MID – YEAR FISCAL POSITION REPORT 2014

MINISTRY OF FINANCE AND PLANNING SRI LANKA

MID-YEAR FISCAL POSITION REPORT - 2014

Issued under Section 10 of the Fiscal Management (Responsibility) Act No. 3 of 2003

Mahinda Rajapaksa

President and Minister of Finance and Planning

30th June 2014

Mid-Year Fiscal Position Report

Issued by the Hon. Minister of Finance

Under Section 10 of the Fiscal Management (Responsibility) Act No. 03 of 2003

In terms of Section 10 of the Fiscal Management (Responsibility) Act No. 03 of 2003, the Minister of Finance is requested to present the Mid-Year Fiscal Position Report to the public by the last day of June of the year and thereafter lay before Parliament.

The purpose of this report is to provide updated information on the Government's fiscal performance as per the fiscal strategy of the Government.

The report contains the performance of government revenue, expenditure, cash flow operations and borrowings during the first four months of the year 2014. The report also provides provisional budget outturn for the first four months of 2014, updated information, depending on the availability of information, relating to macroeconomic performance, price developments, foreign financing, government debt and official reserves as well as the performance of state owned business enterprises.

CHAPTER 1

The Economy

1.1 Economic Growth

The Sri Lankan economy recorded a 7.6 percent growth, in real terms, during the first quarter of 2014 in comparison to 6.1 percent growth in the same period in 2013. The growth was supported mainly by the strong growth in the Industry and Services sectors, but lagged by a relatively lower growth in the Agriculture sector due to draught conditions. Achieving a growth rate of this magnitude following the growth rates of around 8 percent during the last two quarters in 2013 is notable. This reflected a continuation of the increase in the domestic economic activities from the second half of 2013 with the gradual recovery in the global economy and exports.

This growth performance was mainly contributed by the industry sector which grew by 12.6 percent during this period in comparison to 10.7 percent in the same period in 2013 with continued expansion in the manufacturing sector and construction activities. The Services sector improved recording a growth rate of 6.5 percent during the first quarter of this year. However, Agriculture sector recorded a slower growth of 0.2 percent during the first quarter in

Chart 1.1 >Quarterly GDP Growth

2014 in comparison to 3.4 percent growth recorded during the same period in 2013.

The growth rate of agriculture, livestock and forestry sub sector which contributed for 10.3 percent of Gross Domestic Product (GDP), decreased by 1.2 percent in the first guarter in 2014 compared to the 2.3 percent growth recorded in the same period in 2013 owing to adverse weather conditions. The significant contraction in production of tea by 2.3 percent, production of paddy by 5.7 percent and plantation by 7.4 percent mainly contributed to this decline in the Agriculture Livestock and Forestry sub sector. The rubber and minor export crop sectors also contracted by 1.1 percent and 3.1 percent, respectively. However, the value additions by coconut sub sector and vegetable sub sector increased by 6.7 percent and 4.7 percent, respectively. Showing continuous potential, fishing industry recorded a 13.3 percent growth in this quarter in comparison to 13.9 percent growth in the same period in 2013.

The industry sector recorded a 12.6 percent growth and contributed to 32.7 percent of GDP with the continuous expansion in all the sub manufacturing sectors, including and construction activities, except electricity sub sector. The improved external demand mainly helped the improvement recorded in the manufacturing sector. The growth in factory industry was mainly supported by the improvement in the food and beverages, textile and wearing apparel industries benefiting from the recovery in advanced economies and increase in domestic demand due to enhanced economic activities.Meanwhile the negative growth in the electricity, gas and water sub sector was mainly due to the declined hydro power generation owing to unfavorable weather conditions.

Table 1.1 > Sectoral Composition of GDP (2002 Constant Prices) - First Quarter

Source: Department of Census and Statistics

Chart 1.2>Sectoral Composition of GDP– First Quarter 2014

Service sector recorded a significant growth of 6.5 percent in comparison to 4.3 percent growth during the same period in 2013 and contributed to 55.8 percent of the GDP during the first quarter of 2014. This growth was mainly supported by improved performance in wholesale and retail trade, hotels and restaurant and transport and communication sub sectors which grew by 8.3 percent, 23.2 percent and 7.3 percent, respectively in comparison to first quarter in 2013. Further, the moderate growth in domestic trade and banking, insurance and real estate services by

8.3 percent and 5.1 percent, respectively also had an impetus for the growth of the services sector. There was a strong recovery in the external trade activities, led by exports, due to the improvements in the global demand since mid last year.

1.2 Inflation

The annual average inflation, as measured by the Colombo Consumers' Price Index (CCPI) (2006/07=100), declined to 4.9 percent in June 2014 reflecting a continuous decline from the peak of 8.8 percent recorded in May 2013. The inflation on a year-on-year basis (YoY) declined to 2.8percent in June 2014 from 3.2percent in the previous month. The core inflation, which measures the price movements excluding fresh food, energy, transport, rice and coconut in the CCPI basketwas 3.5percent in June in comparison to a peak level of 7.6 percent in December 2012 on aYoY basis while annual average core inflation decreased to 3.0 percent in Junefrom 6.6percent in May 2013.

1.3 Money and Credit

During the first four months of 2014, the growth in both reserve money and broad money decelerated. The year-on-year growth in the reserve money was 3.0 percent in April 2014. The broad money (M2b) grew by a moderate rate of 13.2 percent in April 2014 on a year-on-year basis, moving towards the projected average growth of 14 percent in 2014. During the first four months of the year, a greater proportion of domestic credit was absorbed by the public sector within the overall monetary

expansion as against the credit extended to the private sector by commercial banks. The private sector credit growth, which was 10.2 percent in April 2013, moderated to 3.3 percent in April 2014 on a year-on-year basis. The significant decline in pawning advances contributed largely to the continued low growth of credit to the private sector. The growth in the private sector credit is expected to increase during the remaining period of the year with the downward adjustment of market lending rates as well as the expected improvement in the domestic economic activities.

1.4 Stock Market

The stock market activities continued its gradual recovery during the first four months of 2014. All Share Price Index (ASPI) increased by 4.5 percent to 6,224 by end April 2014 in comparison to end April 2013. The S&P SL 20 Index recorded a 1.5 percent increase by the end April 2014. The turnover remained unchanged at Rs.74 billion in the period of January to April 2014, compared to the same

period of 2013. Market capitalization increased by 14 percent to Rs.2,606 billion in comparison to the 13 percent growth recorded during the corresponding period of 2013. Foreign purchases recoded a 37 percent decline in the period of January to April 2014 against the11 percent growth recorded in the same period of 2013 while foreign sales increased by 10 percent to Rs 30,268 million in this period.

1.5 External Sector Developments

The external sector performance continued to improve during the first four months of 2014. Exports increased by 16.9 percent to US\$ 3,571 million during this period while imports also increased albeit at a lower rate of 2.6 percent to US\$ 6,192.3 million. Hence, the trade deficit declined by 12.1 percent to US\$ 2,621.2 million during the first four months of 2014 in comparison to US\$ 2,981.0million during the same period in 2013. The remittances from overseas employment increased by 11 percent to US\$ 2,109.3 million resulting from the continuous improvements in skill levels of the workforce engaged in such employment and remittances through he formal channels while earnings from tourism also increased by 37 percent to US\$771.7 million strengthening the external sector performance. Meanwhile, the international reserve position also improved as reflected by the increase in gross official reserves to US\$ 8.9 billion by end April 2014, which is equivalent to 5.9 months of imports and total reserves of to US\$ 10.2 billion, which is equivalent to 6.8 months of imports.

Exports

The healthy growth of exports by 16.9 percent to US\$ 3,571 million during the first four months of 2014in comparison to the same period in 2013was mainly due to the 15 percent growth in industrial exports to US\$ 2,666million. The significant increase of the export of textiles and garments by 20.9 percent to US\$ 1602 million helped achieve this improvement. The export of petroleum products declined by 15.7 percent to US\$ 128 million during this period while the other industrial products recorded a 11.3 percent increase to US\$ 936 million. Healthy performance in coconut product exports mainly contributed to the growth in primary agricultural products exports by 50.2 percent to US\$ 126 million during this period. Export earnings from tea also increased by 14.5 percent toUS\$ 504 million as a result of the increase in the price, volume and better valued tea exported.

