2022, NLB has achieved a lottery sale income amounting to Rs. 21.2 billion which is an increase of 22.6 percent compared to 2021. The declared prizes in 2022 increased by 28.6 percent to Rs. 10.7 billion, compared to Rs. 8.4 billion in 2021. As a result, the NLB recorded a profit amounting to Rs. 1.4 billion in 2022, compared to Rs. 1 billion in 2021. During the year, NLB contributed Rs. 2.6 billion to the Consolidated Fund, out of which over 47 percent has been generated by the lottery "Mahajana Sampatha". NLB produced 58 super prize winners in 2022 and distributed Rs. 1.2 billion among them.

NLB is equipped with an island-wide agency network comprising of 115 dealers including 3 SMS dealers, 3,030 agents, and approximately 19,500 sellers by the end of 2022. In line with the core strategy of creating wealth for all stakeholders, NLB has developed a strong product portfolio in lottery industry by continuously expanding its market segments

8.10.2 Development Lotteries Board

Development Lotteries Board (DLB) recorded a 24 percent increase in revenue compared to preceding year amounting to Rs. 19.1 billion, while recording a profit of Rs. 3.2 billion which is an increase of 11.9 percent in 2022 in contrast with Rs. 2.9 billion recorded in 2021. The net prize payout of the year stood at Rs. 9.9 billion, which is an increase of 20.4 percent compared to 2021. The Board produced 51 super jackpot winners in the year 2022 totaling Rs. 0.6 billion.

The DLB provides scholarships for university students through Mahapola Scholarship Trust Fund. Similarly, the health sector is also supported by the funds generated through DLB by assisting patients facing financial hardships. DLB has contributed Rs. 3.2 billion to the President Fund which is an increase of 12 percent compared to the contribution made in 2021.

DLB operated with an agency network of 88 distributors, 2,517 agents and approximately 19,048 sales assistants island-wide at the end of 2022. Moreover, the DLB has implemented several strategies such as lottery shops for niche markets, modification of lotteries, capturing untapped markets and reducing the inactive dealer ratios in order to increase the market share.

8.11 Livestock and Dairy

Livestock plays a diverse role in the Sri Lankan agriculture sector, accounting for around 1 percent of the national GDP. Among the subsectors of livestock, the dairy sector has been identified as a national priority in socio-economic development. In this context, being state-owned entities, the National Livestock Development Board (NLDB) and Milco (Pvt) Limited (MILCO) play a vital role in manufacturing and marketing livestock products, including dairy products.

According to contemporary data, Sri Lanka exports approximately 1,610 metric tons of milk and milk products while importing 88,482 metric tons of milk and milk products at a cost of Rs. 63.1 billion. Imported milk products include milk and milk cream, milk cream fat, condensed milk, cheese, curd, butter and other fats, buttermilk and curdled milk and whey and whey powder. As of 2022 48 percent of Sri Lanka's milk requirement was met by domestic production. Annual milk production decreased by 1.3 percent in 2022 compared to 2021. Sri Lanka produced 419 million liters of cow milk and 87 million liters of buffalo milk in 2022 on

average while incurring Rs. 68.3 million on importing milk and milk products during the year.

8.11.1 Milco (Pvt) Ltd

MILCO is a fully Government-owned company being operated with the view of achieving growth in fresh milk production while strengthening livelihoods of the local dairy farmers. In 2022, MILCO has collected 19.7 percent of the total milk production of the country.

In the year under review, MILCO's milk production sales revenue increased by 5.8 percent to Rs. 13.1 billion from Rs. 12.4 billion, driven by an increase in the prices of the milk products and other income escalated to Rs. 216 million from Rs. 80 million compared to the year 2021.

MILCO's profitability dramatically decreased in 2022 compared to the previous year by 243 percent recording a loss of Rs. 471 million in 2022 from Rs. 329 million profits in 2021 mainly due to a 29 percent decrease in milk collection. This is the highest-ever loss reported by MILCO

over the last 3 years, resulting in earnings per share reducing from Rs. 10.31 in 2021 to Rs. -15.14 in 2022. There was a considerable increase in bank debt to Rs. 1,230 million in 2022 coupled with a significant 444.8 percent rise in finance cost, driven by the overdraft facility obtained for working capital purposes.

MILCO produced 2,060 metric tons of milk powder in 2022 which is far below the potential of the entity, since the Ambewela factory has the annual capacity to produce 6 times higher than the quantity produced in 2022.

8.11.2 National Livestock Development Board

The National Livestock Development Board (NLDB) was established in 1973 and commenced its field operations in 1974. The NLDB manage with 32 livestock and coconut integrated farms aiming to enhance the socio- economic standards of the citizens by producing quality breeding materials, livestock, and agricultural products whilst imparting practical and theoretical knowledge of livestock to the farmers by the training center located at Digana.

NLDB farms are equipped with pure and hybrid breeders of cows, buffaloes, pigs, goats, sheep, rabbits, parent broilers, commercial broilers, ducks, turkeys, quails together with a network of 41 NLDB milk outlets and 16 farm based sales centers which sell animal products such as milk, eggs, meat products, and milk-based products such as yoghurt, butter and cheese.

In addition, NLDB has 3,908 hectares of coconut cultivation including 10 farms located in the coconut triangle with production of 17.68 million nuts in 2022 with part of the production converted to coconut oil for local consumers. Sri Lanka Poultry Development Company (Pvt) Ltd. is a subsidiary while Mahaweli Livestock Enterprises Limited operates as an associate of NLDB, the liquidation of which has been approved by the Cabinet.

The overall contribution of NLDB to the national milk production is around 1.5 percent by end of 2022, with the total annual milk production of 6.43 million liters.

Although, NLDB recorded a 12.5 percent increase in revenue earned in 2022 compared to the previous year, a slight decrease in profit before tax was recorded amounting to Rs. 133 million due to increased cost of production given the price increase of animal feed.

8.12 Marketing and Distribution

8.12.1 Lanka Sathosa Ltd

Lanka Sathosa Limited (LSL) is the largest Government owned retail store network operating with 440 outlets and over 4,300 employees providing essential items to consumers at affordable prices. Although, LSL accounts for almost 5 percent of the market share, rapid expansion in private sector super market networks has curtailed growth in LSL's market share. However, the year 2022 saw an improved financial performance by LSL even though the company continued to incur losses.

The company's gross profit ratio increased to 11.7 percent in 2022 compared to the 10.9 percent in the previous year. LSL recorded an operating profit amounting to Rs. 432 million in 2022, which is an increase of 182 percent over 2021. Revenue also increased significantly by 39.7 percent to Rs. 56.5 billion in 2022, compared to Rs. 40.4 billion in 2021. However, due to higher interest costs, LSL recorded a loss of Rs. 615 million in 2022, albeit a reduction

of 31 percent compared to the loss in the previous year. LSL had elevated liabilities over its assets attributable to financing raised for the import of rice in 2014/15. However, as part of the restructuring of LSL, the General Treasury has taken over the responsibility of servicing loans borrowed by LSL from the state banks amounting to Rs. 11.47 billion.

8.13 Plantation

The plantation sector plays an important role in the Sri Lankan economy in terms of contribution of exports and employment creation in particular. The sector has undergone significant transformation over the last several decades, with most estates now operating under private ownership. Nonetheless, the state continues to play a role in the sector with a number of plantation companies operating under state ownership.

Sri Lanka State Plantations Corporation (SLSPC) and Janatha Estates Development Board (JEDB) were established in 1958 and 1976 respectively as fully Government owned entities to strengthen the contribution of the state plantation sector towards the national economy. The majority of estates under their ownership have been leased out to 23 Regional Plantation Companies (RPCs) while allotting the Golden Share of each RPC to the Government. The Government has retained the ownership of Kurunegala Plantations Limited (KPL), Chilaw Plantations Limited (CPL), Elkaduwa Plantations Limited (EPL) and Kalubovitiyana Tea Factory Limited (KTFL) from the above RPCs, in order to strengthen the state plantation sector contribution towards the national economy.

CPL comprises of 85 coconut estates in total extent of 5,733.23 hectares located in Puttalam, Kurunegala & Gampaha districts, out of which 3,815.94 hectares of productive extent mainly focused on coconut and intercrops such as cashew, rambutan, cinnamon, pepper and

dragon-fruits in addition to animal husbandry. KPL manages a total land extent of 4,971.12 hectares comprising 07 estates in the Kurunegala, Gampaha and Anuradhapura districts. The coconut bearing land extent is 3,124.60 hectares as the main crop while tea and rubber being secondary crops and minor-crops such as black pepper, cinnamon, mango and rambutan. CPL and KPL have recorded profit before tax of Rs. 514 million and Rs. 511 million in 2022 while earning a total revenue of Rs. 975 million and Rs. 1,065 million respectively.

EPL consists of 10 estates covering the bearing extent of 2,320 hectares including tea, rubber, coconut and minor crops such as mango, cocoa, rambutan, pepper, cinnamon and cloves. EPL recorded its highest profit before tax of Rs. 553 million in 2022. This is an increase of 73.4 percent compared to preceding year. However, the total green leaf production and the yield per hectare (green leaf) decreased by 16 percent and 15 percent respectively in 2022 compared to previous year, due to the shortage of chemical fertilizer.

KTFL revenue from tea production amounted to Rs. 2,637 million, which is a significant increase of 153.3 percent compared to the preceding year, primarily due to higher net sales average of made tea. KTFL recorded a profit of Rs. 380 million in 2022 compared to a loss of Rs. 2.76 million in the previous year.

JEDB manages 3,572 hectares of 16 tea estates and 02 rubber estates while the SLSPC covers the management of 4,200 hectares of 16 tea

estates and 01 rubber estate. As the main crop, the tea production by JEDB and SLSPC amounted to 1,210 metric tons and 1,327 metric tons respectively, while tea yield per hectare was 432 kg and 545 kg respectively. JEDB

made a loss of Rs. 18 million in 2022, continuing a trend of losses during the past 5 years. SLSPC made a profit of Rs. 17 million, reversing a trend of losses in the previous 4 years.

8.14. Health

8.14.1 State Pharmaceuticals Corporation

State Pharmaceuticals Corporation (SPC) is the sole importer and the major supplier of 780 varieties of pharmaceuticals in the generic form for the Medical Supplies Division (MSD), ensuring timely and continuous supply of quality assured pharmaceuticals and healthcare items to the Government hospitals while spanning its geographical footprint in the open market operations through 52 Osusala outlets, 111 franchised Osusala outlets, and 51 distributors.

SPC's revenue which had grown at a compound annual growth rate of nearly 25 percent steadily for the five years up to 2021, dipped

by 15 percent in 2022. Imports restrictions due to shortages of foreign exchange in the market and constrained fiscal space were among the major reasons for this decline.

The MSD being the main contributor to the SPS's revenue recorded 80 percent contribution from the total revenue in 2022. The decline in finance cost from Rs. 580 million in 2021 to Rs. 14 million in 2022 due to the relief measures extended by the Ministry of Health, supported the SPC's bottom line which resulted in a profit before tax of Rs. 1.2 billion. However, this was a 61 percent decline when compared to Rs. 3.2 billion recorded in 2021.

SPC faces liquidity challenges as receivables from MSD amounted to Rs. 51.6 billion by the end 2022, albeit recording a slight reduction of 3 percent compared to year 2021.

Enhanced management information systems and improving procurement practices would be necessary in order to improve financial performance of the entity.

8.14.2 State Pharmaceuticals Manufacturing Corporation

State Pharmaceuticals Manufacturing Corporation (SPMC) has developed formulas for 94 pharmaceutical items applying the international quality standards of British Pharmacopoeia (BP) and the United States Pharmacopoeia (USP). The total production output of 3,302 million units of tablets/capsules

was recorded in the year 2022 as the highest output of SPMC.

SPMC supplies joint venture products with five joint venture companies through shareholder agreements. Given the weak foreign exchange position in the country, SPMC and other local manufacturers played a vital role to fulfill the shortage of pharmaceuticals requirement in the Government hospitals in 2022.

^(a) Provisional

Due to the depreciation of the rupee, the cost of pharmaceutical materials and other overheads increased by almost 100 percent. In this context, the Ministry of Health increased prices of the units of tablets/capsules on multiple occasions. As a result, SPMC's total revenue increased by 94 percent to Rs. 16.6 billion in 2022 from Rs. 8.5 billion in 2021.

Out of the total revenue, 84 percent was attributable to the MSD in 2022, increasing to Rs. 13.9 billion from Rs. 7 billion in 2021.

SPMC recorded a profit of Rs. 1.6 billion in 2022 compared to Rs. 1.2 billion in 2021, an increase of 26 percent. Accordingly, SPMC paid Rs. 100 million as a levy to the General Treasury.

