# 2. BASIS OF PREPARATION

#### 2.1 Statement of Compliance

The financial statements which comprise the statement of comprehensive income, statement of financial position, statement of changes in equity and the statement of cash flows, together with the accounting policies and notes ("financial statements") have been prepared in accordance with new Sri Lanka Accounting Standards (SLFRS / LKAS) as laid down by the Institute of Chartered Accountants of Sri Lanka (ICASL) and the Financial Regulations formulated by Sri Lankan Government.

The financial statements were authorized for issue by the board of directors on the 28th February 2024. (Board decision number: 14606)

#### 2.2 Basis of Measurement

The Financial Statements have been prepared on the historical cost basis.

No adjustments have been made for inflationary factors in the financial statements.

#### 2.3 Going Concern

Board of Directors have made an assessment of the SLADC's ability to continue as a going concern in the foreseeable future and they do not foresee a need for liquidation or cessation of Corporation's activities.

#### 2.4 Comparative Information

The presentation and classification of the financial statements of the previous years have been amended where relevant for better presentation and to be comparable with those of the current year.

# 2.5 Use of Estimates and Judgments

The preparation of Financial Statements in conformity with Sri Lanka Accounting Standards (SLFRS/LKAS) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities income and expenses.

Judgments and estimates are based on historical experience, trends and other factors including expectations that are believed to be reasonable under the circumstances. Accordingly, the actual results may differ from these judgments and estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis to ensure the validity of the same. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the Financial Statements are included in the following notes:

Note 16- Measurement of Defined Benefit Obligation. Note 17 - Deferred Taxation

## 2.6 Foreign Currency Transaction

# (a) Functional and Presentation Currency

Items included in these financial statements of the corporations are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The financial statements are presented in Sri Lanka Rupees (LKR), which is the Corporation's functional and presentation currency.

#### (b) Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

# 03. SIGNIFIACANT ACCOUNTING POLICIES.

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

# 3.1 Assets and the Bases of their Valuation

Assets classified as current assets in the Statement of Financial Position are cash, bank balances and those which are expected to be realized in cash during the normal operating cycle of the Corporation's business, or within one year from the reporting date, whichever is shorter. Assets other than current assets are those which the Corporation intends to hold beyond a period of one year from the reporting date.

## 3.1.1 Property, Plant and Equipment

# 3.1.1.1 Recognition and Measurement

The cost of an item of property, plant and equipment comprise its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use.

The cost of self-constructed assets includes the cost of materials, direct labour, and any other costs directly attributable to bringing the asset to the working condition for its intended use. This also includes cost of dismantling and removing the items and restoring the site on which they are located and borrowing costs on qualifying assets.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Carrying amounts of property plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposal of an item of property, plant and equipment are determined as different between the proceeds from disposal and the carrying amount of property, plant and equipment, and are recognized under other income in the statement of comprehensive income.

#### 3.1.1.2 Subsequent Costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Corporation and its cost can be measured reliably. The carrying amount of the replaced part is derecognized.

The costs of the day to day servicing of property, plant and equipment are recognised in profit or loss as incurred.

#### 3.1.1.3 Derecognition

The carrying amount of an item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses on derecognition are recognised within other income in profit & loss.

#### 3.1.1.4 Renovation cost of Anuradhapura building

Renovation cost of Anuradhapura building is recognized as expense through the period of 5years. (Property has been transferred to SLADC for the period of 5 years)

#### 3.1.1.5 Bad and doubtful debt

#### **Bad Debt**

Bad debt recognizes as an expense in the profit and loss account when certain that amount cannot be recovered

#### Doubtful debt

Doubtful debts provision made it outstanding balances remain more than previous five years.

#### 3.1.1.6 Borrowing Cost

Borrowing costs that are directly attributable to acquisition, construction or production of a qualifying asset, which takes a substantial period of time to get ready for its intended use

or sale, are capitalized as a part of the asset. The amounts of the borrowing costs which are eligible for capitalization are determined in accordance with the in LKAS 23 - Borrowing Costs.

Borrowing costs that are not capitalized are recognized as expenses in the period in which they are incurred and charged to the Statement of Comprehensive Income.