Imports

Total imports increased by 2.6 percent to US\$ 6,192.3 million during the first four months of 2014 in comparison to the same period in 2013. This was a combined outcome of the 6.1 percent growth in consumer goods imports, 9.8 percent growth in the intermediate goods imports and the 16.4 percent decline in the import of investment goods. The import of foods and drinks declined by 2.2 percent to US\$ 447 million partly reflecting the positive impact of government policy of encouraging domestic production of certain food items. The import of petroleum products increased by 22.3 percent to US\$ 1762 million due to the decline in hydro power generation owing to unfavorable weather conditions prevailed in the country.

Textiles and clothing imports increased by 8.9 percent to US\$ 708 million in line with the increase in export of textiles and garments. However, import of other intermediate goods declined by 31.6 percent to US\$ 958.3 million. Investment goods imports declined by16.4 percent to US\$ 1,271 million mainly due to decline in import of transport equipment by 34 percent to US\$ 163.6 million and the machinery and equipment to US\$ 701 million during this period. The import of building materials also declined by 17.5 percent to US\$ 406 million due to lower imports of insulated wires and cables, cement and aluminium articlespartly reflecting the domestic production of such items. The decline in the import of foods and drinks highlights the importance of appropriate policies to substitute domestic food production to continue this trend while the increased expenditure on petroleum imports highlights the necessity of promoting energy saving measures and renewable energy to reduce the trade deficit

CHAPTER 2 Global Economic Trends

2.1 Economic Growth

The projections for global economic growth slightly moderated as the United States experienced adverse weather condition with abnormally harsh winter, and political unrest in Ukraine. According to the World Bank, the projected world GDP growth rate for 2014 has been reduced to 2.8 percent in June from 3.2 percent in January. The expansion of world GDP in 2015 and 2016 is projected at 3.4 and 3.5 percent, respectively.

During the first quarter of 2014, the United States economy contracted by 1.0 percent, despite the growth of 2.6 percent in the final quarter of last year mainly due to adverse effects of unusually cold weather. The economic growth in the Euro area in the first guarter of 2014 showed a mixed performance as they are in the early stages of recovery after the exit from recession in the first quarter of 2013. The growth rate of the area was slightly lowered to 0.8 percent in the 2014 first quarter from 1.0 percent recorded in the third quarter of 2013. Germany's GDP expanded with the accelerated construction activities supported by mild weather conditions while Netherland's GDP contracted with a significant decline gas production which was affected by warm weather. However, improvements in labour market, investment spending and reduced fiscal drag will help to accelerate the growth in the United States and euro zone in the second half of the year.

During the quarter 1 of 2014, the United Kingdom grew by 3.3 percent compared to 2.7 percent in the previous quarter as the Japanese GDP expanded significantly at a rate of 6.7 percent compared to the increase of 0.3 percent in the final quarter of the previous year. This was mainly due to the purchases ahead of the consumption tax increase on April 1.

The growth in developing economies is still crawling up amidst advanced economy policy tightening measures and possible slowdown in Chinese economy. The political unrest between Russia and the European Union adversely affects the growth forecast of some European and Central Asian countries. The economic activities in North Africa and Middle-East region and Sub-Saharan Africa are showing positive signs despite the domestic political tensions and policy normalization in the advanced economy financial markets. Steady global demand and favorable domestic conditions in South Asian economies are expected to offset the effects of such policy tightening on their economic activities.

2.2 Inflation

According to the World Bank, global inflation eased during the first three months of 2014 due to low commodity prices and related subdued price pressures in developing economies. However, global inflation accelerated by 3.6 percent in April largely contributed by the acceleration of inflation in advanced economies by 1.8 percent due to recovery in economic activities. This increase in inflation in advanced economies is broad based and was except the Euro area. Quarterly inflation in East Asia Pacific region, excluding Chinaeased during this period. This easing was mainly due to price moderation in Indonesia. But price pressures in China are increasing due rising cost of production. Inflation in Kazakhstan, Ukraine and Turkey reached double digit levels in April, because of the currency depreciation.

Source: World Economic Outlook, IMF, October 2013 and April 2014 Fiscal Monitor, IMF, April 2014 Annual Report 2013, Central Bank of Sri Lanka

2.3 Interest Rates

IMF has projected that LIBOR on six-month U.S. dollar deposits for 2014 and 2015 will be averaged at 0.4 and 0.8 percent, respectively. LIBOR on three-month Euro deposits averaged at 0.2 percent in 2013 and expected to be averaged at 0.3 and 0.4 percent in 2014 and 2015, respectively. LIBOR on six-month Japanese yen deposits which was averaged at 0.2 percent in 2013 is projected to be at the same level in 2014 and 2015 as well.

2.4 Exchange Rates

Euro and US dollar strengthened during the first part of the year due to rebound of economic

activities in Euro zone and the United States. However, Euro fell by 2.5 percent against the U.S. dollar compared to May, with the announcement on June 5 of monetary easing measures by European Central Bank. Japanese yen stabilized mainly due to monetary stimulus, following the sharp depreciation in the previous year. Currencies of large developing economies appreciated after sharp fluctuations recorded in January 2014, with the decline of financial tensions. India, South Africa and Turkey tightened their monetary policies while easing financial tensions and current account positions in India, Indonesia and South Africa and policy reforms in Mexico helped to stabilize the respective exchange rates. However, downward pressures remain for South African Rand due to strikes in the platinum industry and Indonesian Rupiah owing to widening trade deficits resulting from ban on mineral ore exports and weak commodity exports.

2.5 Fiscal Deficits

The average fiscal balance of advanced economies showed a significant strengthening as it declined sharply to 4.9 percent from 6.2 percent in 2012 and expected to be reduced further to 4.3 percent in 2014. On the contrary, emerging market economies experienced a slight increase in the average fiscal balance from 2.1 percent in 2012 to 2.4 percent in 2013 and projection for 2014 is at 2.5 percent as most of the economies are postponing fiscal consolidation measures.

2.6 Government Debt

The gross debt of advanced economies in terms of GDP declined marginally from 108.3 percent to 107.1 percent while emerging market economies recorded it as 34.9 percent in 2013. The projections for 2014 are 107.1 percent and 33.7 percent in advanced and emerging economies respectively. The gross government debt in terms of GDP in emerging market economies is relatively low. The public debt ratio in India is declining. The gross debt ratios in terms of GDP in Middle East and North Africa are significantly higher than other emerging market economies and likely to remain high.

2.7 International Trade

Global trade rebounded in the first quarter due to the recovery of advanced economies and strong import demand in developing economies including Europe and Central Asia, Latin America and Caribbean and South Asia, but suddenly contracted in April in consequence with the reduced imports from developing economies as a result of the domestic adjustments, policy tightening measures, currency depreciations and political tensions together with downward movements in advanced economy imports. Exports by China dropped sharply in April 2014. However, as the economic outlook in advanced economies is strengthening, a pick-up in trade is projected for the second half of 2014.

2.8 Commodity Prices

Commodity prices as a whole remained stable and relatively low while the prices of beverages increased during the first few months of 2014. The prices of oil, grains and sugar declined during this period. Dry weather in South America and South East Asia created upward pressure on the food prices. According to the World Bank, wheat and maize prices gained 10.9% and 6.2%, respectively in March 2014 on continuing supply concerns but dropped in May following U.S. Department of Agriculture (USDA)'s first assessment for 2014/15 season. Accordingly, there is a 60-70 percent possibility for occurring an El Nino condition in 2014 and hence, upside risks are projected for prices of wheat, rice, soybean, palm oil and coffee. However, rice prices declined 8.1 percent in March and by 6.5 percent in April on abundant Thai and Indian stocks. Coffee (Arabica) prices increased by 4.5 percent in April due to dry and hot weather conditions in Brazil.

