# NOTES TO THE FINANCIAL STATEMENTS- 2024/2025

# 2.2 Assets and the basis of their valuation

# 221 Property, Plant and Equipment

# 222 Recognition and Measurement

The cost of an item of property, plant and equipment comprise its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use.

The cost of self-constructed assets includes the cost of materials, direct labor, and any other costs directly attributable to bringing the asset to the working condition for its intended use. This also includes cost of dismantling and removing the items and restoring the site on which they are located and borrowing costs on qualifying assets.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Carrying amounts of property plant and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Land and Buildings are accounted on the basis of revaluation done in 2024. Any increases in the carrying amount is recognized in other comprehensive income and accumulated in equity in the asset revaluation reserve. Decreases that offset previous increases of the same asset are charged against the revaluation reserve of equity. Land and buildings will be measured at fair value less accumulated depreciation on buildings and impairment charged subsequent to the date of the revaluation.

Plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment loss or at the revaluation whenever necessary. The revaluation has been done in 2024 and the values have been stated accordingly.

# 2.2.3 Subsequent Costs

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized.

The costs of the day to day servicing of property, plant and equipment are recognized in profit or loss as incurred.

#### NOTES TO THE FINANCIAL STATEMENTS-2024/2025

#### 2.2.4 De-recognition

The carrying amount of an item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses on de-recognition are recognized within other income in profit or loss.

## 2.2.5 Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is recognized in profit or loss on a straight line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives and rates of depreciation for the current and comparative periods are as follows:

Building	7.5%

## 2.2.10 Impairment of financial assets

#### Assets carried at amortized cost

The Company assesses at the end of each reporting period whether there is an objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, the probability that they will enter bankruptcy or other financial reorganization, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults. "For loans and receivables category, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate.

The carrying amount of the asset is reduced and the amount of the loss is recognized in the income statement."

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized (such as an improvement in the debtor's credit rating), the reversal of the previously recognized impairment loss is recognized in the statement of comprehensive income.

# SRI LANKA STATE TRADING (GENERAL) CORPORATION LTD NOTES TO THE FINANCIAL STATEMENTS- 2024/2025

# 2.2.11 Impairment of non-financial assets

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).