Table 8.33 | Performance of Other State Owned Enterprises

Description	Core Activities	Performance	Concerns
Insurance			
Sri Lanka Export Credit Insurance Corporation (SLECIC)	Provide support services to the export sector through the provision of export credit insurance and credit guarantee services to the exporters.	The total operating income increased by 63.1 percent to Rs. 443.8 million in 2022 from Rs. 272.0 million in 2021. The profit before tax of SLECIC increased to Rs. 1,883.6 million in 2022 from Rs. 334.4 million in 2021, mainly due to the considerable increase in exchange gain reported during the year.	SLECIC should focus on new strategies to boost export earnings with more proactive approaches.
Agricultural & Agrarian Insurance Board (AAIB)	Operate Agricultural Insurance Scheme, Farmers Pension Scheme, and Fishermen Pension Scheme	The net surplus of AAIB increased by 48.9 percent to Rs. 2,650.8 million from Rs. 1,779.6 million in 2021 mainly due to the increase in operating profit in Agricultural Insurance Scheme.	High dependency on the National Budget due to mismatch in the cash inflows and outflows of insurance premiums and payments.
Non Renewable Resources			
Lanka Mineral Sands Ltd (LMSL)	Mining, processing and marketing of heavy mineral sands. Manufacturing and selling other by-products create as a result of refining and processing mineral sands.	LMSL's revenue increased significantly by 178 percent to Rs. 7,563 million in 2022 from Rs. 2,720 million in 2021. As a result, the profit before tax has also drastically increased to Rs. 6,160 million in 2022 from Rs. 1,387 million in 2021.	Despite exporting raw products, LMSL needs to seek new avenues for value addition catering to the foreign market demand in order to gain more benefits and foreign exchange to the country.
Kahatagaha Graphite Lanka Ltd (KGLL)	Excavate, process and sell Graphite as industrial raw material.	KGLL's revenue in the year 2022/23 increased sharply to Rs. 182 million by 48 percent compared to preceding year of Rs. 123 million due to the Rupee depreciation. As a result, KGLL's profit of the year increased drastically to Rs. 70 million compared to Rs. 8 million in 2021/22.	KGLL should focus on the value addition projects in order to gain the foreign exchange to the country.
Lanka Phosphate Ltd (LPL)	Excavate, process and sell rock phosphate which is used as a fertilizer for perennial agricultural crops such as Tea, Rubber and Coconut.	LPL's revenue decreased to Rs. 546 million in 2022/23 from Rs. 741 million 2021/2022. Consequently, LPL's profit has been declined by 52 percent to Rs. 74 million for the year under review.	LPL needs to explore the possibilities of new product development in order to enhance the use of the natural resource.

Table 8.33 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Health			
Sri Lanka Ayurvedic Drugs Corporation (SLADC)	Operate with the prime objective of manufacturing and distributing quality Ayurvedic drugs. It manufactures 65 varieties of drugs and supplies to Government hospitals, Ayurvedic physicians, and to the private sector.	SLADC's revenue increased by 17 percent to Rs. 936 million in 2022 compared to Rs. 800 million in 2021 due to the introduction of new marketable product varieties. Administration and selling & distribution increased by 17 and 22 percent respectively. SLADC recorded Rs. 14 million profit in 2022 compared to a loss of Rs. 14 million in 2021.	The scarcity of herbs as raw materials has been a major challenge for SLADC. SLADC should expand its herbal cultivation to ensure the availability of raw material while using modern processing methods to improve productivity.
Sri Jayawardenapura General Hospital (SJGH)	SJGH is the only fee levying Government owned General Hospital which offers a comprehensive range of clinical and Para-clinical services in the country. SJGH also plays a vital role as a teaching hospital, in training undergraduate and postgraduate medical students and nurses.	Hospital care income increased by 18 percent to Rs. 3,332 million in 2022 compared to Rs. 2,815 million in 2021. However, SJGH recorded a loss of Rs. 2,033 million for the year 2022 despite the budgetary support of Rs. 2,280 million.	SJGH should consider to increase OPD facilities and laboratory facilities with modern technology. SJGH needs to enhance reputable brand by providing the best international quality care to patients, enabling SJGH to compete with the private sector.
Media			
Independent Television Network (ITN)	ITN group is the pioneer television station in Sri Lanka which broadcasts and produces a variety of programs in Sinhala, Tamil and English languages including news, teledramas, documentaries, educational programmes, children entertainment programmes, reality TV, religious programmes etc. via ITN, Vasantham TV, ITN FM and Vasantham FM.	Revenue for the year 2022 slightly increased to Rs. 1,536 million. Programme expenses increased by 15 percent and marketing expenses increased by 11 percent in 2022 to Rs. 579 million and to Rs. 97 million respectively. As a result of the above, the net loss has increased by 7.8 percent to Rs. 370 million in 2022.	ITN should implement strategies to improve the quality of their programmes to attract more viewers and improve its ratings. ITN should implement strategies identified on their Business Plan effectively in order to reach at least to breakeven point.
Sri Lanka Rupavahini Corporation (SLRC)	Produce and broadcast informative, educational and entertaining programmes via the channels namely Rupavahini, channel Eye and Nethra TV.	Revenue decreased by 12 percent to Rs. 1,320 million in the year 2022 in compared to 2021. Distribution cost decreased by 45 percent to Rs. 69 million in 2022. Net loss of Rs. 227 million recorded in 2021 increased to Rs. 541 million in 2022 by 138 percent. During 2022, Rs. 25 million budgetary support given by the General Treasury to cover the recurrent expenses. In 2021, Rs.362 million given for recurrent expenses.	SLRC should adopt strategies to improve the quality of their programmes and to expand the coverage and improve its ratings. SLRC should implement strategies which are identified in their Business Plan effectively in order to reach the breakeven point.

Table 8.33 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
Sri Lanka Broadcasting Corporation (SLBC)	As the oldest radio station in Sri Lanka, SLBC engages in broadcasting activities through 6 National channels, (Sinhala National Service, Tamil National Service, Commercial Service, City FM, Thendral Service, English Service); 6 Regional channels (Raja Rata FM, Ruhunu FM, Kandurata FM, Pierei FM, Yal FM, Wayabha Service) and 1 community radio channels (Dambhana) with a view to providing its service as the pioneer radio broadcasting network in Sri Lanka.	Revenue increased by 7.5 percent to Rs. 1,046 million and administration expenses reduced by 6.2 percent to Rs. 3,545 million in 2022 compared to the previous year. SLBC has recorded a net loss Rs. 236 million in 2022 against the profit of Rs. 11 million recorded in 2021. During 2022, Rs. 40 million in budgetary support was given by the General Treasury. In 2021, Rs. 497.8 million was given to cover the recurrent expenses.	SLBC should adopt strategies to improve the quality of their programmes and to expand the coverage and improve its ratings. SLBC should implement strategies identified on their Business Plan effectively in order to reach at least to breakeven point.
Marketing & Distribution			
Sri Lanka Handicraft Board (SLHB)	SLHB aims to improve the traditional handicraft industry by making gift and souvenir items for both local and international markets. Further, it tries to broaden the production market network of handicraft items by preserving and developing the traditional skills of Sri Lankan craftsmen. Currently, 11 branches are located island-wide trading gifts and souvenir boutiques.	Even though the prevailed socio-political unrest within the country in 2022, SLHB was able to secure the revenue stream. The Board recorded a revenue of Rs. 288 million in 2022 which is a growth of 132 percent compared to the previous year's revenue of Rs. 124 million. However, the Board recorded a loss of Rs. 53 million, an increase of 51 percent from last year's loss of Rs. 35 million due to inflationary pressure.	The Board should plan to expand its geographical footprint by expanding its sales outlets in island-wide tourist destinations focusing on foreign customer base. Similarly, a clear shift towards digital platform and expanding the Board's online presence by enhancing the digital capabilities through e-commerce, social media marketing are essential matters to consider during this period.
State Timber Corporation (STC)	Extracting and purchasing timber and converting them into value-added products. Sale of logs, sawn timber, finished products, and reforestation.	"Revenue decreased by 16 percent to Rs. 4,743 million in 2022 compared to Rs. 5,696 million in 2021. Moreover, net profit decreased by 72 percent to Rs. 315 million in 2022 compared to Rs. 1,136 million in 2021. STC paid a Levy amounting to Rs. 320 million in 2022."	"STC should focus to gain competitive advantage through the infusion of technology is required to ensure sustainability of the entity. Regular training of skilled labour is a key factor of the STC to cater the changing market patterns (Eg. Furniture)"
STC General Trading (STC)	STC engaging with the offering various products such as retail, supplying chemicals and allied products, office supplies, construction materials, agricultural products, motor cycles, machinery & equipment and automotive tire and services ranging from household equipment to industrial machinery products.	STC recorded a significant increase in net profit amounting to Rs. 473 million in 2022 compared to Rs. 60 million profit in 2021. Further, a significant improvement in the sale of chemical & allied products and essential foods was experienced in 2022.	STC has to continue its business improvement strategies while enhancing its product range according to the current requirements.

Table 8.33 | Performance of Other State Owned Enterprises Contd...

Description	Core Activities	Performance	Concerns
State Printing Corporation (SPC)	SPC engages with primarily the printing of school text books, exercise books and lottery tickets.	"Revenue decreased by 49 percent to Rs. 825 million in 2022 from Rs. 1,633 million in 2021. Further, net loss increased by 35 percent to Rs. 380 million in 2022 compared to Rs. 281 million in 2021."	SPC needs to re-engineer its business process to sustain the business.
Hotel Developers Lanka Ltd (HDL)	HDL engages in the hospitality trading business.	HDL recorded a loss of Rs. 633 million in 2022 compared to a Rs. 976 million loss for the previous year mainly due to improvement in the tourism sector.	The Restructuring process with Selandiva Investment Ltd has been halted. However, as per the Cabinet decision directions, HDL is under the broader SOE restructuring program.
Fisheries			
Ceylon Fishery Harbours Corporation (CFHC)	CFHC provides fishing communities with infrastructural facilities and services connected to fishing harbors through its harbors spread around the country.	CFHC recorded a loss of Rs. 37.5 million in 2022 compared to Rs.136.22 million loss accounted in 2021 as a result of increase in revenue and other income by 395 percent and 88 percent respectively.	The current contribution to the GDP needs to be increased by making the best use of the resources in the fishing harbors.
Ceylon Fisheries Corporation (CFC)	CFC specializes in buying fish from fishermen and selling it to the market to keep the price of fish controlled.	CFC recorded a loss of Rs. 42 million in 2022 compared to Rs. 64 million loss in the previous year mainly due to increase in fish sales income in the year under review by 42 percent.	Entire business restructuring is needed in the areas including purchasing, marketing, working capital management, strengthening internal control system, etc. to protect the business viability of CFC.
Fertilizer			
Colombo Commercial Fertilizer Co. Ltd (CCFL)	CCFL primarily involved in importing, blending and marketing fertilizer required for paddy, tea, coconut, rubber and other crops.	Revenue decreased significantly by 94.4 percent from Rs. 770 million in 2021/22 to Rs.42.8 million in 2022/23 resulted due to the shortage of fertilizer created through import restrictions. Similarly, profit has also decreased by 74 percent to Rs. 61 million in 2022/23 from Rs. 234 million in 2021/22.	The two entities play a vital role in order to maintain agricultural productivity which is crucial to maintain the food security in the country. As such collaborative approach is needed to meet the market demand with proper supply chain management strategies.
Ceylon Fertilizer Co. Ltd. (CFC)	Out of two state owned entities, Ceylon Fertilizer Company (CFC), considered as the largest organization engaged in the fertilizer importation, mixing, packing, and distribution in the country.	Revenue decreased significantly by 65.9 percent from Rs. 1,210 million in 2021/22 to Rs. 413 million in 2022/23 mainly due to less supply of fertilizer. However profit after tax has increased to Rs.115 million in 2022/23 from Rs. 0.5 million in 2021/22 mainly due to the interest income.

Public Finance Management

9.1 Overview

The unprecedented economic crisis in the country has compelled the Government to manage and rationalize its public expenditure towards achieving revenue based fiscal consolidation and revamp weak public financial management processes and systems that are partly attributable to the crisis. The need for a robust and all-encompassing Public Financial Management System has been pressing more than ever before to bring in the necessary fiscal discipline in the public finances. Hence, it is important to introduce the new Public Finance Management Act as the overarching piece of legislation of the Government to ensure prudent fiscal discipline over public finances.

The lack of fiscal space engulfed by the inflationary pressures together with the imposition of import restrictions and exchange controls, resulted in most of the public sector capital projects to hold. Also, several measures have been taken to enable the smooth functioning of the government procurement process while ensuring transparency and accountability.

9.2 Revisiting the Public Finance Management Processes

The need for enacting a new Public Finance Management Bill (PFM Bill), covering different aspects of policy formulation related to public finance and filling many of the lacunas in the existing public financial framework while ensuring transparency and accountability in the processes and systems has been a cornerstone of the reform agenda of the Government. Several high-level consultations with the International Monetary Fund (IMF) have been undertaken and a road map has been agreed upon to submit the draft PFM bill to the Parliament towards the end of 2023. The Bill is expected to cover the areas budget formulation and execution, public procurement of fiscal rules, debt management policy, control measures for public expenditure, management asset management and measures for assuring transparency and accountability in the system. Alongside the development of the draft PFM bill, several other related laws, regulations and guidelines have also been initiated towards the latter part of 2023.