Low demand from slow economic activities in China resulted in a drop in metal pricesfurther. Aluminum and iron prices declined due to oversupply while nickel prices rose consecutively for six months because Indonesia banned export of unprocessed ore in January 2014. Prices of precious metals continued with the declining trend in consequence with monetary policy normalization in the United States and reduced demand for safe-haven investments.

Crude oil prices averaged at 105/bbl in April, but increased to 106/bbl in May influenced by geo-political tensions in Ukraine and Russia and supply outages in Libya. Security concerns in Iraq further aggravated the price by escalating to 109.5/bbl in mid-June 2014.

CHAPTER 3 Fiscal Developments

3.1 Overview

Overall revenue performance continued to improve during the first four months of 2014. Total revenue during this period increased by 11.5 percent to Rs. 345 billion in comparison a 3.9 percent decline to Rs. 309 billion recorded during the same period in 2013. Tax revenue increased by 8.5 percent to Rs. 311 billion in comparison to 2.6 percent drop experienced in the same period of the previous year while non tax revenue also increased by 48.7 percent to Rs. 34 billion in comparison to 16.9 percent contraction in the first four months of 2013.

Tax revenue from indirect taxes on domestic activities showed a positive movement. The revenue from VAT on domestic consumption at Rs. 46,369 million recorded an increase of 8.4 percent, reflecting the system improvement under single rate VAT of 12 percent as against dual rate structure of 12 and 20 percent prevailed prior to 2011 as well as the gradual consolidation of the expansion of the VAT base to wholesale and retail trade. The Nation Building Tax (NBT) on domestic activities also increased by 5.0 percent reflecting the enhanced economic activities. Excise duty on liquor and cigarettes recorded 8.0 percent and 4.0 percent growth, respectively during this period due to higher prices despite the drop in production.

Meanwhile, the VAT revenue from imports increased by 3.9 percent and NBT revenue from imports also increasedby 3.5 percent. The revenue from Excise (Special) Provision Tax, primarily imposed on motor vehicles, increased by 49.4 percent in comparison to the decline of 36.9 percent recorded in the corresponding period in 2013. Special Commodity Levy (SCL) collected at the point of imports showed 7.4 percent increase mainly reflecting the higher tax rate imposed in support of maintaining a stable remunerative domestic producer margins in agriculture commodities. The revenue from Ports and Airports Development Levy (PAL) increased by 31.2 percent reflecting the increase in imports including motor vehicles, home appliances, textiles and chemical products and a fewer number of exemptions under this levy. The total increase in the revenue from import based taxes amounted to Rs. 20.4 billion in the first four months of 2014. The increase is a reflection of the enhanced domestic economic activities benefiting from the expansion in domestic demand recovering from the impact of measures adopted corrective from February/March 2012 to reduce imports and stabilize Balance of Payments.

In the context of direct taxes, the revenue from corporate and non-corporate income and profit tax increased by 9.2 percent due to a gradual completion of tax holiday period by many companies and buoyant performance of banking and financial institutions, food and beverages, manufacturing and tourism and services despite the impact of relatively lower private sector credit growth. The tax revenue from wage income (PAYE) also increased by 1.6 percent due to higher wage income and employment liable to such taxes, collection of such tax at source as final tax and improved compliance from employers despite lower rate structure and higher threshold inbuilt in the post 2010 tax system. However, tax on interest imposed at source as final tax recorded a decline of 20.2 percent mainly reflecting the relatively lower yield rates and lower turnover of government securities. Due to this decline in the revenue from tax on interest income the revenue from income taxation was Rs. 57,013 million in the first four months of 2014 in comparison to Rs. 62,220 million recorded during the corresponding period of the previous year reflecting a decline of 8.4 percent.

Non tax revenue from profits and dividends from State Owned Enterprises and state banks as well as social security contribution from public servants showed strong positive growth while profit transfers from Central Bank of Sri Lanka (CBSL)and interest income showed a decline during the first four months of 2014.

Table 3.1 > Summary of the Budget: January - April

Source: Department of Fiscal Policy

Total government expenditure amounted to Rs. 692,773 million reflecting a 6 percent increase in comparison to Rs. 653,770 million in the same period of the previous year. This consisted with recurrent expenditure of Rs. 498,998 million and capital expenditure and net lending of Rs. 193,776 million. The current expenditure increased by 6.5 percent while capital expenditure grew by 4.5 percent during this period.

The total government expenditure in excess of government revenue produced an overall deficit

of Rs. 347,018 million or 3.5 percent of GDP during January-April 2014 in comparison to Rs. 343,531 million or 3.9 percent of GDP in the corresponding period of 2013.

The provisional data for the first four months with comparable figures for 2013 is presented in Table 3.1. The expected improvement in income taxation, full impact of VAT coverage extension to retail trade, continued improvement in domestic economic activities complemented by gradual recovery of global economy, adjustment of lending rates in line with lower market interest rates as well as improvement in banking liquidity are expected to increase government revenue at a higher rate during the second half of the year. This improvement together with a closer monitoring of public expenditure management within the overall budgetary ceilings is expected to be conducive to maintaining annual budget deficit at 5.2 percent of GDP as announced in Budget 2014.

There was a mixed performance in the key State Owned Business Enterprises (SOBEs) during the first four months of 2014. The Ceylon Petroleum Corporation (CPC) recorded a profit of Rs. 2 billion during this period andis expected to strengthen its financial position further with the benefit of administered price revisions in respect of petroleum products together with relatively modest movements in international oil prices and exchange rate. The delays and/orlack of rainfall as expected in the catchment areas resulted in a substantial drop in hydro power generation of Ceylon Electricity Board (CEB) by 19.5 percent in the first four months of 2014 compared to 50 percent in 2013. As the CEB provided an uninterrupted power supply throughout the country amidst this situation, it incurred an operational loss of Rs. 18.6 billion during the first four months of 2014. However, with the diversified coal friendly generation mix complemented by the positive impact of electricity tariff revision would reduce the operational losses of CEB. Consequent to these positive developments, the overall liquidity in the economy is expected to improve while enhancing lending to the private sector in supportingeconomic activities therebystrengthening fiscal performance in the remaining period of the year.

The economy expanded at 7.6percent during the first quarter of 2014 following an equally higher growth in the last two quarters of 2013. Many emerging sectors, including livestock, construction, manufacturing, tourism, pharmaceutical and other services contributed positively despite the slowdown in credit growth amidst relatively low interest rate regime. The inflation as measured by Colombo Consumer Price index (CCPI-2006/07 base year) recorded a year on year inflation rate of 2.8percent at the end of June2014 in comparison to 6.8percent in June 2013. The average inflation by end June 2014was 4.9 percent in comparison to 8.6 percent in the same period in 2013.

The trade deficit declined by 12.1 percent to US\$ 2,621 million during the first four months of 2014 from US\$ 2.980.9 million in 2013 as a result of a significantly higher growth in exports than the growth in imports. All the major categories of exports recorded a healthy growth except petroleum products. In particular, exports of tea and garments, the country's biggest export activities accounting for about 60 percent of total exports increased significantly reflecting the strong resilience in the wake of global slowdown, particularly in advanced economies in Europe and the US. The Balance of Payments strengthened with the continued improvement in remittances from overseas employment to US\$ 2,217 million and income from tourism to US\$ 772 million during first four months of 2014. Nevertheless, the increased import expenditure on petroleum products underscoresthe importance of domestic substitution of energy in addition to taking measures to enhance exports to overcome Balance of Payments difficulties.

3.2 Government Revenue

The tax revenue of the government of Rs. 345 billion during the January-April 2014 period was supported by the increases in both domestic consumption based taxes as well as

the import based taxes, although there was an overall decline in income taxes due to the low revenue from tax on interests. There was a considerable increase in the non tax revenue contributing to the improvement in the total revenue of the government.

Table: 3.4 > Summary of Performance of Government Revenue (January - April)

Source: Department of Fiscal Policy

Chart 3.1: Composition of Government Revenue (Jan- April 2014)

Income Tax

During the first four months of 2014, the revenue from Corporate and Non Corporate income tax increased by 9.2 percent to Rs. 19,703 million.The banking, financial and insurance, food and beverages, import and export trade and manufacturing sectors contributed to this growth. The revenue of Rs. 7,441 million from PAYE tax during the first four months compared to Rs. 7,324 million generated during the same period of 2013 was supported by the increase in employment in

high earning categories in sectors such as tourism, construction, information technology and professional services.

