**MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021**

1.1. CORPORATE INFORMATION

1.1.1 Legal and Domiciled Form

Milco (Private) Limited (The Company) is a limited liability company incorporated and domiciled in Sri Lanka.

The company was incorporated on 09th May, 1996 under the name 'Kiriya Milk Industries of Lanka (Private) Limited'. The name of the company was changed as 'Milco (Private) Limited' with effect from 23rd July 2001. As per the agreement entered into between the Government of Sri Lanka (GOSL) and the National Dairy Development Board of India (NDDB), all property, plant and equipment (other than land) owned and used by Milk Industries of Lanka Company Limited as at 03rd February, 1998 and leasehold rights of the land and buildings used by Milk Industries of Lanka (Private) Company Limited as at the same date were transferred to the Company with effect from 04th February, 1998. The value of Net Assets so transferred was Rs.306,500,020/-. Further, as per the letter dated 08th August, 2000 from Public Enterprises Reform Commission of Sri Lanka, annual lease rentals of leasehold land and buildings amounting to Rs. 20,427,900/- was waived off as per a cabinet decision.

The registered office of the company is located at No. 45, Nawala Road, Colombo 05 and the principal place of business is also at the same place. Major factories of the company are situated at Narahenpita, Ambewela, Digana, Polonnaruwa and construction of Badalgama factory was in progress as of 31st December 2021.

1.1.2 Principal Activities and Nature of Operations

During the year, the principal activities of the company were collecting, processing, packing, distributing and dealing in milk related products.

1.1.3 Date of Authorization to Issue

The financial statements for the year ended 31st December, 2021 were authorized for issue in accordance with a resolution of the Board of Directors on 12.02.2024.

1.1.4 Responsibility for Financial Statements

The board of directors are responsible for the preparation and presentation of these financial statements

1.2. Summary of Significant Accounting Policies

1.2.1 General Accounting Policies

1.2.1.1 Basis of Preparation of Financial Statements

The financial statements have been prepared in accordance with Sri Lanka Accounting Standards (SLFRS / LKAS) as issued by the Institute of Chartered Accountants of Sri Lanka

1.2.1.2 Basis of Measurement

The financial statements have been prepared under the historical cost convention basis with the exception of certain assets and liabilities at fair value or any other basis, as it may require or prescribe by specific SLFRS / LKAS.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

1.2.1.3 Functional and Presentation Currency

Items included in the financial statements are measured using the currency of primary economic environment in which the entity operates (the functional currency). The financial statements are presented in Sri Lanka Rupees, which is the company's functional and presentation currency.

1.2.1.4 Statement of Compliance

The statement of financial position, statement of comprehensive income, changes in equity and cash flows, together with accounting policies and notes ("financial statements") of the company as at 31st December, 2021 are prepared in compliance with the Sri Lanka Accounting Standards (LKAS and SLFRS) issued by the Institute of Chartered Accountants of Sri Lanka.

1.2.1.5 Going Concern

The Directors of the company have made an assessment of the company's ability to continue as a going concern and are satisfied that the company has the resources to continue in business for a foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the company's ability to continue as a going concern. Therefore, the financial statements are continued to be prepared on the going concern basis.

1.2.1.6 Comparative Information

The accounting policies have been consistently applied by the company and are consistent with those of the previous year. The previous year's figures and phrases have been re-arranged wherever necessary to conform to the current year's presentation/classification.

1.2.1.7 Foreign Currency Transaction

All foreign exchange transactions are converted to Sri Lanka Rupees, which is the reporting currency, at the rates of exchange prevailing at the time the transactions were effected.

Monetary assets and liabilities denominated in foreign currencies are translated to Sri Lanka Rupee equivalents using year end spot foreign exchange rates, the resulting gains or losses are accounted in the statement of comprehensive income.

Non-monetary assets and liabilities are translated using the exchange rates that existed when the values were determined. The resulting gain or loss is accounted in the statement of comprehensive income.

1.2.1.8 Materiality and Aggregation

Each material class of similar items is presented separately in the financial statements. Items of dissimilar nature or function are presented separately unless they are immaterial.