9.3 Procurement Management

The economic crisis prompted the Government to take immediate measures to ensure the uninterrupted functioning of Government procurement. These measures were instrumental in ensuring public safety and public health, in particular. Therefore, Health Sector Emergency Procurements Process (HSEPP) was introduced to tackle numerous practical issues that prevailed at that time including forex issues, import restrictions and price escalations etc. The prompt measures have effectively helped ease the shortage of most of the urgent and essential pharmaceuticals, medical equipment and devices.

In addition, due to the depleting foreign currency reserves and depreciation of the Sri Lankan Rupee, the suppliers have become reluctant to enter into contracts with the Government and to complete the contracts as per the contract agreements. Considering the situation, the Government established a Price Variation Committee in the General Treasury, limited to the goods and services in order to provide uninterrupted service to the general public. Further, a circular was issued regarding the grading system of the Construction Industry Development Authority (CIDA) to facilitate a level-playing field for the contractors.

Also, new Guidelines for the Procurement of Pharmaceuticals and Medical Devices of a Consumable Nature – 2022 were issued to facilitate the procurement of Pharmaceuticals and a limited range of medical devices of a consumable nature using a transparent, expeditious and efficient process that ensures value for money and fair dealing with the approval of the Cabinet of Ministers.

9.4 Electronic Government Procurement (e-GP)

Several measures have been taken during 2022 to broaden the application of e-GP System by Government entities. This system covers procurement steps from 'Invitation to Quotations' up to 'Quotation Opening' under Shopping Procedure. As of January 12, 2023, 342 Procuring Entities and 2,944 vendors have registered for the e-GP System and 2,159 e-Procurements have been carried out through the e-GP System.

For the implementation of recommendations issued by the Information and Communication Technology Agency (ICTA) and World Bank, the e-GP Secretariat has re-designed the development methodologies, technology and architecture of the e GP system. In order to accommodate these enhancements, the e-GP Secretariat has prepared an Addendum to the Original Contract for Design, Develop, Implementation and Maintenance of Electronic Government Procurement (e GP) system.

Accordingly, the Cabinet of Ministers has approved the signing of an Addendum to the Original Contract for Design, Develop, Implementation and Maintenance of Electronic Government Procurement (e GP) for the e-GP Secretariat, which is to be entered between the Secretary of the Ministry of Finance, Economic Stabilization and National Policies and the Developer of the e-GP System at the revised terms, conditions and contract value in the first quarter of 2023.

Furthermore, the European Union has agreed to provide USD 4 million under the project of Strengthening Public Finance Management and Accountability in Sri Lanka as a grant through the World Bank for the implementation of e-GP system for the period from April 2023 to March 2027. It is further planned to implement the e-GP system in all public institutions on full scale from the year 2026.

9.5 Control over Public Finance

Department of Public Finance has attended 25 meetings summoned by the Parliamentary Committee on Public Accounts (COPA) with the view of overseeing the operation of public institutions in accordance with Article 74 of the Constitution and Parliamentary Standing Order No. 119. Accordingly, officials of the Department of Public Finance participated in COPA meetings to assist them and, inform the relevant institutions to take corrective actions as directed by the COPA regarding the shortcomings in their Public Financial Management.

Upon receiving audit queries and audit reports from the Auditor General regarding the relevant public institutions in 2022, follow-up actions have been taken to inform the respective institutions to take remedial actions on queries made by the Auditor General within the stipulated period of time.

9.6 Financial Regulations and Public Finance Circulars

New public financial measures have been introduced by the Budget Speeches of 2022 and 2023. It has been decided to reduce the telephone cost of public institutions by 25 percent under the Expenditure Management Proposal in terms of Budget Proposal 5.4 in relation to the expenditure control in the year 2022. Accordingly, Table 4.1 in Section 4 of paragraph 4 in the Public Finance Circular No. 01/2020 dated August 28, 2020 under "Provision of Communication Facilities to Public Officers and Settlement of Bills" was amended and a new Public Finance Circular No. 01/2020 (i) was issued on January 12, 2022.

Further, the Public Finance Circular 01/2020 (ii) dated December 20, 2022 was issued as an amendment to paragraph 05 of part II of the existing Public Finance Circular No. 01/2020 dated August 28, 2020 based on the Proposal No. 35.1 of the Budget 2023.

9.7 Management of Statutory Funds and Trust Funds

The preparation of the Annual Budget, Financial Statements, and Performance Reports of Funds is conducted in conformity with Guidelines 04 and 05 of the Public Finance Circular No. 01/2020 dated August 28, 2020, which has introduced formats related to the preparation and submission of Financial Statements and Annual Reports of Statutory Funds and Trust Funds. Accordingly, in co-ordination with the Line Ministries, the monitoring and evaluation of the Funds have been carried out and follow-up actions have been taken regarding the audit queries and audit reports issued by the Auditor General on the Funds.

Table 9.1 | The Circulars issued by the Department of Public Finance

Circular	Description
Public Finance Circular 01/2020 (i) Date of issue : January 12, 2022 Provision of communication facilities for the public officers and settlement of bills	To reduce the telephone expenses of government institutions by 25 percent with the purpose of reducing the recurrent expenditure as proposed by Proposal 5.4 of Budget 2022
Public Finance Circular 01/2020 (ii) Date of issue : December 20, 2022 Amendment to the fees charged by the government Institutions for the service delivery	To increase fees and charges by 20 percent with effect from 2023 with the purpose of increasing non-tax revenue as proposed by Proposal 35.1 of Budget 2023
Public Finance Circular No. 01/2023 Dated January 13, 2023 – Guidelines for Procurement of Pharmaceuticals and Medical Devices of a Consumable Nature – 2022	To issue Guidelines for Procurement of Pharmaceuticals and Medical Devices of a Consumable Nature – 2022 by replacing previous Guidelines for the Procurement of Pharmaceuticals and Medical Devices – 2006 issued by the NPA Circular No. 10 dated 01st March 2007. These Guidelines came into force effective from February 01, 2023.
Public Finance Circular No. 04/2016(iv) Dated February 09, 2023 – Procurement of Works up to Rs. 50 million from Regional Contractor under Domestic Funds	To amend table under the paragraph 3.3 of the Public Finance Circular No. 04/2016 (iii), dated 18.02.2021, taking into consideration the economic situation in the country. This amendment will be in effect until 31st December 2023.

Box 9.1 | A Snapshot of the management of Non- Financial Assets of the Government

The Non-Financial Assets of the Government frequently lack proper maintenance. There has been inadequate record-keeping of these assets and ownership issues have also been a concern. To enhance the efficient management of these assets, the Comptroller General's Office initiated efforts to collect comprehensive information regarding vehicles, structures, buildings, lands, furniture & office equipment and plant & machinery, by issuing the Assets Management Circular No. 01/2017.

Vehicles: As of December 31, 2021, the Public Sector Institutions owned 84,247 motor vehicles, of which 77,678 were in running condition. Since mid 2019, the government suspended purchasing of new motor vehicles, except for utility vehicles required for development activities and other essential purposes and also the vehicles imported for the use of Sri Lanka Police. Accordingly, the existing motor vehicle fleet was managed to meet the government's requirements, thereby incurring no additional costs. However, as of August 31, 2020, there were 5,430 vehicles to be repaired and 4,073 vehicles to be disposed. To address this issue, Assets Management Circulars No. 05/2020 and 04/2022 were issued, and accordingly as of May 15, 2023, 2,241 vehicles were repaired and added to the running vehicle fleet which cost Rs. 915 million, while 1,742 vehicles were disposed of, generating revenue of Rs. 634 million. Moreover, the ownership issues of 284 vehicles were resolved as per the directives of Assets Management Circulars No. 02/2017 and 03/2018.

Total	57,179,272	2,880,758	60,060,030	785,200	11,588,009,510	1,691,881	9,313,787,745

Note: This information does not include information of garages, quarters, circuit bungalows, rest houses and other such non – residential buildings

Disposal of Scrap Materials: As per the instructions issued by the Assets Management Circular No. 10/2022, as of December 15, 2022, Rs. 54.4 million was earned from disposal of Scrap Materials.

Disposal of Scrap Materials (as of December 15, 2022)

Description	Identified quantity (Mt)	Disposed quantity (Mt)	Sales income (Rs. Mn.)
Iron or Steel	2,832	116	12.1
Other Metal	299	40	11.7
Other Scrap	-	-	30.6

Revenue from Sale of Non-Financial Assets: Sales of Non-Financial Assets revenue increased to Rs. 584.2 million in 2022 compared to Rs. 188.4 million in 2021, following the efforts made for disposal of vehicles not in running condition and scrap materials.

Sale of Non-Financial Assets Revenue (Rs. Million)

Non-Financial	2020	2021	2022
Sale of Non-Financial Assets – vehicles	201	128.3	226.4
Sale of Non-Financial Assets – Other	56	60.1	357.8
Total	257	188.4	584.2

Valuation of Non-Financial Assets: A guideline for valuation of non-financial assets of the government was introduced by issuing the Assets Management Circulars No. 04/2018, No. 02/2019 and 05/2021.

Online system for Non- Financial Assets Management: An integrated online software system is also being designed and developed to establish a centralized database of Non-Financial assets of the government, to facilitate more effective allocation and use of these resources.

10

Human Resource Management

10.1 Human resource management in the public sector

In 2022, the Government maintained a consistent public service delivery amidst the economic crisis and political upheaval including trade union actions, protests and public anxiety. The crisis has also provided a platform to take much-needed and much-neglected reform in human resource management in the public sector. As such, the Government has taken bold and far-sighted actions to maneuver the expenditure on salary and wages on a sustainable path while achieving the optimum cadre for the public sector.

The expenditure rationalization has been a catalyst in the fiscal consolidation process of the Government. As such, several measures were taken to curtail the non-essential public expenditure other than paying salaries, pensions, social welfare and debt servicing. New recruitments to the public sector were halted during the year and essential cadre recruitments were done through a special committee chaired by the Secretary to the Prime Minister. The Government presented two major proposals to minimize the size of the public sector. As such, the Public Administration Circular No. 14/2022 and Public Enterprises

Circular No. 05/2022 were issued to grant five year no pay leave for public officers to travel abroad and to engage in employment in a foreign country or within Sri Lanka. Further, in 2022, the Government decided to make the compulsory retirement age of public servants 60 years in order to attract youth into the sector.

Expenditure on salaries and wages together with the payment for pensions accounted for more than half of the government revenue. Such expenditure on salaries and wages, in nominal terms, increased by 13.1 Percent to Rs. 956.2 billion in 2022 from Rs. 845.7 billion in 2021 to manage for about 1.39 million public servants. The pension bill increased by nearly 15 percent to Rs. 309.1 billion in 2022 from Rs. 269.8 billion in 2021. The total salaries and wages including pension payments amounted about 5.2 percent of GDP in 2022 compared to 6.3 percent of GDP in 2021. Therefore, maintaining such a large public service relative to the total population of the country has become a foremost issue in public finance management due to the limited fiscal space engulfed with the economic crisis. This has warranted an efficient management of human resources in the public sector, among others.

Act – Actual Number of Employees

10.2 Cadre Management in 2022

At the end of 2022, the total number of deployed employees in the public sector was 1,393,883, a slight drop of 0.53 percent compared to 2021. This drop was due to the suspension of new recruitments, reduction of new cadre positions, and retirements. The cadre utilization rate against the total number of approved cadre positions remained at 81 percent at the end of 2022, a 1 percent decline compared to 2021. The decline in cadre utilization was mainly due to the restrictions imposed on public expenditure curtailment by the Government.

Figure 10.1 | Total cadre of Public Sector (2014–2022)

Table 10.2 | Public Sector Cadre Utilization – 2022

Institutional Category	Approved Cadre	Existing Cadre	Rate of utilization of the approved Cadre
Ministries, Departments and Special Spending Units, Tri-Forces	1,018,019	783,238	77%
Provincial Councils	441,748	398,528	90%
State Owned Enterprises	255,650	212,117	83%
Total	1,715,417	1,393,883	81%

Source: Department of Management Services

10.3 Distribution of Public Service Cadre by Service Level (excluding Tri-forces and SOEs)

As per the classification based on the Public Administration Circular No. 06/2006, public service is provided under four main levels of staff comprising senior, tertiary, secondary and primary. These service levels include professions related to unskilled, skilled professional, managerial and administrative employment categories.

Figure 10.2 | Distribution of Public Service Cadre (Approved Cadre excluding Tri-forces and SOEs)

Source: Department of Management Services

The analysis of the service level distribution of the public sector cadre reveals that the dominance of the secondary service level employees further continued at the rate of 58 percent in 2022. This sector mainly consists of Teachers, Development Officers and Health Workers. The distribution of the public sector employment category has significantly departed from the traditional pyramid shape of employment category within the institutions due to the excessive growth of the secondary level. The large size of uneven distribution of the above category with disproportionate supervisory level has caused widespread underutilization of the middle level workforce in the government sector. Addressing the issue, a policy decision was taken to recruit suitable personnel for the educational sector among the existing development officers in the government service.