# 3.1.1.7 Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. Depreciation is recognized in profit or loss on a straight line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Corporation will obtain ownership by the end of the lease term. Land is not depreciated. There are no leased assets relating to this corporation.

Assets Category	Useful Life (Years)	Depreciation Rate ( % )
Building	20 Years	5%
Machinery	06.66 Years	15%
Water Supply Equipments	06.66 Years	15%
Laboratory Equipments	06.66 Years	15%
Office Equipments	10Years	10%
Motor Vehicles	05 Years	20%
Tools & Equipments	03 Years	33.33%

The estimated useful lives and rates of depreciation for the current and comparative periods are as follows:

Depreciation of an asset begins when it is available for use whereas depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale and the date that the asset is derecognized.

Depreciation method, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

# 3.1.1.8 Capital Work in Progress

Capital expenses incurred during the year which are not completed as at the reporting date are shown as Capital work - in - progress whilst, the capital assets which have been completed during the year and put to use have been transferred to Property, Plant and Equipment.

# 3.1.1.9 Financial Instruments - Initial Recognition and Subsequent Measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### **Financial Assets**

#### Initial Recognition and Measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, i.e., the date that the company commits to purchase or sell the asset.

#### Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon de-recognition (equity instruments)
- 4. Financial assets at fair value through profit or loss.

However, the classification of the financial assets of the company is limited to financial assets at amortized cost (debt instruments) and financial assets designated at FVOCI (equity instruments).

#### Financial Assets at Amortized Cost (Debt Instruments)

This category is the most relevant to the Company. The Company measures financial assets at amortized cost if both of the following conditions are met:

\*The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and

\*The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the Effective Interest Rate (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Company's financial assets at amortized cost includes trade and other receivables, cash and bank and loans granted to related parties.

# Financial Assets Designated at Fair Value through OCI (Equity Instruments)

Upon initial recognition, the company can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under LKAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognized as Finance income in the statement of profit or loss when the right of payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Company elected to classify irrevocably its listed equity investments under this category.

#### Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily de-recognized (i.e., removed from the Company's statement of financial position) when:

\*The rights to receive cash flows from the asset have expired, Or

"The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement and either

(a) The Company has transferred substantially all the risks and rewards of the asset, or (b)The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

#### Impairment of Financial Assets

The Company recognizes an allowance for Expected Credit Losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward looking factors specific to the debtors and the economic environment.

The company considers a financial asset in default when contractual payments are 365 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

#### **Financial Liabilities**

#### Initial Recognition and Measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, bank overdrafts, loans and borrowings, and other financial liabilities.

#### Subsequent Measurement

The measurement of financial liabilities depends on their classification, as described below:

#### Loans and Borrowings

This is the category most relevant to the company. After initial recognition, interestbearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit or loss.

#### Derecognition

Financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of Profit or Loss.

#### Offsetting of Financial Instruments

Financial assets and financial liabilities are offset if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

#### **Financial Risk Management**

#### Credit Risk

Credit risk is the risk of financial loss to the Corporation if a customer or counter party to a financial instrument fails to meet its contractual obligations, and arises principally from the Corporation's receivables from customers and related parties.

The Corporation establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables and investments.

#### Liquidity Risk

Liquidity risk is the risk that the Corporation will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Corporation's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Corporation's reputation.

# 3.1.1.10 Inventories

Inventories are measured at the lower of cost and net realizable value. Company did not value the stocks by using the NRV. Because company did not sell produces less than the market value during the year. The cost of inventories includes expenditure incurred in acquiring the inventories, Production or conversion cost and other costs incurred in bringing them to their exsiting location and condition. Company uses FIFO formula for value the raw materials and finished goods in the head office and Sales centers.

#### 3.1.1.11 Trade Receivables

The Corporation recognizes trade receivables as financial assets in its statement of financial position when, and only when, the Corporation has a contractual right to receive cash or another financial asset.

Trade receivables are amounts due from customers for commodities sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business) they are classified as current assets. If not, they are presented as non-current assets.

Trade receivable is carried at anticipated realizable value and estimates are made for doubtful receivable based on a review of all outstanding amounts at the yearend after considering outstanding period more than one year. Bad debts are written off during the year in which they are identified.

A provision for impairment of trade receivables is established when there is objective evidence that the Corporation will not be able to collect all amounts due according to the original terms of the contractual right.