1.2.1.9 Critical Accounting Estimates and Judgements

a) Judgements

In the process of applying the accounting policies, the management has made the judgements, apart from those involving estimations, which have the most significant effect on the amounts recognized in the financial statements.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

b) Estimates and Assumptions

The preparation of the company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities and the disclosure of contingent liabilities at reporting date.

The key assumptions concerning the future and other key sources of estimation uncertainty at the date of financial position, that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year, have been considered.

1.3 Assets and Bases of their Valuation

1.3.1 Property, Plant and Equipment

a) Measurement

All items of property, plant and equipment are initially recorded at cost. Where items of property, plant and equipment are subsequently revalued, the entire class of such assets is revalued.

Property, plant and equipment are stated at cost, excluding the cost of day to day servicing, less accumulated depreciation and accumulated impairment in value. Such cost includes the cost of replacing part of the property, plant and equipment when that cost is incurred, if the recognition criteria are met. When significant parts of property, plant and equipment are required to be replaced at intervals, the company recognizes such parts as individual assets with specific useful lives and depreciates them accordingly.

When a major inspection is performed, its cost is recognized in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognized in profit or loss as incurred.

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of comprehensive income in the year the asset is de-recognized.

b) Useful Lives of Property, Plant and Equipment

The company reviews the assets' residual values, useful lives and methods of depreciation at each reporting date; judgement made by the management based on the professional experts is exercised in the estimation of these values, rates and methods.

c) Depreciation

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Assets held under finance lease are amortized over the shorter of the lease term or the useful lives of equivalent owned assets.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

The economic useful lives are as follows:

Buildings	20 to 25 years
Plant and Machinery	04 to 30 years
Furniture and Fittings	05 years
Laboratory Equipment	05 years
Motor Vehicles	04 years
Tools and Equipment	05 years
Office Equipment	05 years
Bottles and Crates	04 years
Computers	04 years
Bottle Coolers	04 years
Software	03 years
Milk Cans	05 years

Depreciation of assets begins when it is available for use and ceases at the earlier of the date that the asset is classified as held for sale and the date that the asset is de-recognized.

d) Restoration Costs

Expenditure incurred on repairs or maintenance of property, plant and equipment in order to restore or maintain the future economic benefits expected from originally assessed standard of performance is recognized as an expense when incurred.

e) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective assets. All other borrowing costs are recognised as expenses in the period in which they are incurred.

f) De- Recognition

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is calculated as the difference between the net disposal proceeds and the carrying amount and is recognized in the statement of comprehensive income.

1.3.2 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life is reviewed at least at each financial year-end.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the Statement of Profit or Loss and Other Comprehensive Income in the expense category consistent with the function of the intangible asset.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

1.3.3 Right-of-use assets recognised under SLFRS 16

a) Right-of-use assets

The company recognises right-of-use assets when the underlying asset is available for use. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred and lease payments made at or before the commencement date less any lease incentives received. Unless the Group is reasonably certain to obtain the ownership of the leased asset at the end of the lease term, the recognised right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life or the lease term. Right-of-use assets are subject to impairment.

Any excess of sales proceeds over the carrying amount of assets in respect of a sale and leaseback transaction that results in a finance lease is deferred and amortised over the lease term

b) Short-term leases and low value assets

The Group applies the short-term lease recognition exemption to leases that have a lease term of 12 months or less from the commencement date. It also applies the lease of low value assets recognition exemption lease payment on short-term leases and leases of low value assets are recognised as expense on a straight line basis over the lease term.

1.3.4 Impairment of Non-Financial Assets

The company assesses at each reporting date to ascertain whether there is an indication that an asset may be impaired. If such indication exists or when annual impairment testing for an asset is required the company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash generating unit's fair value less costs to sell and its value in use and determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or a group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessment of the time value of money and the risk specific to the asset.

Impairment losses of continuing operations are recognized in the statement of comprehensive income in those expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date to verify as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the company makes an estimate of the recoverable amount.