Box 10.1 | Optimum Academic Cadre for Education Sector

- Schools**

Ensuring a high quality and technically competent human resource for the education sector, steps were taken in 2022 to create a school based optimum academic cadre based on Education Ministry Circular No. 06/2021 to provide required physical and human resources to the education sector. Approving school based cadre has been identified as necessary for a systematic human resource development aimed at guaranteed continuous education for students. The number of required Teacher cadre positions was computed against the number of students, number of classes and number of subjects in each school, in terms of Circular No. 06/2021. Accordingly, school-based Teacher cadre positions were determined for 396 national schools and 9,644 provincial schools excluding 87 provincial schools.

Table 10.3 | Distribution of National and Provincial Schools in 2022

Type of School		Number of National / Provincial Schools			Total
		Students 0 – 10	Students 11 – 1,000	Students Above 1,000	
National Schools		0	64	332	396
Provincial Schools	Western	2	1,067	200	1,269
	Central	12	1,020	46	1,078
	Southern	9	1,380	71	1,460

Ministry of Education

The new approach would support preventing unnecessary mobilizing of teachers in National and Provincial schools due to informal transfers. Simultaneously, it shares equal opportunities for all schools and leads to develop a proper transfer scheme systematically. The total number of academic cadre positions identified in respect of 2022 terms of Education Circular No. 06/2021 is detailed in Table 10.4.

Table 10.4 | School based Academic Cadre distribution in 2022

Type of School		Number of Schools	Total Students	Academic Cadre in terms of Education Circular No. 06/2021
National Schools		396	1,708,935	44,083
Provincial	Western	1,267	686,828	40,169
	Central	1,451	459,612	35,139
	Southern	1,029	373,440	26,448

- **Pirivenas**

At present, 825 registered Pirivenas established under the provisions of the Pirivena Education Act, No. 64 of 1979 and the Pirivena Regulations No. 01 of 1980, are operating island wide and classified as Mulika Pirivenas (Primary), Maha Pirivenas, Pirivena Vidyayathana, Special Pirivenas, Dwibhasha Pirivenas (Bilingual), and Buddhist Seelamatha Pirivenas. The number of lay and clergy students in these Pirivenas is about 71,427 and the teachers engaged in the teaching process are 7,591. Steps were taken to regularize the 7,500 of Piriven cadre for the first time in 2022 by following the proper evaluation process. The Government has allocated about Rs. 6 billion for Piriven education for the year 2023.

Box 10.2 | Need for reviewing the existing modality of Project Management Units (PMUs)

In accordance with the provisions of Management Services Circular No. 01/2019, Project Management Units (PMUs) have been established under the preview of different line ministries as a modality of implementing foreign and locally funded development projects. These specific units have been created with the purpose of having a designated team which directly and engages full time in specific project activities so that the aforesaid projects can be completed within the given timeline enabling to achieve the expected economic and social project benefits. In addition, PMUs facilitated the need for acquiring people with specialized knowledge and experience regarding specific project activities where required skills were not available within the project implementation agencies.

By the end of the year 2022, there were about 260 mega projects worth Rs. 5.8 trillion being implemented by various line ministries, departments and State-Owned Enterprises (SOEs) with financing from local and foreign resources. Out of the aforesaid 260 mega projects, 133 projects had been implemented through PMUs.¹

However, it was recently noticed that the objectives of establishing Project Management Units have been disoriented with various project related issues. The main concern was the cost of maintaining these PMUs. It became a trend to establish PMUs for each and every project for which sometimes the need for a separate PMU cannot be justifiable where the mandate of a specific project implementing agency is to do such kind of project activities. In addition, delays in project implementation due to inadequate consideration of project preparedness and project readiness criteria also resulted in significant additional projects cost.

These issues have been multiplied by the recent economic constraints faced by the country. As a consequence of the preemptive default declared by the Ministry of Finance on April 12, 2022, funding from bilateral lenders which facilitated many development projects all over the country stalled. Due to the non-disbursement of funding for ongoing project works and uncertainty of future funding, planned activities of many foreign funding projects couldn't be continued and completed. Further, development activities carried out with local funding or through budgetary allocation have also been controlled with strict financial controls over capital and recurrent expenditure.

¹ Report dated November 24, 2022 submitted by the Committee appointed to review POs and PMUs

Box 10.2 | Need for reviewing the existing modality of Project Management Units (PMUs) contd..

The above situation hindered the implementation of development projects that subsequently resulted in the suspension or cancellation of project activities. On the other hand, it raised the question of the necessity of continuing PMUs any further.

Accordingly, a committee was appointed to review the activities of the Project Offices (POs) and Project Management Units (PMUs) that have been established for various purposes as per the directions given by the Budget proposal No. 10.5 of the Interim Budget Speech 2022. The committee submitted recommendations to the Cabinet of Ministers in November 2022. With the approval of the Cabinet of Ministers, said recommendations will be implemented by relevant authorities in the year 2023. Main recommendations include closing down 55 PMU's and suspension of 32 PMU's. Further, Committee recommended rescinding the Management Services Circular No. 01/2019. Accordingly, a new modality that supports project implementation would be prepared and this modality will facilitate in achieving desired project objectives within the prevailing implementation structure of the ministries and especially with a minimum cost to the country.

PART IV

Financial Statements

Financial Statements

Note to Readers

Financial Statements of the Government for the year ended 31st December 2022 comprising the Statement of Financial Performance, Statement of Financial Position, Statement of Cash Flow, Statement of Changes in Net Assets / Equity, applied Accounting Policies and Notes thereto are forwarded herewith.

The Statement of Financial Position shows the assets and liabilities of the Government whereas Statement of Financial Performance shows government's affairs in relation to revenue collection and use of resources as provided by Appropriation Act No. 30 of 10th December 2021 for 2022 as amended by Act No. 21 of 09th September 2022, and Act No. 42 of 30th November 2022, of nineteen (19) Special Spending Units, twenty nine (29) Government Ministries, ninety eight (98) Government Departments and twenty five (25) District Secretariats and the way that fiscal deficit could be financed. Further, in the Financial Statements, it is reflected the financial support provided to fifty (50) Commercial Public Corporations, ninety four (94) Government Owned Companies/ Plantation Companies /US Dollar Denominated Companies, one (01) Development Bank in the form of capital contribution or shareholding and also information relating to allocation of financial resources to nine (09) Provincial Councils by the Government.

As per the provisions provided under the Fiscal Management (Responsibility) Act No. 03 of 2003, Financial Statements should be prepared to reflect financial results and Financial Position of the Democratic Socialist Republic of Sri Lanka. Since these Financial Statements should be prepared in accordance with the Article 149 and 150 of the Constitution of Democratic Socialist Republic of Sri Lanka, in addition, Generally Accepted Accounting Principles could not be followed in all the time. However, in such deviations, reasons for deviation and the relevant alternate accounting policies are disclosed in the Financial Statements.

Modified cash basis accounting method is used to prepare the Financial Statements and actions are taken to include the assets and liabilities generated through the cash basis transactions in the Financial Statements whenever possible. The Computerized Integrated Government Accounting System (CIGAS) has been further developed enabling non-financial assets are recorded in the Financial Statements, starting from the year 2015.

Statement of Responsibility

These Financial Statements have been prepared in keeping with the provisions of the Article 149 and 150 of the Constitution of Democratic Socialist Republic of Sri Lanka, Fiscal Management (Responsibility) Act No 03 of 2003 and National Audit Act No. 19 of 2018. The Financial Statements are in compliance with Generally Accepted Accounting Principles and relevant Treasury Circulars, whereas most appropriate accounting policies are used as disclosed in the Notes to the Financial Statements.

The General Treasury is responsible for establishing and maintaining a system of internal control to provide reasonable assurance that the transactions are effected within statutory authority and use of allocations provided by Appropriation Act or any other Law are properly recorded.

The accompanying "Statement of Accounting Policies" and "Notes to the Financial Statements" form an integral part of these Financial Statements. The designated authority in preparation and presentation of these Financial Statements is Department of State Accounts.

Significant Accounting Policies

Reporting Entity

These Financial Statements of the Government encompass the Reporting Entity of the Government comprising of Government Ministries, Departments, Special Spending Units and District Secretariats. However, Commercial Public Corporations, State Owned Enterprises and Government Owned Companies or other Companies and Statutory Boards, are not covered in these Financial Statements. Cash outflows from Government to those entities taken place during the reporting period and the Government's total interest in the Commercial Public Corporations, State Owned Enterprises and Government owned Companies or other Companies held in the form of equity and loans are taken into consideration. The Revenue and Expenditure of Provincial Councils are not considered as a part of these Financial Statements, since there is no significant control by the Government over the financial and operating activities of Provincial Councils.

The Financial Statements of the Government for the year ended 31 December 2022 were authorized for issue by the Department of State Accounts.

Basis of Preparation

These Financial Statements have been prepared on the historical cost convention in conformity with Generally Accepted Accounting Principles. Historical cost basis has been adopted for measurement while adopting modified cash based accounting for reporting.

The Cash Flow Statement is prepared using the direct method.

All financial information presented in Sri Lankan Rupees has been rounded to the nearest rupee, except where indicated otherwise.

Reporting Period

The reporting period of these Financial Statements is from 1st of January 2022 to 31st December 2022.

Basis of Consolidation

Expenditure incurred and revenue collected under revenue codes specified in the budget classification by respective Ministries and Departments in the form of financial assets, liabilities, revenue and expenditure are reported using same classification codes for preparation of consolidated accounts.

Revenue

The Government provides non-income generating goods, services and benefits to the general public. The revenue is raised by way of taxes, levies, fees and charges imposed under various statutes approved by Parliament to finance the expenditure incurred on provision of such goods, services and benefits. All revenue, so collected through relevant Ministries and Departments are identified and accounted at the time of collection. Investment income is accounted for the period during which such income is actually collected.

Premiums and Discounts

Premiums and discounts on issue of debt instruments are adjusted against the cost of borrowings.

Expenses

All expenses are accounted in the period in which payments have been made.

Foreign Currency Transactions

Foreign Currency Transactions are converted into Sri Lanka Rupees using the exchange rate prevailed on the date of the transaction. Exchange differences arising from the settlement of these transactions are duly accounted through corresponding main ledger accounts.

Investments

Value of the Government's equity investments in State Owned Enterprises is recorded at cost and shown separately in the Financial Statements. However, investments in Statutory Boards are not separately identified and

disclosed since such entities are relying on the Government for their recurrent and capital expenditure requirements similar to those of the other Government Departments.

Borrowings

In the Statement of Financial Position, all local borrowings are recorded at cost. Since foreign borrowings are subject to change in exchange rates, foreign monetary liabilities are converted to Sri Lanka Rupees using exchange rates prevailed at the end of the reporting period. Statement of individual loan details are shown in the Note – 30(I) and 30(II).

Employee Entitlements

Employee entitlements to salaries and wages, pre-retirement leave and other similar benefits have been recorded when they actually accrue to or utilized by the employees. Retired Government employee entitlements for pension payments are also recorded on the same basis.

Contingent Liabilities & Commitments

Contingent Liabilities and Commitments are recorded at the point of contingency or commitment is evident. Rs. 1,292,180,874,993 was recorded in 2022 and Rs. 1,583,335,901,659 was recorded in 2021. (Schedule I)

Comparatives

To ensure consistency with the current period and classification method adopted in making a fair presentation of financial information, comparative figures have been restated where appropriate.

Bank Balance

The Bank Balance comprises of all favorable and unfavorable cash book balances for the bank accounts operated in the name of the Deputy Secretary to the Treasury, sum of unsettled imprest balances of Ministries and Departments which are treated as cash in transit and Rupee equivalent amount of all foreign currency bank accounts balances as at end of the reporting period. When there is an Over Draft, it is considered for the Borrowing Limit of the respective year.

Non-Financial Assets

All non-financial assets i.e. Property, Plant and Equipment is recognized at cost or grant value. The cost includes expenditure that is directly attributable to the acquisition of the items.

In a situation, where an assets is acquired in a non-exchange transaction on free of charge or nominal consideration, the asset is initially measured at its grant value or cost. The corresponding credit is recognized as income in the statements of Financial Performance unless there are conditions on the assets' use.

Capital work in progress includes cost of buildings under development as at the Balance Sheet date.

The Government derecognizes items of Property, Plant and Equipment upon disposal. The sales proceeds received upon disposal of non-financial assets is recognized as revenue.

Leases

The Government as a lessee, finance lease are leases that transfer substantially all the risk and benefits incidental to ownership of the leased asset to the Government. Assets held under a finance lease are capitalized at the commencement of the lease at the value of the leased asset. The Government also recognizes the associated lease liability at the inception of the lease.

Operating leases are leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item to the Government. Operating lease made during the year are recognized as an operating expense in the Financial Performance Statement on cash basis over the lease term.

Intangible Assets

Intangible assets which are acquired separately are initially recognized at cost. The cost of intangible assets acquired in a non-exchange transaction is considered at their cost or grant value at the date of exchange and subsequently such intangible assets are carried at cost.

Advances

Advances consist of advances to Public Officers of the Government and provincial councils and to Government Departments through the treasury authorized advance account which is recognized on cash basis.