However, the revenue from tax on interest declined by 20.2 percent to Rs. 26,959 million mainly due to the relatively lower issuance of domestic debt securities in the first few months of the year and the relatively low interest rates. The tax on ESC has declined by 5.0 percent to Rs. 2,912 million during the period of 2014 compared to Rs. 3,065 million for the same period in 2013. While the ESC threshold has

increased and the liability on the turnover of any business of which the profit are subject to income tax has removed, the ESC revenue had a positive contribution from sectors like export & import, manufacturing, and construction. Consequently, the total revenue from income taxes declined by 8.4 percent to Rs. 57,013 million during the first four months of 2014 compared to the Rs. 62,220 million generated during the same period of 2013.

			Rs. Million
Tax Base	2013	2014	% Change
Corporate and Non Corporate	18,043	19,701	9.2
PAYE	7,324	7,441	1.6
Tax on Interest Income	33,788	26,959	-20.2
Economic Service Charge	3,065	2,912	-5.0
Total	62,220	57,013	-8.4

Table 3.5>Performance of Revenue from Income Tax (January - April)

Source: Department of Fiscal Policy

Value Added Tax

During the first four months of 2014, total revenue from Value Added Tax (VAT) increased by 6.3 percent to Rs. 84,966 million in comparison to the Rs. 79,916 million in the corresponding period of 2013. The revenue from VAT on domestic activities increased by 8.4 percent to Rs. 46,369 million during this period.Improved domestic economic activities theimposition of VAT on wholesale and retail trade with a quarterly turnover more than Rs. 500 million in 2013 and the reduction of the tax exempted quarterly turnover to Rs. 250 million

in 2014 thereby broadening the VAT base contributed positively to this increase. The increases in the VAT revenue from alcoholic beverages by 22 percent, construction works by 23 percent, and commercial banking activities by 68 percent in comparison to the corresponding period of 2013 also helped achieve this improvement. However, the contraction of VAT revenue from petroleum products by 87 percent, machinery and equipments by 30 percent, and insurance by 10 percent, had a negative impact on domestic VAT revenue.

Table 3.6> Performance of F	Revenue of VAT (Janua	ry - April)		
			Rs	Million
			-	

Tax Base	2013	2014	Growth (%)
Domestic	42,757	46,369	8.4
Imports	37,329	38,896	4.2

Refunds	170	299	75.9
Net Revenue	79,916	84,966	6.3
Refunds as % of Gross Revenue	0.2	0.4	

Source : Department of Fiscal Policy

Meanwhile, the revenue from VAT on imports also increased by 3.9 percent to Rs. 38,597 million during the first four months in 2014 in comparison to the corresponding period of 2013. This was mainly supported by the increase in imports of motor vehicles and intermediate goods, including fuel, textiles, and fertilizers.

Excise Taxes

Total excise tax revenue generated from liquor, cigarettes and tobacco, petroleum, motor vehicles and other items, increased by 23.6 percent to Rs. 71,651 million during the first

four months of 2014 compared to the Rs. 57,984 million in the same period of 2013.

Revenue from hard liquor increased by 8.0 percent despite the decline in the production of hard liquor by 0.3 percent compared to same period of 2013 as a result of the increased excise duty on country made foreign spirits and coconut and processed arrack. The revenue from malt liquor increased significantly by 20.9 percent during the first four months in 2014 compared to same period in 2013 with the increase in production by 8.3 percent and the increase in excise duty.

Table 3.7 >Performance of Excise Duty (January - April)

Source : Department of Fiscal Policy

Chart 3.2: Performance of Excise Duty (Jan-April)

The revenue from cigarettes and tobacco increased by 4 percent to Rs. 17,524 million during the first four months of 2014 benefiting from the increase in excise duty on cigarettes despite the decline in the production of tobacco by 11.3 percent during this period. Meanwhile, the revenue from excise special provisions duty on motor vehicles amounting to Rs. 29,490 million during the first four months in 2014 recorded a significant49.5 percent growth in comparison to the same period in 2013 as a result of the increase in the value of motor vehicle imports during this period.

Table 3.8> Motor Vehicle Imports and New Registration of Vehicles - January to April

Source: Department of Customs and Department of Motor Traffic

(a) Lorries and Other Goods Transport Vehicles.

(b) Tractors, Hand Tractors and Other Land Vehicles.

Import Duty

The revenue from import duties increased by 8.3 percent to Rs. 23,964 million during the first four months of 2014 in comparison to Rs. 22,125 million during the same period of 2013. This was mainly due to the increase in the import value of consumer and intermediate goods although there was a decline in investment goods imports, including transport equipments, machinery and equipment and building materials, which are largely free from taxes or lower tax is charged. In particular, the 13.4 percent increase in other consumer goods, including motor vehicles, which has a bearing on the tax revenue at the point of import, to US\$ 597.6 million, mainly helped achieve this increase. In addition, wheat grain, Lubricants, undenatured ethyl alcohol etc. were among the major items that generated higher import revenue during this period.Further, the duty free items, consisting of pharmaceuticals, fertilizer, textiles etc. and imports under FTA with India and Pakistan as well as duty free imports under investment agreements etc. caused a decline in the revenue from import duty.

Special Commodity Levy

Special Commodity Levy (SCL) generated a revenue of Rs.16,030 million in January – April

period of 2014 showing a 7.4 percent increase over the same period of 2013. The commodities that generated high revenue under SCL included Sugar, Potatoes, B'onions and vegetable oils contributed to this increase. The government continued to use SCL, which is a single tax on selected commodities, as a mechanism to provide remunerative prices to domestic farmers during the harvesting seasons and adjust appropriately during the off season to stabilize domestic consumer prices.

Nation Building Tax

During the first four months of 2014, the total NBT revenue increased by 4.4 percent to 13,108 million in comparison to Rs. 12,555 million in the same period in 2013. NBT revenue from import activities increased by 3.5 percent to Rs. 4,924 million while that revenue from domestic activities increased by 5.0 percent to 8,185 million. The contraction in imports of several items such as intermediate goods including diamonds and precious stones and materials, gold, mineral products, all categories in investment goods including machinery and equipments, building materials, transport equipments, consumer goods including sugar and confectionery, seafood and, oil and fats mainly affected to slower growth of NBT revenue from imports. The improvement in construction activities, growth in domestic trade services, improvements in the hotel and restaurant services and introduction of NBT on the banking and financial activities supported the growth in NBT revenue from domestic activities. The loss of NBT revenue due to increaseof NBT threshold of all businesses carried out by any person or partnership to Rs. 3 million per quarter or Rs. 12 million per year was made effective from 01 January 2013 to facilitate the SMEs as well as simplify the tax administration has been partly restored through the introduction of NBT on financial services.

One third of the revenue generated from the NBT is being transferred to Provincial Councils

(PCs) under the revenue sharing mechanism introduced to consolidate NBT and the Provincial Councils Turnover Tax (PTT) as a part of the simplification of taxation. Accordingly, NBT revenue of Rs. 6,556 million was transferred to PCs during the first four months of 2014. It was Rs. 6,279 million in the same period of 2013. This increase is mainly a reflection of higher collection from NBT on domestic activities including financial services. In addition, 70 percent of revenue amounting to Rs. 475 million collected from motor vehicle registration fees and entire revenue of Rs. 3,624 million collected from stamp duty were also transferred to PCs during the first four months in 2014 in support of devolved activities.

					Rs. Million

Source: Department of Fiscal Policy

Other Taxes

The revenue from Ports and Airports Development Levy (PAL) increased by 31.2 percent to Rs. 17,784 million during the first four months of 2014 compared to the same period of 2013 reflecting the improved performance in imports and as a result of the relatively fewer number of exemptions under this levy. However, total revenue collected from Cess on import and export amounted to Rs. 14,956 million and remained unchanged in comparison to the same period in 2013. In order to protect the local industry and encourage the domestic value creation export industry, Cess was imposed on selected imports and low value added exports. Meanwhile, the revenue collected from Telecommunications Levv

increased by 36.5percent to Rs. 9,664 million in first four months of 2014 compared to Rs. 7,082 million in the same period in the previous year.