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the assets' recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. The increased amount cannot "exceed" the carrying amount that would have been determined, net of depreciation had, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of comprehensive income.

1.3.5 Capital Work-in-Progress

Capital work-in-progress is transferred to the respective asset accounts at the time of the first utilization of the asset.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

1.3.6 Financial Assets

The company classifies its financial assets in the following categories: Financial Assets at fair value through profit or loss, Loans and receivables, financial assets available for sale and Held-to-maturity financial assets. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition and re-evaluates this designation at every reporting date.

1.3.6.1 Initial Recognition and Measurement

The company determines the classification of its financial assets at initial recognition. All financial assets are recognized initially at fair value plus, in the case of assets not at fair value through profit or loss, directly attributable transaction costs.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the company commits to purchase or sell the asset.

The company's financial assets include cash, investments in fixed deposits and trade and other receivables.

1.3.6.2 Subsequent Measurement

The subsequent measurement of financial assets depends on their classification as follows:

(a) Financial Assets at Fair Value Through Profit or Loss

Financial assets at fair value through profit or loss include financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or re-purchasing in the near term.

(b) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate method (EIR), less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of comprehensive income.

(c) Held-to-Maturity Investments

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity when the company has the positive intention and ability to hold them to maturity. After initial measurement, held-to-maturity investments are measured at amortized cost using the effective interest rate (EIR) method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of comprehensive income. The losses arising from impairment are recognized in the statement of comprehensive income in finance costs.

(d) Available-for-Sale Financial Investments

Available-for-sale financial investments include equity and debt securities. Equity investments classified as available-for-sale are those, which are neither classified as held for trading nor designated at fair value through profit or loss. Debt securities in this category are those which are intended to be held for an indefinite period of time and which may be sold in response to needs for liquidity or in response to changes in the market conditions.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

After initial measurement, available for sale financial investments are subsequently measured at fair value.

Unrealized gains and losses are recognized directly in equity (Other comprehensive income) in the 'Available for sale reserve'. When the investment is disposed of, the cumulative gain or loss previously recognized in equity is recognized in the statement of comprehensive income in 'Other operating income'. Where the company holds more than one investment in the same security, they are deemed to be disposed of on a first-in first-out basis. Interest earned whilst holding available for sale financial investments is reported as interest income using the EIR. Dividends earned whilst holding available for sale financial investments are recognized in the statement of comprehensive income as 'Other operating income' when the right of the payment has been established. The losses arising from impairment of such investments are recognized in the statement of comprehensive income in 'Impairment losses on financial investments' and removed from the 'Available for sale reserve'.

(d) Available-for-Sale Financial Investments

The company evaluates its available-for-sale financial assets to determine whether the ability and intention to sell them in the near term is still appropriate. When the company is unable to trade these financial assets due to inactive markets and management's intention to do so significantly changes in the foreseeable future, the company may elect to re-classify these financial assets in rare circumstances. Re-classification to loans and receivables is permitted when the financial assets meet the definition of loans and receivables and the company has the intent and ability to hold these assets into a foreseeable future or until maturity. Re-classification to the held-to-maturity category is permitted only when the entity has the ability and intention to hold the financial assets accordingly.

For a financial asset to be re-classified out of the available-for-sale category, any previous gain or loss on that asset that has been recognized in equity is amortized to profit or loss over the remaining life of the investment using the EIR. Any difference between the new amortized cost and the expected cash flows is also amortized over the remaining life of the asset using the EIR. If the asset is subsequently determined to be impaired, then the amount recorded in equity is re-classified to the statement of comprehensive income.

1.3.6.3 De-Recognition

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is de-recognized when:

- (a) The rights to receive cash flows from the asset have expired
- (b) The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either

The company has transferred substantially all the risks and rewards of the asset, or the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the company has transferred its rights to receive cash flows from an asset or has entered into a 'pass-through' arrangement, and has neither transferred nor retained substantially all of the risks and rewards of the asset nor transferred control of it, the asset is recognized to the extent of the company's continuing involvement in it.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

In that case, the company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

1.3.6.4 Impairment of Financial Assets

The company assesses at each reporting date to ascertain whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors are experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganizations where observable data indicates that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial Assets Carried at Amortized Cost

For financial assets carried at amortized cost, the company first assesses to determine whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the statement of comprehensive income. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income in the statement of comprehensive income. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collaterals have been realized or has been transferred to the company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to finance costs in the statement of comprehensive income.