Sundry Accounts

Sundry Accounts consist of main ledger accounts operated for special purposes.

Advances from the Central Bank

Advances from the Central Bank are consist of advances held by the Government under the Monetary Law Act.

Explanatory Notes

Note 16 – Statement of Non-Current Assets

As stated in the Statement of Financial Position as at 31st December 2022, 18 Special Spending Units, 29 Government Ministries, 95 Departments and 25 District Secretariats have reported non-financial assets at cost or revalued amount amounting to Rs. 2,093,287,997,715.84. Balance part of the non-financial assets of the above mentioned institutes if any, and other Ministries / Departments which have not yet been recorded the non-financial assets will also be bringing to the same system gradually, to be completed by 2023.

Note 30(II) – Foreign Loan Balances (8343)

Foreign loans are included the loans outstanding as at 31.12.2022 which were recorded in the CS-DRMS cutoff date 18.01.2023.

Schedule IV – Total Revenue and Expenditure of Provincial Councils

Total Revenue of Rs. 69,987,296,980 and Total Expenditure of Rs. 355,442,370,463 were reported in respect of 9 Provincial Councils (Provisional figures) during the financial year.

Adopt New Accounting Policies

Previously adopted accounting method on reporting Treasury Bonds was revised from the year 2016. From 2016 and onward Treasury Bonds are recorded on their face value, and required adjustments have been done accordingly. Adjustments were made in the year 2022 for accounting of accumulated discount value of the Treasury bonds issued prior to 2016.

Defunct Institutions

Institutions namely Common Wealth Games Hambanthota (Pvt) Limited, Lanka Cement Limited, Lanka Fabrics Limited, Mihin Lanka (Pvt) Limited, Sri Lanka Cement Corporation, State Resource Management Corporation Limited and State Trading Corporative Wholesale Company Limited are in the process of winding up. Hence once the winding up process are completed, Treasury Books will be adjusted accordingly.

Nature and Purpose of Reserves

The Government creates and maintains reserves in terms of specific local requirements.

Consolidated Fund

The funds of the Republic not allocated by law to specific purposes form the Consolidated Fund into which shall be paid the produce of all taxes, imposts, rates and duties and all other revenues and receipts of the Republic not allocated to specific purposes.

Contingency Fund

A Fund Created by Parliament by law for the purpose of providing for urgent and unforeseen expenditure.

Foreign Loan Revolving Funds

Funds created for recording loan receipts and reimbursements for expenditure incurred.

Public Service Provident Fund Account

A Fund established to afford Provident Fund benefits to those public servants who are not pensionable.

Teachers Widows Orphans Pension Fund

A fund established for the payment of pension to widowers and orphans of teachers who are entitled to the payment of pension under the Minutes of pension.

Secretary

Ministry of Finance, Economic Stabilization and National Policies

Report of the Auditor General on the Financial Statement of the Government for the year ended 31 December 2022 in terms of Sections 11(1) and 15(1) of the National Audit Act, No.19 of 2018

1. Financial Statements

1.1 Qualified Opinion

The audit of financial statements of the Government for the year ended 31 December 2022 comprising the statement of financial position of the Government as at 31 December 2022 and the statement of financial performance, statement of changes in net assets/equity and cash flow statement for the year then ended and notes to the financial statements including a summary of significant accounting policies was carried out under my direction in pursuance of provisions in Article 154(3) of the Constitution of the Democratic Socialist Republic of Sri Lanka read in conjunction with provisions in Section 15 of the National Audit Act, No. 19 of 2018. The annual detailed management audit report will be issued to the Chief Accounting Officer in terms of Section 11(2) of the National Audit Act, No. 19 of 2018. My report to Parliament in pursuance of provisions in Article 154(6) of the Constitution of the Democratic Socialist Republic of Sri Lanka read in conjunction with Section 10 of the National Audit Act, No. 19 of 2018 will be tabled in due course.

In my opinion, except for the effects of the matters described in the Basis for Qualified Audit Opinion Paragraph in this report, the accompanying financial statements of the Government give a true and fair view of the financial position of the Government as at 31 December 2022 and its financial performance and cash flows for the year then ended in accordance with Generally Accepted Accounting Principles.

1.2 Basis for Qualified Opinion

The following observations are made.

1.2.1 Accounting Deficiencies on the Preparation and Presentation of the Financial Statements of the Government

The following observations are made.

- (a) There was no direct relationship between the statement of financial performance and the statement of financial position included in the financial statements of the Government. That is, the statement of financial performance reflected only the actual position of the budget relating to the year under review and of them, deficits or surpluses relating to the year had not been computed and adjusted to the statement of financial position. Accordingly, the statement of financial performance and the statement of financial position were in contrast.
- (b) Even though a debit value of Rs.22,477,362,524,574 had been indicated as the total of statutory and other funds in the statement of financial position, only a credit value of Rs.149,436,599,992 had been indicated in the statement of changes in equity. The debit balance of Rs.22,626,799,124,566 of the Net Assets Adjustments Account which has a direct significant impact on the equity, had not been indicated in the statement of changes in equity.
- (c) Assets and liabilities included in the statement of financial position had not been classified as current and non-current. As such, the users of financial statements and interested parties were unable to get a clear view of the amount of external liabilities payable by the Government during the ensuing year.
- (d) According to the statement of financial position, the value of total external liabilities amounted to Rs.27,281,161,967,904. However, the value of total assets amounted to only Rs.4,803,799,443,330 in relation to the said value. As such, the total external liabilities exceeded the total assets by Rs.22,477,362,524,574.
- (e) Provision for depreciation had not been made according to the Prudence Accounting Concept by systematically allocating the depreciable value for non-financial assets totalling Rs.775,918 million throughout their useful life except for lands, work-in-

progress in the financial statements of the Government. Moreover, assets should be periodically reviewed so as to reflect the fair value. However, action had not been taken accordingly. As such, the opportunity of getting a specific understanding of the carrying amount obtained after deducting accumulated depreciation and accumulated impairment losses of these assets, if any, had been lost by the users of these financial statements.

- (f) A sum of Rs.33,405,049,463 was included as grants in the cash flow generated from financial activities in the cash flow statement included in the financial statements of the Government. Nevertheless, the said value comprised receipts of materials and equipment valued at Rs.19,487,743,093 as grants without cash inflow.
- (g) A balance of domestic and term loans amounting to Rs.45,000,000,000 had been converted to treasury bills in the year under review and no cash flow whatsoever was generated therefrom. However, it had been indicated under financial activities, considering as a cash inflow generated during the year under review. Moreover, this value had been included in domestic borrowings under budget financing in the statement of financial performance and net changes in domestic borrowings and deposits and liabilities.
- (h) The value of net changes in deposits and other liabilities included in the cash flow generated from financial activities in the cash flow statement of the year 2020, had been separately indicated in each relevant cash flow from the year 2021. Accordingly, the cash flows included in those values were included in the Consolidated Fund and as such, action had been taken to adjust the net changes in values of deposits and other liabilities to the Consolidated Fund as a total. Therefore, recording an elimination of Rs.294,583,038,486 from the Consolidated Fund as net changes in deposits and liabilities in the year under review was observed in Audit as conflict to the Article 150(1) of the Constitution of the Democratic Socialist Republic of Sri Lanka.
- (i) A sum of Rs.1,022,280,600 recoverable as at 31 December 2022 to the Department of Treasury Operations from the Fuel Price Stabilization Fund, had been indicated as a negative value under a liability in the statement of financial position of the

financial statements of the Government for the year 2022 and erroneously indicated by naming as the Fuel Price Stabilization Account under miscellaneous accounts.

- (j) According to the financial statements of the Government, the value transferred in the year under review to the Government from the profit of the Central Bank of Sri Lanka was Rs.30,007,245,202 and according to the financial statements of the Central Bank of Sri Lanka, the said value was Rs.31,035,788,000. As such, a difference of Rs.1,028,542,798 was observed.
- (k) In the comparison of Government recurrent grants and capital grants provided to public enterprises with the values included in the financial statements of relevant institutions, the net value had been understated in the financial statements of the Government by Rs.38.5 million and Rs.16.52 million respectively.

1.2.2 Foreign Borrowings

The following observations are made.

- (a) According to the information made available to the Audit, the value of foreign borrowings realized in the year 2022 and the year 2021 or prior to that but unaccounted even by the end of the year 2022, were Rs.10,665.4 million and Rs.3.6 million respectively. However, according to computations of the Audit which was based on the information provided by the Treasury Operations Department and the foreign exchange rates as at the ending date of the year under review, the total value of foreign borrowings not so accounted was Rs.11,700.6 million as at 31 December 2022. Accordingly, a difference of Rs.1,031.5 million was observed. Therefore, as disbursed unaccounted loan balances remained in the year under review as well as in prior years were observed. Moreover, if any expenditure was incurred using unaccounted foreign borrowings. It was further observed that the said expenditure could remain excluded in the financial statements of the year under review.
- (b) Disbursements of Rs.17,305.2 million had been accounted in the year under review relating to 21 types of loans maintained outside the statement of financial position which were realized in the year 2021 or prior years and no disclosures whatsoever had been made thereon in the financial statements of the Government. Accordingly,

it was further observed that even though it was disbursed during the relevant year, contrary to the periodic Accountong concept certain foreign borrowings had not been accounted continuously.

- (c) According to Note No.30 (11) to the financial statements of the Government of the year under review, the opening balance of Loan No.2001042 had been indicated as Euro 5,644,462 without any disbursements or repayments in the year under review and the said loan balance had been indicated as Euro 6,702,014 as at 31 December 2022.
- (d) The loan amount of Rs.589 million remained unaccounted as at 31 December 2021 as per Report 854-1 relating to the loan agreement bearing No.2021007 under contractual commitments entered into by the Government in the year 2021, had been accounted, considering in the year 2022 as a realization in the current year and no disclosures thereon had been made in the financial statements. As such, it was observed that actual realizations during the year under review were not completely reflected by Notes No.11 and 30 (II) to the financial statements of the Government.
- (e) Loan balances amounting to Rs.518,293 million relating to 08 types of loans maintained completely outside the statement of financial position of the financial statements of the Government, had been accounted in the year under review. No disclosures whatsoever had been made thereon in the financial statements of the Government and the balances of the relevant 08 types of loans had been directly indicated in the closing balances of Note No.30 (II). Furthermore,
 - (i). Even though it is the normal practice of the Government to account the borrowings through the Consolidated Fund, the aforesaid 08 types of loans could not be accounted through the Consolidated Fund. Nevertheless, the loan instalments relating to these 08 types of loans had been paid through the Consolidated Fund.
 - (ii). It was observed that no expenditure whatsoever incurred by obtaining these 08 types of loans, had been accounted as expenditure in the financial statements of the Government during the period of obtaining the loan or during any other

period. Moreover, no asset whatsoever acquired by obtaining this loan, had been accounted in the financial statements of the Government.

- (f) Two different currency units had been used in the financial statements of the Government for two loan agreements in the preceding year. As such, the relevant loan balances had changed by Rs.340 million and Rs.285 million according to 854-1 Report of CS-DRMS system. Even though only the loan currency unit had been changed in the year under review in the opening balances relating to those two types of loans, the opening balances had not been rectified. As such, the relevant changes had been absorbed into the currency loss arisen in the year under review due to those loans. Therefore, differences were observed between currency losses by the said values according to financial statements of the Government and 854-1 Report of CS-DRMS system.
- (g) Even though a sum of EUR 500,000 had been received in the year under review relating to Loan No.2019010, the value thereof amounted to Rs.114,180,500 according to the 854-1 Report of CS-DRMS system while it was Rs.148,497,550 according to financial statements of the Government. As such, the loan value had been overstated by Rs.34,317,050 in the financial statements.
- (h) Even though the opening loan balance should be equal to the closing loan balance after adding the realizations during the year under review and deducting loan payments during the year under review in terms of the foreign currency unit included in Note No. 30(II) of the Financial Statement of the Government, a difference of Rs.1,327,324,971 related to 12 unequal loan agreements was observed.
- (i) When comparing the Foreign Currency Banking Unit Loan (Project) Balances presented in Note No. 30(I) of the Financial Statement of the Government with the 854-1 Report of CS-DRMS system, a difference of Rs.94,064,888 had been observed in the opening balances as at 01 January 2022 related to two loan agreements, and a difference of USD 454,444 had been observed in relation to the loan agreement number 2018034 when loan repayments are made. Further, even though an amount of Rs. 2,978,950 in relation to loan agreement No. 2016002 had

been adjusted to the Parity/Adjustments column, no disclosure had been made in the financial statements.