Non Tax Revenue

Total non tax revenue during the first four months of 2014 increased by 48.7percent to Rs. 34,478 million compared to Rs. 23,184 million collected in the same period in 2013 and made a contribution to 9 percent of the total revenue. The significant increase in the profit and dividend transfers from state banks, Telecommunications Regulatory Commission (TRC) and other SOBEs in comparison to 2013 mainly contributed to this increase in the non tax revenue during this period.

Table 3.10 > Fiscal Measures (June 2013 - May 2014)

Excise (Speci	al Provisions)
29.07.2013	Excise (Special Provisions) Act, No. 13 of 1989 (Gazette Notification No. 1821/1 of29.07.2013) – To increase the excise duty on cigars, cheroots, cigarillos and cigarettes of tobacco or of tobacco substitutes and to increase excise duty to 27% from 12% for vehicles with separate bodies for cabin and cargo area (crew cabs), to 29% from 15% for vehicles exceeding 5 tons but not exceeding 20 tons and to 35% from 20% for vehicles for transport of goods and to ensure more contribution from those vehicles to maintain the national road network.

The income of this fiscal levy is used for payment of compensation to farmers on damaged crops due to drought, floods and wild elephants

Stamp Duty (Special Provisions) Act

26.05.2014 Stamp Duty (Special Provisions) Act No. 12 of 2006 (Gazette Notification No. 1864/2of 26.05.2014) – To charge stamp duty at the "market value" at the event of any share certificate issued consequent to the issue, transfer or assignment of any number of shares of any company and for this purpose to amend schedule of the Gazette Notification No. 1465/19 of 05.10.2006 as last amended by the Gazette Notification No. 1809/19 of 10.05.2006).

Special Commodity Levy Act

-	
11.07.2013	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1818/36 of 11.07.2013) - To increase the prevailing Special Commodity Levy on Bonions from Rs. 15
	to 30 per KG with a view to offer a better and reasonable price to local farmers of B- onions
31.07.2013	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1821/32 of 31.07.2013) – Having observed a declining trend in respect of prices of sugar in the international market and considering the possibility of further decreasing of prices of sugar in international market, prevailing levy on a kilo gram of Sugar was increased from Rs. 20 to Rs. 27
22.08.2013	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1824/22 of 22.08.2013) - Having considered the supply of local production to the market, the existed tax on a kilo gram of Potatoes was increased from Rs. 25 to 40 and B' onions from Rs. 30 to 35 in order to ensure a better and reasonable price for local cultivators of Potatoes and B' onions
16.11.2013	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1836/41 of 16.11.2013) – To reduce the SCL rate on Potatoes from Rs. 40 per Kg to 10 per Kg. B'onions from Rs. 35 per Kg To Rs. 10 per Kg and Red Onions from Rs. 15 per Kg to Rs. 5 per Kg.
21.11.2013	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1837/26 of 21.11.2013) - To revise the SCL rates according to 2014 Budget proposals and introduced 4 new items to the SCL. (Salt, Yoghurt, Butter and Margarine)
05.02.2014	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1848/12 of 05.02.2014) - To reduce the duty on Spilt lentils Rs. 22 to 05 per Kg for 05 months
06.02.2014	Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1848/30 of 06.02.2014) - To increase the duty rate on potatoes Rs. 10 to Rs, 25 per Kg

- 07.03.2014 Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1852/91 of 07.03.2014) To reduce the duty on Whole lentils Rs. 18 to 10 per Kg for 05 months
- 14.03.2014Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1853/45 of
14.03.2014) To extend the validity period for Red Onion and B'Onion for 5 months
- 09.04.2014 Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1857/10 of 09.04.2014) To introduce SCL for Rice Rs. 5 per Kg with effect from 09.04.2014 for 03 months
- 11.04.2014 Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1857/34 of 11.04.2014) To introduce SCL for Maize & Sorghum 10% per Kg with effect from 11.04.2014 for 02 months
- 21.05.2014 Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1863/13 of 21.05.2014) To extend the validity periodfor 31 items for 7 months and reduced the duty rate on potatoes on Rs. 25 to 15 per Kg and Sugar Rs. 30 to 25 per Kg
- 23.05.2014 Special Commodity Levy Act No 48 of 2007 (Gazette Notification No. 1863/28 of 23.05.2014) To reduce the duty on Whole lentils Rs. 10 to 05 per Kg for 05 months

Revenue Protection Act

21.11.2013 Revenue Protection Act No. 19 of 1972(Gazette Notification No. 1837/25 of 21.11.2013) -To introduce new tariff bands on CID as 0%, 7.5%, 15% and 25%, Reduced the CID rate for IT supportive printers, Optical fiber cables, Solar control films, Change the CID rate for Branded items for up market development. Local value addition and backward integration with domestic value creation - Machinery and heavy industry - Tea machinery, Tractors, steel, Cement, Ayurvedic industry, fisheries industry, Confectionary industry, Flavours, Cocoa beans, gold, Boat manufacturing industry, Wheel barrows and Gauze. Created new HS codes for Diesel hybrid vehicles. Under SAFTA and ISFTA, 208 and 10 items are removed respectively from the negative list of Sri Lanka

20.01.2014 Revenue Protection Act No. 19 of 1972 (Gazette Notification No. 1846/10 of 20.01.2014) - To identify both lories and trucks separately and to introduce new national subheadings and keep minimized tax rates on those national sub-headings (as total tax value at 38% and 55%), to ensure that the existing tax rate for single cabs is remained, to introduce new customs codes for gully bowsers and garbage trucks which are mostly used by the local government authorities and to reduce tax rates of those items, to introduce new customs codes for vehicles chassis fitted with engine and cabin and to impose tax rates for that item to promote local value additions and to revise tax rates on packing films of pharmaceuticals, sanitary towels and tampons

Customs Ordinance (Chapter 235)

20.06.2013	Customs Ordinance (Chapter 235) (Gazette Notification No. 1815/15 of 20.06.2013) – To apply a surcharge of 100% on Customs Duty (5%) on Gold
21.11.2013	Customs Ordinance (Chapter 235) (Gazette Notification No. 1837/28 of 21.11.2013) – To remove the surcharge on imported Gold

07.04.2014 Customs Ordinance (Chapter 235) (Gazette Notification No. 1857/3 of 07.04.2014) – Declared in order that the value of motor vehicles imported and classifiable within the headings 87.01, 87.02, 87.03, 87.04, 87.05 and 87.11 of the Harmonized Commodity Description and Coding System shall be set out as specified in the gazette and all Customs duties and other levies payable at the time of importation shall be calculated on the basis of such value and this shall be in force for a period of two years from 8th of April 2014.

Customs Amendment Act

21.11.2013 Customs Amendment Act No 2 of 2013(Gazette Notification No. 1837/27 of 21.11.2013) – To revise the method of Calculation of value of used Motor Vehicles

The Licensing of Shipping Agents, Freight Forwarders, Non-Vessel Operating Common Carriers and Container Operators Act

27.12.2013 The Licensing of Shipping Agents, Freight Forwarders, Non-Vessel Operating Common Carriers and Container Operators Act, No. 10 OF 1972(Gazette Notification No. 1842/16 of 27.12.2013) - Regulations made under Section 10 of the Licensing of Shipping Agents, Freight Forwarders, Non-Vessel Operating Common Carriers and Container Operators Act, No. 10 of 1972 read with Article 44(2) of the Constitution of the Democratic Socialist Republic of Sri Lanka.

3.3 Government Expenditure

Total government expenditure during the first four months of 2014 amounted to Rs. 692,773 million. The recurrent expenditure amounted to Rs. 498,998 million while capital expenditure was Rs. 193,776 million. There was a lower increase of 6.5 percent in recurrent expenditure during this period mainly benefiting from the declined interest payments while major development projects in the areas such as roads, irrigation, rural development, health and education contributed to the increase in expenditure on capital expenditure by 4.5percent in this period.