Available-for-Sale Financial Assets

For available-for-sale financial assets, the company assesses at each reporting date to verify whether there is objective evidence that an investment or a group of investments is impaired. In the case of equity investments classified as available-for-sale, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. Where there is evidence of impairment, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the statement of comprehensive income - is removed from other comprehensive income and recognized in the statement of comprehensive income. Impairment losses on equity investments are not reversed through the statement of comprehensive income; increases in their fair value after impairments are recognized directly in other comprehensive income.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortized cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortized cost and the current fair value, less any impairment loss on that investment previously recognized in the statement of comprehensive income.

Future interest income continues to be accrued based on the reduced carrying amount of the asset, using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the statement of comprehensive income, the impairment loss is reversed through the statement of comprehensive income.

1.3.7 Financial Liabilities

The company classifies its financial liabilities as financial liabilities at fair value through profit or loss or other financial liabilities, as appropriate. At the reporting date there were no financial liabilities at fair value through profit or loss.

1.3.7.1 Initial Recognition and Measurement

All financial liabilities are recognized initially at fair value. This includes directly attributable transaction costs. The company's financial liabilities include loans and borrowings, trade and other payables and bank overdrafts.

1.3.7.2 Subsequent Measurement

The measurement of financial liabilities depends on their classification as follows:

(a) Financial Liabilities at Fair Value Through Profit or Loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term.

(b) Other Financial Liabilities

After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the statement of comprehensive income when the liabilities are de-recognized as well as through the effective interest rate method (EIR) amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance costs in the statement of comprehensive income.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

1.3.7.3 De-Recognition

A financial liability is de-recognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the statement of comprehensive income.

1.3.7.4 Off-setting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

1.3.8 Inventories

Inventories are measured at the lower of cost and net realizable value, after making due allowances for obsolete and slow-moving items. Net realizable value is the price at which inventories can be sold in the ordinary course of business less the estimated cost of completion and estimated cost necessary to make the sale.

The cost incurred in bringing inventories to its present location and condition is accounted using the following cost formula:

- Raw Material - At cost determined on Weighted Average Basis,
- Finished Goods - At the cost of direct materials, direct labour and appropriate proportion of fixed production overheads at normal operating capacity,
- Work-In-Progress - At the cost of input materials,
- Packing Material - At cost determined on Weighted Average Basis,
- Other Stocks - At cost determined on Weighted Average Basis,
- Goods In Transit - At actual cost.

1.3.9 Trade and Other Receivables

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment.

Other receivables are recognized at the amounts they are estimated to realize net of provisions for impairment. The amount of the provision is recognized in the statement of comprehensive income. However, staff loans have not been measured at amortized cost due to unavoidable reasons of the company.

1.3.10 Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held as call deposits with banks, other short-term highly liquid investments with original maturities of three months. Bank overdrafts are shown within current liabilities in the statement of financial position.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

1.3.11 Stated Capital

(a) Classification

Ordinary shares with discretionary dividends are classified as equity when there is no obligation to transfer cash or other assets.

(b) Dividends

Dividends are recognized when the shareholders' right to receive the dividend is established. In the case of interim dividends to equity shareholders, this is when declared by the directors. In the case of final dividends, this is when approved by the shareholders at the Annual General Meeting.

1.3.12 Current and Deferred Income Tax

a) Current Taxes

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from, or paid to the Commissioner General of Inland Revenue.

The provision for income tax is based on the elements of income and expenditure as reported in the financial statements and computed in accordance with the provision of the Inland Revenue Act No. 10 of 2006.

b) Deferred Taxation

Deferred tax is provided using the liability method on temporary differences at the date of the financial position between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes.