- (j) Even though the exchange loss of Rs. 5,232,909 million occurred in the conversion of foreign loan as at 31 December 2022 into local currency should be adjusted to the Financial Performance Statement, that value had been adjusted to the Net Assets Adjustment account. Furthermore, an exchange loss of the preceding year amounted to Rs. 363,647 million and it was Rs.5,232,909 million in the year under review, thus observing an increase of 1339 per cent in the year under review as compared with the preceding year.
- (k) Even though the value of loan repayments during the year under review was Rs.348,629 million though as per the Notes No. 30(ii), (iii) and (iv) to the Financial statement relating to foreign loans, a difference of Rs.9,874 million was observed since it was Rs. 358,504 million according to the Financial Performance Statement. Further, it was observed that the value is 369,825 million according to the 854-1 report of CS-DRMS system.
- (l) Even though information related to domestic loan repayments had been disclosed in a note in the Financial Performance Statement, no such note had been presented with the financial statements in relation to the foreign loan repayment value of Rs. 358,504 million paid in the year 2022.
- (m) When loan balance confirmations sent by the doners are compared with the Financial Statement of the Government and computerized debt management system 854-1 report, loan balances related to 07 and 37 loan categories had been overstated and understated by Rs.7,607,493,758 and Rs.13,082,627,225 respectively in Financial Statement of the Government.
- (n) When examining the loan balance confirmations received from the lending institutions, Euro 82,158 as Commitment Fee due, Euro 31,571 as Delay Interest, Euro 194,391 as Fees Overdue had been stated in certain loan balance confirmation letter.

- (o) Considering the disbursement period, it was observed that even though the disbursed foreign loans related to the year 2022 were included in the computerized debt management system 814-1 report printed on 02 May 2023, it was not included in the said report printed on 20 January 2023. Accordingly, the net worth of foreign loan amounting to Rs.27,392 million had also not been accounted for as disbursed loan in the Financial Statement of the Government. Further, among those loan balances, it was also observed the instances where loan disbursements in the said report printed on 02 May 2023 were less than the said report printed on 20 January 2023.
- (p) When analyzing the reports of the computerized CS-DRMS System operated by the Department of External Resources for the management of foreign debt, the following deficiencies were observed.
- (i) Even though the balances as at 31 December 2021 for loan numbers 2021008 and 2021016 had not been recorded according to the CS-DRMS 2000+Report 854-1 obtained in the year 2021, the following opening balances as at 01 January 2022 were observed in the reports obtained as at 31 December 2022.

Loan Number	Loan currency	Loan amount	Amount Rs.
-----	-----	-----	-----
2021008	USD	392,385	78,647,303
2021016	USD	12,500	2,505,423

Similarly, there were no opening balances for the above two types of loans as at 01 January 2022 according to the Financial Statement of the Government, and the following amounts had been accounted for as realized during the year under review. Accordingly, it was not clear in which year these loans had been realized.

Loan Number	Loan currency	Amount of Realized loan	Amount Rs.
-----	-----	-----	-----
2021008	USD	392,385	78,280,893
2021016	USD	472,500	168,106,589

- (ii) The loan balance related to loan number 2002054 was only EUR 11 or Rs. 2,495 as at 01 January 2022, and the loan balance related to this loan without any realization during the year under review was EUR 4373 or Rs. 1,692,045 as at 31 December 2022.
- (iii) Negative loan balances totaling Rs.1,803,456 in respect of two loan agreements had been observed in the Financial Statement of the Government and 854-1 report of CS-DRMS system.
- (iv) Negative loan disbursements totalling Rs.24,945,542 related to two loan agreements had been observed only in the Financial Statement of the Government, and according to the 854-1 report of CS-DRMS system, difference totalling Rs. 1,936,975,642 was observed between the Closing balances of the Previous year and the Opening Balances of the year under review.

Accordingly, it could not be satisfied through the debt management computerized system regarding the accuracy of the foreign loan balance remained as at any specific date.

1.2.3 Non-financial assets

The following observations are made.

- (a) Even though the total value of non-financial assets as at 31 December 2021 was Rs. 1,850,007 million according to the Financial Statement of the Government for the year 2021, the value as at 01 January 2022 was stated as Rs. 1,802,121 million according to the Financial Statement of the Government for the year 2022. Accordingly, the opening balance of non-financial assets for the year under review was understated by Rs.47,886 million.
- (b) The balance of non-financial assets of certain institutions, out of 84 institutions selected on sample basis, was Rs. 38,245 million and according to the ACA-6 form of the financial statements of those institutions, the balance was Rs. 21,382 million. Therefore, the value of non-financial assets as at 31 December 2022 was overstated by Rs.16,863 million in the Financial Statement of the Government.

- (c) The balance of non-financial assets of certain institutions, out of 84 institutions selected on sample basis, was Rs. 6,277 million, and according to the ACA-6 format of the financial statements of those institutions, the balance was Rs. 7,829 million. Therefore, the value of non-financial assets in the Financial Statement of the Government as at 31 December 2022 was understated by Rs. 1,552 million.
- (d) A difference of Rs.344 million was observed between the building value assessed and adjusted to opening balances during the year under review in the ACA-6 form for the year 2022 of 2 institutions which was selected on sample basis and the values contained in the valuation reports submitted for audit by the Valuation Department.

1.2.4 Rent and Work Advances

Even though the opening (31 December 2021) rent and work advance balance of Head 290 - Fisheries and Aquatic Resources Department and Head 247 - Sri Lanka Customs Department are stated as Rs.8,518,925 and Rs. 780,000 respectively according to Financial Statement of the Government, the opening balances of the rent and work advance account were not recorded in the financial statements in the year 2022 of those departments.

1.2.5 Capital Contribution

The following observations are made.

- (a) According to the direct balance confirmations submitted by 13 public corporations and shareholding public enterprises and public companies, the capital contribution of those entities as at 31 December 2022 was Rs.985,745 million, and according to the financial statements of the Government, the balance was Rs. 149,875 million. Therefore, the capital contribution in the financial statements of the Government as at 31 December 2022 had been understated by Rs. 835,870 million.
- (b) Differences were observed between the direct balance confirmations submitted as at 31 December 2022 and the financial statements of the Government in relation to the number of shares owned by the government in respect of 07 institutions.

Accordingly, the capital contribution of the Government as at 31 December 2022 had been understated by Rs.1,877 million in the state financial statements.

- (c) Although the value as at 31 December 2022 had been Rs. 5,148 million in the calculation made during the audit according to the number of shares owned by 02 state companies and according to their nominal value, it had been indicated as Rs. 14,556 million in the financial statements of the Government. Accordingly, the capital contribution had been overstated by Rs. 9,408 million as at 31 December 2022 in the financial statements of the Government.
- (d) Although 6,183,946 par value shares worth Rs. 175 million had been issued on 15 December 2022 by offsetting the loan amount of Rs. 175 million, which had been obtained from Lankaputra Development Bank in order to improve Capital Adequacy (Tier 1) of the Regional Development Bank and which had to be paid to the General Treasury, it had not been brought to accounts in the financial statements of the Government as at 31 December 2022.
- (e) The increase in capital contribution of Government-owned enterprises during the year under review was Rs.1,405,204 million according to the financial statements of the Government. A sum of Rs.109,625 million, that is 8 per cent, out of it, consisted of money released from the General Treasury for the payment of the recurrent expenditure of each institution, that is for loan and loan interest payments and salary and remuneration payments.

1.2.6 Foreign Grants

The following observations are made.

- (a) Total foreign grants received during the year under review under Note No. 12 Foreign Grants (Cash Receipts) to the financial statements for the year 2022 had been Rs. 3,218 million and according to the relevant deposit ledger, its total had been Rs. 3,190 million. Out of this difference, foreign grants amounting to Rs.27.7 million had been credited to the Government revenue during the year under review.

- (b) The value of foreign grants, which have been received as foreign grants to the Government of Sri Lanka as at 01 January 2022 and remained idle as at 31 December 2022 without being used for the relevant purpose had been Rs. 34.9 million.
- (c) Although it has been stated that all the transactions related to foreign aid should be carried out by the Director General of the Department of Foreign Resources of the Treasury according to the State Accounts Circular No. 30/94 dated 20 April 1994, foreign grants totaling to Rs.1,837,321,420 had been directly received for 20 projects of other ministries / departments in the year 2022 without making the Treasury aware of that as per the information obtained from an audit test check, and action had not been taken to make provision for those values and to include them in the financial statements.

1.2.7 Non-Disclosures in the Financial Statements

The following observations are made.

- (a) Even though the payments of Rs. 671,569 million as loan installments in relation to 391 loan agreements as at 13 April 2022 to the end of the year under review and Rs. 305,435 as the interest of the loans had been suspended according to the policy decision of temporarily suspending the payment of foreign loans issued by the Ministry of Finance on 12 April 2022, any disclosure had not been made in the financial statements of the Government on that and the relevant policy decision of temporarily suspending the payment of foreign loans.
- (b) Two (02) foreign loans amounting to Rs. 10,200 million, for which contracts had been entered during the year 2022, but not realized, had not been disclosed in the financial statements of the Government.
- (c) The Government's shareholding had not been classified as investment in listed companies in the Colombo Stock Exchange and investment in unlisted companies. Moreover, although the ownership value of companies listed in the Colombo Stock Exchange had been brought to accounts on the basis of its nominal value, their market value as at 31 December 2022 had not been disclosed in the financial statements.

1.2.8 Exceeding Limits

The following observations are made.

- (a) As per the Fiscal Management (Responsibility) (Amendment) Act No. 12 of 2021, the limit for issuance of treasury guarantee had been 15 percent as a percentage of the total GDP for the financial year under review together with the previous two financial years. Accordingly, even though guarantee should be issued within the limit of Rs. 2,826,300 million in relation to the year 2022, action had been taken to issue treasury guarantee up to 2,908,515 million. Accordingly, treasury guarantee amounting to Rs. 82,214 million had been issued exceeding the treasury guarantee limit in the year under review and it was 15.4 percent.
- (b) Instances of not following the limits, approved by the Parliament for advance works under the Third Schedule of the Appropriation Act No. 30 of 2021, of which details are mentioned below, were discovered as per the treasury books. Although the limits should have been revised by submitting them to Parliament by 31 May 2023 according to Section 8(1)(b) of the Act, evidence for verifying that those limits had been revised had not been submitted to audit even by 19 May 2022.
 - (i) Had spent by exceeding the maximum expenditure limit by a total of Rs. 1,070,283 in relation to 03 works of advances to public officers.
 - (ii) Subject No. 31002 - had spent an amount of Rs.196,900,472 by exceeding the maximum expenditure limit of the Work done advance account of the Department of Government Factory by Rs.76,900,472.

I conducted my audit in accordance with Sri Lanka Auditing Standards (SLAuSs). My responsibilities, under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my qualified opinion.

1.3 Responsibilities of Chief Accounting Officer on Financial Statements

The Chief Accounting Officer are responsible for the preparation of financial statements that give a true and fair view in accordance with Generally Accepted Accounting Principles and provisions in Section 38 of the National Audit Act, No.19 of 2018 and for the determination of the internal control that is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. As per Section 16 (1) of the National Audit Act, No.19 of 2018, the Department is required to maintain proper books and records of all its income, expenditure, assets and liabilities to enable the preparation of annual and periodic financial statements.

In terms of Sub-section 38 (1) (c) of the National Audit Act, the Chief Accounting Officer shall ensure that an effective internal control system for the financial control exists in the Department and carry out periodic reviews to monitor the effectiveness of such systems and accordingly make any alterations as required for such systems to be effectively carried out.

1.4 Auditor's Responsibility on Audit of Financial Statements

My objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Sri Lanka Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Sri Lanka Auditing Standards, I exercise professional judgment and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve

collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- An understanding of internal control relevant to the audit was obtained in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Ministry's / Department's / District Secretariat's internal control.
- Evaluate the structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Evaluate the overall presentation, structure and content of the financial statements including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

I communicate with the Chief Accounting Officer/ Accounting Officer regarding, among other matters significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

2. Operational review

2.1. Non-compliance with Laws, Rules and Regulations

Non-compliance with the following laws, rules and regulations was observed.

(a) Article 149 of the Constitution of the Democratic Socialist Republic of Sri Lanka

The Fuel Price Stabilization Fund had been established and maintained on the approval of the Cabinet of Ministers without obtaining the approval of Parliament even by 31 December 2022.

(b) Fiscal Management (Responsibility) Act No. 3 of 2003

- (i) Although the maximum liabilities at the end of a particular year should not exceed 80 percent of the estimated gross domestic product for that year in terms of the Fiscal Management (Responsibility) Act No. 3 of 2003, which had been amended by the Fiscal Management (Responsibility) (Amendment) Act No. 12

of 2021 and the Fiscal Management (Responsibility) (Amendment) Act No. 15 of 2013, that limit had exceeded up to 114.83 percent by 31 December 2022, Details are given below.

Liabilities	Value of Liabilities as at 31 December 2022 *
-----	-----
	Rs. Billion
Overdraft	84
Advances of the Central Bank	235
Public Debt	27,379
Liabilities Not Accounted for in the Financial Statements :	
- Unaccounted Foreign Loans	39
Total Liabilities	27,379
Estimated GDP	23,843
Total Liabilities as a Percentage of the Estimated GDP	114.83

* A sum of Rs. 1,292 billion being the value of letters of comfort and guarantees given to the banks in respect of loans obtained by public enterprises under guarantees of the Treasury, and liabilities amounting to Rs. 106 billion as per the statement of liabilities and commitments presented to the Audit by the Ministries, Departments, and special expenditure units, had not been included in the said liabilities.