Source: Department of National Budget, Department of State Accounts and Department of Treasury Operations

Salaries and Pension

Expenditure on salaries for public servants stood at Rs.144,750 million, with an increase of 14 percent over the corresponding period of the previous year, mainly due to the increase of cost of living allowance by Rs.1,200 and the full impact of the special allowance made in 2013.

Total pension paymentsamounted to Rs. 43,578 million during the first four months of 2014 in comparison to Rs. 41,732 million in the same period in 2013. The full impact of retirees in 2013 as well as the increase of cost of living allowance by Rs.500 for pensioners who retired

before 2006 and Rs.350 for other pensioners per month contributed to this increase.

Interest Cost

Total interest payments on foreign and domestic debt amounted to Rs.157,855million during the first four months of 2014 with a 10.4 percent decrease over the corresponding period of last year. The positive impact of the relatively low interest rates on government securities mainly contributed for lowering the interest expenditure during this period.

3.4 Treasury Operations

Performance of the Government Treasury Cash Flow

Cash inflows to the Treasury during the first five months of 2014 increased by 7 percent in comparison to the same period in 2013. Cash deficit after outflow for recurrent and capital payments amounted to Rs 440 billion which is higher than the corresponding figure for the same period in 2013 by Rs. 73 billion. This was mainly due to the increase in cash outflows for recurrent and capital payments by 7 percent and 30 percent, respectively, compared to the corresponding period of the previous year. The overall closing cash balance (deficit) as at end May, 2014 was Rs 177 billion, which is higher than the cash deficit which prevailed at the end of May 2013, by Rs. 46 billion.

CHAPTER 4

Performance of State Owned Business Enterprises

4.10verview

The State Owned Business Enterprises (SOBEs) continued their contribution towards economic growth and stability supported by several initiatives mooted by the Government during the past few years. Restructuring of SOBEs by way of strengthening the balance sheets of the major SOBEs is already underway with several entities being recapitalized as proposed in the 2014 National **Budget.Conversion** of outstanding debts to Treasury to Government Equity, settlement of long outstanding debts of Government departments and agencies to SOBEs and buy back of non-performing investments in SOBEs are some of the other measures identified to strengthening the financial position of the SOBEs.

During first four months of 2014, seven SOBEs contributed towards government's non-tax revenue by way of paying dividends and levies to the Consolidated Fund totalling Rs9.7 billion.Meanwhile, the Treasury released a total of Rs 4.5 billion and Rs 1.9 billion to meet recurrent and capital expenditure, respectively, of selected SOBEs to meet their short, medium term financial requirements. and long Outstanding debts to banks of SOBEs declined by 1 percent to Rs. 500 billion while the state banks were encouraged to diversify channelling of funds to the development initiativesof the private sector as well as the fast growing sectors of the economy.

4.2 Brief Review of the Ten Major SOBEs

Bank of Ceylon

Bank of Ceylon (BOC), positioning itself to be a premier bank in the region, established a new branch in Seychelles in January 2014. In order to be competitive and to improve efficiency, BOC has identified technological transformation as a key strategic priority and is in the process of upgrading its core banking system. As part of the Government's initiatives to strengthen the balance sheet of state banks as proposed in the 2014 Budget, BOC's investments in Sri Lankan Airlines (SLA) was bought back by GOSL. Several long outstanding debts to BOC from SOEs, Government departments & agencies are being settled by GOSL, so that BOC's lending portfolio can be diversified rapidly into fast growing sectors such as exports, high value agriculture, construction, tourism, SME sector and leisure related activities. The asset base of the Bank recorded a marginal increase of 2.9 percent by the end of April 2014 from Rs.1,193 billion as at end 2013. The lending portfolio decreased marginally to Rs. 749 billion compared fromRs. 755.4 billion as at end 2013 mainly due to the decline in pawning advances by 16.5 percent or Rs.21.7 billion. The non-performing loan ratio of the Bank increased to 5.85 percent during the period in comparison to 4.3 percent in 2013.

People's Bank

People's Bank strengthened its human resources by recruiting 1000 customer service assistants during the first four months of 2014. With the repositioning of its SME banking business, PB expects to accommodate financial and non-financial requirements of SMEs in a more prudent manner. As part of the Government's initiatives to strengthen the balance sheet of state banks, PB's nonperforming investment in SLA was bought back by GOSL. Moreover several long outstanding debts to PB from SOEs, Government departments & agencies are being settled by GOSL. Theasset base of the Bank recorded a decrease by the end of April 2014 to Rs. 905 billion from Rs.930 billion as at end 2013 mainly due to reduction in loans and advances by 18 percent or Rs.125 billion. The deposit base recorded a marginal decrease. However,the CASA ratio of the Bank improved to 41.5 percent from 38 percent in 2013 contributed by the deposit campaigns carried out during the period. Although the net interest margin declined from 4.1 percent in 2013 to 2.5 percent, the Bank recorded a net interest income of Rs.7.6 billion during the period. PB reduced its exposure to pawning by 30 percent reducing the pawning portfolio to Rs.138 billion by the end of April 2014 from Rs.197 billion in 2013. However, the non-performing loan ratio rose to 6.6 percent from 5.3 percent in 2013.

National Saving Bank

The Bank recorded a profit before tax of Rs2.3 billion during the first four months of 2014, as the interest margin increased from 1.67 percent (December 2013) to 2.38 percent (April 2014). However, non-performing advances (NPA) of the Bank increased to 8.90 percent from 6.66 percent in 2013 as the pawning portfolio contracted. NSB's non- performing investments in SLA were also bought back by GOSL in March 2014. During the period NSB opened a new branch at Ragala in NuwaraEliya district in 2014, and introduced several new products and services; "NSBBuddhi" a higher education loan, "DiriyaDiyanee" a scheme of loan for women entrepreneurs, the "DiviSurekum" pension plan and personal loan scheme for SMEs facilitating micro financing to the priority sectors. Further, NSB is moving into project financing associated with Sri Lankan corporates by financing many pioneering projects in several sectors including agriculture, apparels, food & beverages, hotels & tourism, infrastructure, manufacturing, property development, renewable energy and telecommunications.

Sri Lanka Insurance Corporation

During the first quarter of the year the Sri Lanka Insurance Corporation(SLIC) achieved a total revenue of Rs. 6.96 billion which is a marginal decline compared to Rs.6.98 billion during the corresponding period in 2013. Initiatives have been taken to splitLife and General insurance businesses into two companies as required under the, Regulation of the Insurance Industry (Amendment) Act No. 03 of 2011. During the period, SLIC introduced several new products in order to consolidate its position as the market leader in the insurance industry. A new product, i.e., Motor Plus Global Emergency Assistance, partnered with "Assist America" was introduced to provide medical emergency services with a 24 hour - 365 days a year Operations Center equipped with trained, multilingual medical personnel, including nurses and doctors, to provide medical advice and assist guickly and professionally in a medical emergency. The new SLI Annual Medical Plan (GI) Cover provides a range of health insurance needs at an affordable price and comes with a special "No Claim Bonus" which increases the sum insured for every claim free year. A Motor Plus Loyalty Rewards scheme was also introduced during the year 2014. Further, SLIC is planning to introduce a range of pension with the aim of becoming the products "Pension Provider to the Nation". In addition, the company is also initiating action to move in to Group Pension Products.

Ceylon Electricity Board

Due to the delays and/orlack of rainfall as expected in the catchment areas, hydro power generation substantially dropped to 19.5 percent in the first four months of 2014 compared to 50 percent in 2013. Accordingly,the generation cost per unit increased to Rs. 24.37 againstRs. 17.70 in 2013. However, the diversified coal friendly generation mix enabled CEB to mitigate the adverse effects to some extent. CEB'soperational loss for the first four months of 2014 was Rs. 18.6 billion while providing an uninterrupted power supply throughout the country.The third phase of the Lakvijaya Coal Power Plant (300MW) is scheduled to be commissioned in the second half of 2014 which would increase the total volume of coal powered electricity provided to the national grid to 900MW. With the shift towards using coal, the weighted average generation cost is expected to furtherdecline.CEB'slong term generation plan for 2011-2025 has been prepared taking in to consideration the necessity to meet the increasing demand for electricity with a diversified low cost generation mix with more weight towards coal. However in order to ensure energy security, CEB should strategically Non-Conventional Renewable Energy add (NCRE) sources such as wind, biomass and solar to its generation mix to establish a sustainable energy platform.