#### 3.1.1.12 Cash & Cash Equivalents

Cash & Cash Equivalent are defined as cash in hand, demand deposits and short term highly liquid investments. For the purpose of Cash Flow Statement, Cash & Cash Equivalent consist of Cash in hand, deposits in banks & net of outstanding bank overdrafts.

#### 3.2 Liabilities and Provisions

Liabilities classified as current liabilities on the Statement of Financial Position are those which fall due for payment on demand or within one year from reporting date. Noncurrent liabilities are those balances that fall due for payment after one year from reporting date. All known liabilities have been accounted for in preparing these Financial Statements.

A provision is recognized if, as a result of a past event the Corporation has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefit will be required to settle the obligation.

All known provisions have been accounted for in preparing the financial statement.

#### 3.2.1 Contributions Received from General Treasury

The accumulated fund includes the total of all amounts received from Government in respect of the financing of Fixed Assets.

#### 3.2.2 Borrowings

Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the statement of comprehensive income over the period of the borrowings using the effective interest method. However, no borrowings as at the reporting date.

#### 3.2.3 Employee Benefits

#### (a) Defined Benefit Plan

Defined benefit plans define an amount of benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The Corporation has adopted a defined benefit plan as required under the Payment of Gratuity Act No. 12 of 1983 for all eligible employees.

The liability recognized in the statement of financial position in respect of defined benefit plans is the present value of the defined benefit obligation at the reporting date together with adjustments for unrecognized past service cost. The defined benefit obligation is calculated annually by the Company using the projected unit credit method prescribed in Sri Lanka Accounting Standard 19; Employees Benefits. The present value of the defined benefit obligation is determined by discounting the estimated future cash flows using the interest rates of Government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability.

Gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income in the period in which they arise.

Past service costs are recognized immediately in statement of comprehensive income, unless the changes to the plan are conditional on the employees remaining in service for a specific period of time (the vesting period). In this case, the past service costs are amortized on a straight-line basis over the vesting period.

Under the Payment of Gratuity Act No.12 of 1983, the liability to an employee arises only on completion of 5 years of continued service.

The key assumptions used in determining the Retirement Benefit Obligations are given in Note 13.

#### (a). I

Assumption related to calculation of retirement benefits Discount rate is 12% Staff turnover is 9.66% Salary increment rate is 2% Retirement age is 60 years

# (b) Defined Contribution Plan - EPF & ETF

All employees who are eligible for the Employee Provident Fund (EPF) and Employees Trust Fund (ETF) contribution are covered by relevant contribution fund in line with respective statutes and Regulation.

EPF & ETF covering the employees are recognized as expenses in the statement of comprehensive income in the period in which it is incurred.

# 3.2.4 Government Grants

Government grants are recognized where there is a reasonable assurance that the grant will be received and all attached conditions will be complied with. Where the grant relates to an asset, the grant is deducted in arriving the carrying amount of the asset. When the grants related to an expense item, it is recognized as income over the period necessary to match the grant on a systematic basis to the costs that are intended to compensate.

# 3.2.5 Trade Payables

The Corporation recognizes trade payables as financial liabilities in its statement of financial position when, and only when, the Corporation has a contractual obligation to deliver cash or another financial asset.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business) if longer, they are presented as non-current liabilities. Trade payables are recognized initially at fair value.

#### 3.2.6 Capital Commitments and Contingencies

Contingencies are possible assets or obligations that arise from a past event and would be confirmed only on the occurrence or non occurrence of uncertain future events, which are beyond the Company's control.

All material Capital Commitments and Contingent Liabilities are disclosed in Note 29.

#### 3.3 Statement of Comprehensive Income

For the purpose of presentation of the Statement of Comprehensive Income the directors are of the opinion that function of expenses method presents fairly the elements of the Company's performance, and hence such presentation method is adopted in line with the provisions of LKAS 1 – Presentation of Financial Statements.

#### 3.3.1 Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Corporation and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes. The following specific recognition criteria must also be met before revenue is recognized.

#### (a) Sale of goods

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods.

#### (b) Rendering of Services

Revenue of the rendering of services are recognized in the accounting period in which the services are rendered or performed.

#### (c) Interest Income

Interest income is recognized on effective interest method.