- (ii) In terms of Section 3(a) of the Fiscal Management (Responsibility) Act No. 3 of 2003 , “Reduction of government debt to prudent levels, by ensuring that the budget deficit at the end of the year 2006, shall not exceed five per centum of the estimated gross domestic product and to ensure that such levels be maintained thereafter” had been mentioned as an objective underlying responsible fiscal management which need to be adhered to, by the Government in outlining the fiscal strategy of the government. Nevertheless, it was observed that the Ministry of Finance was not able to maintain the estimated budget deficit of the year under review by not exceeding the five per centum of the estimated GDP, and maintain the actual budget deficit below five per centum of the estimated GDP at the end of the year under review. Accordingly, those percentages remained 9.78

per centum and 10.71 per centum of the estimated budget deficit and actual budget deficit respectively in the year under review. Particulars are as follows.

Estimated GDP	Budget Deficit		Estimated Budget Deficit as a Percentage of the Estimated GDP	Actual Budget Deficit as a Percentage of the Estimated GDP
	Estimated	Actual		
-----	-----	-----	-----	-----
Rs Billion	Rs. Billion	Rs. Billion	Per Centum	Per Centum
23,843	2,333	2,554	9.78	10.71

(c) State Accounts Circular No. 243/2015 dated 24 June 2015

It was expected to close the deposit accounts of the Category, 6003 in terms of State Accounts Circular No. 243/2015 dated 24 June 2015, and instructions had been given that such activities be done through the annual estimate with effect from the year 2016. Nevertheless, a balance of Rs. 10 million was being brought forward under the deposit account number, 6003 without being settled even as at 31 December 2022.

(d) Financial Regulations of the Democratic Socialist Republic of Sri Lanka

The following observations are made.

- (i.) Debit balances totalling Rs. 3,893 million relating to 93 imprest accounts, remained unsettled contrary to Financial Regulation 373 as at 31 December 2022. A balance of Rs. 121 million therefrom continued to exist over several years, but no action had been taken even up to 31 December 2022 to settle those balances.
- (ii.) According to Financial Regulation 387, no overdraft facility should be obtained from any state bank. Nevertheless, overdraft facilities had been obtained through the account maintained by the Director General of Pensions at People's Bank on 09 May 2022, and an interest of Rs. 30,925,253 had been paid on the overdraft balance of Rs. 7,727,113,034 existed in the said account as at that date.

03. Management Activities

The following observations are made.

- (a) According to financial statements of the Government, the values of Treasury Bills and Treasury Bonds issued as at 31 December 2022, amounted to Rs. 4,126,383,805,527 and Rs. 8,692,134,561,000 respectively. Of them, the values of Treasury Bills and Treasury Bonds purchased by the Central Bank of Sri Lanka amounted to Rs. 2,575,716,725,527 and 22,461,378,516 respectively. Accordingly, it was observed that 62.42 per centum of the Treasury Bills and 0.26 per centum of the Treasury Bonds issued as at 31 December 2022 had been purchased by the Central Bank of Sri Lanka.
- (b) Following recommendations made by the Negotiation Committee appointed by the Cabinet to look into the demands of the contractor relating to the termination of Light Rail Transit Project, the Cabinet had decided on 22 November 2022 that a sum of USD 2,930,307.48 for the activities executed by OCG-JV Company, an interest of Rs. 3,733,128 relating to the delay in reimbursing the Value Added Tax, along with expenses totalling USD 492,749 on overhead costs including the termination of employment of the employees of OCG-JV Company as the project had been abandoned, be paid to the OCG-JV Company.
- (c) It was mentioned under No. 254 of the budget proposals of the year 2018 that preparation of financial statements be converted into accrual basis of accounting within 10 years from the improved cash basis of accounting being followed at present. Although the Department of State Accounts revised the timeframe of the activities given in the roadmap presented with respect to the said Cabinet approval, a formal approval was not sought thereon. According to the note of the Cabinet, progress of the relevant process should be reported to the Cabinet after a period of one month following the end of each year, but it was not done so even by 19 May 2023. The Audit was informed by the Department of state Accounts that, once a specific policy decision is taken on the said transformation process, approval on the revised roadmap would be sought.

- (d) Action had not been taken even in the year under review to settle the debit balance of Rs. 3,995,094 that had continued to exist over an extensive period as balances of cheques dishonored by banks relating to accounts being maintained by Government Departments.
- (e) A sum of Rs. 191,466,910 had continuously been shown in the financial statements as advances given under Advances to Public Officers to Government officers who had been transferred to Provincial Councils, but action had not been taken even in the year under review to settle the said value.
- (f) A debit balance totalling Rs. 70,959,434 under 08 Government approved Treasury advance accounts and a negative balance totalling Rs. 18,066,465 under 03 advance accounts, had continued to exist over several years without being settled.
- (g) There existed a negative balance of Rs. 455,036,103 in 06 advance accounts relating to 06 Heads as at 31 December 2022.
- (h) Although an opening balance of Rs. 1,221,599,026 existed in the stores and other advances account under Head 111-Ministry of Health, either an age analysis thereon or information in that connection was not made available to the Audit.
- (i) According to Paragraph 07 of the Gazette Extraordinary No. 1550/07 issued by the Ministry of Finance on 22 May 2008, a sum of Rs. USD 60 or an equivalent amount should be charged on every air ticket being sold or issued outside Sri Lanka in respect of flights originating from Sri Lanka irrespective of how the ticket is sold or issued; and, as per Paragraph 08 of the same Gazette, the surcharges so collected, should be credited to the consolidated fund as directed by the Director General of Civil Aviation. Accordingly, the Civil Aviation Authority had collected a sum of Rs. 16,982 million as surcharges during the period from 01 August 2008 to 31 December 2022 , but those funds had not been credited to the consolidated fund. Furthermore, the Director General of the Department of Public Enterprises had been informed along with the letter issued by the Department of Legal Affairs dated 07 April 2017 stating the opinion of the Attorney General's Department being "*this surcharge can be further recoverable, and there exists a legal liability that those surcharges be credited to the consolidated fund*". Nevertheless, no action had

been taken even up to the date of audit by the Department of Public Enterprises to recover the said surcharge from the Civil Aviation Authority.

- (j) According to the schedule of age analysis on Advances to Public Officers presented as at 31 December 2022, there existed a loan balance of Rs. 319 million remaining in arrears over 01-04 years relating to the officers who had either been transferred, deceased, retired, interdicted, permanently released to the Corporations, Boards and Provincial Councils, or who had vacated their services or whose services had been terminated or those belonging to other categories. The balance continued to exist over 05 years, amounted to Rs. 391 million.
- (k) According to financial statements of the Government, an on-lending balance of Rs. 491,552 million remained receivable as at 31 December 2022. Due to failure in settlement as per on-lending agreements relating to the relevant institutions, the value of on-lending installments receivable as at 31 December 2022 from 04 institutions with respect to 05 on-lending agreements, totaled 260,503 million; and, a total of Rs. 778 million therefrom continued to exist over 05 years.
- (l) A sum of Rs. 912 million remained receivable as interest for on-lending as at 31 December 2022. No interest amount whatsoever had been paid to the Treasury by 03 institutions for the year 2022 contrary to the relevant agreement. The value of interest that had not been settled over 05 years, totaled Rs. 616 million.
- (m) An on-lending balance totalling Rs. 318,061 had been provided during the year 2022, and of that, an on-lending balance of Rs. 285,191 million had been provided in the year under review as a new on-lending balance with respect to 06 institutions. The said on-lending balance represented 90 per cent of the total value given in the year under review.
- (n) According to financial statements of the Government, the increase in capital contribution of the enterprises owned by the Government amounted to Rs. 1,405,204 in the year under review. This was observed to have been an effect caused by the fact that 89 per cent of that amount being Rs. 1,246,401 million, was a value adjusted in the balance sheet of the Government of Sri Lanka under the

transfer of liabilities of the Government enterprises identified in accordance with the Cabinet Decision No. අමප/23/0154/604/014 dated 07 February 2023. Particulars are as follows.

No.	Institution	Amount Adjusted in the Balance Sheet of the Government under Identified Liabilities of the Government Enterprises
----	-----	-----
		Rs.
1.	Ceylon Electricity Board	362,307,620,369
2.	Ceylon Petroleum Corporation	884,093,386,477
	Total	1,246,401,006,846

- (o) Foreign grants totalling Rs. 34,740,561 received from 04 donors relating to 05 projects during the year under review had been returned to the relevant donors without being utilized for the intended purpose.

4. Performance

4.1 Revenue Estimation

The Gross Domestic Production in 2022 was Rs. 24,148 billion and it was Rs. 16,809 billion in the year 2021. Accordingly, the Gross Domestic Production had increased by Rs. 7,339 billion or 43.66 per cent compared to the preceding year. As per the original annual budget estimate approved by Parliament for the year 2022, the revenue of the government was Rs. 2,213 billion and as per the interim budget presented in the year 2022, the revenue of the government was Rs. 2,084 billion, while it was Rs. 1,961 billion in the preceding year. Accordingly, the government budget estimate had been prepared by increasing the government revenue by Rs. 252 billion and Rs.123 billion or 12.85 per cent and 6.27 per cent, respectively, compared to the preceding year, in terms of the original estimate and the interim estimate.

The budget deficit was initially estimated based on that revenue estimate, but the Revenue Accounting Officer had revised the original estimate, stating the deficit as Rs. 2,102 billion, thus decreasing by Rs.111 billion. According to the aforementioned revenue estimate, the government revenue was 8.7 per cent of the GDP. Even though the

increase in the GDP should have been taken into account in the preparation of revenue estimates, it was observed that revenue had been estimated regardless of this factor.

The government revenue collected during the year 2022 was Rs. 1,999 billion and it was a decrease of Rs.103 billion than the revised revenue estimate. Accordingly, that decrease was Rs. 214 billion and Rs. 85 billion when comparing the original annual budget estimate presented to Parliament and the interim budget revenue estimate presented in the year 2022, respectively. The decrease in the revenue collection compared to the revenue stated in the revenue estimate presented to Parliament each year from 2012 to 2022 ranged from 4.04 per cent to 26.06 per cent and the highest percentage of the decrease was recorded in 2021.

It is stated in terms of Financial Regulations 85 (2) (b) that the Accounting Officer should only report to the Fiscal Policy Department for the purpose of revising the revenue estimate. However, it was observed that allowing the revision of a revenue estimate approved by Parliament without obtaining its approval has weakened the accountability for preparing realistic estimates.

4.2 Revenue Deficit

The revenue deficit in the financial statements presented to the Audit for the year under review was Rs. 1,540 billion and it was Rs. 1,290 billion in the preceding year. The highest revenue deficit from the year 2006 to 2022 was recorded in the year 2022. The government had failed to meet recurrent expenditure with the revenue collected each year during that period. The minimum deficit of the revenue amounting to Rs. 43 billion was recorded in 2007 and it represented 7.52 per cent of the government revenue collection. The total revenue deficit during that period amounted to Rs. 6,319 billion. To bridge the deficit, the government obtained local and foreign debts as well as foreign grants. Accordingly, sums totaling Rs. 28,218 billion were obtained during that period, including local loans of Rs. 20,484 billion, foreign loan of Rs. 7,487 billion and foreign grants of Rs. 246 billion. The revenue deficit was financed by a percentage ranging from 6.89 to 45.59 percent of the loans and grants obtained each year. Out of the loans and grants obtained, 20.25 percent, 45.59 percent, 42.39 percent, and 30.59 were used to meet the recurrent expenditure in 2019, 2020, 2021, and 2022, respectively, without making any investment.

Interest of Rs. 1,565 billion was paid in the year under review and it accounted for 44.22 per cent of the total recurrent expenditure. The interest payment in the preceding year amounted to Rs. 1,048 billion or 38.01 per cent of the total recurrent expenditure. Accordingly, the payment of interest had increased by Rs.517 billion compared to the preceding year. Furthermore, settlement of certain loan installments and interest had been suspended during the period from 13 April 2022 up to the end of the year under review following the interim policy decision taken by the Ministry of Finance, Economic Stabilization and National Policies on 12 April 2022 to suspend the settlement of foreign loans. Nevertheless, it was observed that the said deficit would have further increased had the payments relating thereto been made. The payment of interests, which stood at Rs.151 billion in the year 2006, had increased by 936 per cent to Rs. 1,565 billion by the year 2022. In order to finance the budget deficit, loans had to be obtained and the payment of interest therefor had increased annually. Out of the government revenue amounting to Rs. 1,999 billion collected during the year, Rs.1,565 billion or 78.29 per cent had to be paid as interests. This position was annually on the increase during the related period and it had rapidly increased from the year 2019.

The total of outstanding revenue recoverable as at the end of the year under review from the key institutions collecting revenue, such as, the Department of Inland Revenue, Sri Lanka Customs, Department of Excise, and Department of Motor Traffic, amounted to Rs. 971,330,513,621.