Ceylon Petroleum Corporation

Considering the contribution of the petroleum sector to national economic development and with a view to ensuring energy security, the Government has initiated several measures to facilitate infrastructure development related to importation, refining, storing and distribution of petroleum products. The Ceylon Petroleum Corporation (CPC) recorded a profit of Rs. 2 billion during the first four months in 2014 compared to the loss of Rs. 8 billion recorded in 2013 supported by the cost effective pricing policy introduced in 2013 and the fairly stable oil prices in the world market during the period.CPC's outstanding borrowings from state banks decreased from Rs. 419 billion at the end of 2013 to Rs. 378 billion as at 30th April 2014. In order to improve theliquidity position of CPC, Treasury bonds amounting to Rs. 30.69 billion were issued in February 2014 by the General Treasury to settle long outstanding dues to CPC by Government institutions. Further, the outstanding debts totallingRs. 26.11 billion to CPC by Sri Lankan Airlines and Mihin Lanka Ltd were also settledduring the first quarter of 2014. In line with the Governments policy for a green economy, CPC introduced environment friendly 92 octane petrol in place of 90 octane petrol with effect from 1st January 2014. Action has also been initiated to introduce an environment friendly alternative to super diesel.

Sri Lanka Ports Authority

In 2014, the Sri Lanka Ports Authority (SLPA) initiated the Colombo Port City Development Project under which 233 hectares of land will be reclaimed. The Port City will consist of luxury hotels, apartment complexes, shopping malls, space for modern offices and leisure and recreation activities providing a large space for foreign direct investments. In order to maintain the competiveness among the other terminals within the Colombo Port and in the region, SLPA is taking steps to introduce a new tariff structure for its services. Further, SLPA introduced new promotional tariff rates at the MagamRuhunupuraMahindaRajapaksha

(MRMR) Port in order to encourage and expand the transhipment of vehicles as well as bunkering trade. Fuel bunkering at the MRMR Port commenced operations in June 2014. SLPA recorded a profit (before tax) of Rs. 3.7 billion during the first four months of the year. However, the total expenditure was Rs.8.5 billion of which 41 percent or Rs. 3.5 billion consisted of financing costs during the period.

National Water Supply and Drainage Board

During the first four months of 2014, a total of 36,340 connections were provided all over the island, with a significant number of connections provided in the Eastern and Western provinces. Among them Kandy and Ampara were the areas where the most number of new connections were provided The total revenue of the National Water Supply and Drainage Board (NWSDB) during the first four months of 2014 improvedto Rs.7, 894 million, which is a 28 percent growth in comparison to the revenue during the first four months of 2013. With the total operating cost of Rs.7, 892 million during the period NWSDB earned a marginal profit ofRs.2 million.

During the period, several remedial measures were taken to reduce the level of non- revenue water. Some defective meters and pipe lines were replaced, several illegal connections were disconnected, several new bulk meters and valves were installed, leaks were repaired and meter reading audits were conducted.

Airport and Aviation Services (Sri Lanka) Ltd

Airport and Aviation Services (Sri Lanka) Ltd (AASL) handled a total of 2,595,842 passenger movements including 414,307 transit passengers recording an increase of 7 percent during the period of first four months. In addition, the total cargo handled by AASL amounted to 47,994 MTs. However, AASL's profit before tax for the period decreased by 33 percent to Rs. 1.4 billion compared with the previous year. Total foreign borrowings of AASL as at 31.04. 2014 stood at Rs 37 billion while the debt servicing cost for the period was Rs. 378 million. AASL is expected to commence the servicing of USD 189 million loan obtained for the construction of theMattala Airport and thereafter obtain the 2nd phase of the loan of USD 120 million for further development of the Mattala Airport. AASL is preparing to commence the phase II (2) of the BIA development project with the assistance of USD 346 million from JICA to increase the passenger handling capacity from 6 million to 15 million by 2015.Further, a credit facility of USD 105 million from domestic finance will be utilized to overlay the existing run-way of BIA by a local contractor.

Sri Lankan Airlines

Sri Lankan Airlines (SLA) has entered into the One World Alliance to expand its global presence by linking over 800 new destinations worldwide. In accordance with the Government's policy to position Sri Lanka as an and a tourism hub,SLA aviation was recapitalized in line with the 2014 Budget Proposals to strengthen its financial position enabling it to make an effective contribution to the aviation and tourism sectors. In 2014, the Government infused Rs 19.81 billion by way of Treasury Bonds in part fulfilment of the Cabinet decision of 2011 to infuse capital to SLA totalling USD 500 million(or Rs. 60 billion) over a five year period commencing 2012.By end April 2014, the Government has provided capital amounting of Rs 46.69 billion to SLA. In addition, SLA obtained a syndicated loan of USD 150 million in April 2014 for a period of five years(with a government guarantee of USD 50 million) the proceeds of which were used to settle USD 112.5 million outstanding loan obtained from Meshreq Bank UAE.In June 2014, SLA successfully issued an International Bond of USD 175 million with a 100% sovereign guarantee for the purpose of raising funds for working capital requirements and re-fleeting purposes. SLA's revenue for the first four months of 2014 increased by 2 percent to Rs. 27.8 billion compared to Rs. 27.4 billion in same period 2013. However, SLA's operating loss for period wasRs8.4 billion and the the accumulated loss amounted to Rs82 billion. With the re-fleeting programme expected to be carried out over the next 7 years period and the marketing and promotional strategies to be launched, SLA expects to breakeven by 2020.

Box 1 >The Latest International Bond Issue – Sri Lankan Airlines US\$175millionat 5.3%

The Sri Lankan Airlines (SLA) was able to raise a 5 year bond guaranteed by the sovereign of US\$ 175 million at 5.3 percent. The Bond was oversubscribed by 17 times at US\$ 3 billion with 85 participants. In terms of investor type, the issuance was allocated 85% to Institutional Investors and 15% to Private Banks. In terms of geographic allocation, 60% of the issuance was allocated to Asia, 25% to Europe and 15% to Middle East. The Bond's performance was commendable for many reasons:

- the issuance was Reg S only (cannot be marketed in the US)
- the airline industry globally is not perceived well
- the issuance was less than US\$ 500 million whereby was not eligible for EMBI inclusion.

The oversubscription by a record 17 times with significant demand from the institutional investors in spite of the issuance being excluded from the US indicate that there is a strong appetite for issuances from Sri Lanka in the international financial markets.

The strong macroeconomic fundamentals of being able to sustain an average economic growth of 7 percent during 2010-2013, along with the consistent improvement in government fiscal operations and a robust external reserves position complemented by strong growth prospects has allowed Sri Lanka to consistently access the market at relatively low interest rates.

This was evident when the government accessed the market in January 2014 with a 5 year Bond for 1,000 million, the interest rate at 6 percent was around 435 bps wide of the US 5 year Treasuries. However, when the government accessed the market in April 2014, US\$ 500 million through a 5 year bond the interest rate at 5.125 percent was only 351 bps wide of the US 5 year Treasuries. The decline in the spreads relative to the US Treasuries by almost 90 bps or 20 percent decrease is an indication of the trust the international investors have in the country's economic growth trajectory and a reiteration of the Sri Lanka's credit standing in the financial world.