Deferred tax assets and liabilities recognized for all temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry-forward of unused tax credits and unused losses can be utilized.

The carrying amount of deferred tax assets is reviewed at each date of the statement of financial position and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are re-assessed at each date of the statement of financial position and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the date of the statement of financial position.

Income tax relating to items recognized directly in equity is recognized in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

MILCO (PRIVATE) LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31ST DECEMBER, 2021

1.3.13 Employee Benefits

(a) Defined Benefit Plans – Gratuity

Provision has been made for retirement gratuities, in conformity with LKAS 19 / Gratuity Act No.12 of 1983. The liability is not externally funded. The gratuity liabilities are based on actuarial valuation carried out. The actuarial gains and losses are charged or credited to the statement of other comprehensive income in the period in which they arise.

The retirement benefit obligation of the company is based on the actuarial valuation carried out by Messrs. Actuarial & Management Consultants (Pvt) Ltd. The actuarial valuations involve making assumptions about discount rates and future salary increases. The complexity of the valuation, the underlying assumptions and its long term nature, a defined benefit obligation are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. Details of the key assumptions used in the estimates contain in note no 16. The main assumptions used relate to mortality, disability rates and withdrawal rates. The assumptions regarding the discount rate and salary rate are of critical importance in determining the pace of providing for a final salary retirement scheme.

(b) Defined Contribution Plans – Employees' Provident Fund and Employees' Trust Fund

Employees are eligible for Employees' Provident Fund Contributions and Employees' Trust Fund Contributions in line with respective statutes and regulations. The company contributes 12% and 3% of the gross emoluments of employees to the Employees' Provident Fund and to the Employees' Trust Fund respectively.

1.3.14 Grants and Subsidies

Grants and subsidies are credited to the statement of comprehensive income over the period necessary to match them with related cost, which are intended to compensate on a systematic basis.

Grants related to assets, including non-monetary grants at fair value, are deferred in the statement of financial position and credited to the statement of comprehensive income over the useful life of the related asset.

Grants related to income are recognized in the statement of comprehensive income in the period in which they are receivable.

1.3.15 Trade and Other Payables

Trade payables are obligations to pay for services that have been acquired in the ordinary course of business. These are classified as current liabilities where payment is due within one year or less if not, they are presented as non-current liabilities.

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method. Short-term payables with no stated interest rate are measured at original invoiced amount since the effect of discounting is immaterial.

1.3.16 Provisions

Provisions are recognized when the company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement are determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

1.3.17 Commitments

All material commitments as at the reporting date have been identified and disclosed in the notes to the financial statements.

1.3.18 Related Party Transactions

Disclosure is made in respect of the transaction in which one party has the ability to control or exercise significant influence over the financial and operating policies/decisions of the other, irrespective of whether a price is charged. Relationship between parent and subsidiaries shall be disclosed irrespective of whether there have been transactions between those related parties.

1.3.19 Revenue Recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when the control of the goods or services is transferred to the customer at an amount that reflect consideration to which the Company expects to be entitled in exchange for those goods or services.

(a) Goods transferred at a point of time

Under SLFRS 15, revenue is recognised upon satisfaction of a performance obligation. The revenue recognition occurs at a point of time when the control of the asset is transferred to the customer, generally, on delivery of the goods.

(b) Service transferred over time

Under SLFRS 15, the company determines, at the contract inception, whether it satisfies the performance obligation over time or at a point of time. For each performance obligation satisfied over time, the company recognises the revenue over time by measuring the progress towards the complete satisfaction of that performance obligation.

(c) Interest Income

Interest income is recognized using the effective interest method.

(d) Dividend Income

Dividend income is recognized when the right to receive payment is established.

(e) Other Income

Other income is recognized on accrual basis.

1.3.20 Expenditure

The expenditures are recognized on an accrual basis. All expenses incurred in the ordinary course of business and in maintaining property, plant and equipment in a state of efficiency are charged against income in arriving at the profit for the year.

For the purpose of presentation of the statement of comprehensive income information, expense by function method is used to classify the expenses.