#### 3.3.2 Expenditure Recognition

# (a) Revenue Expenditure

Expenses are recognized in the statement of comprehensive income on the basis of a direct association between the cost incurred and the earning of specific items of income. All expenditure incurred in the running of the business and the maintaining the capital assets in the state of efficiency, has been charged to revenue in arriving at the profit or loss for the year.

### (b) Capital Expenditure

Expenditure incurred for the purpose of squaring, extending or improving Assets of a permanent nature by means of which to carry on the business or for the purpose of increasing capacity of the business has been treated as capital expenditure.

#### (c) Net Finance Income / Expenses

Finance income comprises interest income on funds invested and staff loans, and changes in the fair value of financial assets at fair value through profit or loss. Interest income is recognised as it accrues in profit or loss, using the effective interest method.

Finance costs comprise interest expense on borrowings, changes in the fair value of financial assets at fair value through profit or loss, impairment losses recognised on financial assets, borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

#### (d) Tax Expense

Income Tax expense comprises current and deferred tax. Income tax expense is recognized in Statement of Comprehensive Income except to the extent that it relates to items recognized directly in equity, when it is recognized in equity.

#### Current Taxes

Current tax expense for the current and comparative periods are measured at the amount paid or expected to be payable to the Commissioner General of Inland Revenue on taxable income for the respective year of assessment computed in accordance with the provisions of the Inland Revenue Act No 24 of 2017 as amended by subsequent legislation enacted or substantively enacted by the reporting date.

Component	2023
Tax Rate	30%
Current Tax Expenses	76,884,979

# **Deferred Taxation**

Deferred taxation is recognized using the Balance Sheet liability method, in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax assets and deferred tax liabilities are offset, if legally enforceable right exists to set off current tax assets against current tax liabilities and when the deferred taxes relate to the same taxable entity and the same taxation authority.

The relevant details are disclosed in the Note 18 & 30 to the Financial Statements.

#### 3.4 Related Party Transactions

Disclosure has been made in respect of the transactions in which one party has the ability to control or exercise significant influence over the financial and operating policies/ decisions of the other, irrespective of whether a price is being charged or not.

# Transactions with related entities

There are no any related entities of Sri Lanka Ayurvedic Drugs Corporation.

# 3.5 Statement of Cash Flows

Statement of cash flows has been prepared using "Indirect Method".

#### 3.6 Earnings per Share

The Company presents Basic Earnings per Share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

#### 3.7 Events after the Reporting Date

Events after the reporting date are events, favorable and unfavorable, that occur between the end of the reporting period and the date the financial statements were authorized for issue.

Those events have been considered and where necessary appropriate adjustments or disclosures have been made in the financial statements. There are no any events occurring after the reporting date that require adjustments to or disclosure in the Financial Statements.

#### 3.8 Responsibility for the Financial Statements

The Board of Directors of SLADC is responsible for the preparation and fair presentation of these Financial Statements in accordance with Sri Lanka Accounting Standards. This responsibility includes: designing, implementing and maintaining internal controls relevant to the presentation of financial statements that are free from material misstatements, whether due to fraud or error, selecting and applying appropriate

accounting policies and marking accounting estimates that are reasonable in the circumstances.

# 3.9 Related party Disclosers

The corporation stated transactions in the ordinary course of business with the parties who are defined as related parties in Sri Lanka Accounting Standard – LKAS 24(Related Party Disclosures), the details of which are as fallows.

The Corporation provides loans to employees at concessionary rates. These loans are fair valued at initial recognition using level 2 inputs. The fair value of the employee loans are determined by discounting expected future cash flows using market related rates for the similar loans.

The difference between the cost and fair value of employee loans is recognized as prepaid staff benefits. The employee loans are classified as loans and receivables and subsequently measured at amortized cost. The loans given to employees are secured and interest is charged at the following rates.

#### Liquidity Risk

Liquidity risk is the risk that the Corporation will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Corporation's approach to managing this risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities, when due, under normal or stressed conditions, without incurring unacceptable losses or damage to the corporation's reputation.

To measure and mitigate liquidity risk, the Corporation closely monitored its net operating cash flow, maintained a level of cash and cash equivalents and secured committed funding facilities from financial intuitions.