	Price (%)		UST Spr (bps)	Benchmark	
Sri Lanka 7.4% 2015	102.88	2.187	170	2yr UST	
Sri Lanka 6% 2019	105.87	4.553	287	5yr UST

4.3 Reform Initiatives for Major SOBEs

Institution	Reform Initiatives
State Banks	- Encourage to move towards IT empowered, highly efficient and productive, innovative
(BOC,PB &	banks to effectively facilitate inclusive growth in the economy.
NSB)	- Diversifying the lending portfolio by directing funds to emerging and fast growing sectors
	of the economy.
	 Implement strategies to achieve operational efficiency.
	 Focus on creating new entrepreneurs and facilitating their growth through SME centers.
	 Improve the HR capacities in areas such as customer relationships, risk management, IT
	and communication.
	 Raise low cost funds in the international market through capitalization of the strengths or
	the banks.
	- Optimal utilization of the financial sector consolidation process initiated by the Centra
	Bank of Sri Lanka.
SLIC	 Introduce pension products to the nation considering the increasing population of senior
	citizens.
	 Implement measures to increase the rate of insurance penetration in the country.
	······································
CEB	- Continue the implementing measures to minimize system losses in the distribution
	system.
	 To ensure energy security and affordability, formulate a low cost generation mix
	incorporating coal and non-renewable energy sources.
	 Conversion of Treasury loans to equity to strengthen CEB's financial position, facilitating
	CEB to raise future fundsindependently.
	 Move towards cost reflective pricing policies while prioritized emerging industries are
	subsidized.
CPC	- Expansion and modernization of the Refinery by increasing its capacity to 100kbpd from
	50kpbd to maximize diesel production and other petroleum products to meet the future
	demand at affordable prices.
	– Installation of pipeline connections between the main storage facilities of Kolonnawa and
	Muthurajawela installations and Colombo harbor to cater to the present and future
	demand of the country and to minimize leakages and losses.
	- Establishment of new bulk depots at Northern and Eastern provinces to facilitate the
	development activities and emerging industries.
	- Explore economically viable alternative suppliers of crude oil rather than depending on a
	few countries for oil supply.
SLPA	- Improve infrastructure facilities and enhance capacity through introduction of modern
	technology.
	- Introduce sector specific marketing and business development programmes with medium
	term focus on income generation activities to match the rising finance costs.
	- Facilitate private sector investments by attracting Foreign Direct Investments to develop
	port related activities and new ventures, such as ship building and catering, marine
	resource management and emerge opportunities in maritime tourism.

	 Explore new ventures with the exploration of oil and gas, marine minerals and archaeological sites.
NWS&DB	 In order to ensure safe drinking water and mitigate health issues such as the chronic kidney disease, measures have been initiated to prevent water pollution and to establish treatment facilities in the existing community based water supply projects. The ADB funded project aimed at reducing non-revenue water to 20% in 2018 will enable NWSDB to progress to a commercially viable entity with the ability to source necessary funds on its own in the future. In order to improve collection efficiency, water bill payments have been made more convenient to the public
	 It is projected to implement 35 water supply projects catering to 265,520 households with local investment of Rs.42.1 billion provided by local banks.
AASL	 Commencement of the Phase II stage 2 of BIA development project to increase passenger handling capacity from 6 million to 15 million by 2016.
	 Overlay of the runway of BIA by local contractors to enhance the capacity of the run-way. Setting up an aircraft maintenance repair and overhauling facility to service the region at MRIA.
SLA	 Embarked on a re-fleeting programme to replace the entire wide body fleet with a new fleet to improve operational efficiencies and provide modern passenger comforts with a view to attracting around 55 percent of the passengers flying in to Sri Lanka while increasing its revenue to be a commercially viable entity.

4.4 Outstanding Debts to Banks of Non-Financial State Owned Business Enterprises

A summary of the outstanding debts to banks of non-financial SOBEs is given in Table 4.1.

CHAPTER 5

Foreign Financing

5.1 Foreign Financing Commitments

The total value of the commitments made by Development Partners and lending agencies for development projects and programmes in Sri Lanka during the period from 1st January to 30th April 2014 was US\$ 683.1 million (Rs.89,236.2 million), of which, project loans amounted to US\$ 678.2 million (Rs.88,604.6 million) and grants amounted to US\$ 4.9 million (Rs 631.6 million). In addition, two international bonds amounting to US\$ 1,500 million with a maturity period of 5 years were issued during the first 4 months of this year.

A full list of Agreements signed during the first four months in 2014 is shown in Table 5.1 below.

Development Partner/ Lending	Loan / Grant	Agreement Date	Project	Instrument Currency	Original Amount	SL Rs.	USD
Agency					(Million)	(Million)	(Million)
			Bilateral				
Japan	Loan	28/03/2014	New Bridge Construction over the Kelani River	JPY	35,020	44,808.1	342.8
	Grant	3/11/2014	Medical Equipment and Welfare Apparatus Package - 2014	JPY	500	631.6	4.9

5.2 Foreign Financing Disbursements and Utilization

The total disbursements recorded in development projects from January to April 2014 was US\$ 541.3 million (Rs.70,739.9 million). Of the total, project loans accounted

for US\$ 536.3 million (Rs. 70,081.0) and grants accounted for US\$ 5.0 million (Rs.658.9 million).

Disbursements made during the period under review by each creditor are depicted in Table 5.3 below.

Table 5.3 > Foreign Financing Disbursements in Development Projects from 1st January -30th April, 2014 by Development Partner

Note: 1. LIBOR = London Interbank Offered Rate (Average LIBOR 6 Months rate from January to April 2014 was 0.3310 per cent)

EURIBOR = Euro Interbank Offered Rate (Average EURIBOR 6 months rate from January to April 2014 was 0.4050 percent)

3. The conversion rates used for the report were the exchange rates prevailed for different currencies at the date where the disbursement was made

4. Disbursements made from foreign loans obtained by SOEs are not included

5. N/A = Not Applicable

Out of the total disbursements recorded during the period January –April 2014, 26 percent or US\$ 141.9 million was reported under the development projects funded by China and 20 per cent or US\$ 108.9 million was from the Japanesefunded projects. The total disbursements recorded in the projects financed by multilateral agencies such as the World Bank, Asian Development Bank and IFAD was 33 per cent or US\$ 177.2 million.

Chart 5.3 > Foreign Financing Disbursements by Development Partner

Note: Other = Hungry, Sweden, Spain, France, Austria, Belgium, Denmark, Germany, Kuwait, IFAD, UNHCR and OFID

Out of the total disbursements recorded during the period January – April 2014, 38 percent was disbursed for the construction / rehabilitation of roads and bridges and 7 percent, 9 percent and 18 percent were disbursed for the power sector development, water supply and ground transport projects, respectively.

Chart 5.4 Foreign Financing Disbursements by Sector

Note: Other = Agriculture, Defense, Environment, Finance-Insurance-etc, Fisheries, Humanitarian Assistance, Livestock Development, Management and Institutional Development, Private Sector Development, Rehabilitation, Rural Development

5.3 Committed Undisbursed Balance (CUB)

The total undisbursed balance of foreign financing available to utilize in development projects as at end of April 2014 was US\$ 6,929.4 million (Rs.904,953 million). The project implementation duration for these commitments will be in the range of 2-5 years and hence the utilization will be on the same basis. Table 5.5 and Chart 5.6 indicate the sector and development partner-wise classification of the committed undisbursed balance.

5.4 Outstanding External Debt and Debt Service Payments

At the end of April 2014, the total outstanding external debt of the Government amounted to US\$ 21.1 billionⁱ (Rs.2, 755.5 billion).

Total debt service paymentsⁱⁱ from January to April 2014 amounted to US\$ 390.5 million (Rs.

50,996.6 million). Of this, US\$ 244.1 million (Rs.31,878.5 million) was for principal payments and the balance US\$ 146.4 million (Rs.19,119.3 million) was for the interest payments.

Total estimated debt service payments for 2014 are US\$ 1,279.3ⁱⁱⁱmillion (167,071.7million), of which 31percent has already been made by 30th April 2014.

ⁱ This includes outstanding external debt for loans obtained to finance development projects and International Bond Issuances.Loans obtained by State Owned Enterprises (SOEs)and foreign investments on Treasury Bonds and Treasury Billsare not included.

ⁱⁱDebt Service Payments = Principal Payments + Interest Payments

ⁱⁱⁱIncludes the Debt Service Payments of International Bond Issues. US\$ estimations are based on the exchange rates as at 30th April 2014.