Revenue of Rs. 904 billions, which was supposed to be collected as at 31 December 2022 by the Inland Revenue Department, which recorded the highest outstanding revenue, remained in arrears without being collected. If it had been possible to collect that revenue in the year 2022, the revenue deficit of that year could have been reduced by Rs.636 billion or 41.30 per cent. The revenue that remained outstanding amounted to Rs.698 billion and 620 billion in the years 2020 and 2021, respectively. If it had been possible to collect that revenue in those years, the revenue deficit in the year 2020 could have been reduced by 46.47 per cent to Rs.606 billion, and in the year 2021 by 51.94 per cent to Rs.670 billion.

The reasons such as, inefficiencies in the Revenue Administration and Management Information System, tax appealing process is time-consuming, and lack of a special court

system relating to the recovery of outstanding taxes, had attributed to the delay of the Department of Inland Revenue in recovering outstanding taxes.

The failure to properly prepare revenue estimates, collect revenue in accordance with the prepared revenue estimates, and effectively manage expenditure had led the government to obtain public debts. Due to the annual increase in obtaining those loans, the interest costs of the loans had also increased annually, resulting in an increase in recurrent expenditure. Due to the failure to collect the estimated revenue as expected and the increase in the recurrent expenditure, the revenue was insufficient to meet the annual expenses, leading to an increase in the revenue deficit each year.

4.3 Budget Deficit

According to the financial statements of the Government, the budget deficit for the year 2022 stood at Rs. 2,555 billion, accounting for 10.58 percent of the GDP. The budget deficit for the year 2021 was Rs. 2,080 billion, representing 12.37 of the GDP. There was a budget deficit throughout the period from 2006 to 2022 and the budget deficit, which stood at Rs. 300 billion in the year 2006, had increased to Rs. 2,555 billion by 2022. During that period, the highest budget deficit was recorded in 2022. The budget deficit as a percentage of the GDP ranged from 5.55 per cent to 14.08 per cent from 2006 to 2022. The actual budget deficit, which should be 5 per cent of the actual GDP as stipulated in Section 3(a) of the Fiscal Management (Responsibility) Act, No.03 of 2003, was not maintained during any year within that period. It was possible to maintain that percentage at 5.55 per cent, 5.69 per cent, and 5.59 per cent in 2016, 2017, and 2018 respectively.

4.4 Increase in the Debt Balance

With the increase in the annual budget deficit, the quantity of borrowings had also increased. According to the financial statements of the government, the debt balance payable by the government as at the end of 2022 was Rs. 27,379 billion. The balance mentioned above included local debts amounting to Rs. 14,360 billion and foreign debts amounting to Rs. 13,020 billion. The public debt balance had reached Rs. 16,827 billion in 2021. Accordingly, the debt balance had increased by Rs. 10,552 billion, representing a 63 percent increase in 2022 compared to 2021. The debt balance, amounting to Rs. 2,431 billion in 2006, accounted for 82.72 per cent of the GDP and by the end of 2022, it

had reached to Rs. 27,379 billion, representing 113.8 percent of the GDP. Furthermore, in terms of Section 3 (f) of the Fiscal Management (Responsibility) Act, No.3 of 2003, the government's liability should be below 85 per cent. However, the government's debt liability, excluding other liabilities, had reached 113.38 per cent exceeding the aforementioned limit. This situation persisted in both 2020 and 2021 as well.

4.5 Public Investments

Despite the failure to collect sufficient revenue to settle recurrent expenditure during the period from 2006 to 2022, a sum of Rs. 9,213 billion was invested as public investments during that period. The analysis of the financial statements reveals that the funds required for the aforementioned investment were financed through public debts. A sum of Rs. 1,014 billion was invested in public investments in 2022. Compared to the public investments amounting to Rs. 790 billion made in the preceding year, an increase of Rs. 224 billion is observed during the year under review. The public investments of Rs. 1,014 billion of the year 2022 were stated as construction and purchase of physical assets and acquisition of other investments under the financial expenses of the cash flow generated from investment activities in the cash flow statement. The public investments totaling Rs. 9,213 billion from the year 2006 to 2022 were specified as construction and purchase of physical assets and acquisition of other investments in the cash flow statements. Nevertheless, only Rs.2,093 billion thereof were recognized and accounted for as non-financial assets in the statement of financial position of 2022. Accordingly, assets worth Rs. 7,120 billion, which accounted for 77 per cent of the total amount of Rs. 9,213 mentioned in the cash flow statements for the construction and purchase of physical assets and acquisition of other investments, were not recognized and brought to account. Furthermore, non-financial assets were not accounted for in the financial statements from the year 2005 to 2014, and their inclusion in the financial statements was initiated since the year 2015.

4.6 Public Debts

(a) Obtaining loans in excess of the amount scheduled as per the Government Loan Scheme

According to the scheme for obtaining loans for the year under review, the scheduled Treasury bond value stood at Rs. 1,976,800 million, whereas Treasury bonds worth

Rs. 2,373,044 million was obtained as at 31 December 2022. Accordingly, loans were obtained in excess of the scheduled amount by Rs. 396,244 million representing 20 per cent through Treasury bonds.

According to the loan scheme, eventhough it was not expected to obtain loans from foreign currency banking units, the actual loans borrowed from FCBU had been amounted to Rs.339 million. Further, the value of the Sri Lanka Development Bonds amounted to Rs. 66,686 million according to the loan scheme, but it had reached Rs. 67,441 million by the end of the year. Accordingly, the value of the Sri Lanka Development Bonds had increased by Rs. 755 million or 1.1 per cent in excess of the amount scheduled for the year under review.

- (b) The disbursement estimate and the actual disbursement value as per the Performance Plan for the year 2022 were as follows.

Development Partner	Disbursement Estimate 2022	Actual Disbursement Value 2022	Variance	Variance as a percentage of the Disbursement Estimate
	USD Mn.	USD Mn.	USD Mn.	%
World Bank	482	456.2	(25.8)	(5)
Asian Development Bank	550	741.4	191.4	35
China		101.3	101.3	
Japan		75.7	75.7	
Korea		4.9	4.9	
East Asian Countries	50	21.4	(28.6)	(57)
South Asian Countries	835	925.5	90.5	11
Russia, Australia and Western Countries	150	76	(74)	(49)
United Nations Agencies	8	11.1	3.1	39
Total	2,075	2,413.5	338.5	

The following observations are made in this connection.

- (i) Although the total value of the disbursement estimate for the year 2022 was USD 2,075 million, the actual disbursement value was USD 2,413.5 million.

Accordingly, the actual disbursement value had exceeded the disbursement estimate by USD 338.5 million or around 16 per cent.

- (ii) Although estimates were not made to obtain loans from China, Japan and Korea as per the disbursement estimate, the actual borrowings stood at USD 101.3 million, USD 75.7 million, and 4.9 million, respectively.
- (iii) When comparing the actual realizable value of the loans obtained from the Asian Development Bank, the South Asian Countries and the United Nations Agencies with the disbursement estimates, there were excesses of 35 per cent, 11 per cent, and 39 per cent, respectively.
- (iv) The loans, which were expected to be obtained from the World Bank, East Asian Countries and Russia, Australia and the Western Countries, had decreased by 5 per cent, 57 per cent, and 49 per cent, respectively.

4.7 Profit and Dividends

The following observations are made.

- (i) Revenue of Rs. 34.7 billion and Rs.6.3 billion had been estimated from the profit revenue code 20.02.03.00 and the dividend revenue code 20.02.04.00, respectively for the year ended 31 December 2022. Out of that amount, the Public Enterprises Department was able to collect Rs.22 billion and Rs.6.08 billion, respectively during the year under review and it had been 63 per cent and 97 per cent of the estimated profit and dividend income, respectively.
- (ii) Although the capital contribution of the government owned business enterprises stood at Rs. 2,165,981,657,905 in the government's financial statements as at 31 December 2022, only profits and dividends amounting to Rs. 28,092,481,811 were received for that investment during the year under review, representing 1.3 of the investment value.

- (iii) Even though the number of Government owned business and other institutions which are under supervision of the Department of Public Enterprises as at 31 December 2022 stood at 300, revenue estimates for 63 institutions of them had been prepared and only 47 institutions had remitted profits and dividends to the Treasury.
- (iv) In terms of Section 10 (5) of the Finance Act, No.38 of 1971, all sums remaining out of the net surplus revenue of the state corporations should be credited to the Consolidated Fund. However, there observed instances where, the Public Enterprises Department had not taken adequate measures, according to the above provisions, to have such surplus credited to the Consolidated Fund from the public enterprises that reported such surplus.

4.8 Treasury Guarantee and Letters of Comfort

Treasury Guarantees worth Rs. 2,793,987 million and Letters of Comfort worth Rs. 114,527 million had been issued under 239 instances and 19 instances, respectively for external institutions as at 31 December 2022. According to the financial statements of the government for the year under review, it was observed that Treasury Guarantees worth Rs. 45,628 million and the Letters of Comfort worth Rs. 66,637 million issued to external institutions on 09 occasions and 13 occasions respectively had expired by 31 December 2022.

^(a) Provisional

^(b) Under the revenue sharing mechanism introduced in 2011 with the Provincial Councils (PCs), 100 percent of the revenue from stamp duties is transferred to PCs. The BTT collected by Provincial Councils was abolished in 2011 and NBT was extended to buying and selling activities.

^(c) Debits tax was abolished with effect from April 2011.

^(d) Data from 2011 represents only two thirds of the total revenue from NBT as the balance one third is transferred to PCs under the revenue sharing mechanism with them.

^(e) Data from 2011 represents the revenue from Telecommunications Levy, which was introduced as a composite tax to the telecommunications sector by removing VAT, NBT, Regional Infrastructure Development Levy, Environment Conservation Levy and the Mobile Subscribers' Levy on this sector in 2011.

^(a) As per the guidelines of compiling government debt statistics in the Manual of Government Finance Statistics published by the IMF in 2014, non resident holdings of outstanding SLDBs have been classified under foreign debt and resident holdings of outstanding ISBs of the Sri Lankan Government have been classified under domestic debt from 2019 onwards.

^(b) Provisional

^(c) The outstanding central government debt excludes several debt service payments that became overdue after 12 April 2022, the date of which the Interim Policy regarding the servicing of Sri Lanka's external public debt was announced by the Ministry of Finance, Economic Stabilization and National Policies. These debt service payments comprise of overdue interest payments of affected debt which deemed to be capitalised as per the Interim Policy and several overdue interest payments in relation to SLDBs.

^(d) Foreign loan debt statistics and classification of foreign debt for 2021 and 2022 are prepared based on the data sourced from the Commonwealth Secretariat Debt Recording and Management System (CS-DRMS) maintained by the Ministry of Finance, Economic Stabilisation and National Policies, and extracted on 09 and 10 March 2023

^(e) Excludes outstanding Treasury bills held by non resident investors

^(f) Excludes Treasury bonds held by non resident investors and includes Government Treasury bonds of Rs. 4,397 million issued for CWE in November 2003 (matured on 14 November 2016) and Rs. 13,125 million issued to capitalise SriLankan Airlines in March 2013 (matured on 01 June 2018) and Rs. 78,441 million issued for CPC in January 2012 of which Rs. 21,778 million matured on 01 January 2017 and Rs. 25,217 million matured on 01 January 2022 and the current outstanding is Rs. 31,446 million

^(g) Several interest payments that fell overdue after the debt standstill may not be included in the outstanding balance for 2022 since recording of these debt service payments in the debt recording systems is not yet finalised.

^(h) Represents ISB outstanding owned by the Licensed Commercial Banks

⁽ⁱ⁾ Data for 2022 includes outstanding balance of the government guaranteed foreign currency debt of the Ceylon Petroleum Corporation that was absorbed into central government debt w.e.f. December 2022, which amounted to Rs. 884,093.4 million

^(j) Includes liabilities of the central government to commercial banks reported in the Monetary Survey of the Central Bank

^(k) Includes administrative borrowings arising from foreign loans channelled through government or semi-government agencies and outstanding borrowings from OBUs

^(l) Based on GDP estimate 2015 based year published by the Department of Census and Statistic

^(a) Revised^(b) Provisional^(c) The decline in the Wireless Local Loop telephones and cellular phones in 2013 is due to revision in the classification of active subscribers

* from 2014 Mobile Broadband definition has been changed.

** In 2002, a three year project was started to establish Estate Agency Post Offices on recommendation made by the Presidential Committee to address the "Social Cultural Problems in the Estate Sector". These Offices were ceased to function since 2006, due to the incapability of the Agents to expand the overall business capacity (potential) to earn sufficient income and lack of continued financial remuneration from the Ministry of Estate Infrastructure and Livestock Development to the Agents of the Estate Agency Post Offices"

^(a) Revised^(b) Provisional^(c) Upto 2013, specialized banks were classified as National level and regional level banks.

* During 2010, business of 6 Regional Development Banks was vested with a new level bank, i.e. Pradeshiya Sanwardhana Bank

**All outlets excluding Student Savings Units

***This includes Student Savings Units only.

Note: with effect from 01.01.2013 Banking Outlets were reclassified into two categories namely branches and student savings units.
